If during the fiscal year [1947] *1948* or [1948] *1949* functions are transferred by the Federal Security Administrator from or between any of the offices or bureaus of the Social Security Administration, the Administrator may transfer from or between the amounts herein made available for salaries *and expenses* for the Social Security Administration the sums necessary for [personal services] *expenses* in connection with the functions so transferred.

Not to exceed 5 per centum of any of the amounts herein made available for salaries *and expenses* for the Social Security Administration may, subject to the approval of the Bureau of the Budget, be transferred by the Administrator to any other of such amounts, but no amount may be increased more than 5 per centum thereby.

None of the moneys appropriated by this Act to the Social Security Administration or to the Children's Bureau for grants-in-aid of State agencies to cover, in whole or in part, the cost of operation of said agencies, including the salaries and expenses of officers and employees of said agencies, shall be withheld from the said agencies of any States which have established by legislative enactment and have in operation a merit system and classification and compensation plan covering the selection, tenure in office, and compensation of their employees, because of any disapproval of their personnel or the manner of their selection by the agencies of the said States, or the rates of pay of said officers or employees.

[The amounts herein made available for salaries or expenses of the Social Security Administration shall be available for a health service program for the employees thereof as authorized by the Act of August 8, 1946 (Public Law 658).]

Grants to States, fiscal year [1949] *1950*: For making, after May 31, [1948] *1949*, payments to States under titles I, III, IV, V, and X, respectively, of the Social Security Act, as amended, for the first quarter of the fiscal year [1949] *1950*, such sums as may be necessary, the obligations incurred and the expenditures made thereunder for payments under each of such titles to be charged to the appropriation therefor for the fiscal year [1949] *1950*.

In the administration of titles I, IV, V, and X, respectively, of the Social Security Act, as amended, payments to a State under any of such titles for any quarter in the period beginning April 1, [1947] *1948*, and ending June 30, [1948] *1949*, may be made with respect to a State plan approved under such title prior to or during such period, but no such payment shall be made with respect to any plan for any quarter prior to the quarter in which such plan was submitted for approval. by law (5 U. S. C. 150) (except for the health service program for employees of the Public Health Service at the seat of government as specifically provided for elsewhere in this title), and such amounts as may be necessary may be transferred to the appropriations of the organizational units operating such programs.

SEC. 206. In order that the Administrator may effectuate reorganization plans submitted and approved pursuant to the Reorganization Acts of 1939 and 1945 he may transfer to the foregoing appropriations under this title from funds available for administrative expenses of the constituent units of the Federal Security Agency such sums as represent a consolidation in the Office of the Administrator of any of the administrative functions of said constituent units: *Provided*, That no such transfer of funds shall be made unless the consolidation of administrative functions will result in a reduction of administrative salary and other expenses and such reduction is accompanied by savings in funds appropriated to the Federal Security Agency which savings shall not be expended for any other purpose but shall be impounded and returned to the Treasury.

[The Secretary of the Treasury is authorized to transfer to the constituent organizations of the Federal Security Agency from appropriations for travel expenses and printing and binding, Federal Security Agency, such amounts as the Administrator may request; amounts so transferred shall be set up on the books of the Treasury under suitable titles and shall be available for the same purposes and subject to the same limitations as the appropriations from which transferred: *Provided*, That balances of any amounts so transferred, or any part of such balances shall, upon request of the Administrator, be retransferred to the appropriations for travel expenses and printing and binding, Federal Security Agency.] (*Labor-Federal Security Appropriation Act, 1948.*)

GENERAL PROVISIONS

SEC. 601. No part of any appropriation contained in this Act shall be used to pay the salary or wages of any person who engages in a strike against the Government of the United States or who is a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or who advocates, or is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: *Provided*, That for the purposes hereof an affidavit shall be considered prima facie evidence that the person making the affidavit has not contrary to the provisions of this section engaged in a strike against the Government of the United States, is not a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or that such person does not advocate, and is not a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: *Provided further*, That any person who engages in a strike against the Government of the United States or who is a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or who advocates, or who is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence and accepts employment the salary or wages for which are paid from any appropriation contained in this Act shall be guilty of a felony and, upon conviction, shall be fined not more than $1,000 or imprisoned for not more than one year, or both: *Provided further*, That the above penalty clause shall be in addition to, and not in substitution for, any other provisions of existing law. EXPLANATORY STATEMENT

The Federal Works Agency deals with public works not incidental to the normal work of other executive establishments and administers Federal grants or loans to State and local governments or to other agencies for the planning and construction of public works.

Under the general supervision and coordination of the Federal Works Administrator, the Federal Works Agency handles public works through three constituent units: the Public Buildings Administration, the Public Roads Administration, and the Bureau of Community Facilities.

Estimates for the fiscal year 1949 reflect little change except in the postwar highway program. The total estimates of appropriation for 1949 are approximately $193,000,000 more than appropriations for 1948.

OFFICE OF THE ADMINISTRATOR

The Office of the Administrator performs the general supervision, policy direction, and coordination of the administration of all of the activities of the Agency.

Provision is made for assisting the Administrator in the performance of these objectives by a small technical staff which covers each of the important programs and administrative functions at the staff level, and develops, establishes, and assures uniformity of policies and procedures throughout the Agency. The estimate for 1949 reflects no functional changes from 1948.

PUBLIC BUILDINGS ADMINISTRATION

This constituent bureau performs functions related to Federal public buildings and sites in respect to design and construction; lease, purchase, and custody; survey, planning, and control of space; repair, preservation, maintenance, and management; communication services (for various Government agencies); and the administration of surplus real property.

Section 5 of the act of June 14, 1946 (40 U. S. C. 294), authorizes the Commissioner of Public Buildings to maintain a survey of the use of certain Government-owned and leased office space in the larger metropolitan centers and the District of Columbia and to study and determine the extent to which consolidation, reassignment, and reallocation of office space would be advantageous to the Gov-

ernment. The Commissioner is also authorized to direct and prescribe the economical use or the surrender of space found to be uneconomically used in buildings operated by the Public Buildings Administration.

The appropriation for general administrative expenses provides the minimum nucleus personnel for performing the functions summarized in the first paragraph. The increase in the estimate for 1949 will be required to cover the cost of within-grade salary advancements.

The appropriation for repair, preservation, and equipment of public buildings outside the District of Columbia, involving some 5,000 buildings, provides for normal major items of alteration and repair necessary to keep buildings in usable and efficient operating condition and for accomplishing a portion of the extensive backlog of building maintenance which was deferred because of the war.

The appropriation for salaries and expenses for public buildings and grounds in the District of Columbia and adjacent area provides for the administration, management, operation, maintenance, protection, repair, and improvement of public buildings and grounds in the District of Columbia and the area adjacent thereto. The operation includes both Government-owned and leased buildings and also provides for the management and operation of communications facilities for use of other Government activities. The estimate contemplates the management of 37,674,600 gross square feet of Government-owned space and 2,370,200 net square feet of leased space under direct appropriations.

The appropriation for salaries and expenses for public buildings and grounds outside the District of Columbia provides for the administration, management, operation, maintenance, and protection of public buildings and grounds outside the District of Columbia. The operation includes both Government-owned and leased buildings and, in addition, provides for the management and operation of communications facilities and space and related service activities serving other governmental agencies. The estimate contemplates the management of 18,589,300 gross square feet of Government-owned space and 5,713,300 net square feet of leased space under direct appropriations.

Funds were appropriated for the 1948 fiscal year for the acquisition of sites, the preparation of drawings and specifications, and other preconstruction work incident to the establishment of a hospital center in the District of Columbia and the National Institute of Mental Health at Bethesda, Md. Estimates of appropriation and contract authority are included for the fiscal year 1949 for the construction of the hospital center upon completion of drawings and specifications. The estimate for the 1949 fiscal year for the National Institute of Mental Health has been consolidated with the estimate for cancer research activities in the Federal Security Agency chapter of the Budget under the heading "Construction of research facilities." The only other construction estimate included for 1949 would provide for the establishment of a geophysical institute in Alaska.

PUBLIC ROADS ADMINISTRATION

This constituent bureau, in cooperation with the highway departments of the States, the District of Columbia, Hawaii, and Puerto Rico, is responsible for the approval and designation of highway systems and for the approval and supervision of programs of construction designed to develop and improve such systems. The postwar highway program is proceeding at a slower rate than that authorized by the Congress. The volume of Federal-aid highway construction in the various States is being limited by the capacity of the available contracting organizations and the availability of labor, equipment, and supplies. Priority is given to most urgently needed improvements, but unreasonably high bids are rejected.

Estimates of appropriations for the Federal-aid highway programs supervised by the Public Roads Administration represent cash required under the authority of previously approved contract authorizations to reimburse the States for the Federal share of the cost of work that is accomplished. With the exception of small balances of prewar authorizations, the Federal-aid program is being financed from funds authorized by the Federal-aid Highway Act of 1944. This act authorized for appropriation the sum of $500,000,000 annually for each of the three successive postwar fiscal years. By House Concurrent Resolution 81, approved by the Congress October 2, 1945, the fiscal year 1946 was designated the first postwar fiscal year. The apportionment of the first postwar fiscal year authorization of $500,000,000 was made January 6, 1945. The apportionments for fiscal years 1947 and 1948 were made May 13, 1946, and May 12, 1947, respectively. The authorization for each fiscal year is apportioned among the States for three classes of highways, as follows:

(1) $225,000,000 for projects on the Federal-aid highway system.

(2) $150,000,000 for projects on a designated system of secondary and feeder roads, including farm-to-market roads, rural free delivery mail, and public-school bus routes.

(3) $125,000,000 for projects on the Federal-aid highway system in urban areas.

The estimate of $452,288,854 provides for the anticipated cash requirements for the fiscal year 1949. This estimate exceeds the 1948 appropriation by $204,577,708 and reflects an acceleration of the program. This estimate, together with prior appropriations, leaves $625,000,000 to be appropriated in subsequent years under the authorization made in the Highway Act of 1944.

Prewar Federal-aid authorizations have been fully appropriated except for elimination of grade crossings. An estimate of $7,300,000 is included for this appropriation item, leaving a balance of $10,000,000 to be appropriated in subsequent years.

The active Federal-aid program, as of November 1, 1947, provides for the improvement of 39,050 miles of highway, the construction of 436 highway-railroad grade separations, and the protection of 881 highway-railway crossings. The estimated total cost of this work is $1,762,727,000, of which $904,326,000 is the Federal share. These totals include programed projects for which plans were not yet approved, amounting to $707,589,000 in total cost and $370,302,000 in Federal funds.

In addition to the estimates for the Federal-aid highway program, the budget submission includes an estimate of $1,000,000 to provide for the continued construction of laboratory buildings at Langley, Va., for use in highway physical research.

The highway activities of the Public Roads Administration, in addition to the Federal-aid highway program, include cooperation with other Federal agencies in the design and construction of main roads in national forests and in and to the national parks, cooperation with the Central American Republics in the design and construction of the Inter-American Highway, and cooperation with the State Department and Philippine Republic in the rehabilitation and restoration of highways and

bridges in the Philippine Islands destroyed or damaged during the war.

BUREAU OF COMMUNITY FACILITIES

This constituent bureau administers programs assigned to the Agency in the field of public works which are not under the jurisdiction of the other two constituent units.

Currently assigned to this organization are the final payment and repayment incident to a program involving some 7,000 repayable advances of Federal funds to non-Federal public bodies for preparation of plans for locally financed public works; construction of public works in the Virgin Islands under an authorized 5-year program; completion and settlement of the affairs of the war-related community facilities program, including maintenance and disposal of over 700 Federal properties constructed or acquired under that program; assistance, until June 30, 1948, in the maintenance and operation of certain school facilities; provision of educational facilities, including equipment, etc., other than housing, from Federal surpluses, to assist educational institutions furnishing courses of training or education to veterans; loan or transfer of surplus Federal personal property to aid State and local governments to alleviate damage caused by flood or other catastrophe; and grants for the restoration of public works in the Territory of Hawaii which were damaged by the seismic waves of April 1946.

The estimate of $1,300,000 for the fiscal year 1949 provides funds for the initiation or continuation of high priority projects under the Virgin Islands public works program. This estimate, together with appropriations heretofore made, provides for 53.5 percent of the $10,028,-420 program authorized for this purpose. It is proposed that all other activities of this bureau for the fiscal year 1949 will be financed from available balances of prior-year appropriations or reappropriations.

Under the appropriations for salaries and expenses, public buildings and grounds in and outside the District of Columbia, per diem employees may be paid at rates approved by the Commissioner of Public Buildings not exceeding current rates for similar services in the place where such services are employed, and such employees in emergencies may be entered on duty subject to confirmation by the Federal Works Administrator.

The appropriations for salaries and expenses, public buildings and grounds in and outside the District of Columbia, shall be available for printing and binding and for communication services serving one or more governmental activities, and for services to motor vehicles, and where such services, together with quarters, maintenance, or other services, are furnished on a reimbursable basis to any governmental activity, such activity shall make payment therefor promptly by check upon the request of the Public Buildings Administration, either in advance or after the service has been furnished, for deposit to the credit of the applicable appropriation, of all or part of the estimated or actual cost thereof, as the case may be, proper adjustment upon the basis of actual cost to be made for services paid for in advance.

Costs of maintenance, upkeep, and repair paid by Government corporations pursuant to section 306 of the Government Corporations Appropriation Act, 1948, shall be credited to the appropriations of the Public Buildings Administration bearing such costs.

Funds available to the Public Buildings Administration shall also be available for health service programs as authorized by law (5 U. S. C. 150). (Independent Offices Appropriation Act, 1948; Second Supplemental Appropriation Act, 1948.)

