The administrative expenses for the Defense Homes Corporation and also for the supplemental development work in the veterans' re-use housing program authorized by Public Law 85, Eightieth Congress, approved May 31, 1947, are contained in these respective program budgets and are not included in this appropriation request. Authority for a single administrative expense account for the authorization requested herein is contained in The Government Corporations Appropriation Act, 1948.

Financial Organization

Distribution of administrative expenses to programs, legislative sources, and activities is a part of the process by which the budget estimates are prepared and approved budgets executed. This distribution is derived from detailed analyses and from special surveys which involve the recording by employees of time spent on each activity within the several programs. This record of time spent is converted by means of annual salaries and other costs to distribution factors so that each program bears its proportionate share of the total administrative expenses.

The distribution of costs by programs, activities, and sources of funds is shown in the following table:

Comparative statement of sources and application of funds

[Fiscal years ending June 30, 1947, 1948, and 1949]

	Actual, 1947	Estimate, 1948	Estimate, 1949
FUNDS APPLIED			
To administration of project development activity:			
Public war housing program	$948,400	$75,000	$25,000
Veterans' re-use housing program	5,790,500	215,500	190,370
United States Housing Act program	810,300	306,060	528,750
Total, development activity	7,549,200	596,560	744,120
To administration of project management activity:			
Public war housing program	4,586,642	5,513,510	3,286,200
Veterans' re-use housing program	1,138,200	302,700	792,900
Subsistence homesteads and greenbelt towns program	58,200	47,550	42,790
Homes conversion program	790,100	356,800	217,400
United States Housing Act program:			
Public Laws 412 and 671 projects	2,754,700	1,775,650	1,816,640
Public Works Administration projects	215,900	118,290	154,610
Total, management activity	9,543,742	8,114,500	6,310,540
To administration of project disposition activity:			
Public war housing program	1,881,200	2,552,600	3,754,520
Subsistence homesteads and greenbelt towns program	196,800	110,500	16,020
Homes conversion program	607,600	125,840	174,800
Total disposition activity	2,685,600	2,788,940	3,945,340
Total funds applied	19,778,542	11,500,000	11,000,000
FUNDS PROVIDED			
By appropriation:			
Public war housing program	$948,400	$75,000	$25,000
Veterans' re-use housing program	5,790,500	215,500	190,370
Total appropriations	6,738,900	290,500	215,370
By project income:			
Public war housing program	6,467,842	8,066,110	7,040,720
Veterans' re-use housing program	1,138,200	302,700	792,900
Subsistence homesteads and greenbelt towns program	255,000	158,050	58,810
Homes conversion program	1,397,700	482,640	392,200
United States Housing Act program: Public Works Administration projects	215,900	118,290	154,610
Total project income	9,474,642	9,127,790	8,439,240
By interest income: United States Housing Act program, Public Laws 412 and 671 projects	3,565,000	2,081,710	2,345,390
Total funds provided	19,778,542	11,500,000	11,000,000

Analysis of Budget Programs

The budget can best be explained by summarizing the development, management, and disposition activities which are discussed in detail in the five program budgets.

DEVELOPMENT

During fiscal year 1948 construction will be completed on 4,727 units in the original veterans' re-use housing program, and processing will also be completed on approximately 8,500 units covered by Public Law 85, Eightieth Congress. Concentration of effort on the completion of this construction program, the placing of primary emphasis on disposition activities, together with sharp reductions in personnel of the Administration during fiscal year 1948, will result in a substantial backlog of unfinished paper work in completing contract settlements and land acquisition for the veterans' re-use housing program and the public war housing program in fiscal year 1949.

The deferment of development in the United States Housing Act program of 159 urban and rural nonfarm low-rent projects as of June 30, 1947, was necessitated by the restrictive conditions of war. During the fiscal years 1948 and 1949 stabilization of construction costs is expected. Reactivation plans can therefore proceed in 1948 on 4 urban projects consisting of 2,926 units. In fiscal year 1949 an additional 8 urban projects are programmed for reactivation. Reactivation of urban projects will consist of preliminary planning prior to actual construction and for financial and other necessary assistance and supervision in connection with the 10 projects, consisting of 4,402 units, which are programed to be in construction by June 30, 1949.

Reasonably favorable conditions exist for the construction of rural nonfarm housing which will make possible the reactivation of 3 projects of 152 units in fiscal year 1948 and an additional 31 projects of 1,648 units during fiscal year 1949. Of this total of 34 projects, construction is programmed to start on 8 projects during the fiscal year 1949.

The net effect on administrative costs of (a) decreases due to construction completions and (b) increases due to clean-up and reactivation is an increase for administra-

Federal Reserve Bank of St. Louis

tion of these activities of $147,560 over fiscal year 1948. However, the 1949 estimate is nearly $6.8 million under the 1947 actual expenditure.

MANAGEMENT

Management activities must be sharply curtailed during fiscal year 1948 due to staff reductions and also to enable adequate emphasis on disposition activities. To this end, management activities in the veterans' re-use housing program are limited through most of the year to the review of tenant eligibility and of quarterly income and expense reports. Protection of the Government's interest requires that complete management services must be instituted in fiscal year 1949 which includes review of reports, rent schedules, tenant eligibility and over-all improvement of operations, as well as complete audits for the cumulative period of project management up to June 30, 1948. These management activities are provided for in fiscal year 1949. Despite increased emphasis in the management activities of the veterans' re-use housing program, a net reduction in administrative costs of $1,794,960 is proposed for fiscal year 1949. Changes in management work load enabling this reduction is illustrated in the following table:

Program	Units in management		
	Actual, June 30, 1947	Estimate, June 30, 1948	Estimate, June 30, 1949
Public war housing	409,830	321,830	188,830
Homes conversion	37,610	27,260	12,260
Veterans' re-use housing	168,197	181,446	181,446
United States Housing Act	189,879	189,879	190,305
Subsistence homesteads and greenbelt towns	2,874	2,397	2,263
Total	808,390	722,812	575,104

DISPOSITION

As of June 30, 1947, there were in the public war housing program some 163,674 units classified as permanent type dwellings; by June 30, 1949, only 12,674 permanent units will be left. Present plans call for the transfer of 20,000 units to low-rent use which will be sought only in those cases approved by the Congress as the result of formal requests for such transfer by local communities. In addition, 10,000 permanent units will be transferred to other Federal agencies and 121,000 units will be sold directly to veterans, occupants, and private investors.

It is also estimated that 80,000 units of various types of temporary housing, including trailers and trailer parks, will be demolished, transferred, or sold by June 30, 1949.

Leases under the homes conversion program are being canceled in advance of their contract expiration dates wherever final satisfactory settlements can be reached. During fiscal year 1948, 1,800 leases are scheduled for cancellation and 2,500 leases in fiscal year 1949. This will leave, as of June 30, 1949, only 1,911 leases out of the total of 6,211 in effect on June 30, 1947. The properties involved in these cancellations contain about 25,350 units.

Objectives for the subsistence homesteads and greenbelt towns program contemplate the disposition of all the subsistence homesteads units so that as of June 30, 1949, only 2,263 units in the 3 greenbelt towns will remain in this program under active management. Detailed planning is proceeding for the disposition of greenbelt towns.

These accelerated disposition activities, particularly in the public war housing and the homes conversion program, require an increase of $1,156,400 over fiscal year 1948 for this activity.

Comparison of positions with man-years of employment follows:

Class	Estimate, 1948		Estimate, 1949	
	Positions	Man-years	Positions	Man-years
Departmental	780	561.5	446	423.7
Field	2,522	1,760.9	1,879	1,800.0
Total	3,302	2,322.4	2,325	2,223.7

ESTIMATES OF AUTHORIZATION RELATING TO CORPORATE FUNDS

NOTE.—The text of general authorizing language, as incorporated in the Government Corporations Appropriation Act, 1948, and as proposed for 1949, will be found at the end of the "Summary Statements and General Language" of part III of the Budget.

Salaries and Expenses, Public Housing Administration, Housing and Home Finance Agency—

[Federal Public Housing Authority] *Public Housing Administration*: Of the amounts available by or pursuant to law for the administrative expenses of the [Federal Public Housing Authority] *Public Housing Administration* in carrying out duties imposed by or pursuant to law including not to exceed [$2,200,000] *$2,500,000* of the funds available for administrative expenses for the United States Housing Act program (all of which are hereby merged into a single administrative expense account), not to exceed [$11,500,000] *$11,000,000* shall be available for such expenses subject to the provisions of section 6 (b) of the act of September 1, 1937, as amended, 42 U. S. C. 1406 (b), including health service program as authorized by [the Act of August 8, 1946 (Public Law 658)] *law (5 U. S. C. 150)*: *Provided*, [That the number of officers and employees receiving compensation in excess of $4,500 per annum shall not exceed 20 per centum of the total number of officers and employees paid from such funds: *Provided further*,] That necessary expenses of providing representatives of the [Authority] *Administration* at the sites of non-Federal projects in connection with the construction of such non-Federal projects by public housing agencies with the aid of the [Authority] *Administration*, shall be compensated by such agencies by the payment of fixed fees which in the aggregate in relation to the development costs of such projects will cover the costs of rendering such services, and expenditures by the [Authority] *Administration* for such purpose shall be considered nonadministrative expenses, and funds received from such payments may be used only for the payment of necessary expenses of providing representatives of the [Authority] *Administration* at the sites of non-Federal projects or for administrative expenses of the [Authority] *Administration* not in excess of the amount authorized by the Congress[: *Provided*, That $175,000 shall be available only for the audit and revision of past accounting records]. (*The Government Corporations Appropriation Act, 1948.*)

The Public Housing Administration has undertaken to render services in connection with other programs for other agencies, for which these agencies reimburse the Administration. These programs, which are all being liquidated, are as follows:

Surplus Property Program

The Housing and Home Finance Agency was designated by the War Assets Administration as the disposal agency for surplus residential property. The Public Housing Administration was the designated agent of the Housing and Home Finance Agency to carry out the work assigned by the War Assets Administration. As of June 30, 1947, however, no new assignments were to be made, leaving 15 to be completed. It is expected that the program will be completed in fiscal year 1948.

Foreign Shelter Program

The Foreign Economic Administration designated the Public Housing Administration in November 1944, to procure, package, and transport prefabricated houses and barracks to the French and British Governments. The program was suspended after VJ-day and the Public Housing Administration now has practically liquidated this account.

ESTIMATES OF APPROPRIATION

Salaries and Expenses, War Assets Administration, Special Fund (Allotment to Housing and Home Finance Agency, Public Housing Administration)—

	Actual, 1947	Estimate, 1948	Estimate, 1949
Funds Available for Obligation			
Transferred from "Salaries and expenses, War Assets Administration, special fund"	$218,000	$75,000	
Unobligated balance, estimated savings	$19,930		
Total obligations (see schedules under War Assets Administration)	198,070	$75,000	

Defense Aid, Agriculture, Industrial, and Other Commodities (Allotment to Housing and Home Finance Agency, Public Housing Administration)—

	Actual, 1947	Estimate, 1948	Estimate, 1949
Prior year balance available	$9,892,851	$1,757,000	
Balance available in subsequent year	−1,757,000		
Transfer to "Defense aid, agriculture, industrial and other commodities"	−8,135,851	−1,757,000	
Total obligations			

Defense Aid, Special Fund (Allotment to Housing and Home Finance Agency, Public Housing Administration)—

	Actual, 1947	Estimate, 1948	Estimate, 1949
Prior year balance available	$61,216	$5,362	
Balance available in subsequent year	−5,362		
Transfer to "Defense aid, special fund"	−55,854	−5,362	
Total obligations			

Defense Aid, Liquidation, Lend-Lease Program (Allotment to Housing and Home Finance Agency, Public Housing Administration)—

	Actual, 1947	Estimate, 1948	Estimate, 1949
Funds Available for Obligation			
Transferred from "Defense aid, liquidation, lend-lease program"	$43,700		
Total obligations	43,700

NATIONAL HOUSING AGENCY

NOTE.—The major housing activities of the Federal Government formerly grouped under the National Housing Agency were permanently grouped in the Housing and Home Finance Agency by Reorganization Plan No. 3 as transmitted by the President to the Congress on May 27, 1947, and as made effective on July 27, 1947. At the same time the National Housing Agency ceased to exist. Estimates of appropriation previously appearing under this head now appear elsewhere in this Budget in accordance with the provisions of the cited enactment.

PANAMA RAILROAD COMPANY

Purpose and Financial Organization

The Panama Railroad Company was incorporated by an act of the Legislature of the State of New York on April 7, 1849. In 1904 the majority of its capital stock was acquired by the United States as a part of the assets of the New Panama Canal Company, which were purchased for $40,000,000, as authorized by the act of June 28, 1902 (34 Stat. 481). The remaining shares were purchased from private owners during 1905.

By Executive order of May 9, 1904, the President directed that the policy of the Panama Railroad Company be harmonized with the policy of the Government by making it an adjunct to the construction of the Canal, while at the same time fulfilling the purpose for which it was created. The Panama Canal Act, approved August 24, 1912, authorized the President to establish, maintain, and operate, through the Panama Railroad Company or otherwise, numerous types of business activities related to the Canal, and this legislation constitutes the basic statutory authority for the present activities of the Company.

The authorized and issued capital stock of the Company, consisting of 70,000 shares with a par value of $7,000,000, stands in the name of the Secretary of the Army, with the exception of 13 shares which are issued to the directors for qualification purposes but which remain in the custody of the Secretary of the Army. The Secretary nominates or approves the 13 directors who comprise the board of directors of the Company. The Governor and the engineer of maintenance of The Panama Canal are president and second vice president, respectively, of the Company and also members of its board of directors.

Although the Company is authorized by its charter to borrow money and to mortgage its property if necessary, it has not done so and has no bonded indebtedness. The Company has followed a very conservative financial policy, and its board of directors has set aside funds, invested in United States Government securities, to provide for the replacement of plant and equipment and for other important future expenditures. Funds which the board of directors considers to be in excess of the needs of the Company are paid as dividends into the Treasury of the United States.

Pursuant to section 304 (b) of the Government Corporation Control Act, a bill was drafted recommending that the Panama Railroad Company be reincorporated as a Federal corporation.

Analysis of Budget Program by Major Activities

The operations of the Panama Railroad Company comprise eight distinct functions, which are listed below and individually discussed in the following text: (1) Railroad, (2) harbor terminal facilities, (3) telephone system, (4) Hotel Tivoli, (5) Hotel Washington, (6) commissary division, (7) coaling plants, (8) New York office and steamship line. Statements of income and expenses for each of these functions are shown in schedule B–1.

Effective January 1, 1947, the operation of the Mindi dairy farm as a separate function of the Company was discontinued and the activity became one of the productive plants of the commissary division. The results of operations for the entire year are included in commissary operations.

Basic assumptions.—The estimates for fiscal years 1948 and 1949 are based on the assumption that the general level of activity on the Isthmus during both years will be approximately the same as during the last half of fiscal year 1947.

The volume of the Company's business is affected to a certain extent by world trade conditions, but it is largely dependent upon the activities of the various United States Government agencies in the Canal Zone. The present indications are that neither of these factors will change greatly in the near future, but unforeseen conditions may develop which will result in variations from the estimates as submitted. If a new project for improving the capacity and security of the Panama Canal should be adopted by the Congress prior to or during the fiscal year 1949 and appropriations made for initiating work on the project, it is expected that the estimated volume of business will be substantially increased.

Railroad (see schedule B–1).—The railroad comprises 50 miles of main line track between the cities of Panama and Colon, at the Pacific and Atlantic terminals of the Canal, and the usual appurtenances such as freight and passenger stations and terminals, railroad yards, industrial trackage, and the requisite rolling stock. The railroad serves The Panama Canal, the United States Army and Navy, and other Government agencies on the Isthmus, and also performs the functions of a common carrier in meeting the needs of the Republic of Panama, and commercial agencies transacting business in this area.

For purposes of administration and accounting, there are also included under this heading the incidental real estate activities of the Company. The $48,000 income from rentals is nearly all derived from rental of buildings.

The gross revenues from operations of the railroad during the fiscal year 1947 were $2,708,167 and for 1948 are estimated to be $2,435,000. It is estimated that in fiscal year 1949 the gross revenues will further decline to $2,375,000 as the result of the probable diversion of some passenger traffic to the trans-Isthmian highway which was constructed during the war.

While operating expenses will also be reduced, the reduction will not be proportionate to the decline in gross revenue. This is because a large part of the expense of operating and maintaining the railroad does not vary in direct ratio to the volume of traffic and must be incurred as long as required standards of service are maintained.

As the result of the anticipated decline in both gross revenues and expenses, it is estimated that net revenues of the railroad, which were $292,513 in fiscal year 1947, will be reduced to $131,800 in fiscal year 1948, and further reduced to $60,900 in 1949.

Harbor terminal facilities (see schedule B–1).—The harbor terminal facilities consist of docks, piers, and appurtenances necessary for handling, transferring, stevedoring, and storing cargo arriving at the Canal Zone ports of Cristobal and Balboa. This function also includes the custody and rental of the Colon stables.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

The gross revenues of the harbor terminals during fiscal year 1947 were $2,821,982 and are estimated to be $2,990,000 for each of fiscal years 1948 and 1949. The estimated increases in gross revenues as compared to fiscal year 1947 are based on an expected increase in the receipt of commercial cargo for transshipment.

Operating expenses for fiscal year 1948 are expected to increase as a result of increased business and the completion of several deferred maintenance projects, and it is estimated that they will amount to $2,780,300 in that year as compared to $2,489,445 in fiscal year 1947. Expenses for fiscal year 1949 are estimated to be $2,681,300, the decrease as compared to fiscal year 1948 being the result of reduced repair expenses.