Return of Departmental Functions to the Seat of Government, Public Buildings Administration—

[Return of departmental functions to the seat of government: For all expenses, including personal services in the District of Columbia and travel and other expenses of the Public Buildings Administration incident thereto, necessary to provide for the transfer to the seat of government of such bureaus, offices, agencies, or activities of the Federal Government as are designated from time to time by the President, which were removed from, or established at places other than, the seat of government by reason of the national emergency, including the expenses of travel of employees transferred; transportation of immediate families of employees; the expenses of packing, crating, drayage, transportation, temporary storage, unpacking, and uncrating of household goods and personal effects, in accordance with regulations approved by the President; and the payment to employees of special allowances at $5 per day after arrival at destination for six days for employees, plus $2.50 per day additional for six days for each member of immediate families of employees; $900,000, to remain available until expended: *Provided*, That removal to the seat of government of Government-owned or leased furniture, equipment, supplies, and other property and household goods and personal effects of employees, and costs of restoration of leased office space when required, may be accomplished without regard to section 3709 of the Revised Statutes: *Provided further*, That such sums as may be determined by the Commissioner of Public Buildings to be necessary therefor may be transferred to other agencies concerned for the payment to the transferred employees of the allowances mentioned herein.] *(Independent Offices Appropriation Act, 1948.)*

NOTE: Pursuant to the provisions of sec. 306 of "The Government Corporations' Appropriation Act, 1948" (Public Law 268, 80th Cong.), title to all office buildings at the seat of government, owned by wholly owned Government Corporations, is transferred to the United States for management by the Public Buildings Administration, Federal Works Agency. The Secretary of the Treasury is authorized to reduce the indebtedness of the corporations to the Treasury in the amount of the valuation of these buildings. This authorized reduction in the corporations' indebtedness is effected by the cancellation of notes. The amounts entered in the schedule above are tentative estimates based on cost less depreciation and are not intended to influence the pending valuation of the buildings by the Secretary of the Treasury.

PUBLIC ROADS ADMINISTRATION—Continued

In carrying out the provisions of "An Act to provide that the United States shall aid the States in the construction of rural post roads, and for other purposes", as amended and supplemented (23 U. S. C. 1–117), none of the money appropriated for the work of the Public Roads Administration during the fiscal year 1949 shall be paid to any State on account of any project on which convict labor shall be employed, except this provision shall not apply to convict labor performed by convicts on parole or probation: Provided, That, during the fiscal year 1949, whenever performing authorized engineering or other services in connection with the survey, construction, and maintenance, or improvement of roads for other Government agencies, cooperating foreign countries and State cooperating agencies the charge for such services may include depreciation on engineering and road-building equipment used, and the amounts received on account of such charges shall be credited to the appropriation concerned: Provided further, That during the fiscal year 1949 the appropriations for the work of the Public Roads Administration shall be available for meeting the expenses of warehouse maintenance and the procurement, care, and handling of supplies, materials, and equipment stored therein for distribution to projects under the supervision of the Public Roads Administration, and for sale and for distribution to other Government activities, cooperating foreign countries and State cooperating agencies, the cost of such supplies and materials or the value of such equipment (including the cost of transportation and handling) to be reimbursed to appropriations current at the time additional supplies, materials, or equipment are procured, from the appropriation chargeable with the cost or value of such supplies, materials, or equipment: Provided further, That the appropriations available to the Public Roads Administration may be used in emergency for medical supplies and services and other assistance necessary for the immediate relief of employees engaged on hazardous work under that Administration, and (not exceeding $15,000) for temporary services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), but at rates for individuals not in excess of $50 per diem.

For all necessary expenses to enable the President to utilize the services of the Public Roads Administration in fulfilling the obligations of the United States under the Convention on the Pan-American Highway Between the United States and Other American Republics, signed at Buenos Aires, December 23, 1936, and proclaimed September 16, 1937 (51 Stat. 152), for the continuation of cooperation with several governments, members of the Pan American Union, in connection with the survey and construction of the Inter-American Highway as provided in public resolution, approved March 4, 1929 (Public Resolution 104), as amended or supplemented, and for performing engineering service in pan-American countries for and upon the request of any agency or governmental corporation of the United States, $100,000 to be derived from the administrative funds provided under the Act of July 11, 1916, as amended or supplemented (23 U. S. C. 21), or as otherwise provided. (23 U. S. C. 1–117 and 25 U. S. C. 318b—Federal Highway Act and miscellaneous highway legislation; the foregoing citations apply to all appropriation items under the Administration in addition to any legislative authority cited therein; Independent Offices Appropriation Act, 1948.)

[FEDERAL-AID HIGHWAY SYSTEM]

Federal-Aid Highway System, Public Roads Administration—

[For carrying out the provisions of "An Act to provide that the United States shall aid the States in the construction of rural post roads, and for other purposes", as amended (23 U. S. C. 1–117), including personal services in the District of Columbia, $10,288,854, to be immediately available and to remain available until expended, which sum is composed of $5,000,000, the remainder of the amount authorized to be appropriated for the fiscal year 1943 by section 1 of the Act approved September 5, 1940 (Public Law 780), and $3,171,950 and $2,116,904, the latter sums being for the reimbursement of the sums expended for the repair or reconstruction of highways and bridges which have been damaged or destroyed by floods, hurricanes, or landslides, as provided for by section 3 of the Act approved June 18, 1934 (Public Law 393), and by section 7 of the Act approved July 13, 1943 (Public Law 146): *Provided*, That none of the money herein appropriated shall be paid to any State on account of any project on which convict labor shall be employed, except this provision shall not apply to convict labor performed by convicts on parole or probation: *Provided further*, That, during the fiscal year 1948, whenever performing authorized engineering or other services in connection with the survey, construction, and maintenance, or improvement of roads for other Government agencies, cooperating foreign countries and State cooperating agencies the charge for such services may include depreciation on engineering and road-building equipment used, and the amounts received on account of such charges shall be credited to the appropriation concerned: *Provided further*, That during the fiscal year 1948 the appropriations for the work of the Public Roads Administration shall be available for meeting the expenses of warehouse maintenance and the procurement, care, and handling of supplies, materials, and equipment stored therein for distribution to projects under the supervision of the Public Roads Administration, and for sale and distribution to other Government activities, cooperating foreign countries and State cooperating agencies, the cost of such supplies and materials or the value of such equipment (including the cost of transportation and handling) to be reimbursed to appropriations current at the time additional supplies, materials, or equipment are procured, from the appropriation chargeable with the cost or value of such supplies, materials, or equipment: *Provided further*, That the appropriations available to the Public Roads Administration may be used in emergency for medical supplies and services and other assistance necessary for the immediate relief of employees engaged on hazardous work under that Administration, and (not exceeding $15,000) for temporary services as authorized by section 15 of the Act of August 2, 1946 (Public Law 600), but at rates for individuals not in excess of $35 (unless a higher rate, not exceeding $50, shall be approved by the Director of the Bureau of the Budget) per diem.]

[For all necessary expenses to enable the President to utilize the services of the Public Roads Administration in fulfilling the obligations of the United States under the Convention on the Pan-American Highway Between the United States and Other American Republics, signed at Buenos Aires, December 23, 1936, and proclaimed September 16, 1937 (51 Stat. 152), for the continuation of cooperation with several governments, members of the Pan American Union, in connection with the survey and construction of the Inter-American Highway as provided in public resolution, approved March 4, 1929 (Public Resolution 104), as amended or supplemented, and for performing engineering service in pan-American countries for and upon the request of any agency or governmental corporation of the United States, $100,000 to be derived from the administrative funds provided under the Act of July 11, 1916, as amended or supplemented (23 U. EXPLANATORY STATEMENT

FUNCTIONS OF THE DEPARTMENT

The Department of Agriculture is charged with the responsibility of carrying on agricultural activities and programs concerned with rural people and with production, processing, and distribution of food and fiber in the United States and its possessions, and for the relationship of such activities and programs to those of other countries.

The functions performed relate to agricultural research, education, marketing, regulatory work, conservation, and agricultural adjustment. Research is conducted in the fields of agricultural chemistry and engineering, plant and livestock breeding and production, manufacture and industrial uses of farm products, marketing, soils and soil conservation, entomology, home economics, and human nutrition. It makes research results available for practical farm application through extension and experiment station work in cooperation with the States. The Department provides crop reports, commodity standards, Federal meat inspection service, and other marketing services. It seeks to eradicate and control plant and animal diseases and pests. It administers more than 50 regulatory laws designed to protect the farmer and consuming public. It promotes the efficient use of soils and forests. It provides rural rehabilitation, and guarantees farmers a fair price and a stable market through commodity loans and marketing quotas. It also provides agricultural credit, assists tenants to become farm owners, and facilitates the electrification of rural areas.

THE 1949 BUDGET

Annual and permanent appropriation estimates for the fiscal year 1949, as presented in the summary table, indicate an apparent decrease of $4.8 million as compared with 1948. This comparison excludes from consideration appropriation rescissions of $40 million in 1948 and $91 million recommended for 1949, and an anticipated 1949 supplemental estimate for fighting forest fires. Including these rescissions and this supplemental, there is a net reduction of $50.7 million for 1949. Loan funds recommended for rural electrification, to be borrowed from the Treasury, have been increased from $225 million for 1948 to $300 million for 1949.

Major increases in appropriation items for 1949 are $6 million for flood control, $10 million for the Research and Marketing Act of 1946, $15 million for production and subsistence loans, and $17 million for payments to sugar producers as authorized by the Sugar Act of 1948. Major decreases are $78 million for conservation payments as provided by the 1948 appropriation act, $10 million for capital stock of the Federal Crop Insurance Corporation, and $5 million for meat inspection. The latter is now on a self-supporting basis through a system of meat-inspection fees paid by the packing industry.

OFFICE OF THE SECRETARY AND STAFF AGENCIES

The work of the Department is supervised and directed by the Secretary of Agriculture, who is assisted by an under secretary and an assistant secretary. The staff officers include the chief of the Bureau of Agricultural Economics, the director of finance, the director of foreign agricultural relations, the director of information, the director of personnel, the chief of the office of plant and operations, the solicitor, and the chief hearing examiner, each of whom heads an office which helps coordinate, facilitate, and provide staff services for the various activities of the Department. Also included under this head is the Office of the Administrator of the Research and Marketing Act of 1946. The Department library provides library facilities for the entire Department.

The 1949 estimates provide for an increase of $10 million for expanded research under the Research and Marketing Act, an increase of $262,000 to cover increased costs of the Department for penalty mail, and an increase of $250,000 for printing and binding farmers' bulletins and the results of research.

EXTENSION SERVICE

Extension work is conducted on a cooperative basis. The Department and the land-grant colleges in the 48 States, Alaska, Hawaii, and Puerto Rico agree on extension plans of work under which beyond-the-classroom

educational programs are carried on in rural communities. County agricultural, home-demonstration, and 4-H Club agents are located in nearly all of the agricultural counties of the United States. The county extension agents make available to farmers, farm homemakers, and rural youth the results of research conducted by the Department of Agriculture, the land-grant institutions, and other research agencies, adapted to local farm and home conditions. During the past year extension agents visited 2 million farms, distributed 18 million bulletins, made 47,000 radio talks, and cooperated with newspapers in releasing 725,000 educational news and advice stories. They conducted 800,000 method and result demonstrations on better farming and homemaking practices and held meetings which 52 million people attended. There are now 1,800,000 boys and girls participating in 74,500 4-H Clubs.

Federal funds available for payments to States and Territories in 1948, amounting to $27 million, will be matched by $31 million of State and local funds. Recognizing the serious economic and social problems of the rural people of Puerto Rico, an increase of $134,000 for extension work in 1949 has been provided to bring the total for Puerto Rico up to the full amount authorized by the Congress.

AGRICULTURAL RESEARCH ADMINISTRATION

The Agricultural Research Administration comprises the Bureaus of Agricultural and Industrial Chemistry; Animal Industry; Dairy Industry; Entomology and Plant Quarantine; Human Nutrition and Home Economics; and Plant Industry, Soils, and Agricultural Engineering; the Office of Experiment Stations; and the Agricultural Research Center at Beltsville, Md. The Office of the Administrator is responsible for the coordination of all research in the Department, other than economic research; for the administration of the special research fund; and for the general planning and coordination of the research and regulatory activities of all of the agencies in the Administration. In addition to its research activities, the Administration seeks to eradicate or control animal and plant diseases and insect pests through quarantine regulations and direct eradication measures. It also provides a Federal meat-inspection service to insure the wholesomeness of meat and meat food products.

Amazing results have been achieved by the breeding of animals and plants and use of growth-regulating chemicals. The story of hybrid corn sharply outlines the significance of the application of research findings in increasing farm production. Because of hybrid vigor and superior characteristics of hybrid corn, farmers harvested about 740 million extra bushels of corn in 1946. The application of 2-4-D weed killer to corn primarily in river-bottom fields resulted in an estimated extra 2.5 million bushels of corn, which represented about $5 million to the growers. This same chemical (2-4-D) and other growth-regulating chemicals were sprayed on practically all the pear crop and about a third of the apple crop, reducing dropping and partial loss of fruit. This represented an extra 6 million bushels of apples and 3 million bushels of pears. Sodium fluoride, a cheap, easily applied chemical, has been found to be highly effective in controlling roundworms in pigs. This alone has resulted in the marketing of considerably more pigs than formerly, when only about two-thirds of the pigs farrowed lived long enough to reach market. A new method of making cheddar cheese from pasteurized milk, now used by more than 50 percent of the industry, has resulted in savings estimated at from $2 to $3 million annually.

The 1949 estimates for the Agricultural Research Administration provide for continuation of its activities at approximately the 1948 level. The apparent reduction of about $10 million in appropriation estimates for 1949 is accounted for by the placing of the meat-inspection service on a fee basis, and by the provision for financing the eradication of foot-and-mouth disease in Mexico in 1949 entirely by a supplemental estimate to be submitted later.

CONTROL OF FOREST PESTS

Under this head are consolidated for 1949 the white pine blister rust control program, the gypsy moth and Dutch elm disease control activities, and other forest pest control programs now provided for under the new Forest Pest Control Act of 1947. The importance of controlling forest diseases and insects is indicated by the substantial timber losses caused by these pests, estimated at over $20 million annually. No change in the amount of funds is recommended in the 1949 estimates.

FOREST SERVICE

The Forest Service administers 152 national forests, comprising over 180 million acres in 40 States and Alaska and Puerto Rico. It improves them, protects them from fire, insects, and disease, and manages their resources for orderly and continuous service and for the maintenance of stable economic conditions in national forest communities. Technical methods of forestry are applied to the growing and harvesting of timber. Livestock grazing is regulated to obtain range conservation along with use of the annual growth of forage. Watersheds are managed for the regulation of streamflow; reduction of flood damage and soil erosion; and the protection of sources of water for power, irrigation, navigation, and municipal and domestic supply. Provision is made for popular outdoor recreation. Scientific management is applied to the development and maintenance of wildlife resources. In forest and range experiment stations and in the Forest Products Laboratory at Madison, Wis., the Forest Service conducts investigations in the entire field of forestry and wild-land management, including the growth, protection, and harvesting of timber, management of range lands, efficient utilization of forest products, and research in forest economics and taxation and forest influences. It is conducting a forest survey to determine the Nation's present and potential forest resources. The Forest Service cooperates with States and private owners of forest lands in the application of sound forest management practices and in the maintenance of organized protection of forest lands against fire.

The Forest Service took action to control 11,886 forest fires during 1946, of which 6,779 were man-caused. The total area burned over amounted to 247,000 acres. Recreation areas in the national forests were used by 8,750,000 people. In addition, other areas were used by 9.5 million people for hunting, fishing, vacationing, etc. Receipts from the sale of timber amounted to $15.4 million during fiscal year 1947; grazing fees amounted to $2,294,000; and other revenues amounted to $658,000.

The estimates for 1949 provide for a continuation of approximately the 1948 level of operations.

FLOOD CONTROL

This program consists of flood control activities on watersheds specifically authorized by the Congress. Preliminary surveys are conducted to determine the feasibility of watershed treatment for waterflow retardation and soil-erosion prevention in the interest of flood control. On the basis of these studies, control operations are authorized by Congress. Preliminary examinations and surveys have been authorized in over 600 watersheds. The Department has completed reports on 124 watersheds or portions thereof. The Congress has approved programs of watershed improvement work on 11 watersheds which call for a total estimated Federal cost of approximately $90 million. The cumulative Federal obligations through 1948 are estimated at about $8 million. Because the work has been progressing more slowly than originally contemplated, with a consequent further deterioration of the watersheds, provision is made for a $9 million level of operations during 1949.

SOIL CONSERVATION SERVICE

The soil conservation program is operating to bring about adjustments in land use that will conserve the soil, establish a permanent and balanced agriculture, reduce the hazards of floods and sedimentation, and better human welfare. In cooperation with soil conservation districts and other Federal and State agencies, the program involves planning individual farms and ranches, group facilities for the use and disposal of water as it affects the land, and the application of conservation practices on the different kinds of lands in accordance with their needs and capabilities as shown by detailed land classification surveys. More than 50 conservation practices have been developed. Among the more common practices are contouring, strip cropping, terracing, farm drainage and irrigation improvements, crop rotations, and conservation management of range and woodlands. Soil Conservation Service technicians work directly with farmers and ranchers in soil-conservation districts, organized under State laws and operated under local farmer direction. As of July 1, 1947, a total of 1,889 districts had been organized, which embrace over 1 billion acres and nearly 4.5 million farms.

In cooperation with State agricultural experiment stations, Federal research agencies, and interested organizations, the Service conducts a practical research program designed to develop, refine, and improve soil and water conservation practices in support of its field operations.

Agricultural lands that are submarginal or not primarily suitable for cultivation were purchased by the Federal Government and are being improved and managed to bring about needed land-use adjustments. These lands, approximately 7 million acres, are improved primarily for grazing and forestry. Permits are granted to farmers and ranchers to graze or otherwise use these lands so as to conserve their capacity to produce. For the calendar year 1946, the income from these permits amounted to $750,000.

No change in the level of operations of the Soil Conservation Service is contemplated for 1949.

PRODUCTION AND MARKETING ADMINISTRATION

Included under this head are the annual appropriations for conservation and use of agricultural land resources (the AAA program), the Sugar Act, the national school-lunch program, and marketing service activities; and the permanent appropriation for exportation and domestic consumption of agricultural commodities (sec. 32). This permanent appropriation, authorized by the act of August 24, 1935, finances activities designed to encourage the exportation and domestic consumption of agricultural commodities and to reestablish farmers' purchasing power by making payments in connection with the normal production of any agricultural commodity for domestic consumption.

In the 1948 appropriation act, Congress authorized an AAA program for the crop year 1948 of $150 million. That amount is provided in the estimates. World demand for food, however, requires that we continue a higher level of agricultural production than is desirable from the standpoint of good land use and conservation. It is recommended, therefore, that a $300 million conservation program be authorized for the 1949 crop year. Under the Sugar Act of 1948, the prescribed rates of payments to sugar producers require an increase in funds from $55 million for 1948 to $72 million for 1949. Provision is made for a direct appropriation to continue the school-lunch program at the $65 million level. Marketing-service activities are provided for at approximately the 1948 level, except small increases for market-news activities and to carry out on a full-year basis the provisions of the Federal Insecticide, Fungicide, and Rodenticide Act of June 25, 1947.

Section 32 funds (an amount equal to 30 percent of customs receipts of the previous calendar year) amounted to $149 million for fiscal year 1948. The 1948 appropriation act provided for a section 32 program of $44 million, a transfer of $65 million to finance the school-lunch program, and a rescission of the balance. Section 32 funds available for 1949 are estimated at $135 million. Provision is made for continuation of the section 32 program at the level of $44 million and a rescission of the balance, $91 million. The program consists of purchases of agricultural commodities for distribution to authorized agencies, indemnity payments to encourage exports of agricultural commodities, the diversion of commodities to byproducts and new uses, and the administration of agricultural marketing agreements and orders.

COMMODITY EXCHANGE ACT

The authorized functions under this act are designed to prevent price manipulation and corners affecting agricultural commodities under the act; to prevent dissemination of false and misleading crop and market information influencing prices; to insure trust-fund treatment of margin moneys and prevent the misuse of such funds by brokers; and to provide information to the public regarding trading operations on contract markets. Futures trading in 18 contract markets is being supervised. Trading is taking place at the rate of approximately 8 million transactions per year. Activities of the Commodity Exchange Authority consist of licensing future commission merchants and floor brokers, promulgation of rules, supervision of trading, auditing accounts, and compliance investigations.

FARMERS' HOME ADMINISTRATION

The Farmers' Home Administration is authorized to (1) make farm-ownership loans up to the normal value of a farm and necessary improvements at 3.5 percent interest, loans to be amortized over 40-year periods; (2) insure 40-year farm-ownership loans by private lenders

up to 90 percent of the normal value of the farm; and (3) make production and subsistence loans up to $3,500 for 1 to 5 years at 5 percent for buying livestock, seed, farm equipment, and other farm needs. Water facility loans also are made by the Administration in the 17 Western States under authority of the Water Facilities Act of 1937.

From the beginning of the farm-ownership program in fiscal year 1938 through fiscal year 1947, a total of 47,104 families had received loans amounting to $294 million for the purchase and development of family-type farms. Since inception of the program, over $104 million of principal and over $28 million of interest have been repaid, and 11,233 borrowers have paid their loans in full. About 25,000 active borrowers are ahead of schedule on their payments, aggregating nearly $22 million. Liquidations since inception of the program have resulted in a net loss to the Government of $50,830, or one-fiftieth of 1 percent of the total loans made. The insured mortgage program is just being initiated during the current fiscal year.

From 1935 through October 31, 1946, loans aggregating $1 billion of the rural rehabilitation type were made by the predecessors of FHA to over 1 million families for livestock, equipment, and other farm needs. Farm supervisors helped these families plan their farming and put the plans into practice. Principal repayments on these loans have amounted to approximately 90 percent of maturities. Annual emergency crop and feed loans made by the Farm Credit Administration and predecessor agencies from 1918 through October 31, 1946, amounted to $576 million, of which approximately 80 percent has been repaid. These annual and rural rehabilitation loans were replaced by the production and subsistence loans under the new FHA Act which became effective November 1, 1946.

While farm production and farm income have increased substantially in recent years, the 1945 census shows that half the Nation's farmers received gross farm incomes under $1,500 in 1944, and one-fourth of the farms produced agricultural products valued at less than $600. It is estimated that nearly 1.5 million farms are failing to provide an adequate family living because of inadequate working capital. To help alleviate this situation, an increase in loan funds from $60 million to $75 million is proposed for 1949. Also recommended is an increase of $2 million for administering the program.

RURAL ELECTRIFICATION ADMINISTRATION

The Rural Electrification Administration is authorized to finance through loans the construction of rural electric facilities to serve rural people who do not have central station electric service. Loans are made at 2 percent, to be amortized over periods not to exceed 35 years. Through fiscal year 1947, loan funds totaling $1,075,628,000 had been authorized. There had been allocated a total of over $1 billion to 1,019 borrowers for the construction of an estimated 811,000 miles of rural lines and other facilities to serve approximately 2.5 million consumers. At the present time nearly 600,000 miles of REA lines are in operation, from which approximately 2 million consumers are receiving electric service. Since the inauguration of the REA program in 1935, the percentage of farms in the United States receiving central station service has increased from 11 percent to about 60 percent. The demand for electricity by unserved rural families is evidenced by the fact that there is at present approximately a year's backlog of loan applications on hand and in process of preparation, for which funds are not available for allocation. The situation warrants an increase in loan authorization for 1949, recommended at $300 million, as compared with $225 million for 1948.

FARM CREDIT ADMINISTRATION

The general purpose of the Farm Credit Administration is to provide a complete and coordinated credit system for agriculture. It makes credit available to farmers and provides credit facilities for farmers' cooperative marketing, purchasing, and business service organizations. The program is administered through a central group, known as the "Administration," which supervises and coordinates the activities of (1) the Federal Farm Mortgage Corporation, 12 Federal intermediate credit banks, 12 production credit corporations, and the Regional Agricultural Credit Corporation, all of which are wholly owned Government corporations; (2) 12 Federal land banks, owned by farmer-borrowers; (3) 12 district banks for cooperatives, and the Central Bank for Cooperatives; (4) the joint stock land banks; and (5) a direct lending activity under the Agricultural Marketing Act revolving fund. No important changes in these credit activities are contemplated for 1949.

FEDERAL CROP INSURANCE CORPORATION

Under the Federal Crop Insurance Act the Corporation was provided with an authorized capital stock of $100 million. The $10 million appropriated for capital stock in 1948 exhausted the authorization. All capital stock has been purchased by the Secretary of the Treasury. Public Law 320, approved August 1, 1947, placed the crop-insurance programs on all crops on a restricted, experimental basis. Due to the restricted program, the estimate recommended for administrative and operating expenses for 1949 is $3,725,000, a reduction of $1,275,000 below the amount appropriated for 1948.

COMMODITY CREDIT CORPORATION

The narrative statement and financial statements reflecting operations of the Commodity Credit Corporation are presented under the Department of Agriculture business-type budget, part III of the Budget.

OFFICE OF THE SECRETARY—Continued

Working Capital Fund, Department of Agriculture—

The Department of Agriculture Appropriation Act, 1944, established a working capital fund of $400,000, without fiscal year limitation, for financing, on a reimbursement basis, central duplicating, photographic, tabulating, motor-transport, and supply services for the Department, and such other services as the Secretary, with the approval of the Director of the Bureau of the Budget, determines may be performed more advantageously as central services. Advances are made from this fund for operation of these services, pending reimbursement from applicable funds of bureaus and agencies at rates so computed as to make the services completely self-sustaining and maintain the integrity of the original fund. *(5 U. S. C. 542–1.)*

RESEARCH AND MARKETING ACT OF 1946

Research and Marketing Act of 1946, Department of Agriculture—

To enable the Secretary to carry into effect the provisions of the Act of August 14, 1946 (Public Law 733) *as amended by the Act of July 31, 1947 (Public Law 297)*, including in addition to the objects for which funds are available for such Act of August 14, 1946, and under title I of the Bankhead-Jones Act, as amended, personal services in the District of Columbia; printing and binding; over-all administration, planning, and coordination of research under section 10 pursuant to the provisions of section 10 (c); and necessary expenses for carrying out the provisions of title III of the Act, as follows:

For payments to States, Territories, and Puerto Rico for agricultural experiment stations pursuant to section 9 of the Bankhead-Jones Act approved June 29, 1935, as amended by the Act of August 14, 1946, [$2,500,000] *$5,000,000*, of which such amount as shall be allotable to Alaska shall be transferred to and made a part of the appropriation "Research on agricultural problems of Alaska", without matching requirement;

For research on utilization and associated problems pursuant to section 10 (a) of said Act, [$3,000,000] *$6,000,000*;

For cooperative research other than research on utilization of agricultural commodities and the products thereof, pursuant to section 10 (b) of said Act, [$1,500,000] *$3,000,000*;

For the improvement and development, independently or through cooperation among Federal and State agencies, and others, of a sound and efficient system for the distribution and marketing of agricultural products pursuant to the "Agricultural Marketing Act of 1946" (title II of the Act of August 14, 1946), [$2,000,000] *$5,000,000*;

In all, [$9,000,000] *$19,000,000*: *Provided*, That such sums as may be necessary for penalty mail as required by the Act of June 28, 1944, may be transferred to the regular departmental appropriation therefor: *Provided further*, That for necessary printing and binding there may be transferred to, and made a part of, the item "Printing and binding, Department of Agriculture," such sums as are necessary: *Provided further*, That the Secretary may make available to any bureau, office, or agency of the Department such amounts from this appropriation as may be necessary to carry out the functions for which it is made (*but amounts made available to the Office of the Secretary, Office of the Solicitor, and Office of Information shall not exceed those which the Director of the Bureau of the Budget, after a hearing thereon with representatives of the Department, shall determine*), and any such amounts shall be in addition to amounts transferred or otherwise made available to other appropriation items of the Department: *Provided further*, That no part of this appropriation shall be available for work relating to fish or shellfish or any product thereof, except for the support of equitable transportation rates before Federal agencies concerned with such rates. (*Department of Agriculture Appropriation Act, 1948.*)