The net income of the harbor terminals in 1947 was $343,260, and it is estimated to be $209,700 in fiscal year 1948 and $308,700 in fiscal year 1949.

Telephone system (see schedule B–1).—The telephone system provides telephone service for The Panama Canal and for the civilian communities in the Canal Zone. It also leases trunk lines, circuits, and duct space to the United States Army and Navy and to the Government of the Republic of Panama.

Gross revenues of the telephone system are estimated to be approximately the same for fiscal years 1948 and 1949 as for 1947. The net income for fiscal year 1947 was $56,026 and it is estimated that net income in fiscal years 1948 and 1949 will be $49,500 and $48,300 respectively. The decrease in net revenue is the result of increased operating expense, largely on account of increasing material costs.

Hotels Tivoli and Washington (see schedule B–1).—The Hotel Tivoli in Ancon, adjacent to Panama City, is an old frame structure of 132 rooms owned by The Panama Canal, built in 1906, and fully depreciated many years ago. It is operated by the Panama Railroad Company. The Hotel Washington in Colon is a concrete structure of 82 rooms, built in 1913 and owned by the Panama Railroad Company.

In the decade 1930–39 both hotels operated at a loss, their continued operation having been justified because of their status as essential adjuncts to The Panama Canal, or, more broadly speaking, to the United States Government in this area.

Business at the Hotel Tivoli is now maintained at a high level by transient guests from commercial air lines, and this business is expected to remain at about the same level during fiscal years 1948 and 1949. It is estimated that the net revenues of the Hotel Tivoli will be $5,000 in fiscal year 1948 and $20,000 in 1949. The Hotel Washington has little business from commercial air lines and it is estimated that it will show a deficit of $35,000 in fiscal year 1948 and a deficit of $27,000 in 1949. The decrease in the loss for 1949 as compared to 1948 is the result of an anticipated slight increase in tourist trade.

In a note accessory to the Treaty of 1936 between the United States and the Republic of Panama, the United States agreed that the hotel business proper would be left in the hands of Panamanian industry when suitable hotel accommodations were available in the Republic of Panama. Preparations are now under way for the construction of a large hotel in Panama City; the estimates have been prepared on the assumption that the new hotel will be in operation about the end of fiscal year 1949.

Commissary division (see schedule B–1).—The commissary division provides food supplies, clothing, and other essential requirements to Government employees and their families, to establishments of the United States Government located on the Isthmus, and to commercial shipping. In addition to 20 retail stores in Canal Zone communities, the division operates large dry and cold storage plants, a bakery, an ice-cream and milk-bottling plant, an industrial laboratory, an ice plant, an abattoir, and a coffee-roasting plant, primarily as processing plants to supply its retail stores, as well as a laundry. It also operates the Mindi Dairy, which prior to January 1, 1947, was conducted as a separate activity of the Company.

Commissary sales, excluding sales of services amounting to $548,744, totaled $31,729,719 in fiscal year 1947 and it is estimated that they will amount to $30,000,000 in each of fiscal years 1948 and 1949. The net revenue of the commissary division in fiscal year 1947 was $203,703, and it is estimated that it will amount to $200,000 in each of the fiscal years 1948 and 1949.

Coaling plants (see schedule B–1).—The Panama Railroad Company operates two coaling plants, one at each terminus of the Canal, to supply coal to shipping calling at Canal Zone ports. Shortly before the close of fiscal year 1946, the Balboa coaling plant was placed on an inoperative or stand-by basis and bunkering operations are confined to emergency demands. In addition to selling coal, the coaling plants derive revenue from vessels docking at coaling plant piers but not taking coal, and the Balboa plant handles sand brought by barge to the Canal from nearby deposits.

The net revenue of the coaling plants during fiscal year 1947 was $87,373. The reason for this favorable showing was that coal-burning vessels have continued to operate after the war to a greater extent than was expected. A contributing reason was the reclamation and sale of the remainder of a stock of coal of low inventory value that had been in subaqueous storage for many years at the Company's plant in Cristobal. It is anticipated, however, that demands for coal from shipping calling at the Canal will constantly diminish as coal-burning vessels are withdrawn from service and it is estimated that the net revenue from coaling plant operations will decline to $12,400 in fiscal year 1948 and to $5,300 in fiscal year 1949.

New York City office and steamship line (see schedule B–1).—The New York City office of the Panama Railroad Company is the general office of the Company maintained under its charter as a corporation of the State of New York; it is also the main office of the Company in the United States. Aside from the administration of its corporate affairs, it has control under the authority of the board of directors of all of the funds of the Company, except those required for working cash in the Canal Zone, and of the deposit and investment of those funds.

The New York office also has direct supervision over and responsibility for the operation of the steamship service and facilities in connection therewith, for the transportation of supplies, material, equipment, and personnel to the Canal Zone; the operation of a commissary purchasing department; and the necessary accounting required in connection with those activities.

The Company's steamship line comprises three identical cargo and passenger steamers of 10,000 gross tons each, built in 1939 at a total cost of $13,200,000, which normally maintain a weekly service between New York and Cristobal, Canal Zone. The steamship line is an essential adjunct to the operation and maintenance of The Panama Canal, furnishing ocean transportation for the large quantity of goods required by The Panama Canal and by the civilian communities in the Canal Zone, and furnishing

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

passenger transportation for civilian employees and their families between the Canal Zone and the United States.

During the war, all three steamers were withdrawn from the Company's service for use in the war effort. After the cessation of hostilities, they were returned to the Company and after undergoing some overhaul and rehabilitation were restored to their former service. The S. S. *Panama* resumed operations on September 20, 1946, the *Cristobal* on February 5, 1947, and the *Ancon* on June 26, 1947. Rehabilitation of the steamers *Panama* and *Cristobal* has not been completed and both steamers will again be temporarily withdrawn from service in fiscal year 1948 for completion of repairs and refitting.

The net income from steamship line operations during fiscal year 1947 was $174,124 and it is estimated that net income for fiscal years 1948 and 1949 will amount to $12,300 and $75,400, respectively. The low net income for fiscal year 1948 will be the result of the withdrawal of two of the steamers from service during the year for final rehabilitation, while in 1949 it is anticipated that they will be in full service during the entire fiscal year. It is expected that the three steamers will be running full time in 1949. This was not true in 1947. While expenses will increase in proportion to time of operation, it is not anticipated revenues will increase in the same proportion for the reason that the ships will probably not be running with full loads in 1949, especially freight loadings.

CAPITAL EXPENDITURES

The principal capital expenditures in fiscal year 1948 will be for a number of box cars for the railroad to complete a long-range program of freight car replacements, the replacement of certain cargo-handling equipment for the harbor terminals, telephone exchange equipment and cables, dry-cleaning equipment and an annex to the Ancon laundry, and preliminary work on a new ice-cream and milk-bottling plant. In fiscal year 1949 the principal expenditures will be for further replacement of box cars and cargo-handling equipment, the acquisition of new Diesel-powered passenger equipment for the railroad, completion of the laundry annex and the installation of dry-cleaning equipment, and additional work on the new ice-cream and milk-bottling plant. The amounts estimated to be expended are shown in schedule A–2.

Retirements of plant and equipment are estimated to amount to $147,000 in fiscal year 1948 and $90,000 in fiscal year 1949.

Operating Results

During the fiscal year 1947 the operations of the Company as a whole resulted in a net revenue of $956,834. This result is arrived at after making due provision for depreciation on the Company's physical plant, and takes into account accrued liabilities at the close of the fiscal year. During fiscal year 1947 a dividend of $1,250,000 was paid into the Treasury of the United States.

For fiscal year 1948, it is estimated that the operations of the Company as a whole will result in a net revenue of $664,960, and for fiscal year 1949 in a net revenue of $772,860, and it is estimated that a dividend of $700,000, or 10 percent on the capital stock, will be paid into the Treasury of the United States in each of these years.

Financial Condition

The comparative statement of financial condition, exhibit C, indicates that the Company has maintained a strong financial position. It has been unnecessary to borrow any funds for its operations. The earned surplus of the Company will be maintained at about $47,000,000 after payment of dividends to the United States Treasury. The greater portion of the earned surplus is invested in plants and facilities of the Company.

EFFECT ON GOVERNMENT BUDGET

Since the Panama Railroad Company does not make expenditures from general or special accounts in the Treasury or from checking accounts with the Treasurer, the only effect on the Government budget as a result of its operation results from the payment of dividends into the Treasury.

AUDIT BY THE GENERAL ACCOUNTING OFFICE

The accounts of the Company for fiscal years 1945 and 1946 were audited in fiscal year 1947 by the corporation audits division of the General Accounting Office and the audit of the accounts for fiscal year 1947 was begun just prior to the close of the fiscal year. No report of the result of the audits has yet been received by the Company.

Administrative Expenses

Administrative expenses applying to the general administration of the Company amount to less than 2 percent of sales. Included in these expenses are the New York City office and the administrative, fiscal, and legal services furnished by The Panama Canal on the Isthmus to the Panama Railroad Company.

Compliance with the limitations fixed by the Congress for the administrative expenses of the Panama Railroad Company in the fiscal years 1947 and 1948 has required the curtailment of important auditing and accounting work, a slight curtailment of personnel work, and the postponement of the contemplated expansion of the staff of the engineer of maintenance.

Estimates for fiscal year 1949 are based upon the resumption of normal administrative control over the operations of the Company. Detailed figures show increases as compared to 1948 estimates to cover Ramspeck promotions to employees in the New York City office and to cover the Panama Railroad Company's share of the cost of Ramspeck promotions in the comptroller's office, the office of the general counsel, general correspondence and records, pay-roll bureau, paymaster, and collector of The Panama Canal. In addition, it will be necessary to make increases in administrative expenses to cover the following items:

(*a*) *Transfer of roll keeping from the commissary division to the pay-roll bureau.*—Roll keeping is now handled as part of the commissary division's operations, and hence its expense is included in the direct operating expenses of the commissary. For better efficiency it is proposed to transfer this work to the central pay-roll bureau, and this will require a shift of $10,000 from operating expenses to administrative expenses.

(*b*) *Expansion of staff of engineer of maintenance.*—The engineer of maintenance is likewise second vice president of the Panama Railroad Company and, as such, is in direct charge of the Isthmian operations. It has been apparent for some time that his staff should be expanded for the adequate supervision and analysis of the many diverse operations of the Company, and this expansion was postponed to fiscal year 1949 only because of the limitation on administrative expenses.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

(c) *Increased personnel administration.*—An expansion of service by the personnel division of The Panama Canal will be required in connection with improved personnel procedures and techniques with respect to the native employees, including more adequate personnel records and the institution of efficiency ratings and job-analysis procedures.

However, as an offset to the above three increases, the cost of the following two services rendered by the accounting department of The Panama Canal for the Panama Railroad Company commissary has been reclassified as direct operating expense of that division rather than as an administrative expense of the Company as a whole:

(a) *Coupon audit.*—The coupon system is used by the commissaries in lieu of handling cash in the retail stores, and hence the cost of the system is actually a direct operating expense. The expense of manufacturing coupons and inspection thereof by employees of the accounting department is now treated as an operating expense of the commissary division, and the proposed reclassification of the coupon audit would make uniform the classification of all expense incident to the manufacturing of new coupons and the verification and destruction of used coupons.

(b) *Commissary contraband inspection.*—This service is provided by the accounting department in accordance with treaty commitments with the Republic of Panama and is designed to curtail purchases in Panama Railroad commissaries by persons not entitled to commissary privileges. It also is considered a direct operating expense.

When the original classification of administrative expenses was devised, in the absence of any clear-cut definition, it was assumed that all executive department and accounting department expenses on the Isthmus for work performed for the Panama Railroad Company (with the exception of the inspection of new coupons) would be classified as administrative expenses. However, it is apparent that both of the above-mentioned services pertain to the direct operations of the commissary division alone and not to the general administration of the Company as a whole, and it is accordingly proposed to classify them as operating expenses for fiscal year 1949.

COMPARATIVE STATEMENT OF INCOME AND EXPENSES

[Fiscal years ending June 30, 1947, 1948, and 1949]

	Actual, 1947		Estimate, 1948		Estimate, 1949	
Income:						
Sales of commodities	$32,265,238		$30,456,000		$30,390,000	
Sales of services	9,855,831		12,418,600		13,005,700	
Rents	48,739		48,000		48,000	
Interest income on U. S. Government securities	221,476		145,200		147,200	
Other interest	815		800		800	
Other income-profit from sale of assets	8,936					
Total income		$42,401,035		$43,068,600		$43,591,700
Expenses:						
Cost of commodities sold		27,166,116		25,465,000		25,365,200
Direct operating expenses		12,779,882		15,862,769		16,422,900
Administrative expenses		759,090		750,000		715,000
Depreciation (not included in cost of sales or direct operating expenses)		66,740		66,740		66,740
Contribution to pension fund		10,685				
Provision for postwar contingency—steamers		365,700				
Losses and charge-offs:						
Employees' leave payments	241,786		235,169		234,000	
Refrigerator guarantee cost	3,880		4,000		5,000	
Demolition of pier No. 2, Colon	10,723					
Demolition of wharf bunker, Cristobal	15,075					
Demolition of coaling plant structures	34,570		22,070		20,000	
Deferred maintenance expenses	39,929		7,643			
Losses on plant retirement	78,877		15,600			
		424,840		284,482		259,000
Total expenses		41,573,053		42,428,991		42,828,840
Net income before adjustment of reserves		827,982		639,609		762,860
Adjustment of reserves:						
Employees' accrued leave	18,323		502			
Refrigerator guarantees	232		[a] 4,864		[a] 10,000	
Demolition of pier No. 2, Colon	10,723					
Demolition of wharf bunker, Cristobal coaling plant	59,645		22,070		20,000	
Deferred maintenance, Hotel Tivoli	39,929		7,643			
Net adjustment of reserves		128,852		25,351		10,000
Net income for the year		956,834		664,960		772,860

ANALYSIS OF UNRESERVED SURPLUS

Balance at beginning of fiscal year	$45,777,236	$47,483,318	$47,448,278
Net income for the year (above)	956,834	664,960	772,860
Transfer from postwar contingency reserve, Isthmus	1,250,000		
Transfer from coaling plant contingency reserve	165,000		
Transfer from income reserved from funds invested in depreciation and contingency reserves	796,968

RECONSTRUCTION FINANCE CORPORATION AND SUBSIDIARIES

(FEDERAL NATIONAL MORTGAGE ASSOCIATION)

(U. S. COMMERCIAL COMPANY)

INTRODUCTION

For the purpose of clarity, necessitated primarily by many intercorporate transactions and a very close operating relationship between the Reconstruction Finance Corporation and its subsidiaries, the detailed budget estimates for the Corporation and its subsidiaries have been consolidated in one statement (exhibit A), preceded by a recapitulation by activities and by fiscal effect.

RECONSTRUCTION FINANCE CORPORATION

Purpose and Financial Organization

The Reconstruction Finance Corporation was created by act of Congress approved January 22, 1932. Its functions have been changed from time to time by amendatory and supplemental legislation, and its succession was extended to June 30, 1948 by Public Law 132, Eightieth Congress, approved June 30, 1947. Under the provisions of that act, the Corporation is authorized:

(1) To purchase the obligations of, and make loans to any business enterprise organized or operating under the laws of any State or of the United States;

(2) To make loans to any financial institution organized under the laws of any State or of the United States;

(3) To purchase the securities and obligations of, or to make loans to, (a) municipalities and political subdivisions of States, (b) public agencies and instrumentalities of one or more States, municipalities, and political subdivisions of States, and (c) public corporations, boards, and commissions, to aid in financing projects authorized under Federal, State, or municipal law (limited to $125 million by The Supplemental Government Corporations Appropriation Act, 1948, Public Law 256, 80th Cong.);

(4) To make such loans, in an aggregate amount not to exceed $25 million outstanding at any one time, as it may determine to be necessary or appropriate because of floods or other catastrophes;

(5) To exercise the functions, powers, duties, and authority of the Defense Plants Corporation, Metals Reserve Company, Rubber Reserve Company, Defense Supplies Corporation and Disaster Loan Corporation, which were transferred to the Reconstruction Finance Corporation by Public Law 109, Seventy-ninth Congress, but only with respect to programs, projects, or commitments outstanding at June 30, 1947;

(6) To liquidate the affairs of Smaller War Plants Corporation;

(7) To purchase any surplus property for resale to small business, subject to regulations of the War Assets Administrator or his successor. Such sales may be made on a credit or time basis.

The total amount of investments, loans, purchases, and commitments made pursuant to section 4 of the Reconstruction Finance Corporation Act, as amended, covering items (1), (2), (3), and (4) above, shall not exceed $2 billion outstanding at any one time.

In addition to the foregoing, the Corporation is authorized—

(*a*) To continue until June 30, 1949, or until such earlier time as the Congress shall otherwise provide, (1) to buy, sell, and transport tin, and tin ore and concentrates; (2) to improve, maintain, and operate by lease or otherwise the Government-owned tin smelter at Texas City, Tex.; (3) to finance research in tin smelting and processing; and (4) to do all other things necessary to the accomplishment of the foregoing. Act approved June 28, 1947 (Public Law 125, 80th Cong.); and

(*b*) To continue the manufacture and sale of synthetic rubber until March 31, 1948. Act approved March 29, 1947 (Public Law 24, 80th Cong.).