PRINTING AND BINDING

Printing and Binding, Department of Agriculture—

For printing and binding for the Department, including all of its bureaus, offices, institutions, and services, except as otherwise provided, [$1,607,000] *$1,857,000*, including the purchase of reprints of scientific and technical articles published in periodicals and journals; the Annual Report of the Secretary, as required by the Acts of January 12, 1895 (44 U. S. C. 111, 212–220, 222, 241, 244), March 4, 1915 (7 U. S. C. 418), and June 20, 1936 (5 U. S. C. 108), and in pursuance of the Act approved March 30, 1906 (44 U. S. C. 214, 224), also including not to exceed $250,000 for farmers' bulletins, which shall be adapted to the interests of the people of the different sections of the country, an equal proportion of four-fifths of which shall be delivered to or sent out under the addressed franks furnished by the Senators, Representatives, and Delegates in Congress, as they shall direct, but not including work done at the field printing plants of the Forest Service authorized by the Joint Committee on Printing, in accordance with the Act approved March 1, 1919 (44 U. S. C. 111, 220); and including not to exceed $207,000 for printing and binding [two hundred thirty-one thousand two hundred and fifty] *not less than two hundred thirty thousand eight hundred and fifty* copies for the use of the Senate and House of Representatives of part 2 of the annual report of the Secretary (known as the Yearbook of Agriculture), as authorized by section 73 of the Act of January 12, 1895 (44 U. S. C. 241): *Provided*, That the Secretary may transfer to this appropriation from the appropriation made for "Conservation and Use of Agricultural Land Resources" such sums as may be necessary for printing and binding in connection with marketing quotas under the Agricultural Adjustment Act of 1938, from funds appropriated to carry into effect the purposes of the National School Lunch Act approved June 4, 1946 (Public Law 396), such sums as may be necessary for printing and binding in connection with the activities under said Act, and from funds appropriated to carry into effect the terms of section 32 of the Act of August 24, 1935 (7 U. S. C. 612c), as amended, such sums as may be necessary for printing and binding in connection with the activities under section 32: *Provided further*, That the total amount that may be transferred under the authority granted in the preceding proviso shall not exceed $145,000. *(5 U. S. C. 511–512; Department of Agriculture Appropriation Act, 1948.)*

RESEARCH ON AGRICULTURAL PROBLEMS OF ALASKA

Research on Agricultural Problems of Alaska, Department of Agriculture—

To enable the Secretary, through such officers and employees of the Department [of Agriculture] and the Territory of Alaska as he may designate, to [establish and maintain a] *continue the* program for research into the basic agricultural needs and problems of the Territory of Alaska *in accordance with the Department of Agriculture Appropriation Act, 1948,* $144,940, including printing and binding, the employment of personal services in the District of Columbia, and the construction or acquisition of necessary buildings and facilities without regard to restrictions of existing law. In carrying out such program the Secretary is authorized to use such authorities as have heretofore been made available by the Legislature of the Territory of Alaska to the Agricultural Experiment Station of the University of Alaska, and by the laws of the United

States, and to cooperate with the University of Alaska and with other public and private agencies. The provisions of this paragraph shall [be effective from and after the date of the enactment hereof,] *continue in effect* until June 30, 1949, and the Secretary is authorized to take such steps and to issue such regulations as he may determine to effectuate the orderly discharge of his reponsibilities hereunder. [There are hereby transferred to the Secretary the use of such equipment and other facilities, buildings, and grounds of the Territorial agricultural experiment station, including its branches, as he may determine to be necessary, other than any land in general use heretofore for other university purposes, and the Secretary may to the extent deemed advisable continue the employment of the existing personnel of the station. Notwithstanding any other provision of law, including the laws of the Territory of Alaska, there are hereby transferred for the use of the Secretary any unexpended balances now available, and any moneys hereafter received for credit thereto, of all funds heretofore appropriated by the legislature or acquired under authority of law for the construction, use, and development of the Territorial agricultural experiment station, the availability of such funds to be unaffected by this transfer. The moneys so transferred shall be available for the settlement, in such manner as the Secretary shall direct, of obligations outstanding at the time of the transfer.] The Secretary shall report annually to the Appropriations Committees of the Senate and of the House of Representatives respecting the status and progress of agricultural research in Alaska and the advisability of resumption by the Territory of the operation of the experiment station under the Land Grant College Acts. ERADICATION OF FOOT-AND-MOUTH AND OTHER CONTAGIOUS DISEASES OF ANIMALS

Eradication of Foot-and-Mouth and Other Contagious Diseases of Animals and Poultry, Agricultural Research Administration—Control and Eradication of Foot-and-Mouth Disease and Rinderpest, Department of Agriculture—

[For expenses necessary, including personal services in the District of Columbia, in the arrest and eradication of foot-and-mouth disease, rinderpest, contagious pleuropneumonia, or other contagious or infectious diseases of animals, or European fowl pest and similar diseases in poultry, including the payment of claims growing out of past and future purchases and destruction of animals (including poultry) affected by or exposed to, or of materials contaminated by or exposed to, any such disease, wherever found and irrespective of ownership, under like or substantially similar circumstances, when such owner has complied with all lawful quarantine regulations, $100,000, together with such sums from other appropriations of the Department as the Secretary may deem necessary, to be available only in an emergency which threatens the livestock or poultry industry of the country: *Provided*, That the payment for such animals hereafter purchased may be made on appraisement based on the meat, egg-production, or dairy value, but in case of appraisement based on breeding value no appraisement of any such animal shall exceed three times its meat, egg-production, or dairy value, and, except in case of an extraordinary emergency, to be determined by the Secretary, the payment by the United States Government for any such animals shall not exceed one-half of any such appraisements: *Provided further*, That poultry may be appraised in groups when the basis for appraisal is the same for each bird.]

[The appropriation, "Eradication of Foot-and-Mouth and Other Contagious Diseases of Animals", in the Department of Agriculture Appropriation Act, 1948, is hereby amended to read as follows:]

For expenses necessary, including personal services in the District of Columbia, in the arrest and eradication of foot-and-mouth disease, rinderpest, contagious pleuropneumonia, or other contagious or infectious diseases of animals, or European fowl pest and similar diseases in poultry, including the payment of claims growing out of past and future purchases and destruction of animals (including poultry) affected by or exposed to, or of materials contaminated by or exposed to, any such disease, wherever found and irrespective of ownership, under like or substantially similar circumstances, when such owner has complied with all lawful quarantine regulations; and for foot-and-mouth disease and rinderpest programs undertaken pursuant to the provisions of the Act of February 28, 1947 (Public Law 8, Eightieth Congress), and the Act of May 29, 1884, as amended (7 U. S. C., 391; 21 U. S. C., 111–122), including expenses in accordance with section 2 of said Public Law 8, [$100,000, together with such sums (which may be transferred to and made a part of this appropriation)] *the Secretary may transfer* from other appropriations or funds available to the bureaus, corporations, or agencies of the Department *such sums* as [the Secretary] *he* may deem necessary, to be available[,] only in an emergency which threatens the livestock or poultry industry of the country, *and any unexpended balances of funds transferred under this head in the fiscal year 1948 shall be merged with such transferred amounts: Provided*, That, except for payments made pursuant to said Public Law 8, the payment for such animals hereafter purchased may be made on appraisement based on the meat, egg-production, dairy, or breeding value, but in case of appraisement based on breeding value no appraisement of any such animal shall exceed three times its meat, egg-production, or dairy value, and, except in case of an extraordinary emergency, to be determined by the Secretary, the payment by the United States Government for any such animals shall not exceed one-half of any such appraisements: *Provided further*, That poultry may be appraised in groups when the basis for appraisal is the same for each bird.

[*Resolved by the Senate and House of Representatives of the United States of America in Congress assembled*, That there is hereby appropriated, out of any money in the Treasury not otherwise appropriated, for expenses necessary to enable the Secretary of Agriculture to control and eradicate foot-and-mouth disease and rinderpest as authorized by the Act of February 28, 1947 (Public Law 8), and the Act of May 29, 1884, as amended by the Act of September 21, 1944 (21 U. S. C. 114a), fiscal year 1947, $9,000,000, to be available for the purposes of carrying out the provisions of said Public Law 8 until June 30, 1948.]

[Control and eradication of foot-and-mouth disease and rinderpest: For an additional amount, fiscal year 1947, to enable the Secretary of Agriculture to control and eradicate foot-and-mouth disease and rinderpest as authorized by the Act of February 28, 1947 (Public Law 8), and the Act of May 29, 1884, as amended (7 U. S. C. 391; 21 U. S. C. 111–122), including expenses in accordance with section 2 of said Public Law 8, $1,500,000, to remain available until June 30, 1948.]

[Control and eradication of foot-and-mouth disease and rinderpest: To enable the Secretary of Agriculture, during July 1947, to control and eradicate foot-and-mouth disease and rinderpest as authorized by the Act of February 28, 1947 (Public Law 8), and the Act of May 29, 1884, as amended (7 U. S. C. 391; 21 U. S. C. 111–122), including expenses in accordance with section 2 of said Public Law 8, $5,000,000, to be merged with the appropriation made under this head in the Second Urgent Deficiency Appropriation Act, 1947 (Public Law 122).] (*21 U. Insect and plant disease control: For carrying out operations or measures to eradicate, suppress, control, or to prevent or retard the spread of Japanese beetle, sweetpotato weevil, Mexican fruitflies, [gypsy and brown-tail moths, Dutch elm disease,] phony peach and peach mosaic, cereal rusts, and pink bollworm and Thurberia weevil, including the enforcement of quarantine regulations and cooperation with States to enforce plant quarantines as authorized by the Plant Quarantine Act of August 20, 1912, as amended (7 U. S. C. 151–167), and including the establishment of such cotton-free areas as may be necessary to stamp out any infestation of the pink bollworm as authorized by the Act of February 8, 1930 (46 Stat. 67), and for the enforcement of domestic plant quarantines through inspection in transit, including the interception and disposition of materials found to have been transported interstate in violation of Federal plant quarantine laws or regulations, and operations under the Terminal Inspection Act (7 U. S. C. 166), [$2,972,100] *$2,266,700*: *Provided*, That no part of this appropriation shall be used to pay the cost or value of trees, farm animals, farm crops, or other property injured or destroyed: *Provided further*, That, in the discretion of the Secretary, no part of this appropriation shall be expended for the control of sweetpotato weevil in any State until such State has provided cooperation necessary to accomplish this purpose, or for barberry eradication until a sum or sums at least equal to such expenditures shall have been appropriated, subscribed, or contributed by States, counties, or local authorities, or by individuals or organizations for the accomplishment of this purpose[: *Provided further*, That in the discretion of the Secretary, no expenditures from this appropriation shall be made for applying methods of control of the Dutch elm disease in any State where measures for the removal and destruction of trees on non-Federal lands suffering from the Dutch elm disease are not in force, provided such removal and destruction are deemed essential or appropriate for the carrying on of the control program, nor until a sum or sums at least equal to such expenditures shall have been appropriated, subscribed, or contributed by State, county, or local authorities, or by individuals, or organizations concerned: *Provided, however*, That expenditures incurred for removal of trees infected with Dutch elm disease from non-Federal lands shall not be considered a part of such appropriations, subscriptions, or contributions: *Provided further*, That no part of this appropriation shall be expended for the removal and destruction of trees infected with the Dutch elm disease except where such trees are located on property owned or controlled by the Government of the United States, or on property included within local experimental control areas]. FOREST SERVICE

SALARIES AND EXPENSES

Salaries and Expenses, Forest Service—

For expenses necessary, including not to exceed [$1,083,378] *$1,097,582* for personal services in the District of Columbia, not to exceed $10,000 for employment pursuant to the second sentence of section 706 (a) of the Organic Act of 1944 (5 U. S. C. 574), as amended by section 15 of the Act of August 2, 1946 ([Public Law 600] *5 U. S. C. 55a*) [, and the replacement of one passenger motor vehicle in the District of Columbia]; to experiment and make investigations and report on forestry, national forests, forest fires, and lumbering, but no part of this appropriation shall be used for any experiment or test made outside the jurisdiction of the United States; to advise the owners of woodlands as to the proper care of the same; to investigate and test American timber and timber trees and their uses, and methods for the preservative treatment of timber; to seek, through investigations and the planting of native and foreign species, suitable trees for the treeless regions; to erect necessary buildings: *Provided*, That the cost of any building purchased, erected, or as improved, exclusive of the cost of constructing a water-supply or sanitary system and of connecting the same with any such building, and exclusive of the cost of any tower upon which a lookout house may be erected, shall not exceed $10,000, with the exception that any building erected, purchased, or acquired, the cost of which was $10,000 or more, may be improved out of the appropriations made under this Act for the Forest Service by an amount not to exceed 2 per centum of the cost of such building as certified by the Secretary; to protect, administer, and improve the national forests, including tree planting and other measures to prevent erosion, drift, surface wash, soil waste, and the formation of floods, and to conserve water; to ascertain the natural conditions upon and utilize the national forests, to transport and care for fish and game supplied to stock the national forests or the waters therein; to collate, digest, report, and illustrate the results of experiments and investigations made by the Forest Service: *Provided*, That not to exceed $50,000 of the appropriation for "National forest protection and management", and not to exceed $50,000 of the appropriation for "Forest fire cooperation" may be transferred to the appropriation "Printing and binding, Department of Agriculture", for forest fire prevention posters and related printed material, as follows: (*5 U. S. C. 511–512—establishing the Department of Agriculture; 524—establishing the Bureau of Forestry. The foregoing citations apply to all appropriation items under the Service which are not based upon specific legislative authority either incorporated in the language of the item or cited immediately thereunder; 565a; 16 U. FARM AND OTHER PRIVATE FORESTRY COOPERATION

Farm and Other Private Forestry Cooperation, Department of Agriculture—

To enable the Secretary through the Forest Service to advise timberland owners and associations, wood-using industries or other appropriate agencies in the application of forest management principles to federally owned lands leased to States and to private forest lands, so as to attain sustained-yield management, the conservation of the timber resources, the productivity of forest lands, and the stabilization of employment and economic continuance of forest industries, and to carry into effect, through such agencies of the Department as he may designate, the provisions of the Cooperative Farm Forestry Act, approved May 18, 1937 (16 U. S. C. 568b), (not to exceed $660,034) and the provisions of sections 4 (not to exceed $83,700) and 5 (not to exceed $65,766) of the Act approved June 7, 1924 (16 U. S. C. 567–568), and Acts supplementary thereto; in all, not to exceed $809,500, of which not to exceed $54,636 may be expended for personal services in the District of Columbia; and not to exceed $30,000 for the construction, alteration, or purchase of necessary buildings, and other improvements[: *Provided*, That in carrying into effect the provisions of the Cooperative Farm Forestry Act, no part of this appropriation shall be used to establish new nurseries or to acquire land for the establishment of such new nurseries]. (*16 U. S. C. 564, 568a, 581; Department of Agriculture Appropriation Act, 1948.*)

Appropriated 1948, **$809,500** Estimate 1949, **$809,500**

NOTE.—There are available as a credit to this appropriation collections from States of their share of the cost of providing technical timber management services to owners of private forest land.

Total, Forest Service, annual appropriations, general accounts:

Appropriated 1948, **$40,013,391** Estimate 1949, **$40,902,500**

Permanent appropriation, general account:

Payments to School Funds, Arizona and New Mexico, National Forests Fund—

The act of June 20, 1910, appropriates, out of any money not otherwise appropriated, an amount equal to such proportion of the gross proceeds (during each fiscal year) of all the national forests within the States of Arizona and New Mexico as the area of land granted to the States for school purposes within these forest reserves bears to the total area of all national forests within the two respective States. The appropriation is recorded and paid, in the fiscal year following that in which the money was received, to each such State as income for its common school fund. (*36 Stat. 562, 573.*)

Appropriated (est.) 1948, **$49,217** Estimate 1949, **$49,217**

Obligations: 11 Grants, subsidies, and contributions—1947, $39,335; 1948, $49,217; 1949, $49,217.

Permanent appropriations, special accounts:

Payments to States and Territories From the National Forests Fund—

The act of May 23, 1908, appropriates 25 percent of the net revenues during any fiscal year from each national forest, to be paid at the end of such year to the State or Territory in which the forest is situated, for the benefit of the public schools and public roads of such county or counties. (*16 U. S. C. 500.*)

Appropriated (est.) 1948, **$4,548,000** Estimate 1949, **$4,548,000**

Obligations: 11 Grants, subsidies, and contributions—1947, $3,424,430; 1948, $4,548,000; 1949, $4,548,000.

Roads and Trails for States, National Forests Fund—

The act of March 4, 1913, appropriates 10 percent of all moneys received from the national forests during each fiscal year for the construction and maintenance of roads and trails within the national forests in the States from which such proceeds are derived. Moneys so appropriated become available to the Secretary of Agriculture in the fiscal year following that in which received, and remain available until expended. (*16 U. S. C. 501.*)

Appropriated (est.) 1948, **$1,819,200** Estimate 1949, **$1,819,200**

SOIL CONSERVATION SERVICE

Salaries and Expenses, Soil Conservation Service—

For expenses necessary to carry out the provisions of the Act approved April 27, 1935 (16 U. S. C. 590a–590f), which provides for a national program of erosion control and soil and water conservation, including not to exceed $856,750 for personal services in the District of Columbia, furnishing of subsistence to employees, operation and maintenance of aircraft, and the purchase and erection or alteration of permanent buildings: *Provided*, That the cost of any building purchased, erected, or as improved, exclusive of the cost of constructing a water supply or sanitary system and connecting the same with any such building, shall not exceed $2,500 except where buildings are acquired in conjunction with land being purchased for other purposes and except for eight buildings to be constructed at a cost not to exceed $15,000 per building: *Provided further*, That no money appropriated in this Act shall be available for the construction of any such building on land not owned by the Government: *Provided further*, That in the State of Missouri where the State has established a central State agency authorized to enter into agreements with the United States or any of its agencies on policies and general programs for the saving of its soil by the extension of Federal aid to any soil conservation district in such State, the agreements made by or on behalf of the United States with any such soil conservation district shall have the prior approval of such central State agency before they shall become effective as to such district, as follows: *(5 U. S. C. 511–512—establishing the Department of Agriculture; 565a; 7 U. S. C. 1387; 16 U. S. C. 590a–590f—establishing the Soil Conservation Service; 590q–1. The foregoing citations apply to all appropriation items under the Soil Conservation Service; Department of Agriculture Appropriation Act, 1948.)*

Soil conservation research: For research and investigations into the character, cause, extent, history, and effects of erosion, soil and moisture depletion and methods of soil and water conservation (including the construction and hydrologic phases of farm irrigation and land drainage, and water regulation to conserve the soil and reduce fire hazards in the Everglades region of Florida, except that expenditures for all work in the Everglades region shall be limited to a sum not in excess of funds made available for such work by the State of Florida, or political subdivisions thereof); and for construction, operation, and maintenance of experimental watersheds, stations, laboratories, plots, and installations, $1,048,000. *(Department of Agriculture Appropriation Act, 1948.)*

Appropriated 1948, $1,048,000 Estimate 1949, $1,048,000

NOTE.—There are available as a credit to this appropriation reimbursements for services or expenses of specially qualified employees detailed to certain foreign governments and receipts from State, county, municipal, and private organizations for soil and water conservation work rendered under cooperative agreements (5 U. S. C. 118e; 16 U. S. C. 590a-590f).

Payments to Counties From Submarginal Land Program, Farm Tenant Act—

The act of July 22, 1937, appropriates 25 percent of net revenues received during each calendar year from the use of submarginal lands held by the Secretary of Agriculture under title III of that act. Moneys so appropriated are available until expended, for payment to the counties in which such land is situated, on the condition that they are used for school or road purposes, or both. (*7 U. S. PRODUCTION AND MARKETING ADMINISTRATION

CONSERVATION AND USE OF AGRICULTURAL LAND RESOURCES

Conservation and Use of Agricultural Land Resources, Department of Agriculture—

For expenses necessary to enable the Secretary to carry into effect the provisions of sections 7 to 17, inclusive, of the Soil Conservation and Domestic Allotment Act, approved February 29, 1936, as amended (16 U. S. C. 590g–590q), and the provisions of the Agricultural Adjustment Act of 1938, as amended (7 U. S. C. 1281–1407) (except the provisions of sections 201, 202, 303, 381, and 383 and the provisions of titles IV and V), including personal services in the District of Columbia; not to exceed $6,000 for the preparation and display of exhibits, including such displays at State, interstate, and international fairs within the United States; [$228,000,000] *$150,000,000*, to remain available until December 31, [1948] *1949*, for compliance with programs under said provisions of the Agricultural Adjustment Act of 1938, as amended, and the Act of February 29, 1936, as amended, pursuant to the provisions of the [1947] *1948* programs carried out during the period July 1, [1946] *1947*, to December 31, [1947] *1948*, inclusive: *Provided*, That not to exceed $24,500,000 of the total sum provided under this head shall be available during the current fiscal year, for salaries and other administrative expenses for carrying out such programs, including the *tobacco and* peanut-marketing quota [program] *programs*, the cost of aerial photographs, however, not to be charged to such limitation; but not more than [$7,080,813] *$7,000,000* shall be transferred to the appropriation account, "Administrative expenses, section 392, Agricultural Adjustment Act of 1938": *Provided further*, That payments to claimants hereunder may be made upon the certificate of the claimant, which certificate shall be in such form as the Secretary may prescribe, that he has carried out the conservation practice or practices and has complied with all other requirements as conditions for such payments and that the statements and information contained in the application for payment are correct and true, to the best of his knowledge and belief, under the penalties of the Act of March 4, 1909, as amended (18 U. S. C. 80): *Provided further*, That none of the funds herein appropriated or made available for the functions assigned to the Agricultural Adjustment Agency pursuant to the Executive Order Numbered 9069, of February 23, 1942, shall be used to pay the salaries or expenses of any regional information employees or any State or county information employees, but this shall not preclude the answering of inquiries or supplying of information to individual farmers: *Provided further*, That such amount shall be available for salaries and other administrative expenses in connection with the formulation and administration of the [1948] *1949* programs (amounting to [$150,000,000] *$300,000,000*, including administration, and formulated on the basis of a distribution of the funds available for payments and grants among the several States in accordance with their conservation needs as determined by the Secretary: *Provided further*, That the proportion allocated to any State shall not be reduced more than 15 per centum from the 1946 distribution and that no participant shall receive more than $500) of soil-building practices and soil- and water-conservation practices, under the Act of February 29, 1936, as amended, and programs under the Agricultural Adjustment Act of 1938, as amended; but the payments or grants under such program shall be conditioned upon the utilization of land with respect to which such payments or grants are to be made, in conformity with farming practices which will encourage and provide for soil-building and soil- and water-conserving practices in the most practical and effective manner and adapted to conditions in the several States, as determined and approved by the State committee appointed pursuant to section 8 (b) of the Soil Conservation and Domestic Allotment Act, as amended for the respective States: *Provided further*, That the Secretary may, in his discretion, from time to time transfer to the General Accounting Office such sums as may be necessary to pay administrative expenses of said Office in auditing payments under this item: *Provided further*, That such amounts shall be available for the purchase of seeds, fertilizers, lime, trees, or any other farming materials, or any soil-terracing services, and making grants thereof to agricultural producers to aid them in carrying out farming practices approved by the Secretary under programs provided for herein: *Provided further*, That the Secretary is authorized and directed to make payments to farmers who complied with the terms and conditions of the agricultural conservation programs, formulated pursuant to sections 7 to 17, inclusive, of the Soil Conservation and Domestic Allotment Act, as amended, if the Secretary determines that, because of induction into the armed forces of the United States, such farmers failed to file, or were prevented from filing, applications for payment under any such program during the period the applicable appropriation for such program was available for obligation, such payments to be made out of the unobligated balance of the appropriation, "Conservation and use of agricultural land resources", in the Department of Agriculture Appropriation Act, 1946: *Provided further*, That an application for payment on the prescribed form is filed by any such farmer (or the person entitled to payment in case of death, disappearance, or incompetency of the farmer under regulations issued pursuant to section 385 of the Agricultural Adjustment Act of 1938, as amended (7 U. S. C., 1940 edition, 1385)) within one year from the date of his discharge from the armed forces, or by December 31, [1947] *1948*, whichever is later: *And provided further*, That no part of any funds available to the Department, or any bureau, office, corporation, or other agency constituting a part of such Department shall be used in the current fiscal year for the payment of salary or travel expenses of any person who has been convicted of violating the Act entitled "An Act to prevent pernicious political activities", approved August 2, 1939, as amended, or who has been found in accordance with the provisions of section 6 of the Act of July 11, 1919 (18 U. S. C. 201), to have violated or attempted to violate such section which prohibits the use of Federal appropriations for the payment of personal services or other expenses designed to influence in any manner a Member of Congress to favor or oppose any legislation or appropriation by Congress except upon request of any Member or through the proper official channels. (*Department of Agriculture Appropriation Act, 1948.*)

EXPORTATION AND DOMESTIC CONSUMPTION OF AGRICULTURAL COMMODITIES

Permanent appropriation:

Exportation and Domestic Consumption of Agricultural Commodities, Department of Agriculture—

The act of August 24, 1935, as amended, appropriates out of any moneys in the Treasury not otherwise appropriated an amount equal to 30 percent of the gross receipts from duties collected under the customs laws during the calendar year next preceding the beginning of each fiscal year. The moneys so appropriated are used to (1) encourage the exportation of agricultural commodities and products thereof by the payment of benefits in connection with the exportation thereof or of indemnities for losses incurred in connection with such exportation or by payments to producers in connection with the production of that part of any agricultural commodity required for domestic consumption; (2) encourage the domestic consumption of such commodities or products by diverting them, by the payment of benefits or indemnities or by other means, from the normal channels of trade and commerce or by increasing their utilization through benefits, indemnities, donations, or by other means, among persons in low-income groups as determined by the Secretary of Agriculture; and (3) reestablish farmers' purchasing power by making payments in connection with the normal production of any agricultural commodity for domestic consumption. *(7 U. S. C. 612c.)*

Notwithstanding any other provision of section 32, Public Law Numbered 320, Seventy-fourth Congress, approved August 24, 1935, as amended (7 U. S. C., 1940 edition, 612 (c)), not more than $44,000,000 shall be available during the fiscal year ending June 30, [1948] *1949,* for use in effectuating the purposes of that Act. [To enable the Secretary to carry out the provisions of the National School Lunch Act of June 4, 1946 (Public Law 396), there is hereby made available $65,000,000 of the funds appropriated for the fiscal year 1948 by section 32 of the Act approved August 24, 1935 (7 U. S. C. 612 (c)), such amount to be without regard to the 25 per centum limitation contained in said section 32, and to be exclusive of funds expended in accordance with the last sentence of section 9 of the National School Lunch Act: *Provided,* That no part of such funds shall be used for nonfood assistance under section 5 of said Act.] The remainder of the fund appropriated by said Act for the fiscal year [1948] *1949* is hereby rescinded effective July 1, [1947] *1948,* and shall be carried to the surplus fund and covered into the Treasury immediately thereafter. *(Department of Agriculture Appropriation Act, 1948.)*

[FARM LABOR SUPPLY PROGRAM]

Supply and Distribution of Farm Labor, Department of Agriculture—

[Supply and distribution of farm labor: The funds provided by the Farm Labor Supply Appropriation Act, 1944, as amended and supplemented, are hereby continued available through January 30, 1948, for carrying out the purposes of said Act, as amended, and the Act of April 28, 1947 (Public Law 40, Eightieth Congress), an Act providing for a six months' extension and final liquidation of the farm labor supply program; and, in addition to the amount continued available, there is hereby appropriated for such purposes the sum of $5,000,000 to be merged with the funds hereby continued available. Not less than $2,000,000 of such additional funds shall be apportioned among the several States in the manner and for the purposes specified in section 2 of the Farm Labor Supply Appropriation Act, 1944. In addition to the amounts heretofore made available for administrative expenses pursuant to section 3 of such Act, there is hereby made available out of said funds the sum of $250,000 for such purposes: *Provided*, That not to exceed $258,500 of the total funds remaining as of January 30, 1948, shall be available until June 30, 1948, for administrative and other expenses, including personal services in the District of Columbia, incident to the settlement of growers' and workers' contracts and accounts, the collection of reimbursements due the Government, the payment of transportation and other obligations outstanding, and the handling of other necessary fiscal and administrative work in the final liquidation and disposition of Government assets and liabilities under the program: *Provided further*, That not to exceed $500,000 of the receipts derived from sales of labor supply centers, labor homes, labor camps, and facilities under the provisions of section 2 (d) of the Act of August 14, 1946 (Public Law 731), as amended, shall be available for the payment of costs of the liquidation of such labor supply centers, labor homes, labor camps, and facilities, including personal services in the District of Columbia, and any appropriations or other funds from which such costs have been advanced may be reimbursed therefor from any such receipts, the net proceeds of such sales to be deposited in the Treasury of the United States.] (*Second Deficiency Appropriation Act, 1947.*)

NOTE.—Availability of this appropriation has been extended until expended, pursuant to the Act of July 31, 1947, Public Law 298. There are available as a credit to this appropriation receipts derived from furnishing subsistence to workers (50 U. S. C. 1354).