Under the provisions of section 203 of Public Law 132, Eightieth Congress, the assets and liabilities of The RFC Mortgage Company, a former subsidiary, were transferred to the Reconstruction Finance Corporation and all of its activities have ceased. There remains to be completed its technical dissolution under the laws of the State of Maryland, which dissolution will be effected prior to June 30, 1948. The assets and liabilities of War Damage Corporation will be transferred to the Reconstruction Finance Corporation during the fiscal year 1948 for liquidation and War Damage Corporation will be dissolved. The U. S. Commercial Company will be dissolved not later than June 30, 1948, and its assets and liabilities will be transferred to the Reconstruction Finance Corporation for liquidation.

The Corporation has outstanding capital stock of $325 million all of which is owned and held by the Secretary of the Treasury.

The act extending the Reconstruction Finance Corporation (Public Law 132, 80th Cong.) rescinded the several individual grants of authority to borrow from the Secretary of the Treasury and instead provides that the Corporation "may issue to the Secretary of the Treasury its notes, debentures, bonds or other such obligations in an amount outstanding at any one time sufficient to enable the Corporation to carry out its functions under this Act or any other provision of law." The act further provides that, "Each such obligation shall bear interest at a rate determined by the Secretary of the Treasury, taking into consideration the current average rate on outstanding marketable obligations of the United States as of the last day of the month preceding the issuance of the obligation of the Corporation."

Analysis of Budget Program

The activities of the Corporation and its subsidiaries during the fiscal year 1949 are expected to fall into three broad categories. They are, in the order of their importance from the standpoint of cost of administration and operating funds required, (1) lending activities, including the servicing of loans outstanding and securities held by the Corporation; (2) production and sale of tin and synthetic rubber; and (3) liquidation of other war and re-

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

lated activities. The budget estimates of the Corporation (and of its subsidiaries where applicable) are premised on the following general assumptions:

1. The life of the Reconstruction Finance Corporation will be extended by the Congress beyond June 30, 1948, and the Corporation will retain its present corporate powers and functions;
2. The Congress will authorize and direct the Corporation to continue to produce and sell synthetic rubber throughout the fiscal years 1948 and 1949;
3. The life of the U. S. Commercial Company will not be extended beyond June 30, 1948, and its present operations will have been completed by that date except for final liquidation;
4. The Corporation will not be authorized and directed to undertake any new functions;
5. Present economic conditions will continue through 1949 without appreciable change, particularly with respect to production, employment, prices, and wages;
6. Congress will authorize and direct the Secretary of the Treasury to cancel notes of the Corporation in an amount equal to its unrecovered costs incurred in carrying out its national defense, war and related activities, thereby removing an increasing annual charge to the Federal Budget for interest on such notes, offset by equivalent reduction in the apparent revenues of the Government.

In order to clearly indicate the effect of the net budget of the Corporation and its subsidiaries upon the over-all Federal Budget, estimates (exhibit A) are divided into four parts. Although the books of the Corporation are maintained on an accrual basis and the statements of income and expenses and financial condition which are a part of this budget are prepared on that basis, exhibit A has been prepared to show the estimates for the various programs and transactions on a cash basis. In the narrative discussion which follows, all reference to estimated amounts are to those shown in exhibit A. Parts I and II of the exhibit reflect, respectively, lending and nonlending transactions between the Corporation and individuals, firms, or agencies outside of the Federal Government; part III summarizes administrative expenses relating to all of the activities of the Corporation and its subsidiaries; and part IV sets forth transactions between the Corporation and other agencies and departments of the Federal Government.

Lending Activities

(See part I of exhibit A)

The purposes for which the Corporation makes loans or purchases securities, and the limitations upon the Corporation with respect to the volume of such business, are stated above under the heading, "Purpose and financial organization." In brief, the Corporation may purchase obligations of, or make loans to, business enterprises, public bodies, and to agencies and instrumentalities of public bodies, and may make loans to financial institutions. It may also make catastrophe loans.

Before financial assistance can be obtained from the Corporation, the applicant must present tangible evidence that the financial assistance requested is not obtainable from private lending sources on reasonable terms. The terms and conditions upon which Reconstruction Finance Corporation extends financial assistance are always such that it does not compete with private sources of credit.

More than 90 percent of the number of loans currently being made by the Corporation are to business enterprises. The Corporation considers applications for loans from such enterprises for the following purposes, provided the loans are not considered inflationary in character and the making of the loans would be consistent with current national economic policy:

1. Working capital;
2. Plant reconversion or expansion;
3. Financing surplus property purchases by small business;
4. Future requirements so that industry may proceed with plans for rehabilitation, expansion, etc.

Significant facts and estimates concerning the Corporation's loan activities follow in succeeding paragraphs of this statement.

Business enterprise loans and participations

The heavy demand upon the Corporation for loans to business enterprises is illustrated by the fact that disbursements for this purpose were two and one-half times as great in the fiscal year 1947 as in the previous year, having increased from $36 million to approximately $91 million. Of the total disbursed in the fiscal year 1947, 40 percent or $37 million, was disbursed in the last quarter. Indications are that the current upward trend of direct business loans will continue through most of the fiscal year 1948 with a possible leveling off toward the end of the year and a slight decline in the fiscal year 1949. However, disbursements to banks on the Corporation's outstanding commitments for participation loans will increase. Such commitments amounted to approximately $300 million at June 30, 1947. Based upon these factors, it is estimated that the Corporation's disbursements for business loans during the fiscal year 1949 will amount to $150 million as compared to $155 million in the fiscal year 1948. Even though all credit of an inflationary character is curtailed, the present trend in demand for loans, especially loans to increase production, is such that these estimates may prove to be too low.

A significant development during the fiscal year 1947 in the making of loans to business enterprises was the establishment of the small-loan participation plan. This plan was established in January 1947, and was designed to make long-term credit more readily available to small-business enterprises through regular banking channels, with participation of the Reconstruction Finance Corporation in cases where banks could not or would not make the loans without such participation. Under the plan the Corporation agrees to participate up to 75 percent in business loans of $100,000 or less upon application by the bank. Application by the borrower is not required by the Corporation inasmuch as the plan provides that consideration of the loan will be based on information furnished by the bank. The plan is particularly significant in that it makes the loan services of the Corporation more conveniently available in practically every city and town in the country, at far less cost to the Government than otherwise would be possible; it makes the facilities of commercial banks available to handle the demand for small-business loans which the banks cannot or will not handle wholly at their own risk; and it reduces the potential financial demand on the Government to the extent that the Corporation actually may have to disburse only a small portion of its participation commitments. In the absence of the plan the Corporation would likely have to disburse a much larger total of funds by way of many

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

more direct loans. From January 1947, the date this plan was established, through March 31, 1947, a total of 549 loans were approved under the plan with the Corporation's commitments to participate amounting to $13,061,000. During the quarter ended June 30, 1947, 1,090 loans were approved with the Corporation's commitments to participate amounting to $27,279,000.

PUBLIC AGENCY LOANS

The demand for loans by the Corporation to public agencies or purchase of their securities or other obligations is heaviest in periods when it is necessary for the Federal Government, States, and municipalities to promote employment and production. Consequently, there is not a heavy demand for such financing at this time.

The Corporation had outstanding commitments of $44,211,000 on June 30, 1946 for loans of this character, and made new commitments of $768,000 during the fiscal year 1947, exclusive of $347,000 of commitments for drainage, levee, and irrigation loans. Disbursements during the 1947 fiscal year against such commitments amounted to $15,317,000. After deducting commitment cancellations of $685,000, there was a commitment balance of $29,294,000 outstanding at June 30, 1947; the latter amount is included in the total of $29,765,000 shown on schedule C–1, the difference representing undisbursed commitments for drainage, levee, and irrigation district loans. It is estimated that new commitments will amount to $50.3 million and to $28,750,000 for the fiscal years 1948 and 1949, respectively, and that disbursements will amount to $29,346,000 during the fiscal year 1948 and $33.8 million during the fiscal year 1949.

CATASTROPHE LOANS

There were 14 major catastrophes in the United States during the fiscal year 1947, principally storms and floods, the most damaging of which were the flood of the Mississippi River and its tributaries, and the tornado in the Oklahoma-Texas Panhandle area. The Corporation approved 83 catastrophe loans for a total of $383,000 during the year, of which 79 in the amount of $339,000 were approved in the last quarter; however, due to the loans having been approved so late in the fiscal year, only $54,000 had been disbursed by June 30, 1947. Taking into consideration the substantial carry-over of commitments into the fiscal year 1948, and assuming comparable experience as to the extent and number of catastrophes in the fiscal years 1948 and 1949 as in 1947 and prior years, it is estimated that total disbursements in each of the fiscal years 1948 and 1949 for catastrophe loans will amount to $900,000. This amount could, of course, prove to be entirely inadequate.

OTHER LOANS AND SECURITIES PURCHASED

The Reconstruction Finance Corporation Act, as amended (Public Law 132, 80th Cong.), authorizes the Corporation to make loans and to purchase the securities of the four types previously discussed, and further authorizes the Corporation to carry out its commitments existing at June 30, 1947, with respect to all other types of loans and security purchases which it was authorized to make prior to that date. There follows a brief summary of the extent of such commitments and the estimated future disbursements to be made thereunder:

Type of loan or purchase of securities:	*Commitments outstanding at June 30, 1947*
United Kingdom of Great Britain and Northern Ireland	$35, 000, 000
Veterans' guaranteed home mortgages	81, 260, 000
Rural Electrification Administration	329, 300, 000
Secretary of Agriculture:	
Farm tenancy	63, 040, 000
Rural rehabilitation	1, 150, 000
National defense loans and participations:	
Reconstruction Finance Corporation	36, 380, 000
Smaller War Plants Corporation	9, 950, 000
All others	11, 400, 000
Total	567, 480, 000

No disbursements will be made against outstanding commitments to the Rural Electrification Administration and to the Secretary of Agriculture as the Corporation's liability on such commitments has been transferred to the Secretary of the Treasury in the fiscal year 1948 under the provisions of the Department of Agriculture Appropriation Act, 1948, Public Law 266, Eightieth Congress. It is not expected that any disbursements will be made against the outstanding commitment to the United Kingdom of Great Britain and Northern Ireland. It is estimated that $113 million will be disbursed against the balance of the foregoing commitments during the fiscal year 1948, and that the remainder will be canceled. Of the foregoing disbursements, $78 million will represent purchases of veterans' guaranteed home mortgages.

SERVICING LOANS, SECURITIES, AND ACQUIRED COLLATERAL

There are three basic principles in the loan-servicing policy of the Corporation which, it is felt, are consistent with the policy followed by the Corporation when loans are originally made or securities purchased. Those basic principles are to:

1. Recover all funds loaned without loss to the Government;
2. Exert all reasonable means to assist delinquent creditors in working out their financial difficulties;
3. Cooperate with borrowers in an effort to get their loans or other obligations in such condition that they will represent attractive investments to private lending institutions; and by judicious sale of such loans and obligations, reduce the amount of Government funds required to carry out the Corporation's lending responsibilities.

In addition to the work involved in applying the foregoing policy, the Corporation must incur the expense necessary to determine that the collateral to its loans and investments is being properly used and protected and that all other terms of the loan agreements are being met.

Exclusive of loans to Rural Electrification Administration and the Secretary of Agriculture, the advance of $175 million to the Secretary of State, and capital stock in Federal Home Loan Banks, the Corporation held at June 30, 1947, loans and securities approximating $1.1 billion to be serviced. It is estimated that total loans and securities outstanding at June 30, 1948, will amount to $1,165 million and to $1,155 million at June 30, 1949. In addition to the foregoing the Corporation held collateral acquired through foreclosure or forfeiture in the amount of $21,920,000 at June 30, 1947, which must be liquidated in an orderly manner. It is expected that such additional collateral will be acquired during the fiscal year 1948 in the amount of $4 million and in the amount of $6 million during the fiscal year 1949.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Total estimated collections on principal of loans, and receipts from the sale of securities for the fiscal years 1948 and 1949 amount to $207,413,000 and $192,093,000, respectively. It also is estimated that the Corporation will effect recoveries of $5,529,000 during the fiscal year 1948 and $1,205,000 during the fiscal year 1949 from the sale or other disposition of acquired collateral. Interest and dividends on loans and investments are estimated at $35.3 million for the fiscal year 1948, and $37 million for the fiscal year 1949. The foregoing amounts include $500,000 and $250,000, respectively, representing interest income on Smaller War Plants Corporation loans. (For full details on disbursements and receipts see exhibit A. For details on commitments and loans outstanding see schedule C–1.)

PURCHASE OF SURPLUS PROPERTY FOR RESALE TO SMALL BUSINESS

Since this activity involves time or credit sales and the administrative costs are charged to the regular lending activities of the Reconstruction Finance Corporation, the following operating estimates are reflected under "Lending operations."

During a period of approximately 8 months in the fiscal year 1947, the Corporation purchased and resold to small businesses surplus property having a value of $40.6 million. Since the Congress in Public Law 132, Eightieth Congress, authorized the Corporation to continue this activity, a substantial demand for such accommodation purchases has again developed. It is estimated that such purchases and sales will amount to $25 million during the fiscal year 1948, but as the supply of surplus property of the type in demand by small business is likely to be greatly diminished by the beginning of the fiscal year 1949, only $3 million of such transactions are expected in that year.

Nonlending Activities—Defense, War, and Reconversion

(See part II of exhibit A)

The nonlending activities of the Corporation in the fiscal year 1948 are of three major types, namely: (*a*) Production and sale of tin and synthetic rubber; (*b*) purchase and sale of other commodities, and (*c*) liquidation of other war programs. In the fiscal year 1949 nonlending activities will consist of (*a*) and (*c*) above.

Production and Sale of Tin and Synthetic Rubber

Production and sale of tin.—Public Law 125, Eightieth Congress, approved June 28, 1947, authorized and directed the Corporation as long as it has succession, to continue the Texas City Tin Smelter in full production until June 30, 1949, "or until such earlier time as the Congress shall otherwise provide." This authority included the power "(1) to buy, sell, and transport tin, and tin ores and concentrates; and (2) to finance research in tin smelting and processing."

Disbursements for the purchase of tin, tin ores, and concentrates amounted to $48,763,800 during the fiscal year 1947 and are estimated at $108,236,000 during each of the fiscal years 1948 and 1949. Receipts from the sale of tin are estimated at $125,440,000 for the fiscal year 1948 and $143,360,000 for the fiscal year 1949. This compares with $87,081,000 received from sales during the fiscal year 1947. During the 1948 fiscal year it is expected that it will cost $5 million to operate the smelter (included in cost of tin above), $2 million for plant improvement, and that $500,000 will be disbursed to finance research in tin smelting and processing. This latter sum is included in total "Research and development" cost of $3.1 million reflected in exhibit A, the balance representing similar costs to be incurred in connection with synthetic rubber. Like amounts are estimated for the fiscal year 1949, except that the cost of plant improvement is estimated at only $1 million during that year.

Production and sale of synthetic rubber.—Public Law 24, Eightieth Congress, approved March 29, 1947, directed the Corporation to continue the manufacture and sale of synthetic rubber until March 31, 1948, including the conduct of research essential to the development of the synthetic rubber industry. The ultimate disposition of the synthetic rubber program upon expiration of existing law depends upon the outcome of a congressional study of the matter, currently in progress, and cannot be predicted now. The program may be turned over to private industry, assigned to another Government agency to administer, or retained by Reconstruction Finance Corporation. The latter assumption has been accepted for the purpose of this budget.

In line with the views of the Inter-Agency Policy Committee on Rubber, it is expected that the Corporation will be required to produce 328,600 long tons of synthetic rubber in the fiscal year 1948 and 301,000 long tons in the fiscal year 1949. Based on present cost of production, it is estimated that disbursements for production costs, exclusive of plant depreciation, will amount to $109,008,000 in the fiscal year 1948 and to $98,914,000 in the fiscal year 1949. Receipts from sales are estimated at $145,872,000 and at $129,572,000 for the fiscal years 1948 and 1949, respectively. Disbursements for production costs of synthetic rubber in the fiscal year 1947 were $199,218,000 and receipts from sales amounted to $279,044,000.

It is anticipated that during the fiscal year 1948 disbursements for plant improvements will amount to $4 million, placing plants in stand-by condition and maintaining such plants will amount to $6.9 million, and $2.6 million will be disbursed to cover the cost of research, development, and testing. Similar items of estimated cost for the fiscal year 1949 are $4 million, $6.5 million, and $2.6 million, respectively.

PURCHASE AND SALE OF OTHER COMMODITIES

The purchase and sale of other strategic metals and supplies will continue in the fiscal year 1948 until such time as contracts outstanding at June 30, 1947, have been completed. Principal items involved are antimony, copper, tungsten, alcohol, fibers, and molasses. Disbursements for this purpose, exclusive of U. S. Commercial Company transactions, are estimated at $66,081,500 and receipts from sales are expected to amount to $130,023,400. No purchases and sales of this character are expected to occur in the fiscal year 1949.

The Corporation is under obligation to accept the tender of prefabricated houses and new-type building materials under the provisions of contracts guaranteeing markets for such products to their manufacturers. These contracts were negotiated as directed by the Housing Expediter pursuant to section 12 of the Veterans' Emergency Housing Act. The Corporation must be prepared to effect payment for any such houses or materials tendered, and based on a current review of the contracts and a discussion of the matter with the Office of the Housing

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Expediter, it would appear that the Corporation will probably have to take over $11.5 million of such houses and materials in the fiscal year 1948. It is further estimated that these houses and materials can be disposed of by the Corporation during the year for $5.5 million. These amounts are included in total estimated purchases and sales of strategic materials as indicated above. No transactions of this character are anticipated in the fiscal year 1949 other than the possible disposition of any remaining inventories at June 30, 1948.