Obligations: 13 Refunds, awards, and indemnities—1947, $5; 1948, $500; 1949, $500.

Undistributed Cotton Price Adjustment Payments—

The 1935 cotton price adjustment payment for a farm was made to one person in trust for all producers on such farm who were entitled to share in the payment. In the event the trustee could not for any reason make distribution to any person entitled to share in the payment, this person's share was required to be refunded to the United States to be deposited into this trust fund until such time when proper distribution could be made.

Cancellation of Notes, Farmers' Home Administration—

[All rights, interests, obligations, and duties of the Reconstruction Finance Corporation arising out of loans made or authorized to be made to the Secretary of Agriculture for the purpose of making rural rehabilitation and farm tenancy loans in accordance with the Department of Agriculture Appropriation Act of 1947 and prior appropriations and loans under the Farmers Home Administration Act of 1946 are, as of the close of June 30, 1947, vested in the Secretary of the Treasury; the Reconstruction Finance Corporation is authorized and directed to transfer, as of the close of June 30, 1947, to the Secretary of the Treasury and the Secretary of the Treasury is authorized and directed to receive all loans outstanding on that date, plus accrued unpaid interest, theretofore made to the Secretary under the provisions of the Acts named above, and all notes and other evidences thereof and all obligations constituting the security therefor. The Secretary of the Treasury shall cancel notes of the Reconstruction Finance Corporation, and sums due and unpaid upon or in connection with such notes at the time of such cancellation, in an amount equal to the unpaid principal of the loans so transferred, plus accrued unpaid interest through June 30, 1947. Subsequent to June 30, 1947, the Reconstruction Finance Corporation shall make no further loans or advances to the Secretary and the Secretary of the Treasury is hereby authorized and directed, in lieu of the Reconstruction Finance Corporation, to lend or advance to the Secretary, in accordance with the provisions of the Acts referred to any unobligated or unadvanced balances of the sums which the Reconstruction Finance Corporation has theretofore been authorized and directed to lend to the Secretary. For the purpose of making such loans or advances, the Secretary of the Treasury is authorized to use as a public-debt transaction the proceeds from the sale of any securities issued under the Second Liberty Bond Act, as amended, and the purposes for which securities may be issued under that Act are extended to include such loans or advances to the Secretary of Agriculture. Repayments to the Secretary of Treasury on such loans or advances shall be treated as a public-debt transaction of the United States.] (*Department of Agriculture Appropriation Act, 1948.*)

amounts in the aggregate for each fiscal year commencing with the fiscal year ending June 30, 1948, as the Congress may from time to time determine to be necessary, either without interest or at such rate of interest per annum, not in excess of the rate provided for in sections 4 and 5 of this Act, as the Secretary of the Treasury may determine, upon the security of the obligations of borrowers from the Administrator appointed pursuant to the provisions of this Act or from the Administrator of the Rural Electrification Administration established by Executive Order Numbered 7037. Interest rates on the unpaid balance of any loans made by the Reconstruction Finance Corporation to the Administrator prior to July 1, 1947, shall be adjusted to the interest rate, if any, established for loans made after June 30, 1947, in accordance with the foregoing provision: *Provided*, That such obligations incurred for the purpose of financing the construction and operation of generating plants, electric transmission and distribution lines, or systems shall be fully amortized over a period not to exceed thirty-five years, and that the maturity of such obligations incurred for the purpose of financing the wiring of premises and the acquisition and installation of electrical and plumbing appliances and equipment shall not exceed two-thirds of the assured life thereof and not more than five years. The Administrator is hereby authorized to make all such endorsements, to execute all such instruments, and to do all such acts and things as shall be necessary to effect the valid transfer and assignment to the Secretary of the Treasury of all such obligations, and to execute such trust instruments as shall be agreed upon by the Administrator and the Secretary of the Treasury providing for the holding in trust by the Administrator of all such obligations for the Secretary of the Treasury as security for loans to the Administrator heretofore made by the Reconstruction Finance Corporation or made or to be made by the Secretary of the Treasury. All rights, interests, obligations, and duties of the Reconstruction Finance Corporation arising out of loans made or authorized to be made to the Administrator are, as of the close of June 30, 1947, vested in the Secretary of the Treasury; the Reconstruction Finance Corporation is authorized and directed to transfer, as of the close of June 30, 1947, to the Secretary of the Treasury and the Secretary of the Treasury is authorized and directed to receive all loans outstanding on that date, plus accrued unpaid interest, theretofore made to the Administrator under the provisions of this Act, and all notes and other evidences there of and all obligations constituting the security therefor. The Secretary of the Treasury shall cancel notes of the Reconstruction Finance Corporation, and sums due and unpaid upon or in connection with such notes at the time of such cancellation, in an amount equal to the unpaid principal of the loans so transferred, plus accrued unpaid interest through June 30, 1947. Subsequent to June 30, 1947, the Reconstruction Finance Corporation shall make no further loans or advances to the Administrator; and the Secretary of the Treasury is hereby authorized and directed, in lieu of the Reconstruction Finance Corporation, to lend or advance to the Administrator, in accordance with the provisions of this subsection 3 (a), any unobligated or unadvanced balances of the sums which the Reconstruction Finance Corporation has theretofore been authorized and directed to lend to the Administrator. For the purpose of making loans or advances pursuant to this section, the Secretary of the Treasury is authorized to use as a public-debt transaction the proceeds from the sale of any securities issued under the Second Liberty Bond Act, as amended, and the purposes for which securities may be issued under that Act are extended to include such loans or advances to the Administrator. Repayments to the Secretary of the Treasury on such loans or advances shall be treated as a public-debt transaction of the United States.]

[“SEC. 3. (f) All money representing payments of principal and interest on loans made by the Administrator shall be paid to the Secretary of the Treasury in payment of loans made to the Administrator by the Reconstruction Finance Corporation or the Secretary of the Treasury; upon the payment of such loans all moneys representing payments of principal and interest on loans made by the Administrator shall be covered into the Treasury as miscellaneous receipts.”]

Administrative Expenses and Refunds, Farm Credit Administration, Department of Agriculture—

The Farm Credit Administration is authorized to estimate the cost of examination and administrative supervision of the banks, corporations, and other organizations under its jurisdiction and to assess on an equitable basis and collect in advance such estimated cost. The amounts so collected are made available by the Department of Agriculture appropriation act each year for reimbursing the "Salaries and expenses" appropriation of the Farm Credit Administration. Any excess of collections over costs properly chargeable to each organization assessed is required by law to be refunded to the assessed organization. (*12 U. S. C. 832.*)

GENERAL PROVISIONS—*DEPARTMENT OF AGRICULTURE*

SEC. 2. No funds appropriated or made available under this title shall be used to pay the compensation or expenses of any officer or employee of the Department or any bureau, office, agency, or service of the Department, or any corporation, institution, or association supervised thereby, who makes or approves, or directs or authorizes the approval of, any loan or advance by the Regional Agricultural Credit Corporation of Washington, District of Columbia, unless such loan or advance (1) is for the purpose of protecting the security for or assisting in the collection of a loan or advance theretofore made by the Corporation, or (2) is for use in and confined to a specific area or region in which the Secretary of Agriculture shall have found that such loans for specified agricultural purposes and for limited time periods are necessary because of economic emergencies or production disasters. All loans and advances made pursuant to this section will carry the full personal liability of the borrower, shall be secured by crops or livestock and such additional collateral as is deemed necessary to afford reasonable assurance of repayment, and will be accompanied by a certificate of refusal of the loan or advance by a local bank or the production credit association serving the area.

SEC. 3. Within the unit limit of cost fixed by law the lump-sum appropriations made for the Department under this title shall be available for the purchase of passenger motor vehicles, and for the hire of such vehicles, necessary in the conduct of the work of the Department outside the District of Columbia, but the number of such vehicles purchased or otherwise acquired for all the activities of the Department for which appropriations are made under such title shall not exceed the total number indicated for purchase by the Department under the statements of proposed expenditures for purchase and hire of passenger motor vehicles in the Budget.

SEC. 4. Provisions of law prohibiting or restricting the employment of aliens shall not apply to (1) the temporary employment of translators when competent citizen translators are not available; (2) employment in cases of emergency of persons in the field service of the Department for periods of not more than sixty days; *and* (3) employment under the appropriation for the Office of Foreign Agricultural Relations.

SEC. 5. Appropriations made in this title shall be available for health service programs as authorized by [the Act of August 8, 1946 (Public Law 658)] *law (5 U. S. C. 150)*.

SEC. 6. Appropriations and other funds available to the Department during the current fiscal year (except those appropriated or authorized in title II of this Act for such fiscal year) shall be available for the payment of claims pursuant to [part 2] *section 403* of the Federal Tort Claims Act [of August 2, 1946 (Public Law 601)] *(28 U. S. C. 921)*.

SEC. 7. No part of any appropriation contained in this title shall be used to pay the salary or wages of any person who engages in a strike against the Government of the United States or who is a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or who advocates, or is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: *Provided*, That for the purposes hereof an affidavit shall be considered prima facie evidence that the person making the affidavit has not contrary to the provisions of this section engaged in a strike against the Government of the United States, is not a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or that such person does not advocate, and is not a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: *Provided further*, That such administrative or supervisory employees of the Department as may be designated for the purpose by the Secretary are hereby authorized to administer the oaths to persons making affidavits required by this section, and they shall charge no fee for so doing: *Provided further*, That any person who engages in a strike against the Government of the United States or who is a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or who advocates, or who is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence and accepts employment the salary or wages for which are paid from any appropriation contained in this title shall be guilty of a felony and, upon conviction, shall be fined not more than $1,000 or imprisoned for not more than one year, or both: *Provided further*, That the above penalty clause shall be in addition to, and not in substitution for, any other provisions of existing law: *Provided further*, That nothing in this section shall be construed to require an affidavit from any person employed for less than sixty days for sudden emergency work involving the loss of human life or destruction of property, and payment of salary or wages may be made to such persons from applicable appropriations for services rendered in such emergency without execution of the affidavit contemplated by this section.

SEC. 8. Limitations on amounts to be expended for personal services under appropriations in this Act shall not apply to lump-sum leave payments pursuant to the Act of December 21, 1944 ([Public Law 525): *Provided*, That in expending the appropriation herein for "Inspection and quarantine, Bureau of Animal Industry," service shall be maintained at all stockyards having such service during the last quarter of the fiscal year 1947] *5 U. S. C. 61b–e*). *(Department of Agriculture Appropriation Act, 1948.)*

[The Secretary of Agriculture is hereby authorized, with the approval of the Director of the Bureau of the Budget, to utilize, by transfer or otherwise, during the period between the date of approval of this Act and April 1, 1948, such amounts as may be necessary (but not to exceed a total of $2,750,000) from any appropriation or fund available to the bureaus, corporations, or agencies of the Department of Agriculture, for expenses necessary to carry out (a) any laws enacted subsequent to December 1, 1947, to (1) authorize the regulation of speculative trading on the commodity exchanges and (2) authorize allocation and inventory control of scarce agricultural commodities; and (b) any programs approved by the President under existing laws to encourage conservation practices in this country: *Provided*, That, notwithstanding any other provision of the appropriation laws concerned, any funds utilized under authority of this paragraph by any bureau, corporation, or agency of such Department shall be in addition to any other funds available to such bureau, corporation, or agency: *Provided further*, That at the end of each calendar month the Secretary shall make a report to the Committees on Appropriations of the House of Representatives and the Senate of obligations incurred pursuant to this paragraph.] *(Third Supplemental Appropriation Act, 1948.)*

EXPLANATORY STATEMENT

GENERAL STATEMENT

The functions of the Department of Commerce include (1) services for aviation, (2) aids to business and industry, and (3) technical services for other governmental agencies and the general public.

Provision is made in the estimates for some increase in the Federal-aid airport program, continued modernization and extension of the Federal airway system in keeping with rapid technological and operational developments, and commensurate increases in other types of services and aids to civil aviation.

The collection, analysis, and publication of economic data constitute the major part of the Department's aids to business. Advice on management techniques, with special attention to the problems of small business, is also made available.

The estimates provide for continuation, and in some instances expansion, of such technical services as weather forecasting, the production of nautical and aeronautical charts and the establishment of geodetic control, maintenance of standards of weights and measure, research and testing in physics and chemistry, and the issuance of patents.

The Department consists of the following bureaus and offices, discussed separately hereafter in the same order: Office of the Secretary, Bureau of the Census, Civil Aeronautics Administration, Civil Aeronautics Board, Coast and Geodetic Survey, Bureau of Foreign and Domestic Commerce, Patent Office, National Bureau of Standards, and Weather Bureau.

OFFICE OF THE SECRETARY

The Office of the Secretary performs over-all planning, legal, information, personnel, budget, finance, and central office service functions for the Department. An Office of Technical Services procures and disseminates technical information applicable to industrial processes developed during the war in the United States and enemy countries. This function is being curtailed as postwar work load declines. The increases requested for fiscal year 1949 are principally for the solicitor's office, the information staff, the office of personnel administration, and the office of budget and management.

The fact that no provision is made in the regular 1949 estimates for materials distribution functions results in an over-all decrease of 16 percent in appropriation requests for the Office of the Secretary.

BUREAU OF THE CENSUS

This Bureau collects and publishes current statistics on the population, its trends and characteristics, industrial production, and retail and wholesale trade activity. Compilation of data on foreign trade, State and local governments, and agriculture comprise the balance of the Bureau's year-to-year program. The major item of increase in the 1949 estimates is to provide for preparatory work on the seventeenth decennial census, to be taken in 1950. Increases are also provided for the business, industry, and population statistical programs to provide expanded coverage in these fields. Offsetting these increases is the

omission of $4,000,000 provided in 1948 for a census of manufactures. This census is required by statute to be taken every 2 years. The net result is a small decrease in total estimates for the Bureau.

CIVIL AERONAUTICS ADMINISTRATION

The major programs for which the Civil Aeronautics Administration is responsible, under the Civil Aeronautics Act of 1938 and subsequent legislation, are the establishment, maintenance, and operation of aids to air navigation on the Federal airways system, the enforcement of the safety regulations promulgated by the Civil Aeronautics Board, and the administration of the Federal-aid airport program. In addition, it is charged with carrying on a number of related programs, including the operation of the Washington National Airport, the airport advisory service, survey and compliance activities incident to disposal of surplus airports, and a program of service testing of new air navigational and landing aids. Under the impetus of the great postwar expansion in civil aviation and the rapid technological advancements over the past few years, the functions of the Administration have become major governmental activities.

The system of air navigation and landing aids installed, operated, and maintained by the Administration is essential to the sound development of civil aeronautics and domestic and international air commerce, particularly in connection with safety and regularity of flight. Programs now under way provide for the continuing modernization of existing facilities and aids, their extension to new areas, and the installation of additional landing aids at airports of proven traffic density. The estimate of $23,099,000 for additional facilities in 1949 is the minimum required to keep the system in reasonable alinement with the expanding needs of civil aviation. An increase of 19 percent for maintenance and operation of the Federal airways system is required to place the 1948 program on a full-year basis, to operate new facilities being completed during 1948 under previously authorized programs, and to operate facilities to be completed in 1949.

One of the major obstacles to the continuing development and expansion of civil aviation is the lack of adequate airports; this is a particularly serious problem at points of heavy traffic concentration. Through the Federal-aid airport program, the Government is undertaking a long-range program for the alleviation of this problem through grants to local sponsors of approved airport developments. Over 1,600 requests for projects totaling more than $275,000,000 have been received by the Administration from local sponsoring agencies. The estimate of $40,000,000 for 1949 will enable the Administration to make grants for only the most urgent projects.

Enforcement of safety regulations is also a major responsibility of the Administration. This touches on all phases of air safety including aircraft airworthiness, competence of airmen, and the conduct of flight operations. The Administration is vigorously carrying forward its program of delegating detailed inspectional responsibilities, wherever feasible, to private individuals and companies, and now has approximately 8,700 designees serving under the supervision of its inspectors. An increase of 15 percent in this function provides for placing the 1948 program on a full-year basis, and for strengthening the engineering inspection staff to cope with increasingly complex problems arising from the development of high-speed, long-range transport aircraft and jet propulsion engines.

In summary, the regular operating programs of the Administration require an increase of 20 percent. The estimate for the establishment of air-navigation facilities reflects an increase of 107 percent; and that for the Federal-aid airport program an increase of 23 percent. The over-all increase for all programs is 30 percent as compared with 1948 appropriations.

CIVIL AERONAUTICS BOARD

The three major functions of the Civil Aeronautics Board are the economic regulation of the air transportation industry, the promulgation of civil air regulations and other safety standards, and the investigation and analysis of civil aircraft accidents.

The continuing rapid growth and development of civil aviation has produced a greatly increased work-load volume for the Board in most phases of its work. The backlog of formal economic proceedings carried over at the beginning of fiscal year 1948 was 30 percent over that of a year earlier; it is anticipated that the backlog to be carried into 1949 will be even larger. Of particular concern is the situation with respect to the mail-rate cases. Because of the financial reverses suffered by the air carrier industry during the past year, a large number of petitions are now pending before the Board for revisions in mail rates. These petitions represent a considerable contingent financial liability to the Government, and it is of first importance, from the standpoint both of Government economy and the maintenance of a sound financial condition within the industry, that these petitions be acted on by the Board with a minimum of delay.

During fiscal year 1949, there will also be a continuing need for revision of major sections of the civil air regulations to bring them up to date with the latest technological and operating developments. Because of the upward trend in total flying activity, the accident investigation and analysis work load of the Board can be expected to increase in 1949.

The 1949 estimates reflect an over-all increase of 20 percent over 1948 appropriations. This increase has the objectives of first, preventing the growth of further backlogs, and second, making a start on the reduction of backlogs already accumulated. Approximately 40 percent of the increase is for rate regulation, 36 percent for safety activities, 17 percent for economic and legal activities other than rate regulation, and the balance, 7 percent, for general administration.

COAST AND GEODETIC SURVEY

Production of navigational and aeronautical charts and the establishment of geodetic control are being carried on during 1948 at a slightly lower rate than that of 1947. However, developments in the fields of military and civil aviation and flood control have made necessary increased activity during 1949. Additional funds, representing an increase of 13 percent, are therefore proposed for hydrographic and geomagnetic surveys in the Arctic, and for geodetic control surveys and airport surveys within the continental United States.

BUREAU OF FOREIGN AND DOMESTIC COMMERCE

The Bureau of Foreign and Domestic Commerce analyzes production and marketing data for major commodities in the United States and abroad, and makes studies of business trends and of the Nation's economic structure. An Office of Small Business supplies advisory and informational services especially developed for this segment of the economy. Forty-six field offices in important commercial and industrial cities aid in making

this information available to the public, and in keeping abreast of the changing needs of the business community for Department of Commerce services.

Increases are requested in fiscal year 1949 primarily to strengthen the commodity divisions in the Bureau so as to broaden their coverage and provide for more accurate appraisal of productive capacity, market potential, and similar factors. The fact that no provision is made in the regular 1949 estimates for export control functions results in offsetting most of the increase in appropriations requested for this Bureau, leaving a net increase of 4 percent.

PATENT OFFICE

Although patent applications are now being processed at about the same rate as the receipt of new applications, an extremely large backlog of approximately 145,000 applications still awaits action by the examiners. Additional patent examiners will be recruited during 1948, and this will result in a more rapid disposition of applications. No further increases in staff are proposed for 1949. However, appropriation increases of 15 percent will be required for the printing of a larger number of patents and for maintaining staff throughout the full year at the level to be reached in 1948.

NATIONAL BUREAU OF STANDARDS

Substantial savings in the procurement of Federal supplies and equipment are made possible by the research, testing, and specifications work of the National Bureau of Standards. Private industry also benefits from these activities and, in addition, depends upon the Bureau for standards of measurement, for data as to the chemical and physical properties of materials, and for the development of standard samples. The 1949 estimates, containing recommended increases of 20 percent, would allow for some expansion of research activities in the fields of radio propagation, building technology, and metallurgy. In addition, provision would be made for the procurement of urgently needed equipment and for the physical rehabilitation of the Bureau's plant.

WEATHER BUREAU

Weather forecasting plays an increasingly important role in our national economy, as new methods and techniques extend the usefulness of forecasts, particularly to such activities as agriculture and aviation. Provision is made in the 1949 estimates to meet minimum additional requirements for aviation weather service, and for river and flood forecasting. Funds are also recommended for a major program of research to study the possibilities of artificially inducing rain or snow, and to investigate the basic physical characteristics of meteorological phenomena, about which little at present is known. In all, the 1949 estimates are 11 percent greater than the 1948 appropriations.

EXPLANATORY STATEMENT

GENERAL STATEMENT

The Department of the Interior is concerned principally with promoting the domestic welfare and administering the conservation of natural resources. The following are the principal constituent units of the Department:

Bureau of Land Management
Bureau of Indian Affairs
Bureau of Reclamation
Geological Survey
Bureau of Mines
National Park Service
Fish and Wildlife Service

In addition, the Department has supervision over the Bonneville Power Administration, responsible for the widest possible use of electric energy generated at the Bonneville and Grand Coulee Dams; and the Division of Territories and Island Possessions, which supervises activities in Alaska, Hawaii, Puerto Rico, and the Virgin Islands.

The estimates of appropriation for general and special accounts for the Department of the Interior proposed for 1949 are $481,210,647 as compared with estimated appropriations of $290,688,850 for 1948, an increase of $190,521,797. Estimates for 1949 for the Bureau of Reclamation, $268,590,150, and Bonneville Power Administration, $23,225,000, account for $291,815,150, leaving $189,395,497 estimated for all other activities of the Department. In addition, the estimates for the Bonneville Power Administration, the Bureau of Indian Affairs, the National Park Service, the Alaska Railroad, and Alaskan roads carry contractual authorizations of $13,050,000, $6,400,000, $4,000,000, $6,700,000, and $6,944,000, respectively.

Provision is made in the estimates of the several bureaus for expansion of activities or the undertaking of new ones, all for the purpose of contributing to the development of Alaska. This program includes practically every phase of the Department's activities affecting the Territory. It provides for expediting the rehabilitation of the Alaska Railroad, the construction of additional roads, more intensive search for minerals, including those required for building purposes, public land surveys, provision for tourist accommodations and facilities in park areas, expanded fisheries development, and power market surveys. World War II emphasized the importance of Alaska from a national defense standpoint and the need for a greater Federal interest in its development.

OFFICE OF THE SECRETARY

Appropriations under this head finance the Office of the Secretary and his general staff, the Office of the Solicitor, the Divisions of Territories and Island Possessions and Oil and Gas, the Board on Geographic Names, and certain administrative divisions that serve all bureaus of the Department. Under this head are also included funds for soil and moisture conservation operations on public and Indian lands, for power distribution in the southwest area, for contingent expenses of the Department, and for meeting the costs of penalty mail.

The annual appropriations recommended for these activities total $8,593,650, of which $3,180,000 is for administration, operation and maintenance, and for construction of additional power facilities in the Southwest. Increases are recommended for strengthening the Secretary's staff offices, for additional regional offices, and for a branch office in the Territory of Alaska. An increase of $600,000 is recommended for soil and moisture conservation operations which were held to a minimum during the war period. Since administration, operation, and construction of power facilities in the Southwest are largely financed in 1948 from carry-over funds, the increase of $3,055,000 recommended for 1949 represents the amount required for continuation of these activities. Other small increases are for contingent expenses, penalty mail, and the Board on Geographic Names. This Board was given

legislative status by the act of July 25, 1947, Public Law 242.

COMMISSION OF FINE ARTS

The Commission of Fine Arts renders advice to Congress and the executive agencies of the Government on matters in the fields of architecture, sculpture, painting, and landscape architecture. The appropriation of $12,000 recommended for 1949 is in the same amount as the 1948 appropriation.

BONNEVILLE POWER ADMINISTRATION

Bonneville Power Administration under the Bonneville Project Act of 1937 and Executive Order 8526, dated August 26, 1940, markets surplus power generated at Bonneville and Grand Coulee Dams. Pursuant to this authority the Administration constructs, maintains, and operates electric transmission lines, substations, and other facilities and structures for transmitting electric energy to existing and potential markets, for the exchange of electric energy, and for the interconnection of Federal projects to other systems now and hereafter constructed.

The present transmission system consists of 3,184 circuit miles of transmission lines and 78 substations. Extensions and additions to be completed during fiscal year 1948 will increase the number of circuit miles to 3,361 and the number of substations to 85. The 1949 program will result in the energization of 115 additional circuit miles of transmission lines and 5 additional substations, bringing the total system to 3,476 circuit miles of transmission lines and 90 substations.

During fiscal year 1949 work will also be underway on about 1,519 additional circuit miles of transmission lines and accompanying substation facilities to be completed in future years.

For 1949, the construction program of $32,575,000 is for additional grid facilities required to transmit power from the generators scheduled to be installed at Grand Coulee Dam to the load centers. It further provides facilities for delivery of power direct to large industrial customers and to publicly and privately owned power distributors. An estimate of $3,700,000 provides for administration, operation, and maintenance of the electric system. The total appropriation estimate of $23,225,000 is for construction, operation, and maintenance of the transmission system.

BUREAU OF LAND MANAGEMENT

This Bureau is responsible for the functions formerly conducted by the General Land Office and the Grazing Service. It was created by Reorganization Plan No. 3 of 1946, approved by Congress on July 13, 1946. The objective of the consolidation of functions was to bring under one management resources of more than 400 million acres of public lands located primarily in 11 Western States and Alaska. This involves a study and inventory of resources, the development of plans for their proper utilization, and actual management in connection with their use and development by thousands of individuals and groups. It also includes the administration of thousands of public land laws enacted by Congress providing for disposal and various methods of use of lands of all types.

The Bureau administers timber and grazing lands both in the continental United States and Alaska, and is responsible for the survey and resurvey of public lands. Approximately 142 million acres of public land in the Western States located within 60 grazing districts established under the Taylor Grazing Act of 1934 are administered by the Bureau.

Annual appropriations aggregating $5,637,065 are recommended for this Bureau, an increase of $1,241,625 above estimated appropriations for 1948. The major increases are designed to improve administration of grazing lands, to construct or maintain range improvements, to provide more effective fire prevention and suppression and timber management, to strengthen staffs in local land offices, and to expand surveys of public lands and land classification work.

BUREAU OF INDIAN AFFAIRS

The Bureau of Indian Affairs is concerned with the economic rehabilitation of the Indian wards of the United States and aims to assure to them opportunities enjoyed by other racial groups in the fields of education, health, cultural freedom, and self-government. More than 350,000 Indians in the continental United States and 32,000 Eskimos, Aleuts, and Indians in Alaska come within the jurisdiction of the Bureau.

Among its many functions are the operation of approximately 400 day and boarding schools and the supervision of the education of Indian children attending public and private schools; the operation of hospitals, sanatoria, and infirmaries; medical, dental, and public health nursing service to Indians in their homes and at clinics; the administration of about 46,000,000 acres of forest and grazing land; the maintenance of an extension service, the principal objectives of which are to encourage the use of Indian lands by Indians and to effect the use of improved farming and livestock practices by Indian farmers and livestock men; the administration of a credit system; the construction, operation, and maintenance of irrigation systems; the maintenance of law and order on Indian reservations and the performance of social-service work; the administration of large sums held in trust for individual Indians and Indian tribes; and the construction and maintenance of buildings, utilities, and roads.