LIQUIDATION OF OTHER WAR PROGRAMS

The Corporation has a number of activities which up to the present have been major programs, but which are now entering their final termination stage or are in process of final liquidation. These activities consist of:

(1) Disposition of defense plants and equipment;
(2) Disposition of the fiber plantations;
(3) Transfer of commodities to national stock pile;
(4) Final settlement of subsidy claims and reclaims;
(5) Termination of leases and disposal of Smaller War Plants Corporation plants;
(6) Final liquidation of War Damage Corporation affairs;
(7) Final liquidation of U. S. Commercial Company affairs; and
(8) Determination of legal questions and conduct of litigation growing out of and relating to activities of the Reconstruction Finance Corporation and its subsidiaries during the defense and war periods.

A brief discussion of the current status and plans for concluding each of these activities follows:

Disposition of defense plants and equipment.—By way of reference an entire plant owned by the Corporation or equipment installed in a plant owned by a lessee is referred to as a "plancor" in this statement.

Exclusive of the synthetic-rubber plants, the Texas City Tin Smelter, and the fiber plantations, the Corporation held at June 30, 1947, defense plants and equipment with a book value of $1,244,565,000 (after a write-off of freight and installation charges of approximately $406 million), all of which will be declared surplus, sold to lessees in possession, or taken over by the Army and Navy during the fiscal year 1948, with the exception of some 62 plancors with a book value of $200,565,000 which will still be under lease at June 30, 1948.

Of the total estimated dispositions during the fiscal year 1948, it is expected that plancors with a book value of $994 million will be declared surplus, including plants and equipment which will be taken over by the Army and Navy under the provision of Public Law 364, Eightieth Congress. The Corporation will not receive any cash consideration from either type of disposition. In the case of plancors declared surplus to War Assets Administration, it has been agreed that the proceeds from sales will be paid into the Treasury of the United States as miscellaneous receipts. In the case of plants turned over to the Army or the Navy, the law provides that such transfers will be made without consideration or reimbursement to the Corporation. It is estimated that the balance of plant disposal, with a book value of $50 million, will be by sales to lessees in possession, and that the consideration therefor will be $21.3 million, of which $16 million will be in cash at date of sale. This amount is reflected on exhibit A in total estimated receipts from sale of plants of $19,337,000. The balance of this sum represents $675,000 to be derived from sales of Smaller War Plants Corporation plants and $2,662,000 of miscellaneous recoveries.

As indicated above, it is expected that the Corporation will have 62 plancors under lease at June 30, 1948, with a book value of $200,565,000. It is anticipated that leases on 14 of these plancors, covering plants and equipment with a book value of $31,754,000, will expire or be terminated during the fiscal year 1949. All of these will be declared surplus to War Assets Administration, except for plants with a book value of $4 million, which will be sold for cash to lessees in possession.

Capital expenditures for the improvement and maintenance of plants under lease are expected to amount to $2.1 million in the 1948 fiscal year and to $500,000 during the fiscal year 1949. Total disbursements for the fiscal year 1948 per exhibit A amount to $2,572,000. This includes $472,000 of expenditures for machinery for processing fibers as is indicated under "Disposition of fiber plantations" discussed below. Plant project costs, such as shut-down, clearance, protection, and maintenance, are estimated at $6,937,000 (including $37,000 on Smaller War Plants Corporation plants) for the fiscal year 1948 and $1.5 million for the fiscal year 1949.

It is expected that rental income on plancors under lease during each of the fiscal years 1948 and 1949 will amount to $18.1 million and $9 million, respectively, including rental income of $500,000 and $250,000 from Smaller War Plants Corporation plants.

Of the total synthetic rubber plants and equipment owned by the Corporation at June 30, 1947, it is estimated that six plants with a value of $67,638,000 will be declared surplus during the fiscal year 1948. No surplus declarations or sales of synthetic plants are anticipated during the fiscal year 1949.

Disposition of fiber plantations.—The Corporation has six fiber plantations located in Costa Rica, Guatemala, Honduras, Panama, and Haiti. The one in Haiti is owned outright, while the other five plantations, located in Central America and Panama, are on leased land. The original agreements covering the establishment and operation of these plantations run until December 31, 1948. The Corporation is currently endeavoring to dispose of these plantations, but there is a possibility that it may not accomplish final disposal before the agreements expire. However, current operations are resulting in a profit to the Corporation which in effect is enabling the Corporation to recover a part of its capital investment of $13,280,000.

During the fiscal year 1948 the Corporation will spend approximately $472,000 for new and additional machinery for processing fiber and for repairs and additions to buildings. It is estimated that normal operating costs, charged as cost of fiber, will amount to $5,731,500, and that fiber with a sales value of $8,965,300 will be received and sold to industry in the United States. Comparable estimates for the fiscal year 1949 are $2.7 million and $5,010,000, respectively.

Transfer of commodities to the national stock pile.—In addition to the commodities discussed under the section captioned "Purchase and sale of other commodities," the Corporation owned inventories of critical materials at June 30, 1947, costing $199,293,000 which are to be transferred to the Bureau of Federal Supply of the Treasury Department for national stock pile in accordance with provisions of the Strategic and Critical Materials Stock Piling Act (Public Law 520, 79th Cong.). These inventories consist of natural rubber, carried at a cost of $134,008,000, and certain metals and supplies costing $65,285,000.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

It now appears that all or most of these inventories will be declared to the Bureau of Federal Supply during the fiscal year 1948 but that necessary processing and actual transfer to permanent stock-pile location cannot be completed until the fiscal year 1949, or possibly later. With respect to much of the material to be transferred, it is necessary that it be processed into form suitable for long-term storage and then transported to permanent stock-pile locations. It is estimated that the cost of processing will amount to $7,418,780 in the fiscal year 1948 and $18,250,000 in 1949. The cost of freight, storage, and handling after acceptance of the material by the Bureau of Federal Supply is estimated at $7,317,000 in the fiscal year 1948 (included in the total of $9,426,000 shown in exhibit A. The balance relates primarily to synthetic rubber.) In the fiscal year 1949 such costs are estimated at $3 million (included in the total of $4,444,000 in exhibit A).

Under the provisions of the Strategic and Critical Materials Stock Piling Act (Public Law 520, 79th Cong.), the Secretary of the Treasury is authorized to cancel notes of the Corporation in an amount equivalent to the fair market value of materials transferred to stock pile. In order to arrive at "fair market value" it has been necessary to weigh, sample, test, and otherwise assay the materials actually transferred, thereby establishing the exact amounts for which notes were to be canceled. This has resulted in unnecessary expense and delay in effecting the stock-pile transfer. To expedite this operation and be consistent with the policy adopted by the Corporation in requesting War Assets Administration to pay into the miscellaneous receipts account of the Treasury the proceeds of the sale of other surplus property declared to War Assets Administration, it is now proposed that the transfer to the Bureau of Federal Supply shall also be made without reimbursement by way of note cancellation for the fair market value. Instead, the book values of such inventories are to be charged off as unrecoverable costs against net expenses of nonlending activities for national defense, war, and related purposes. It is contemplated, however, that the Secretary of the Treasury shall cancel notes of the Reconstruction Finance Corporation in an amount equivalent to the costs incurred by the Corporation subsequent to June 30, 1947, for handling, storing, processing, and transporting any materials transferred. The estimates of such costs are stated above. It is estimated that there will be canceled by the Secretary of the Treasury as reimbursement of these costs, $10 million of the Corporation's notes during the fiscal year 1948 and $20 million of notes during 1949, leaving $5,986,000 to be canceled in subsequent periods. The book values of inventories to be charged off as unrecoverable costs are estimated at $322,259,655 in 1948 and $23,023,679 in 1949.

Final settlement of subsidy claims and reclaims.—It is contemplated that the subsidy program will have been completely liquidated during the fiscal year 1948 except for cases that may be in litigation at June 30, 1948. It is estimated that a total of $24,539,600 will be disbursed by the Corporation during fiscal year 1948 in settlement of pending subsidy claims other than those that may be in litigation as stated above. No provision has been made for any subsidy payments in the fiscal year 1949.

Termination of leases and disposal of Smaller War Plants Corporation plants and equipment.—Liquidation of outstanding loans made by Smaller War Plants Corporation has been discussed under the lending activities of the Reconstruction Finance Corporation. In addition to loans and acquired loan collateral, the Corporation held at June 30, 1947, Smaller War Plants Corporation plants and equipment with a book value of $4,350,000 of which $4,308,000 of plants and equipment were still under lease at June 30, 1947. It is estimated that plants and equipment with a value of $256,000 will be declared surplus during the fiscal year 1948, and that the remaining plants and equipment will be declared surplus during the fiscal year 1949. Proceeds from the sale of such plants and equipment will be paid into the Treasury of the United States as miscellaneous receipts by War Assets Administration. It is estimated that cash sales of machinery and equipment will amount to $675,000 which is included in total receipts from plant sales of $19,337,000 appearing in exhibit A. Rental income from leased plants is expected to amount to $500,000 in the fiscal year 1948 and to $250,000 in the fiscal year 1949. These amounts are reflected in total "Rental on plants and facilities" shown in exhibit A. (See schedule C–3 summarizing the progress in liquidation of the affairs of Smaller War Plants Corporation.)

Final liquidation of War Damage Corporation affairs.—Subsequent to the passage of Public Law 268, Eightieth Congress, approved July 30, 1947, the Reconstruction Finance Corporation paid into the Treasury of the United States $209,827,810 representing the profit realized by War Damage Corporation from its operations, exclusive of the participating interest of its fiduciary agents. It is expected that an audit of all fiduciary agents and the payment of their participating share of the profits of the Corporation will be completed in the fiscal year 1948. It is also anticipated that all claims will have been settled with the possible exception of two suits in litigation that are being handled by the Department of Justice. It is expected that total payments in the settlement of claims in the fiscal year 1948 will amount to $637,000 and $20,016,000 will be disbursed in the payment of participating profits to fiduciary agents. There is no provision in the budget for any disbursements or receipts in the fiscal year 1949 in connection with the liquidation of the affairs of War Damage Corporation.

Final liquidation of U. S. Commercial Company affairs.—Operations and budget estimates for the U. S. Commercial Company for the fiscal year 1948 are reflected under the section of this statement titled "U. S. Commercial Company," inasmuch as the Company will be dissolved on or before June 30, 1948, and the responsibility for the liquidation of its remaining affairs transferred to the Reconstruction Finance Corporation. Subsequent to that date the Corporation will necessarily have to establish complete and final accounting for the Company's operations, perform such audit work as may be required, and settle all matters then in litigation or dispute. It is anticipated that such work will be completed by December 31, 1948, and it is not expected that this activity will result in any receipts or disbursements other than required administrative expenses.

Determination of legal questions and conduct of litigation growing out of and relating to wartime activities of Reconstruction Finance Corporation and its subsidiaries.—The liquidation of the subsidiaries of the Reconstruction Finance Corporation and the final disposition of their assets and liabilities have presented and continue to present numerous difficult legal problems and many litigated cases. Cases in active litigation reached the high figure of 806 on June 30, 1947. Of these more than 50 percent grew out of, or were related to wartime activities. In many of them the amounts involved are large, the questions are difficult, and the procedure complex. Consequently, the handling of these suits is both expensive and time consuming.

Federal Reserve Bank of St. Louis

Administrative Expenses

On the basis of the assumptions on which this budget has been developed, the anticipated rate of liquidation of war and related activities, and as a result of efforts devoted by the Corporation to streamlining its organization, improving procedures, and eliminating duplication of work wherever found, administrative expenses of the Corporation for the fiscal year 1948 will be substantially below similar expenses for the fiscal year 1947, and substantial further reductions will be made in the fiscal year 1949.

The following table indicates the extent to which personnel and administrative costs have been or will be reduced from the beginning of the fiscal year 1947 to the close of the fiscal year 1949:

	Number of employees	Annual rate of expenditure		
		Salaries	Other	Total
July 15, 1946	12, 229	$47, 436, 291	$15, 623, 547	$63, 059, 838
July 1, 1947	7, 711	31, 537, 990	10, 223, 260	41, 761, 250
July 1, 1948	5, 699	23, 447, 848	5, 861, 962	29, 309, 810
July 1, 1949	4, 893	20, 144, 340	5, 036, 085	25, 180, 425

In view of the major changes in organization and operations that have been effected by the Corporation, and contemplated major changes of this character, it is difficult to project future administrative requirements with exactness. For example, information concerning the effectiveness of efforts in this direction which has become available since the Corporation's revised budget for the fiscal year 1948 was submitted, now indicates that administrative expenses for the fiscal year 1948 will be $3,719,700 less than was then estimated. Of the foregoing amount, $1,120,000 represents an accounting adjustment necessitated by the revised accounting practice of the Corporation whereunder employees' annual leave will be recognized as an expense and a liability, currently as earned; and accrued annual leave standing to the credit of terminated employees will be charged to the reserve thus provided. The remainder of the estimated reduction, $2,599,700, represents further actual savings to be realized through the simplification of organization, methods and procedures, and the liquidation of activities more expeditiously than was foreseen at the time the budget for the fiscal year 1948 was prepared. It is estimated that administrative expenses to be under limitation for the fiscal year 1949 will amount to $25,796,000, or $12,958,700 less than the amount authorized for the fiscal year 1948, and $9,339,000 less than presently anticipated expenditures in fiscal year 1948. Administrative-type expenses not under limitation are estimated at $685,000.

For purposes of comparability, administrative expenses for the fiscal year 1947 have been adjusted to include expenses of a character which during that year were classified as nonadministrative, but which in the fiscal years 1948 and 1949 are classified as administrative in line with the authorizing language adopted for use by the Corporation for the fiscal year 1948. For detail estimates and comparison see "Estimates of authorization relating to corporate funds" and part III of exhibit A.

Language

Authorizing language for the Reconstruction Finance Corporation and its subsidiaries follows the budget exhibits and schedules.

Recognition of Capital Impairment

Section 102 of the Government Corporation Control Act (Public Law 248, 79th Cong.) requires submission with the annual budget program of a statement of the appropriation required to provide for the restoration of capital impairment.

The cumulative unrecoverable net cost to the Corporation and its subsidiaries of the programs involving national defense, war and related activities (exclusive of the War Damage insurance program) aggregated $8,632,714,519 through June 30, 1947. As of that date, the Corporation held assets valued at $681,022,012 (the estimated recovery value) on which no recovery will be realized by the Corporation since any receipts from disposition thereof will be deposited in miscellaneous receipts of the Treasury. This made a total of $9,313,736,531 of unrecovered costs and net expenses on the nonlending programs involving national defense, war, and related purposes.

These unrecovered costs have been financed by borrowings from the Treasury during past years on which the Corporation continues to pay interest which, of course, continues to add to the deficit from these programs and, simultaneously, constitutes a not insignificant part of the Federal Budget. This charge to the Federal Budget is, of course, offset exactly by an equivalent amount of income credited to miscellaneous receipts account of the Treasury with the result that both the expenditures and the revenues of the Government will continue to be increased so long as the notes representing the deficit of the Corporation from these nonlending programs continue to remain outstanding. It is obvious that notes in the amount of this deficit have only a relatively small realizable value insofar as the Treasury Department or the Government are concerned, and it would appear that the Congress should authorize and direct the Secretary of the Treasury to cancel the Corporation's notes in the amount of the unrecoverable costs of these defense, war and related programs.

The budget of the Corporation provides, therefore, for elimination of the deficit of $9,313,736,531 described above by cancellation of the Corporation's notes held by the Treasury in a like amount, and further that any amounts recovered by the Corporation with respect to these activities subsequent to June 30, 1947, shall, after deduction of related expenses, be deposited in the Treasury as miscellaneous receipts.

As stated above, estimated net recoveries to be realized from collections and sales under these nonlending programs subsequent to June 30, 1947, are $681,022,012. It is estimated that this total will be reduced to $233,039,629 by June 30, 1949, as the result of estimated operating losses (consisting principally of the write-off of the value of materials to be transferred to the national stock pile without reimbursement to the Corporation) of $395,679,647 and $9,680,242 in the fiscal years 1948 and 1949, respectively, the payment of $43,211,494 to the Treasury in the fiscal year 1949, representing the excess of cash receipts over disbursements during that year, less a surplus adjustment of $589,000.

General Comments

There accompanies this budget comparative statements of income and expenses for the fiscal years ending June 30, 1947, through June 30, 1949, with related statements of

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

financial condition as of June 30, 1946, 1947, 1948, and 1949. The 1947 statements are subject to the same qualifying comments as will appear in the published statements of the Corporation and its subsidiaries for the fiscal year ending June 30, 1947. Any variations, except as to arrangement, between the 1947 statements appearing in the budget and the published statements, when completed, are expected to be minor.

Operating Results

As indicated in the consolidated statements of income and expense (exhibits B–1 and B–3), lending activities of the Corporation and its subsidiaries will result in the realization of net income for each of the fiscal years 1948 and 1949. There will be further increases in each of these years in unrecoverable costs and expenses resulting from defense, war, and related activities for the reasons discussed below.

Net income from lending activities.—Net income realized for the fiscal year ended June 30, 1947, and as projected for the 1948 and 1949 fiscal years are: Actual, 1947—$21,010,296; estimated, 1948—$12,481,680; estimated, 1949—$12,420,400.

Early in the fiscal year 1948, on the basis of legislation recommended by the Corporation and passed by the first session of the Eightieth Congress, the Corporation transferred to the Secretary of the Treasury its outstanding loans to the Rural Electrification Administration and to the Secretary of Agriculture, and its capital stock in Federal Home Loan banks. Accordingly, the interest and dividend income theretofore realized by the Corporation on such assets will not be available for the fiscal year 1948 and thereafter. This is the principal cause for the decline in net income from lending activities projected for the fiscal year 1948 as compared to that realized for 1947. A comparable effect is applicable for the fiscal year 1949. A further slight decrease in net income from lending activities is expected to occur in the fiscal year 1949 due, principally, to an anticipated decline in investments and an increase in administrative expenses, offset by an adjustment of valuation reserves.