Annual appropriations aggregating $50,975,020 are recommended for this Bureau for 1949, a net increase of $13,160,490 over appropriations for 1948. The major increases are for strengthening administration, for continuing the construction of the irrigation system on the Colorado River Indian Reservation to provide land for resettlement of a part of the Navajo population, for construction of additional and replacement school and health facilities, for expanding the education and medical services for natives of Alaska, for hospitalizing additional Indian patients, for expansion of field medical services on the Navajo Reservation, for expanding the road systems on Indian reservations, for increasing the loan fund and expanding the agricultural extension service, for greater utilization of school plants, and for meeting increased transportation costs, and costs of operating and maintaining irrigation systems. It has been necessary, also, to provide substantial increases in funds for the operation of schools and hospitals to meet rising costs of supplies and materials. Approximately 50 percent of the appropriations to this Bureau are for education and health purposes. There is a continuation in the trend of increases in school attendance, particularly boarding schools, and greater utilization of hospital facilities, because of the return to reservations of many individuals and families who were in the armed forces or employed in war industries.

BUREAU OF RECLAMATION

The objectives of the Bureau of Reclamation concern the conservation of land and water resources; the transformation, through irrigation, of desert lands into productive farms, the protection, through adequate water supplies, of established agricultural economy from the adverse effects of recurring droughts in the semiarid regions; and the stabilization of the livestock industry at a high level through providing the means of growing feed and forage crops. In company with these major purposes is the function of creating facilities for generation of hydroelectric power, land drainage, control of floods, improvement of navigation, silt control, regulation of stream flow, provision of municipal water supplies, and the incidental development of recreational areas and wildlife refuges. The responsibilities of the Bureau include the planning, construction, and operation of these multipurpose facilities which must be completely coordinated with facilities already built or planned to be constructed in the future, either by the Bureau of Reclamation or other agencies, so that the water resources may be used most beneficially.

The 1949 budget provides for surveys and investigations, preparation of reports, plans, and specifications, economic studies, and land use analysis, in the amount of $5,350,000 for general investigations, and in addition $500,000 for the Colorado River development, and $150,000 for Alaskan investigations.

The scope of activities of the Bureau has been extended from year to year so that to the present time, 58 irrigation projects or divisions of projects have been completed, of which 34 have been turned over to the water users for operation and maintenance. No Federal funds will be required for these latter projects. In the fiscal year 1949, the Bureau will operate and maintain the remaining 24 projects, under the Reclamation fund, special fund. During 1948, 2,457,000 acres are being fully irrigated from Bureau facilities of which 646,000 acres are being irrigated by Bureau forces, and in 1949 it is estimated that these acreages will increase to 2,490,000 and 740,000, respectively. Irrigation operation and maintenance estimates of appropriation in fiscal year 1949, under the Reclamation fund, special fund, total $1,987,500 compared to $1,439,000 appropriated in 1948.

Operation and maintenance costs of power systems are financed from power revenues within limitations established in the appropriations for the particular project. Energy sales from power plants, including Boulder Canyon and Fort Peck projects, in fiscal year 1948, will approximate 15.325 billion kilowatt-hours and are estimated at 16.480 billion kilowatt-hours in fiscal year 1949. Power operation and maintenance estimates and limitations, under the Reclamation fund, special fund, total $7,113,650 for fiscal year 1949 compared to $4,766,700 made available in fiscal year 1948. The increase is due largely to additional generating capacity and transmission line mileage and to increased purchase of power to supply power deficiencies in Arizona.

The estimates for fiscal year 1949 for construction in the aggregate amount of $240,661,000 contemplate continuing work on 39 projects. These funds plus balances remaining from 1948 will provide for activity on 48 projects, including 3 great river basins, during fiscal year 1949. Five major projects require over $200 million of the appropriation estimates for construction.

The estimate for Davis Dam project, Arizona-Nevada, of $24 million, provides for progress at a rate to meet the requirements of the 1944 Treaty with Mexico and for the completion of transmission lines simultaneously with the power plant in 1950.

The Central Valley project of California estimate is $41.5 million. This amount will provide a construction program that will enable irrigation water to be put on the land immediately upon the completion of Tracy pumping plant, the key structure in the irrigation development.

The estimate of $23 million for the Colorado-Big Thompson project, Colorado, is based primarily upon an orderly program of construction for Granby Dam and pumping plants, and is to bring related facilities into operation upon completion of those features.

The Columbia Basin project, Washington, for which an estimate of $48 million is made, is scheduled at a rate to bring irrigation facilities into operation for 216,000 acres of new land by 1952, and to meet the urgent needs for power in the Pacific Northwest.

The estimate of $63.9 million for the Missouri River Basin provides for the orderly and economic continuation of regular work now under way and the continuation of the flood-control program previously authorized and partly provided for by the Congress. No additional major dam contracts are provided for with the exception of the Canyon Ferry unit in Montana. Preliminary work is now under way on this project to meet the critical power shortage in that area.

GEOLOGICAL SURVEY

The Geological Survey is primarily concerned with the natural resources of the United States. It investigates the geology of the United States, and conducts research in geologic and related chemical and physical problems; makes topographic, base, and other maps of the United States, separate States, and special regions; investigates the quantity, distribution, mineral quality, availability, and utilization of the surface and underground water supplies of the United States; classifies the public lands as to their mineral and water resources, and furnishes technical data for the administration of public-land laws; supervises the technical phases of operations on public lands under leases, licenses, and permits; and investigates the mineral resources and production of Alaska, and surveys and maps the Territory's geology and topography.

The recommended annual appropriations total $16,005,000, or $5,913,660 more than appropriations for 1948. This increase includes $3.5 million for topographic mapping, including surveys within strategic zones, formerly performed with funds transferred from the Department of the Army, and for mapping areas in the Mississippi Valley. The increase also provides for expanding geologic surveys involving minerals on the stockpiling list, for reappraising coal resources, for matching offerings of States and municipalities for appraising water resources and solving water problems, and for disposing of work backlogs in the classification of lands. In addition, approximately $400,000 is included in the increase for printing and engraving a large backlog of maps and for accelerating publication of scientific and technical papers. Topographic quadrangle maps supply much of the basic data needed for such projects or activities as flood control, drainage, irrigation, soil conservation, river navigation, highways, railroads, transmission lines, pipe lines, tunnels, airports, television and radar towers, and large industrial developments.

The depletion of our known deposits of critical and essential minerals during the war period demands that prompt steps be taken to inventory the Nation's mineral resources. Less than 10 percent of the country has been mapped geologically on scales adequate to meet minimum current needs, and many of the maps covering the Eastern States are obsolete.

Water for municipal supplies, irrigation, power, process uses in industry, inland navigation, and for other purposes has reached the limits of the supply available in many sections of the country. As the limits of supply are approached reliable water information becomes increasingly essential for planning new and operating old developments, and for adjudicating rights. The increase recommended for water investigations will enable the Geological Survey to expand its cooperative program to match offerings of States and municipalities, to supply basic water data to Federal and other agencies concerned with reclamation, flood control, and water utilization problems, and to make water-resource studies of national interest.

BUREAU OF MINES

The Bureau of Mines is engaged in scientific and technological research concerning mining. It has two basic objectives—conservation of minerals through increased efficiency in their mining, preparation, and use; and conservation of human life through safe methods of operating mines and plants.

Annual appropriations aggregating $21,942,300 are recommended for this Bureau for 1949, as compared with $12,285,800 in 1948. The major increases are $6,750,000 for continuing the synthetic liquid fuels research program, and $1.5 million for developing reserves and conducting experimental mining operations and metallurgical research with respect to metals on the critical stockpiling list, including the construction and operation of a pilot plant. Other increases are for additional coal mine inspectors to increase the frequency of inspections, and for expanding the program for increasing reserves of coking coals, including washing and blending low-grade coals, developing a sound estimate of known minable coking coal reserves, and investigations relating to the carbonization and gasification of coals.

The serious depletion of the Nation's deposits of high-grade minerals, including coal and petroleum reserves, during the war period continues to compel a dependence on lower grade ores until new sources of raw materials are discovered. While progress is being made in developing new methods and processes for the economic mining and utilization of these lower grade deposits, much remains to be done in this field.

NATIONAL PARK SERVICE

This Service is responsible for the administration, protection, maintenance, and operation of some 171 areas of the national park system and 17 other areas and projects. These areas contain more than 22 million acres of federally owned lands with 4,500 miles of roads, 6,600 miles of trails, and about 3,700 buildings and other improvements.

War conditions caused a decline generally in visitation to national parks, monuments, historical and other areas comprising the National Park System, from a high of around 21 million in 1941 to a low of 6.9 million in the travel year ended September 30, 1943. As visitation decreased, appropriations were reduced, and the areas were placed essentially on a custodial basis. Services normally provided for the benefit of tourists were eliminated.

Following the end of the war, visitation increased to all-time highs. For the travel year ended September 30, 1947, the areas were visited by 25,265,229 persons, an increase of about 17 percent over the 1946 travel year, and 20 percent over the previous all-time record of 21,050,426 visitors in the 1941 travel year.

The amount recommended for 1949 is $16,894,150, or $6,466,095 above estimated appropriations for 1948. The principal increases are $5,264,000 for construction and maintenance of roads in park areas and construction of facilities for accommodation of visitors and approximately $900,000 for more effective administration, maintenance, and protection of park and monument areas required by increased visitation. Other increases are designed to strengthen staffs in the headquarters and regional offices and to provide for recreational studies and archaeological excavations in river basins affected by projects of the Bureau of Reclamation and the Corps of Engineers.

FISH AND WILDLIFE SERVICE

This Service is responsible for the conservation and development of our fish, bird, game, and other wildlife resources. It operates fish cultural stations, fish screens, and wildlife refuges; enforces conservation laws regarding fisheries and wildlife; protects the salmon and other fisheries in Alaska and the seals on the Pribilof Islands; and conducts technological and economic research designed to aid the fishing industry and the fur trade.

The total annual appropriation recommended for 1949 is $11,587,200, or $5,054,390, more than appropriations for 1948. One of the principal increases is $1.5 million to permit the exploration, investigation, development, and maintenance of the fisheries resources, and the development of the high-seas fishing industry of the territories and islands of the United States in the tropical and subtropical Pacific Ocean and intervening areas, as authorized by the act of August 4, 1947. An increase of $335,000 is provided for operation of the Crab Orchard project in Illinois, which was transferred to the Fish and Wildlife Service by Public Law 361, Eightieth Congress. The remainder of the increase recommended is for operating vessels for longer periods, repairs to fish hatcheries and other properties of the Service, for increased cost of operating supplies and materials, expanding assistance to commercial fisheries and the fishery market news service, and for additional enforcement agents for protection of migratory birds and Alaska fisheries.

GOVERNMENT IN THE TERRITORIES

This group of appropriations provides for activities of our Territorial governments and island possessions—Alaska, Hawaii, and the Virgin Islands—financed out of the Federal Treasury. It does not cover the operations in Alaska of the several constituent units of the Department.

A total of $25,993,800 is recommended for this group of annual appropriations for 1949. This is $9,509,200 in excess of appropriations estimated for 1948. The major increases are for expediting the rehabilitation program of the Alaska Railroad, and for the construction and maintenance of roads and bridges in Alaska. Other increases are for legislative expenses in Alaska and Hawaii, for care of insane natives of Alaska, and for defraying deficits

in the treasuries of the municipal governments of the Virgin Islands.

ANNUAL INDEFINITE AND PERMANENT APPROPRIATIONS AND TRUST ACCOUNTS

In addition to the annual appropriations described above, annual indefinite appropriations estimated at $10,868,915, permanent appropriations aggregating $26,861,397, and trust accounts aggregating $13,192,812 are recommended for the Department of the Interior for 1949. Of the total for trust accounts $9.8 million represents trust funds received in the Federal Treasury and credited to Indian tribes or bands under numerous acts of Congress; many of these acts also specify the disposition of these moneys, including such purposes as per capita distribution to the Indians, operation of Indian lumber mills, payment of attorney fees, and insurance on tribal property. The other large group of trust fund appropriations is that dealing with the Bureau of Reclamation, for which $2,177,612 is recommended for 1949.

Continuing Fund, Power Transmission Facilities—

This is a continuing fund of $100,000 derived from receipts from the transmission and sale of electric power and energy to be used to defray emergency expenses, to insure continuous operation of the facilities, and to cover the cost of the purchase of electric power and energy and the rentals and other costs in connection with the use of transmission lines and appurtenant facilities of other public agencies and private interests. The continuing fund is to be reimbursed from receipts, for such expenditures made therefrom, when necessary. In 1949 it is proposed to increase this continuing fund to $300,000. (*Act of Dec. 23, 1943, Public Law 216.*)

Payments From Proceeds of Sales, Motor-Propelled Vehicles, Etc., Department of the Interior—

Under the act of August 2, 1946, proceeds of sales of vehicles, equipment, accessories, and other items, the exchange of which is authorized by law, may be applied in whole or in part payment toward the purchase of similar items. Receipts from this source are set up in a special appropriation account available for the fiscal year in which the obligation to purchase the new equipment is incurred; any unobligated balance is subsequently adjusted to miscellaneous receipts (5 U. S. C. 118d–1).

Grand River Dam Project, Southwestern Power Administration—

Executive Order 9373, supplementing Executive Orders 9366 and 8944, authorized and directed the Secretary of the Interior to manage and operate the Grand River Dam project for the purpose of generating and supplying electric power for the manufacture of explosives or munitions of war, and for other purposes involving the safety of the United States. All moneys received as revenues from the sale and distribution of power and from other sources were placed to the credit of this fund to be used for the purposes of administration, construction, litigation, payment of interest on bonded indebtedness, redemption of bonds, etc., and operation of the project. In accordance with the Act of July 31, 1946 (Public Law 573), the physical properties of the Grand River Dam project were returned to the jurisdiction of the State of Oklahoma as of midnight, August 31, 1946. Under the terms of the legislation, the Secretary of the Interior was authorized to make such agreements as were necessary to liquidate the Government's functions with regard to the Grand River Dam project, and the funds in this account are available for that purpose.