It will be noted further that the increased rate of interest which the Corporation will have to pay to the Treasury Department on funds borrowed during the fiscal years 1948 and 1949 will act to further decrease the net income from lending operations.

Unrecovered costs and net expenses resulting from defense, war, and related activities.—The following summary sets out the actual war deficit at June 30, 1946, the results of operations and policies affecting the deficit in the fiscal year 1947, and the projected changes in the fiscal years 1948 and 1949, based on estimated operations and the proposed elimination of the deficit by cancellation of the Corporation's notes with the Treasury:

	Actual, 1947	Estimate, 1948	Estimate, 1949
Balance at beginning of year	$3,896,165,979	$8,632,714,519	$9,027,805,166
Net loss for year	4,819,698,245	395,679,647	9,680,242
Adjustments (decreases)	83,149,705	589,000	
To establish accountability to U. S. Treasury for estimated recoveries			276,251,123
Cancellation of notes			9,313,736,531
Balance at end of year	8,632,714,519	9,027,805,166	

The relatively large net loss of $4,819,698,245 representing an increase in unrecoverable costs and expenses recorded for the fiscal year 1947 results primarily from a determination made by the Corporation in that year whereby all proceeds from the sale of property declared surplus by the Corporation to War Assets Administration would, thereafter, be paid into miscellaneous receipts of the Treasury by War Assets Administration instead of being returned to the Corporation as theretofore. As a result of this decision, the cost of property, equipment and facilities declared or to be declared surplus to War Assets Administration had no further realizable value insofar as the Corporation was concerned and, in effect, was charged off, either directly or by reserve provision, as an unrecoverable cost to the Corporation.

Consistent also with the policy determination made by the Corporation as to the disposition of surplus sales proceeds, the Corporation transferred for credit to miscellaneous receipts of the Treasury in the fiscal year 1947 substantially all the surplus sales proceeds which theretofore had been returned to it by War Assets Administration or its predecessor surplus disposal organizations.

The net losses of $395,679,647 estimated for the fiscal year 1948 and the $9,680,242 for 1949 result largely from the fact that inventories of strategic materials transferred to the Bureau of Federal Supply will be charged off without reimbursement. In the fiscal year 1948 estimated interest expense on outstanding notes to the Treasury, which are applicable to nonlending activities, amounts to $89,513,000. This item of expense will no longer be applicable in 1949 if the Corporation's notes in an amount equal to the nonlending deficit are canceled. If the inventory charge-offs and interest expense are eliminated, an operating profit is estimated for both 1948 and 1949 on the nonlending activities.

Financial Condition

The comparative statement of financial condition (exhibit C) shows that the assets of the Corporation and its subsidiaries, less applicable reserves, decreased from $7,535,348,000 at June 30, 1946, to $2,892,029,000 at June 30, 1947. Net assets are estimated at $1,284,707,000 at June 30, 1948, and at $1,238,479,000 at June 30, 1949.

The substantial actual and projected reduction in assets from June 30, 1946, to June 30, 1948, results primarily from the transfer of loans to and investments in other Government agencies to the Secretary of the Treasury by direction of Congress; and to the accelerated and continuing liquidation, by sale or by surplus declaration without reimbursement, of lands, structures, facilities, equipment, and inventories of commodities and supplies, substantially all of which were involved in the Corporation's defense, war, and related activities.

Liabilities and operating reserves of the Corporation at June 30, 1946, exclusive of notes payable to the United States Treasury plus accrued interest, amounted to $1,124,241,000, which amount had been reduced to $428,309,319 at June 30, 1947. It is estimated that as of June 30, 1949 this amount will be reduced to $326,675,000, included in which will be $233,040,000 representing the Corporation's accountability for estimated future recoveries from war and related activities.

Notes payable, plus accrued interest, to the United States Treasury amounted to $10,009,705,000 at June 30, 1947. Principally, as a result of cancellation of notes in the amount of $693,141,215 in 1948 for assets transferred to other Government agencies (part IV, exhibit A) and of the elimination of the unrecovered costs and net expenses from nonlending activities during the fiscal year 1949, it is estimated that as of June 30, 1949, outstanding notes payable will be $10 million.

Effect on Government Budget

The effect of the Corporation's budget on the Government Budget is set out in the following analysis of totals taken from part D of the summary statements of application and sources of funds:

	Actual, 1947	Estimate, 1948	Estimate, 1949
General account receipts	$684,552,047	$337,632,595	$50,211,494
General account expenditures			9,313,736,531
Net checking account expenditures or receipts [1]	578,628,792	[1] 442,695,440	[1] 9,342,836,531
Net budgetary expenditures or receipts [1]	578,628,792	[1] 442,695,440	[1] 29,100,000

[1] Receipts.

Net budgetary receipts of $442,695,440 shown for the fiscal year 1948, result from net cash disbursements by the Corporation of $250,445,775 as shown in part A of the summary statements of application and sources of funds (made up in part by the general accounts receipts of $337,632,595 above) and from receipts to the Corporation of $693,141,215 by means of note cancellations for assets transferred to and services performed for other agencies of the Government. Net cash disbursements will be met by a reduction of $246,511,835 in the Corporation's cash balance and borrowings from the Treasury of $3,933,940.

Net budgetary receipts of $29.1 million shown for the fiscal year 1949 result from net cash collections of $9.1 million (after disbursements of $50,211,494 to general account as shown above) and receipts of $20 million by means of note cancellations for handling, processing, and transporting materials to the Bureau of Federal Supply. The net receipts are derived by including the identical amount of $9,313,736,531 (representing the cancellation of the Corporation's notes to restore the capital impairment resulting from nonlending activities) in general account expenditures and net checking account receipts. The net receipts of cash by the Corporation result from borrowings from the United States Treasury of $27,725,827 which, together with receipts from program operations, account for the increase of $36,825,827 in the Corporation's cash balance.

FEDERAL NATIONAL MORTGAGE ASSOCIATION

Purpose and Financial Organization

Federal National Mortgage Association was organized in February 1938 under title III of the National Housing Act, as amended, for the purpose of assisting in establishing a market for first mortgages insured under the provisions of title II of the National Housing Act, as amended. The Association has purchased mortgages insured under section 203 of the National Housing Act and may purchase mortgages insured under title VI. The Association has made periodic sales of mortgages to originating mortgagees. Federal National Mortgage Association was organized with a paid-in capital of $10 million and a surplus of $1 million which was subscribed for and paid in by the Reconstruction Finance Corporation. Such additional funds as are now required by the Association are borrowed from the Reconstruction Finance Corporation.

Analysis of Budget Program

In view of the acute shortage of moderately priced homes, and since building materials are becoming available in greater volume, it is reasonable to believe that the building of a substantially greater number of new homes, financed by Federal Housing Administration insured mortgages, will materialize within the next 12 to 18 months. It is expected that these Federal Housing Administration insured mortgages will be absorbed and held principally by private financial institutions, particularly in view of the fact that the Association, standing by ready to buy the mortgages, constitutes an important influence upon the willingness of the private institutions to invest in these insured mortgages. Nevertheless, it is expected that the Association will be called upon to purchase a nominal volume of these mortgages, such purchases being estimated at $1 million for the fiscal year 1948 and $2 million during the fiscal year 1949. Sales of and collections on mortgages are estimated at $1 million for each of the fiscal years 1948 and 1949. (See exhibit A, part I.)

Administrative Expenses

The Association does not have an administrative organization of its own, all work being performed by employees of the Reconstruction Finance Corporation. Administrative expenses for the fiscal year 1947 amounted to $258,000. It is estimated that such expense will amount to $205,700 for the fiscal year 1948 and to $228,700 for the fiscal year 1949. (See exhibit A, part III.)

Language

Language covering this Association is included with that of the Reconstruction Finance Corporation.

U. S. COMMERCIAL COMPANY

Purpose and Financial Organization

The U. S. Commercial Company was created on March 26, 1942, pursuant to section 5d (3) of the Reconstruction Finance Corporation Act (15 U. S. C. 606 (b)) to aid the Government in its national defense program. Under the provisions of section 202 of the Reconstruction Finance Corporation Act, as amended (Public Law 132, 80th Cong.), the succession of U. S. Commercial Company was extended through June 30, 1948.

The authorized capital stock of the U. S. Commercial Company, in the amount of $5 million, is held by the Reconstruction Finance Corporation. The Company obtains its funds through loans from the Reconstruction Finance Corporation. The outstanding balance of such loans at June 30, 1947, was $161,285,000.

Analysis of Budget Program

The major budgetary requirements of the U. S. Commercial Company, for the fiscal year 1948, are predicated upon instructions from the President of the United States, such instructions having been issued upon the recommendations of the Departments of the Army and Navy, and the State Department. Its requirements involve the following activities:

1. Pacific Ocean operations;
2. Trade with occupied and liberated countries;
3. Custody and care of surplus property abroad;
4. Final accounting for foreign operations and assembling of accounting and operating records.

Comments with respect to the final liquidation of the assets and liabilities of the U. S. Commercial Company are reflected in the budget of the Reconstruction Finance

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Corporation for the fiscal year 1949, as the Company will be dissolved on or before June 30, 1948.

PACIFIC OCEAN OPERATIONS

The Pacific Ocean operations were initiated at the request of the Chief of Naval Operations on September 12, 1942, to perform various functions on Pacific islands occupied and to be occupied by the United States military forces. These functions included the local production of foodstuff, primarily intended to supply troops, and to develop island resources.

A trade-goods program, initially intended merely as a work incentive to encourage native labor, has been greatly expanded and now consists of supplying civilian needs on occupied islands. Some 103 native trade stores are in operation throughout the islands. Purchases and sales are conducted on an actual cash basis.

The Navy Department has agreed to assume full responsibility for the Pacific Ocean operations of the Company not later than December 31, 1947. In anticipation of this, the budget reflects operations to that date only. It is expected that total sales of trade goods during the period of operations in the current fiscal year will be $2,701,000 which reflects disposition of the inventory on hand at June 30, 1947, plus additional purchases of $500,000 during the period of operation. Operating expenses in connection with the entire program for the fiscal year 1948 are estimated at $600,000 as compared to $1,344,000 for the fiscal year 1947.

TRADE WITH OCCUPIED AND LIBERATED COUNTRIES

In December 1945, the President wrote the chairman of the board of directors of the Reconstruction Finance Corporation and requested the U. S. Commercial Company to give all possible assistance to the Department of State in carrying out any programs for the handling of trade which the Department of State considered essential to the achievement of our immediate postwar objectives. The President pointed out that the objective of this Government is to return international trade to private channels as rapidly as possible.

In accordance with the President's request, and pursuant to arrangements made between the Department of State and the U. S. Commercial Company, the Company entered into agreements with the Department of the Army according to the terms of which the U. S. Commercial Company sells merchandise made available to it in Japan, Germany, and Korea by the military authorities. The Company pays the sales proceeds, less all out-of-pocket expenses in connection with the programs, and less a fixed charge to cover administrative expenses, to the Department of the Army or its designee. The purpose of the program is to provide dollar exchange for use by the supreme commander of the Allied Powers in Japan and the Office of Military Government for Germany (United States), in facilitating the solution of programs arising in connection with the military occupation of Germany, Japan, and Korea.

Arrangements have been made whereby the supreme commander of the Allied Powers in Japan and the Office of Military Government for Germany (United States) will take over these operations in their entirety sometime during the first half of the calendar year 1948, and in any event not later than June 30, 1948. Furthermore, in view of the progress which is being made in returning trade with occupied countries to regular commercial channels, the volume of business previously anticipated for the Company will not materialize. It would appear, therefore, from available information, that merchandise having a value of $90.5 million will be made available to the Company from Germany, Japan, and Korea during the current fiscal year. The cost of ocean freight, handling and other charges in connection with the disposition of the merchandise is estimated at approximately $2.5 million. Service fees to be retained by the Company on the total estimated value of sales of $75,194,000 will amount to $2 million.

CUSTODY AND CARE OF SURPLUS PROPERTY

There remained at June 30, 1947, a substantial quantity of property in foreign countries which had been declared surplus or was in process of being so declared by U. S. Commercial Company. Since the Office of the Foreign Liquidation Commissioner has no facilities for the care and preservation of this property, it is necessary for the Company to do so. An estimate of $10,000 for this purpose is contained in the budget.

FINAL ACCOUNTING FOR FOREIGN OPERATIONS AND ASSEMBLING OF ACCOUNTING AND OPERATING RECORDS

There will extend into the fiscal year 1949, considerable work necessary to arriving at a final accounting for the extensive operations conducted by this Company throughout the world during the war. This involves the assembling of all records of the Company's operations, the careful analysis and arrangement of such records, and the determination, to the extent practicable and possible, whether all transactions have been recorded or properly recorded. This will involve the expenditure of a small amount of administrative funds in the fiscal year 1949, which expense is included in the budget of the Reconstruction Finance Corporation as the Corporation will effect final accounting for the activities of the Company. (Detailed operating estimates are reflected in exhibit A, part II.)

Administrative Expenses

This Company does not have an administrative organization of its own, all work being performed by employees of the Reconstruction Finance Corporation on a reimbursable basis. It is estimated that administrative expenses of the Company for the fiscal year 1948 will amount to $1,246,000 as compared with $1,879,000 for the fiscal year 1947. (See part III of exhibit A.)

SUMMARY STATEMENTS OF APPLICATION AND SOURCES OF FUNDS—Continued

	Actual, 1947	Estimate, 1948	Estimate, 1949
C. SUMMARY OF APPLICATION AND SOURCES OF FUNDS			
Funds applied:			
To operating program:			
Lending program, part I, exhibit A:			
Acquisition of assets	$299,773,520	$323,343,000	$199,745,000
Operating expenses	114,110	704,000	725,500
Increase in working capital items	2,061,343	2,811,246	1,500,000
	301,948,973	326,858,246	201,970,500
Nonlending program, part II, exhibit A:			
Acquisition of assets	770,815,240	298,129,000	215,350,000
Operating expenses	307,865,135	70,325,104	34,349,000
Increase in working capital items	124,368,468	104,180,417	6,180,000
	1,203,048,843	472,634,521	255,879,000
Intragovernmental operations, part IV, exhibit A:			
Acquisition of assets	514,725,000		
Payments into miscellaneous receipts of U. S. Treasury and other Government agencies	748,777,603	428,132,595	50,211,494
Increase in working capital items	231,757,580	77,365,658	465,000
	1,495,260,183	505,498,253	50,676,494
To administrative expenses, part III, exhibit A	50,807,350	36,365,000	26,481,000
Total funds applied	3,051,065,349	1,341,356,020	535,006,994
To cancellation of notes to U. S. Treasury to restore capital impairment in the amount of unrecovered costs and net expenses resulting from national defense, war and reconversion activities, part IV, exhibit A			9,313,736,531
Total funds applied including note cancellation	3,051,065,349	1,341,356,020	9,848,743,525
Funds provided:			
By operating program:			
Lending program, part I, exhibit A:			
Realization of assets	372,090,513	238,954,109	197,298,000
Income	59,635,789	37,230,000	38,695,000
Decrease in working capital items	11,203,117	4,406,480	1,211,200
	442,929,419	280,590,589	237,204,200
Nonlending program, part II, exhibit A:			
Realization of assets	1,664,344,948	507,637,507	282,042,000
Income	61,252,285	25,763,330	10,523,700
Decrease in working capital items	59,910,070	44,210,468	14,337,094
	1,785,507,303	577,611,305	306,902,794
Intragovernmental operations, part IV, exhibit A:			
Realization of assets	184,096,108	176,901,364	
Decrease in working capital items	59,903,727	55,806,987	
	243,999,835	232,708,351	
Total funds provided	2,472,436,557	1,090,910,245	544,106,994
By credit due Reconstruction Finance Corporation for notes canceled to restore capital impairment, part IV, exhibit A			9,313,736,531
Total funds provided including note cancellation	2,472,436,557	1,090,910,245	9,857,843,525

ESTIMATES OF AUTHORIZATION RELATING TO CORPORATE FUNDS

NOTE.—The text of general authorizing language, as incorporated in the Government Corporations Appropriation Act, 1948, and as proposed for 1949, will be found at the end of the "Summary Statements and General Language" of part III of the Budget.

[The Reconstruction Finance Corporation and its subsidiaries, as hereinafter specified, are hereby authorized to make such expenditures, within the limits of funds and borrowing authority available to said corporation and its subsidiaries and in accord with law, and to make such contracts and commitments without regard to fiscal-year limitations as provided by section 104 of the Government Corporation Control Act as may be necessary in carrying out the programs set forth in the revision of the budget of the Reconstruction Finance Corporation and its subsidiaries for the fiscal year 1948, except as hereinafter provided:]

Administrative Expenses, Reconstruction Finance Corporation—

Not to exceed [$38,754,700] *$25,796,000* (to be computed on an accrual basis) of the funds of the Reconstruction Finance Corporation shall be available during the fiscal year [1948] *1949* for its administrative expenses and the administrative expenses of the Federal National Mortgage Association [and the U. S. Commercial Company]; not to exceed $1,500 for periodicals and newspapers; health service program as authorized by [Act of August 8, 1946 (Public Law 658] *law (5 U. S. C. 150)*; use of the services and facilities of the Federal Reserve banks; and not to exceed [$75,000] *$35,500* for deposit in the [general fund of the] Treasury for [cost of] penalty mail [as required by the Act of June 28, 1944] *(39 U. S. C. 321d)*: *Provided*, That as used herein the term "administrative expenses" shall be construed to include all salaries and wages, services performed on a contract or fee basis, and travel and other expenses, including the purchases of equipment and supplies, of administrative offices: *Provided further*, That the limiting amount heretofore stated for administrative expenses shall be increased by an amount which does not exceed the aggregate cost of salaries, wages, travel, and other expenses of persons employed outside the continental United States; wages, fees, and other expenses, including cost of contract services, of persons who are exclusively engaged in construction, operation, clearance, maintenance and protection of plants, operating facilities, acquired collateral, and other property in which the Corporation has an interest; the expenses of services performed on a contract or fee basis in connection with termination of contracts or in the performance of legal services; and all expenses reimbursable from other Government agencies: *Provided further*, That the distribution of administrative expenses to the accounts of the Corporation shall be made in accordance with its accounting principles and practices: *Provided further*, That, *except as otherwise provided hereinafter*, none of the funds of the Reconstruction Finance Corporation and [the subsidiaries thereof] *its subsidiary* shall be used for the custody, maintenance, or disposal of any surplus property within the continental limits of the United States, its Territories or possessions, except such property as may be owned by and held for disposal by the Reconstruction Finance Corporation or its [subsidiaries] *subsidiary*; but, notwithstanding any other provision of law, the Reconstruction Finance Corporation may waive reimbursement from War Assets Administration for the administrative property transferred prior to July 1, 1946, and for expenses incurred prior thereto in the custody, maintenance, or disposal of any surplus property: *Provided further*, That no part of the funds of the Reconstruction Finance Corporation or of [any] *its* subsidiary [thereof] shall be used to make any purchase or for personal services or to enter into any contract for the use or benefit of any other agency of the Government unless such agency shall have authority in law and appropriations available to make reimbursement for such purchase, personal services, or contract, *except that this provision shall not apply to expenditures in connection with materials, surplus to the needs of the Corporation, which have been or hereafter shall be transferred to stock piles established pursuant to the Strategic and Critical Materials Stock Piling Act (60 Stat. 599)*: *Provided further*, That none of the funds of the Reconstruction Finance Corporation and its [subsidiaries] *subsidiary* shall be used for the making of any loan to any State, any subdivision thereof, any municipality therein, or any public authority, for construction purposes, unless in pursuance of a specific authorization if such loan would increase the aggregate amount of such loans outstanding above $125,000,000 [(Act of July 20, 1946, Public Law 519)]: *Provided further, That the Secretary of the Treasury is hereby authorized and directed to cancel notes of the Reconstruction Finance Corporation in the amount of $9,313,736,531, plus the interest accrued thereon subsequent to June 30, 1947, the foregoing stated amount representing unrecovered costs to the Corporation as of June 30, 1947, in its national defense, war, and reconversion activities, and any amounts recovered by the Corporation with respect to these activities subsequent to June 30, 1947, shall, after deduction of related expenses, be deposited in the Treasury as miscellaneous receipts: Provided further, That, notwithstanding the provisions of section 6 (b) of the Strategic and Critical Materials Stock Piling Act (60 Stat. 599), the Secretary of the Treasury shall cancel notes of the Reconstruction Finance Corporation on account of the transfer of materials to stock piles in an amount equivalent only to the costs incurred by the Corporation subsequent to June 30, 1947, for handling, storing, processing, and transporting such materials, as determined and certified by the Corporation from its accounting records.* (*The Supplemental Government Corporations Appropriation Act, 1948.*)

	Actual, 1947	Estimate, 1948	Estimate, 1949

[1] For the purpose of reducing the cost of administrative overhead and to facilitate reduction in force, the Office of Defense Plants, Office of Metals Reserve, Office of Rubber Reserve, and Office of Defense Supplies will be merged, or otherwise reorganized, probably by the beginning of the fiscal year 1949. The specific organizational arrangement has not yet been determined but tentative plans contemplate the performance of the functions indicated.

TENNESSEE VALLEY ASSOCIATED COOPERATIVES, INC.

Pursuant to the Government Corporations Appropriation Act of 1948, the Secretary of the Treasury has taken over active liquidation and dissolution of the Tennessee Valley Associated Cooperatives, Inc., and at his request officials of the Treasury Department were appointed to serve in their official capacities as directors and officers of the Corporation. All cash funds have been transferred to a special deposit account with the Treasurer of the United States, and custody of all original documents and records of the Corporation has been effected. Due to the nature of the underlying properties which represent the security behind the notes receivable of some of the cooperative associations, it is anticipated that final liquidation will not be accomplished until the fiscal year 1949. The anticipated liquidation of the assets of the Corporation are reflected in exhibit A.

During the fiscal year 1948, it is estimated that $50,000 will be returned to the Treasury Department in partial payment of the paid-in surplus. During the fiscal year 1949, it is believed that $31,182 will be returned to the Treasury Department in payment of the outstanding capital stock and in partial payment of the paid-in surplus. In addition, the balance of $15,000 of preferred stock still owned by the Corporation in fiscal 1949 will be turned over to the Treasury Department for ultimate liquidation and deposit to miscellaneous receipts.

EXHIBIT A

COMPARATIVE STATEMENT OF SOURCES AND APPLICATION OF FUNDS

[Fiscal years ending June 30, 1947, 1948, and 1949]

	Actual, 1947		Estimate, 1948		Estimate, 1949	
FUNDS APPLIED						
To expenses: (Excluding depreciation and other charges not requiring funds):						
Administrative expenses	$2,014		$2,500		$1,000	
Audit by General Accounting Office	1,557		1,200		500	
		$3,571		$3,700		$1,500
To retirement of capital and distribution of surplus:

TENNESSEE VALLEY AUTHORITY

Purpose and Financial Organization

The Tennessee Valley Authority is a Corporation created by act of Congress on May 18, 1933 (16 U. S. C. 831). It was established "to improve the navigability and to provide for the flood control of the Tennessee River; to provide for reforestation and the proper use of marginal lands in the Tennessee Valley; to provide for the agricultural and industrial development of said valley; to provide for the national defense by the creation of a Corporation for the operation of Government properties at and near Muscle Shoals in the State of Alabama, and for other purposes." These purposes, directed toward the development of the Tennessee Valley, have not been changed since the creation of the Corporation.

The Tennessee Valley Authority is financed by appropriations and by proceeds from its operations, principally the sale of power and fertilizer materials. Appropriations are made by the Congress to cover expenses of navigation and flood-control operations, fertilizer research, resource development activities, and for capital plant additions such as structures, equipment, and land. Proceeds (referred to in the financial statements as corporate funds) are used to finance the operation of dams and reservoirs; to conduct the business of generating, transmitting, and distributing electric energy, and in manufacturing, selling, and distributing fertilizer and fertilizer ingredients.

Section 26 of the Tennessee Valley Authority Act, as amended, provides for payment into the Treasury of the United States of such proceeds as in the opinion of the Tennessee Valley Authority Board are not required for the purposes enumerated above. Through the 1947 fiscal year, payments to the Treasury of the United States (including $8,572,500 for the retirement of bonds) have totaled $31,506,508. Under the provisions of title II of the Government Corporations Appropriation Act, 1948, total payments to the Treasury of not less than $10,500,000 (including $2,500,000 for the retirement of bonds) must be made not later than June 30, 1948.

Analysis of Budget Programs

The Tennessee Valley Authority administers a single broad program under a single statute, the Tennessee Valley Authority Act of 1933, as amended. The function of the Tennessee Valley Authority is to bring about the unified development of the water and soil resources of the Tennessee Valley. The budget program of the Corporation is divided into four major types of activities: (1) Navigation, flood control, and power; (2) fertilizer and munitions research and development; (3) chemical facilities and operations; and (4) resource development activities. In addition, there is a budget category for facilities and equipment for general use.

Each of these major activities is interrelated in both planning and execution, as well as in their mutual basic objective of enabling the people of the Tennessee Valley to make full and effective use of their available resources by methods which stimulate the initiative of the individual farmers and business people, and which strengthen their State and local institutions and agencies.

As shown on exhibit A, following this narrative material, the 1949 budget program involves the use of $35,654,600 of appropriated funds (of which $500,000 is carried forward from prior years) and $71,697,000 of corporate funds made available from the sale of power, fertilizer products, and other sources. The total of $107,351,600 to be applied under the 1949 budget program consists of $57,343,600 for acquisition of assets (including inventories), $46,758,000 for expenses, and $3,250,000 for retirement of borrowings and payments to the United States Treasury.

Navigation, Flood Control, and Power

A major objective of the Tennessee Valley Authority Act is the unified development and use of the Tennessee River system for navigation, flood control, and power purposes (16 U. S. C. 831c). As of June 30, 1947, the total Tennessee Valley Authority investment in facilities serving these purposes was $682,127,159, after depreciation, and was allocated in accordance with section 14 of the act (16 U. S. C. 831m), as follows: Navigation, $139,468,159; flood control, $145,974,710; and power, $396,684,290. Principal elements consist of a system of 22 major dams, 20 major hydroelectric generating stations, 10 navigation locks, 5 major fuel-electric generating stations, and a power transmission network of 6,413 circuit-miles.

Scheduled major additions to this investment include the following projects, all designed and under construction:

Watauga Dam and Reservoir	$34, 900, 000
South Holston Dam and Reservoir	34, 500, 000
Hales Bar—raising of dam, lock, and gates	5, 200, 000
Wilson generating units 15 to 18	8, 250, 000
Wheeler generating units 5 and 6	5, 200, 000
Fort Loudoun generating units 3 and 4	4, 750, 000
Douglas generating unit 3	2, 100, 000

System additions scheduled to be started in 1949 include the installation of generating units 7 and 8 at Wheeler Dam and additional steam-electric generating capacity in the western part of the power service area. Other scheduled capital additions include the transmission network, channel improvement below Wilson Dam, shore-line improvements for malaria control, and a power service building at Wilson Dam. This construction program involves appropriation obligations of $19,230,521 in 1948 and $21,802,000 in 1949 and corporate fund expenditures of $29,270,000 and $29,139,000 for the same years, respectively.

Annual operating costs for navigation and flood-control facilities are presented on schedules B–1 and B–2, and net income from power operations on schedule B–3. Expense common to all three purposes and allocated among them in accordance with section 14 of the Tennessee Valley Authority Act is shown on schedule B–4.

Navigation.—Navigation facilities and channel improvements on the Tennessee River and its tributaries now provide a modern waterway from the mouth of the river to Knoxville, Tenn., a distance of 650 miles. The Tennessee Valley is thereby linked with the inland waterways system extending from the Great Lakes to the Gulf of Mexico. Traffic on the Tennessee River amounted to 192,805,000 ton-miles in 1946, but the volume already handled during the first 10 months of calendar year 1947 shows that 1947 will be a record year for navigation on the Tennessee River.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

The Tennessee Valley Authority is cooperating with private shippers and commercial carriers on the Tennessee River. Continuing technical and engineering investigations and analyses are made to insure facilities for safe and efficient navigation and to supply factual data for businessmen who use the river. Public-use river terminals are operated to provide service for small shippers and to enable the potential large shipper to try initial barge shipments. Approximately $2,000,000 of private capital is invested in river terminal and storage facilities.

Close working relationships are maintained among the Tennessee Valley Authority, the United States Corps of Engineers, the United States Coast Guard, and State and local agencies in matters relating to navigation on the Tennessee River.

Flood control.—During the fiscal year 1947, with the removal of all limitations on the operation of Kentucky reservoir imposed by construction activities, the Tennessee River became the world's largest controlled river system, providing 13,534,000 acre-feet of useful controlled storage. In January 1947, excessive rainfall and exceptionally high run-off produced major flows in the Tennessee River. If uncontrolled, this condition would have caused the sixth greatest flood in the 100 years of record at Chattanooga, Tenn. Regulation by the Tennessee Valley Authority reservoir system reduced the possible crest at Chattanooga by 12.7 feet and effected an estimated savings of $7,500,000 in flood damage at Chattanooga. All high flows on the Tennessee River since the completion of Norris Dam have been handled without substantial flood damage to Chattanooga with resultant estimated savings of $21,500,000. Tennessee Valley Authority reservoirs help to protect other cities and urban areas on the lower Ohio and lower Mississippi Rivers, as well as on the Tennessee. These reservoirs have sufficient storage capacity to reduce a flood crest at Cairo, Ill., by as much as 4 feet and in lessening amounts on the Mississippi River as far south as the mouth of the Red River.

Power.—The Tennessee Valley Authority's power operations are confined to generation and transmission of power and sales at wholesale to local distribution systems and to certain large industries and Government agencies. Power is distributed by 140 local agencies to about 775,000 ultimate consumers. As of June 30, 1947, the installed capacity of the power system of the Tennessee Valley Authority was 2,538,902 kilowatts, including 311,120 kilowatts in plants owned by the Aluminum Co. of America but operated as a part of the Tennessee Valley Authority system. The total amount of energy produced by the system in fiscal year 1947 was 15,427,000,000 kilowatt-hours, of which 13,763,000,000 kilowatt-hours was generated at hydro plants and 1,664,000,000 kilowatt-hours was supplied by fuel-electric plants or other auxiliary sources of supply.

Based on load forecasts prepared in the summer of 1947, power demands in the Tennessee Valley service area in both 1948 and 1949 will exceed those of the record year 1947 and will be far above the peak reached during the war.

The net income from power operations before interest payments in the fiscal year 1947 was $21,838,750 and represented a return of about 5.5 percent on the average net investment in power facilities for that fiscal year. The corresponding rates of return for fiscal years 1948 and 1949 are estimated to fall in the range of 4 to 4.5 percent. Extreme dry-year conditions in either 1948 or 1949 could cause the estimates of net income to shrink by as much as $15,000,000 in either year. Better than average stream flow could produce a small increase over the estimates.

Multipurpose reservoir operations.—Nine main-river reservoirs and seven tributary reservoirs of the twenty-two major projects in the Tennessee Valley Authority system of dams and reservoirs are operated to serve the three primary purposes in accordance with section 14 of the Tennessee Valley Authority Act (16 U. S. C. 831m). The several activities and the respective allocations are given in detail on schedule B–4. Included are water dispatching operations, malaria-control activities, and plant protection and service to visitors. In addition, there are such activities as general maintenance of structures and equipment and the upkeep of roads, grounds, and employee housing at multipurpose projects. Also in this category of work is the operation of reservoir lands and the operation of backwater protection facilities. Various engineering investigations and tests and system improvement studies relating to navigation, flood control, and power are performed to enable the Federal Government to control and to develop more fully the water resources of the region.

Fertilizer and Munitions Research and Development

Fertilizer and munitions research and development activities are conducted as an integral part of the over-all Tennessee Valley Authority program of providing for the development of soil resources through the use of improved plant nutrients and the application of sound farming methods and of developing and supplying munitions for military purposes (16 U. S. C. 831d, f, and h). Major emphasis is placed on bridging the gap between laboratory research and practical application by private enterprise. In its 13 years of fertilizer and munitions research and development, the Tennessee Valley Authority has worked on over 200 individual projects. The practical results of the services the Tennessee Valley Authority is rendering to fertilizer and allied industries are becoming increasingly apparent, particularly in their application to the development of western phosphate deposits.

The Tennessee Valley Authority's fertilizer and munitions research and development program consists of small-scale chemical research and process development work. The first category of research is limited to exploratory tests, background research, and applied research at the laboratory level. During 1949, work will be concentrated on research on phosphorus and its compounds and on nitrogen and potassium compounds. Process development, the second category, includes the technical and economic evaluation of research results; the development of unit operations; the design, construction, and operation of pilot plants; and the preparation of engineering and economic studies directed toward practical utilization by others of the over-all findings. Major emphasis will be placed on processes for producing various high-analysis fertilizers and fertilizer ingredients.

Chemical Facilities and Operations

In this category are the fertilizer and munitions production facilities at Muscle Shoals, Ala., and at Columbia, Tenn. These facilities make possible the testing and perfecting of fertilizer processes in full-scale production, after laboratory investigations and engineering development work have been completed. Through these operations, new fertilizers are made available for testing by practical farmers on various types of soil under varying

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

conditions. Further, they provide a ready source of large quantities of phosphorus and fixed nitrogen in the event of a national-defense emergency. In the operation of its chemical facilities the Tennessee Valley Authority has aided many manufacturing concerns, and many of its technical findings have been adopted by private industries.

Major items of Tennessee Valley Authority chemical facilities include a six-furnace elemental phosphorus and phosphate fertilizer plant at Muscle Shoals, Ala., and a two-furnace fused tricalcium phosphate fertilizer plant near Columbia, Tenn. Work is in progress on a chemical laboratory and service building at Muscle Shoals, Ala., scheduled for completion in 1949. During fiscal year 1948, the installation of ammonium nitrate crystallization equipment for improving the product and reducing the hazards of operation will be substantially completed.

During 1947, Tennessee Valley Authority plants produced phosphate fertilizers containing a total of 75,134 tons of phosphorus pentoxide. Output of phosphate products is estimated at 94,008 tons of phosphorus pentoxide in 1948 and 88,970 tons in 1949. Facilities for the production of ammonia and ammonium nitrate fertilizer were operated at capacity during 1947 and are scheduled for full operation in 1948 and 1949. The production of nitrogenous fertilizers has been primarily an emergency activity to supplement the production capacity of private fertilizer plants during the period of urgent need for plant nutrients at home and abroad. However, the Tennessee Valley Authority has improved the equipment and techniques of nitrogenous fertilizer manufacture and has made its findings available to private industry.

Resource Development Activities

Resource development activities include research, demonstrations, and cooperative assistance in the development of agricultural, forestry, mineral, and recreational resources; mapping of the Tennessee Valley; and studies, investigations, and technical assistance in the fields of stream sanitation, fish and game development, transportation and industrial economics, and related matters (16 U. S. C. 831c, d, i, and u). These activities, insofar as practicable, are carried out in cooperation with State and local agencies. They are key elements of the integrated program designed to meet the Tennessee Valley Authority's responsibilities for watershed protection and effective utilization of the area's natural resources.

As shown on exhibit A, gross expenditures for resource development activities are estimated at $5,482,000 in 1949. This estimate is slightly less than the 1948 figure and approximately $2,000,000 under actual 1947 expenditures. Schedule B–6 details the fund requirements for the various activities included in this category.

Of the funds requested for resource development activities, $3,000,000, or approximately 55 percent of the total, will be devoted to agricultural resource development. The basic element in the agricultural resource development program is the test-demonstration plan. After mineral fertilizers developed in the Tennessee Valley Authority's experimental laboratories have been tested under small-scale controlled conditions, they are further tested, in conjunction with improved farm management practices, on practical farms in the Tennessee Valley and throughout the Nation. These tests are designed to measure the effectiveness and demonstrate the potentialities of high-analysis mineral fertilizers as a means of preventing soil erosion and water run-off, rebuilding the soil, improving agricultural production and practices, and generally contributing to the farmers' well-being. These practical farm test demonstrations are carried out through the existing organization of the extension services of the land-grant colleges. The Tennessee Valley Authority contributes financial support for the salaries of assistant county agents who provide technical advice to participating farmers and groups of farmers. In 1949, as in the current year, major emphasis will be placed upon the testing of two relatively new fertilizer products—calcium metaphosphate and fused tricalcium phosphate—under a variety of soil types and farming conditions. The testing of triple superphosphate will continue on a limited scale in order to determine accurately the long-range effects of this product in a practical farm economy.

The estimate for forest resource development in 1949 is $750,000. The Tennessee Valley demonstration of forest resource development and utilization is pointing the way toward full cooperative effort by all concerned—owners, operators, industries, and public agencies at all levels of government. The Tennessee Valley Authority contributes to the regional forestry program through investigative studies of forest resources; research on the utilization of forest resources; assistance and demonstrations in forest management practices, reforestation, and forest-fire control; and technical advice to State and local agencies, industries, and individuals. Activities proposed for 1949 emphasize development of the maximum effectiveness for watershed protection and recreation as well as the maximum productivity of high-quality forest products. With adequate fire control, sustained-yield management, full utilization, and reforestation, the valley could produce at least $900,000,000 in forest products values each year, or about $60 for each acre of forest land, compared to the present yield of about $100,000,000 per year, or $7 per acre.

An estimate of $150,000 provides for continued activities in mineral resource development. The Tennessee Valley Authority, in cooperation with other agencies and institutions, carries on investigations and surveys of the mineral resources of the valley area, evaluates mineral deposits, analyzes samples, undertakes ore-dressing tests, and conducts research on the development of processes for the beneficiation and utilization of the valley's strategic minerals.

The 1949 estimate for recreational resource development is $270,000. The Tennessee Valley is becoming increasingly important as a recreational area. Recreation facilities adjacent to Tennessee Valley Authority lakes, whether on private land or on land owned by the Tennessee Valley Authority, contribute substantially to the region's recreation industry, the annual gross receipts of which are now estimated at $150,000,000. The Tennessee Valley Authority participates in the development of the recreational potentialities of the region by the provision of planning studies and technical assistance to local agencies and groups and through the temporary operation of recreation demonstration facilities. These demonstration facilities are progressively being leased or transferred to other agencies or groups.

Stream sanitation and public health will require an estimated $200,000 in 1949. On the basis of previously collected data, State pollution-control agencies, local communities, and industries, with technical assistance from the Tennessee Valley Authority, are engaging in an aggressive program designed to secure an immediate reduction of the pollution load of the Tennessee River system.

The $90,000 estimate for fish and game investigations provides for continuing investigative studies on such

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

matters as composition and size of fish populations, the reaction of different species of fish to new environmental conditions resulting from dam construction, the effects of environmental conditions on catching fish, and means of increasing the development of waterfowl and other game.

Expenditures for topographic mapping of the Tennessee Valley are estimated at $400,000 in 1949. Continuation of the 1949 rate will provide for completion of the valley mapping during fiscal year 1953 except for revision of antiquated and substandard maps.

An estimated $290,000 is required for special studies and activities, the major elements of which are transportation and industrial economic studies and advisory assistance to State and local governments. The gathering, analysis, and dissemination of factual information about Tennessee Valley resources are intended to supply reliable background for decisions by businessmen and community groups as to the feasibility of particular business operations; to help determine which scientific and engineering research developments are likely to be economically feasible; and to evaluate economic forces affecting the valley's economy. To assist local communities in making effective contributions to the integrated development of the region's resources, the Tennessee Valley Authority extends advice and technical assistance to State and local governments on community planning, finance, and other governmental problems, particularly those which have been affected by Tennessee Valley Authority operations.

FACILITIES AND EQUIPMENT FOR GENERAL USE

Requirements in 1949 for the procurement and construction of facilities and equipment for general use total $3,431,600. Major items consist of the replacement of trucks and heavy mobile equipment, construction of transportation garages at Chattanooga and Muscle Shoals, and the construction of facilities for the convenience and welfare of the public on certain dam reservations.

Operating Results

The operating results of the Tennessee Valley Authority are reflected primarily in increased income and opportunities for the residents of the Tennessee Valley. Income and expense of the various program operations are shown on exhibit B and the supporting schedules B–1 through B–8.

The net expenses of programs other than power for the fiscal year ending June 30, 1947, was $14,318,264. For 1948 and 1949, the corresponding estimates are $11,856,000 and $12,127,000, respectively.

The net income from power operations, after all charges including depreciation and interest on the funded debt, was $21,248,377 in 1947 and is estimated as $17,063,000 in 1948 and $18,676,000 in 1949. The estimated decline in net income reflects not only increasing costs of labor and materials but, more especially, increased energy requirements from fuel-electric plants and other auxiliary sources to meet the system loads. Energy from these auxiliary sources is more expensive than that from the hydro sources, which supplied a greater portion of the total energy in 1947 than they can supply in either 1948 or 1949.

Financial Condition

The financial condition of the Tennessee Valley Authority as of June 30, 1946 and 1947, and estimated financial condition as of the close of the 1948 and 1949 fiscal years, is shown on exhibit C, "Comparative statement of financial condition." The following is a brief explanation of significant changes in major items:

Cash and cash funds.—The cash balance as of June 30, 1947, is larger than normal due primarily to $20,076,550 of the 1947 fiscal year appropriation being unexpended and reappropriated to 1948, and due to a larger than usual balance of corporate funds caused primarily by favorable power operations. The carrying forward of these balances to the 1948 fiscal year was reflected in a reduced appropriation of new funds in that year.

Fixed assets.—The Corporation's fixed assets and reserves for depreciation, reported on exhibit C by type of facility, are reclassified, net of reserves for depreciation, in the following tabulation by major programs:

Classification of fixed assets (less reserves for depreciation)	Actual, June 30, 1947	Estimated, June 30, 1948	Estimated, June 30, 1949
Navigation	$139,468,159	$139,006,785	$140,944,811
Flood control	145,974,710	145,721,084	145,775,058
Power	396,684,290	404,297,290	423,954,290
Total	682,127,159	689,025,159	710,674,159
Chemical facilities	9,035,549	11,214,549	17,286,549
Facilities and equipment for general use	9,357,044	11,807,044	12,770,044
Total in service	700,519,752	712,046,752	740,730,752
Construction and investigations in progress	40,576,684	71,900,205	84,683,805
Total fixed assets	741,096,436	783,946,957	825,414,557

Increases in the above classification of net fixed assets in 1949 are due primarily to the scheduled substantial completion in that year of the following projects of significance:

Navigation.—Channel improvement in the Florence, Ala., navigation canal.

Power.—Additional generating units at Wheeler, Fort Loudoun, and Douglas hydroelectric generating stations, and additional transmission facilities.

Chemical facilities.—Completion of the laboratory and service building at Wilson Dam and certain additional phosphate and nitrogen facilities.

Facilities and equipment for general use.—Transportation garages at Chattanooga and Muscle Shoals and additions and replacement of transportation equipment and heavy mobile equipment.

The major projects included in construction and investigations in progress as of June 30, 1949, are the following:

Project	Estimated cost in progress as of June 30, 1949
Watauga Dam and Reservoir	$34,321,177
South Holston Dam and Reservoir	17,461,137
Wilson generating units 15 to 18	5,363,555
Wheeler generating units 7 and 8	3,147,280
Power-service warehouse and shop	3,169,315
Additional fuel-electric generating facilities	2,300,000
Total of major projects	65,762,464
Transmission, distribution, and communication facilities	16,000,000
Other construction in progress	2,421,707
Investigations for future projects in progress	499,634
Total of construction and investigations in progress	84,683,805

Funded debt.—Total funded debt as of June 30, 1947, represented by bonds sold to and held by the United States Treasury, was $56,500,000. The 1948 and 1949 budget programs provide for retirements of $2,500,000 in

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

each of these years financed from power program net earnings.

Appropriations, transfers of property, and net income (or expense) of programs.—Through June 30, 1947, the Congress had appropriated $717,523,270 for use by the Tennessee Valley Authority for investment in assets and for other program purposes, of which amount $15,063,521 was unobligated as of that date. The Congress has, for the current 1948 fiscal year, reappropriated this unobligated balance and appropriated an additional $18,700,000, of which $18,200,000 will be obligated under present plans in the current year. The 1949 budget program presented herein calls for an appropriation of $35,154,600 and use of $500,000 carried forward from 1948. As shown on exhibit A and as reflected in the estimated financial condition of the Corporation on exhibit C, the proposed appropriation for 1949 and the unobligated balance from 1948 will provide $28,357,600 for acquisition of assets and inventories (after an adjustment of $600,000 for depreciation charged to construction and clearing accounts) and $7,297,000 for expenses of programs financed from appropriations.

Effect on Government Budget

As shown on schedule A–1 the net budgetary expenditures for 1949 are estimated to be $34,654,600. The amount estimated to be deposited into miscellaneous receipts of the Treasury for the budget year is $1,290,000 representing interest of $540,000 and return of capital of $750,000.

The Tennessee Valley Authority is empowered by section 26 of the Tennessee Valley Authority Act, as amended, to utilize the proceeds derived from power sales and other sources in the conduct of its power business, in the operation of dams and reservoirs, and in the production and disposition of fertilizers. Excess proceeds must be paid into the general fund of the United States Treasury. To June 30, 1947, proceeds exceeded expenditures for the above purposes by $43,152,938; and from such excess a total of $22,934,008 had been paid into the general fund of the United States Treasury. Prior to the end of calendar year 1947, as provided in section 26, the Board of Directors of the Tennessee Valley Authority will make a determination as to what portion of the remaining $20,218,930 is necessary for the purposes stated in that section, and the balance will be payable into the general fund of the United States Treasury. Under the provisions of title II of the Government Corporations Appropriation Act, 1948, total payments from such proceeds of not less than $10,500,000, including a minimum of $2,500,000 for the retirement of bonds held by the United States Treasury, must be made by the Tennessee Valley Authority to the Treasury not later than June 30, 1948. Provision for the $10.5 million payment has been included in this budget, and estimated payments aggregating $3,250,000 are included for the fiscal year ending June 30, 1949.

Administrative and General Expenses

Administrative and general expenses, as classified by the Tennessee Valley Authority, consist of the centralized administrative and management expenses of the staff offices, various management service activities, and also certain expenses, not of an administrative or management type, which are general in nature since they cannot be readily identified as directly chargeable to any one program. Schedule B–7 summarizes these expenses by source, and shows the distribution of the total to the various programs and projects.

In accord with usual commercial practice, the Tennessee Valley Authority distributes administrative and general expenses to its several programs and projects in order to produce true "cost" statements. Distributions are arrived at by applying to each of the component items the most realistic of a number of formulas which are based, insofar as practicable, upon annual administrative and accounting studies of direction of effort.

In the Tennessee Valley Authority, all expenses intimately related to particular segments of the total program are treated as direct costs. Similarly, services which are susceptible of precise physical measurement are accumulated in clearing accounts and distributed on a use basis as direct costs of the activities to which the services are rendered. Residual expenses of whatever character are classified for convenience in accounting as administrative and general expenses, and are distributed in accounting and budgetary statements. Consequently, the category "Administrative and general expenses" includes not only those staff and management expenses commonly recognized as "administrative" costs but also a variety of expenses which differ from "direct" costs only in that such expenses benefit two or more program or project segments rather than a particular unitary activity.

In fiscal year 1947, the total expense of items classified as administrative and general was $4,305,783. As the result of a special and intensive study conducted during that year, a number of program refinements which have contributed substantially to past accomplishments have been eliminated or sharply curtailed, and the estimate for 1949 has been accordingly reduced by $340,000 to $3,966,000. The ratio of administrative and general expenses to grand total obligations in 1947 was 4.8 percent as compared with estimates of 3.4 and 3.7 in 1948 and 1949, respectively.

SCHEDULE A–1

EFFECT ON THE GOVERNMENT BUDGET

[Fiscal years ending June 30, 1947, 1948, and 1949]

	Actual, 1947	Estimate, 1948	Estimate, 1949
BUDGETARY RECEIPTS			
General account receipts:			
Interest on bonds held by U. S. Treasury	$567,654	$565,000	$540,000
Payments under sec. 26, Tennessee Valley Authority Act, to U. S. Treasury	10,336,264	8,000,000	750,000
Total	10,903,918	8,565,000	1,290,000
Adjustment to Treasury combined statement	241		
Total budgetary receipts	10,904,159	8,565,000	1,290,000
BUDGETARY EXPENDITURES			
General account expenditures:			
Appropriated funds:			
Acquisition of assets, net	19,134,621	25,911,521	28,347,600
Operating costs	9,420,666	7,346,000	7,297,000
Increase or decrease in commitments outstanding	(a) 3,982,896	1,597,000	279,000
Increase or decrease in working capital items	(a) 5,233,856	(a) 341,286	(a) 210,000
Total	19,338,535	34,513,235	35,713,600
Less transfer of assets from Department of the Army	147,185		
Net expenditure appropriated funds	19,191,350	34,513,235	35,713,600
Corporate funds:			
Acquisition of assets	17,738,680	29,270,000	29,139,000
Operating costs, other than interest payments to U. S. Treasury	28,719,018	38,485,000	38,921,000
Increase or decrease in working capital items other than cash	(a) $930,812	$1,377,017	(a) $153,000
	47,388,510	69,132,017	67,907,000
Retirement of bonds held by Reconstruction Finance Corporation	2,000,000		
Payments into miscellaneous receipts of U. S. Treasury (as above)	10,903,918	8,565,000	1,290,000
Gross expenditures, corporate funds	60,292,428	77,697,017	69,197,000
Corporate receipts:			
Realization of assets	3,139,548	1,584,000	3,317,000
Income	58,661,715	64,915,000	66,939,000
Total corporate receipts	61,801,263	66,499,000	70,256,000
Net expenditures (or receipts), corporate funds	(a) 1,508,835	11,198,017	(a) 1,059,000
Less change in cash balance with United States Treasurer	10,187,375	11,198,017	1,059,000
Total corporate fund general account expenditures or receipts	(a) 8,678,540		
Total general account expenditures	27,869,890	34,513,235	35,713,600
Adjustment to Treasury combined statement	361,458		
Total budgetary general account expenditures	27,508,432	34,513,235	35,713,600
Expenditures from checking account:			
Change in cash balance with United States Treasurer (as above)	(a) 10,187,375	11,198,017	(a) 1,059,000
Net budget expenditure	17,321,057	45,711,252	34,654,600

(a) Deduct.

SCHEDULE B–1

COMPARATIVE STATEMENT OF NAVIGATION OPERATIONS

[Fiscal years ending June 30, 1947, 1948, and 1949]

	Actual, 1947		Estimate, 1948		Estimate, 1949	
Direct expense:						
Study and development of river transportation		$181,995		$180,000		$180,000
Public-use river terminal operations:						
Operating expense	$42,170		$68,000		$69,000	
Income	(a) 14,547		(a) 40,000		(a) 46,000	
		27,623		28,000		23,000
Power for lock operations		7,661		8,000		8,000
Administrative and general expenses (schedule B–7)		22,494		19,000		20,000
Operation of Norris and Wilson villages (schedule B–8)		330				
Net direct expense (excluding depreciation)		240,103		235,000		231,000
Summary of direct expense:						
To expense (exhibit A)	254,650		275,000		277,000	
By income (exhibit A)	(a) 14,547		(a) 40,000		(a) 46,000	
Net direct expense		240,103		235,000		231,000
Provision for depreciation		581,085		582,000		590,000
Allocated from multipurpose reservoir operations (schedule B–4):						
Operation and maintenance expense	1,384,463		1,282,000		1,261,000	
Provision for depreciation	750,338		757,000		773,000	
		2,134,801		2,039,000		2,034,000
Total navigation operations		2,955,989		2,856,000		2,855,000

(a) Deduct.

SCHEDULE B–3

COMPARATIVE STATEMENT OF POWER OPERATIONS

[Fiscal years ending June 30, 1947, 1948, and 1949]

	Actual, 1947		Estimate, 1948		Estimate, 1949	
Revenues:						
Sales of electric energy:						
Municipalities and cooperatives	$19,635,456		$22,800,000		$26,700,000	
Large power consumers, including other Federal agencies	17,193,061		16,460,000		16,700,000	
Electric utilities	5,173,972		5,500,000		4,500,000	
Rural (retail)	132,350		140,000		160,000	
Total outside sales	42,134,839		44,900,000		48,060,000	
Interdepartmental sales	1,675,733		1,600,000		1,940,000	
Total sales of electric energy	43,810,572		46,500,000		50,000,000	
Rents and other revenues:						
Outside sources	371,511		241,000		213,000	
Interdepartmental rents	a 37,993		6,000		6,000	
Total operating revenues		$44,144,090		$46,747,000		$50,219,000
Operating expenses:						
Production:						
Generation:						
Expense	6,516,213		11,313,950		10,390,850	
Incidental income	a 20,238		a 14,000		a 9,000	
	6,495,975		11,299,950		10,381,850	
Purchased power	147,516		962,000		903,000	
Interchange power received	102,422		673,000		2,020,000	
Interchange power delivered (income)	a 2,163,418		a 2,480,000		a 1,714,000	
Total production expense		4,582,495		10,454,950		11,590,850
Transmission:						
Expense	3,135,430		3,459,000		3,572,000	
Incidental income	a 3,600		a 4,000		a 4,000	
		3,131,830		3,455,000		3,568,000
Distribution:						
Expense	28,183		32,000		33,000	
Incidental income	a 83					
		28,100		32,000		33,000
Customers' accounting and collecting:						
Expense	50,166		55,000		56,000	
Incidental income	8,395					
		58,561		55,000		56,000
Sales promotion:						
Expense	259,967		379,000		399,000	
Incidental income			a 100,000		a 110,000	
		259,967		279,000		289,000
Payments in lieu of taxes		1,668,416		2,000,000		2,000,000
General operating expense	1,395,018		1,480,000		1,567,000	
Administrative and general expense (schedule B–7)	985,865		882,000		900,000	
Operation of Norris and Wilson villages (schedule B–8)	43,556		44,000		30,000	
		2,424,439		2,406,000		2,497,000
Other expense	58,456		84,050		88,150	
Other incidental income	a 16,539		a 20,000		a 21,000	
		41,917		64,050		67,150
Provision for depreciation		7,515,959		7,880,000		8,410,000
Amortization of electric plant acquisition adjustments		200,000		200,000		200,000
Total operating expenses		19,911,684		26,826,000		28,711,000
Net operating income		24,232,406		19,921,000		21,508,000
Allocated from multipurpose reservoir operations expense (schedule B–4):						
Operation and maintenance expense	1,393,205		1,292,000		1,267,000	
Provision for depreciation	1,000,451		1,008,000		1,031,000	
		2,393,656		2,300,000		2,298,000
Net income before interest		21,838,750		17,621,000		19,210,000
Interest:						
Interest on funded debt	615,571		565,000		540,000	
Interest from long-term receivables	a 25,198		a 7,000		a 6,000	
Net interest expense		590,373		558,000		534,000
Net income from power operations		21,248,377		17,063,000		18,676,000

SCHEDULE B–4

COMPARATIVE STATEMENT OF MULTIPURPOSE RESERVOIR OPERATIONS

[Fiscal years ending June 30, 1947, 1948, and 1949]

	Actual, 1947		Estimate, 1948		Estimate, 1949	
Operation and maintenance:						
Water dispatching		$442,496		$455,000		$455,000
Malaria control:						
Expense	$1,223,596		$935,000		$968,000	
Incidental income	a 3,556		a 7,000		a 7,000	
		1,220,040		928,000		961,000
Plant protection and services to visitors:						
Expense	573,582		600,450		600,450	
Incidental income	a 2,542		a 3,450		a 4,450	
		571,040		597,000		596,000
Maintenance of structures and equipment		87,424		103,000		66,000
Upkeep of roads and grounds		134,971		180,000		175,000
Reservoir villages:						
Expense	275,776		210,065		184,665	
Income	a 153,212		a 105,065		a 100,665	
		122,564		105,000		84,000
Reservoir lands:						
Expense	755,780		671,485		629,885	
Income	a 218,692		a 177,485		a 149,885	
		537,088		494,000		480,000
Backwater protection facilities		32,242		25,000		25,000
Engineering investigations and tests		370,706		455,000		445,000
System improvement studies		87,343		140,000		150,000
Other operations:						
Expense	25,676		23,000		16,000	
Incidental income	a 148					
		25,528		23,000		16,000
Net direct operation and maintenance (exclusive of depreciation)		3,631,442		3,505,000		3,453,000
Administrative and general expenses (schedule B–7)		465,795		288,000		286,000
Operation of Norris and Wilson villages (schedule B–8)		64,893		63,000		50,000
Net multipurpose reservoir operations (exclusive of depreciation)		4,162,130		3,856,000		3,789,000
RECAPITULATION						
To expenses (exhibit A)		4,540,280		4,149,000		4,051,000
By income (exhibit A)		a 378,150		a 293,000		a 262,000
Total as above		4,162,130		3,856,000		3,789,000
Provision for depreciation		2,501,128		2,522,000		2,577,000
Total multipurpose reservoir operations		6,663,258		6,378,000		6,366,000

ALLOCATION OF MULTIPURPOSE RESERVOIR OPERATIONS TO PROGRAMS

Power operations (schedule B–3):						
Operation and maintenance expense	$1,393,205		$1,292,000		$1,267,000	
Provision for depreciation	1,000,451		1,008,000		1,031,000	
Total allocated to power operations		$2,393,656		$2,300,000		$2,298,000
Navigation operations (schedule B–1):						
Operation and maintenance expense	1,384,463		1,282,000		1,261,000	
Provision for depreciation	750,338		757,000		773,000	
Total allocated to navigation operations		2,134,801		2,039,000		2,034,000
Flood control operations (schedule B–2):						
Operation and maintenance expense	1,384,462		1,282,000		1,261,000	
Provision for depreciation	750,339		757,000		773,000	
Total allocated to flood control operations		2,134,801		2,039,000		2,034,000
Total multipurpose reservoir operations allocated		6,663,258		6,378,000		6,366,000

SCHEDULE B–5

COMPARATIVE STATEMENT OF CHEMICAL OPERATIONS

[Fiscal years ending June 30, 1947, 1948, and 1949]

	Actual, 1947		Estimate, 1948		Estimate, 1949	
Disposition of products:						
Sales:						
Federal agencies	$3,125		$108,000		$4,000	
Cooperatives and others	11,507,779		13,957,000		12,500,000	
Used in TVA programs:						
Tests and demonstrations (from appropriated funds, schedule B–6)	2,431,366		1,500,000		1,500,000	
Income from test-demonstration farmers (partial-pay plan)					400,000	
Other activities	36,269		40,000		19,000	
Total disposition of products		$13,978,539		$15,605,000		$14,423,000
Cost of products disposed of:						
Products manufactured:						
Materials used	3,458,844		3,932,000		3,080,000	
Manufacturing expense	7,639,741		7,718,000		7,779,000	
Provision for depreciation and depletion	1,508,451		1,605,000		1,302,000	
Byproducts and in-process recoveries:						
Expense	60,835		80,000		75,000	
Interdepartmental transfers	(a) 95,701		(a) 18,000		(a) 3,000	
Income	(a) 290,391		(a) 283,000		(a) 271,000	
Total cost of products manufactured	12,281,779		13,034,000		11,962,000	
Increase (a) or decrease in finished inventories	(a) 616,129		(a) 58,000		19,000	
Cost of products shipped	11,665,650		12,976,000		11,981,000	
Shipping expense	1,201,378		1,539,000		1,485,000	
Incidental income, shipping	(a) 2,289					
Provision for depreciation, shipping	16,658		18,000		18,000	
Total cost of products disposed of		12,881,397		14,533,000		13,484,000
Gross income from disposition of products		1,097,142		1,072,000		939,000
Other expenses:						
Agricultural operation of phosphate lands:						
Expense	1,551		4,000		4,000	
Income	(a) 6,599		(a) 6,000		(a) 6,000	
Maintenance of idle chemical facilities:						
Expense	21,907		36,000		34,000	
Income	(a) 18,000		(a) 18,000		(a) 18,000	
Preliminary operation of new processes					120,000	
Sale of CO catalyst—U. S. Treasury Department:						
Expense	11,588					
Income	(a) 29,240					
Depreciation and write-off of idle and retired facilities	368,408		145,000		160,000	
Administrative and general expenses (schedule B–7)	527,123		450,000		475,000	
Operation of Norris and Wilson villages (schedule B–8)	68,647		66,000		65,000	
		945,385		677,000		834,000
Net income from chemical operations		151,757		395,000		105,000
RECAPITULATION						
Gross expenses before depreciation		12,375,485		13,767,000		13,136,000
Less interdepartmental transfers		2,563,336		1,558,000		1,522,000
To expenses (exhibit A)		9,812,149		12,209,000		11,614,000
Depreciation, depletion, and write-offs		1,893,517		1,768,000		1,480,000
		11,705,666		13,977,000		13,094,000
By income (exhibit A)		11,857,423		14,372,000		13,199,000
Net income from chemical operations		151,757		395,000		105,000

SCHEDULE B–6

COMPARATIVE STATEMENT OF EXPENSE OF RESOURCE DEVELOPMENT ACTIVITIES

[Fiscal years ending June 30, 1947, 1948, and 1949]

	Actual, 1947		Estimate, 1948		Estimate, 1949	
Agricultural resource development:						
Fertilizer used in tests and demonstrations	$2,433,526		$1,500,000		$1,500,000	
Fertilizer distribution and relations with rural organizations	252,137		170,000		170,000	
Test-demonstration supervision	845,892		690,000		750,000	
Preliminary soil and fertilizer investigations	176,768		150,000		185,000	
Soil inventory and mapping	72,043		60,000		65,000	
Development and demonstration of farm equipment	188,672		170,000		170,000	
Development of processes and markets for agricultural products	172,803		165,000		160,000	
		$4,141,841		$2,905,000		$3,000,000
Forest resource development:						
Studies of forest resources and management	231,624		210,000		210,000	
Assistance in forest management and reforestation	389,387		415,000		415,000	
Development of processes and markets for forest products	167,640		136,000		125,000	
		788,651		761,000		750,000
Mineral resource development		167,588		160,000		150,000
Recreational resource development:						
Recreational planning studies and assistance	72,799		70,000		70,000	
Operation of recreation facilities	253,605		223,000		200,000	
		326,404		293,000		270,000
Stream sanitation and public health:						
Stream sanitation investigations	155,887		160,000		160,000	
Public health studies and assistance	53,737		47,000		40,000	
		209,624		207,000		200,000
Fish and game investigations		90,279		91,000		90,000
Topographic mapping		936,011		425,000		400,000
Special studies and activities:						
Transportation and industrial economic studies	163,998		144,000		144,000	
Advisory assistance to State and local governments	149,085		142,000		145,000	
Studies of resource development methods and opportunities	12,501		12,000		1,000	
		325,584		298,000		290,000
Administrative and general expenses (schedule B–7)		414,571		250,000		250,000
Operation of Norris and Wilson villages (schedule B–8)		118,773		100,000		82,000
Total to expenses (exhibit A)		7,519,326		5,490,000		5,482,000
Provisions for depreciation		72,671		100,000		115,000
By income (exhibit A):						
Operation of recreation facilities	91,511		72,000		48,000	
Other incidental income	14,813		3,000		4,000	
		[a] 106,324		[a] 75,000		[a] 52,000
Net expense of resource development activities		7,485,673		5,515,000		5,545,000

SCHEDULE C–1

REPAYMENT OF INVESTMENT IN POWER PROGRAM

Repayable Investment as of June 30, 1947, * $348,239,240

	Prior years, actual	Fiscal year 1948, budget	Fiscal year 1949, budget
Repayments:			
Bond redemptions	$8,572,500	$2,500,000	$2,500,000
Under section 26 from power proceeds	15,059,019	7,963,674	60,000
Total	23,631,519	10,463,674	2,560,000
Remainder to be repaid by June 30, 1988	* 348,239,240	337,775,566	335,215,566
Portion to be repaid by June 30, 1958	87,059,810	76,596,136	74,036,136

* As stated in the Government Corporations Appropriation Act, 1948. This amount includes $5,565,082 of construction in progress and not until after fiscal year 1949 will the completion of additional power facilities financed from appropriations exceed this amount so as to require repayment in the succeeding 40-year period under the terms of the appropriation act.

ESTIMATES OF AUTHORIZATION RELATING TO CORPORATE FUNDS

NOTE.—The text of general authorizing language, as incorporated in the Government Corporations Appropriation Act, 1948, and as proposed for 1949, will be found at the end of the "Summary Statements and General Language" of part III of the Budget.

Tennessee Valley Authority[: Not later than June 30, 1948, and not later than June 30 of each calendar year thereafter, until a total of $348,239,240 has been paid as herein provided, the board of directors of the Tennessee Valley Authority shall pay from net income derived the immediately preceding fiscal year from power operations (such net income to be determined by deducting power operating expenses, allocated common expense, and interest on funded debt from total power operating revenues) not less than $2,500,000 of its outstanding bonded indebtedness to the Treasury of the United States exclusive of interest, and such a portion of the remainder of such net income into the Treasury of the United States as miscellaneous receipts as will, in the ten-year period ending June 30, 1958, and in each succeeding ten-year period until the aforesaid total of $348,239,240 shall have been paid, equal not less than a total of $87,059,810, including payment of bonded indebtedness exclusive of interest on such bonded indebtedness. Total payments of not less than $10,500,000 shall be made not later than June 30, 1948].

[Amounts equal to the total of all appropriations herein and hereafter made to the Tennessee Valley Authority for power facilities shall be paid by the board of directors thereof, in addition to the total of $348,239,240 specified in the foregoing paragraph, to the Treasury of the United States as miscellaneous receipts, such payments to be amortized over a period of not to exceed forty years after the year in which such facilities go into operation.]

None of the power revenues of the Tennessee Valley Authority shall be used for the construction of new power producing projects (except for replacement purposes) unless and until approved by Act of Congress. (*The Government Corporations Appropriation Act, 1948.*)

Statement of proposed obligations for purchase and hire of passenger motor vehicles, and for purchase, maintenance, and operation of aircraft for the fiscal year 1949

TENNESSEE VALLEY AUTHORITY

Appropriation	Vehicles (motor unless otherwise indicated) or aircraft to be purchased		Old vehicles or aircraft to be exchanged		Net cost of vehicles or aircraft to be purchased	Old vehicles or aircraft still to be used	Cost of hire of motor vehicles or maintenance and operation of aircraft	Public purpose and users
	Number	Gross cost	Number	Allowance (estimated)

DEPARTMENT OF AGRICULTURE

INTRODUCTORY STATEMENT

The Secretary of Agriculture has under his general direction and supervision six wholly owned Government corporations—Commodity Credit Corporation, Federal Crop Insurance Corporation, Federal Farm Mortgage Corporation, Federal intermediate credit banks, production credit corporations, and Regional Agricultural Credit Corporation. In addition to the wholly owned Government corporations for which business-type budgets are submitted, there are two types of corporations within the Department of Agriculture which, under the act, are termed mixed-ownership corporations—Federal land banks and banks for cooperatives. A statement on the financial relationship of these mixed-ownership corporations with the Government is also included in this chapter of the Budget.

The Commodity Credit Corporation is engaged in a price support program, a commodity export program, a foreign purchase program, and a supply program. The activities of this Corporation are conducted through the Production and Marketing Administration of the Department of Agriculture.

The Federal Crop Insurance Corporation carries out experimental insurance programs on wheat, cotton, flax, corn, and tobacco with one additional crop to be added in 1948 and 1949.

The Federal intermediate credit banks, production credit corporations, and the Regional Agricultural Credit Corporation, together with the cooperatively owned Federal land banks and banks for cooperatives, are engaged in providing credit to farmers and farmers' cooperatives. The Federal Farm Mortgage Corporation, whose authority to make new loans expired on July 1, 1947, is now in the process of liquidation. The operations of these corporations are supervised and examined by the Farm Credit Administration.

The activities of the Federal Surplus Commodities Corporation were liquidated during the fiscal year 1947. Prior to liquidation, this Corporation was also under the general direction and supervision of the Secretary of Agriculture.

COMMODITY CREDIT CORPORATION

Purpose and Financial Organization

A statement describing in detail the creation, purposes, and authorities of the Corporation and its financial organization was contained in the budgets heretofore submitted for the fiscal years 1947 and 1948.

The Corporation engages in buying, selling, lending, and other activities with respect to agricultural commodities, products thereof, foods, feeds, and fibers, for the purpose of stabilizing, supporting, and protecting farm income and prices, assisting in the maintenance of balanced and adequate supplies of such commodities, and facilitating the orderly distribution thereof.

The Corporation has an authorized capital stock of $100 million, all of which is held by the United States. The Corporation is authorized to borrow $4,750,000,000 on the credit of the United States. On June 30, 1947, obligations outstanding amounted to $550,330,021. It is not contemplated that operations during the fiscal year 1949 will require any increase in the Corporation's borrowing power. A statement of the Corporation's financial condition is shown immediately following the narrative material. (Exhibit C.)

Congress has continued the Corporation, under its Delaware charter, as an agency of the United States until June 30, 1948 (Public Law 130, 80th Cong., 1st sess.). Pursuant to the provisions of the Government Corporation Control Act, legislation is under consideration by Congress which would provide the Corporation with a Federal charter after June 30, 1948.

Additional direction was given by the Congress during the past year in the Wool Price Support Act of 1948, Public Law 360, approved August 5, 1947, which provided that the Corporation continue supporting the price of wool at 1946 support levels until December 31, 1948, and authorized the Corporation, until December 31, 1948, to dispose of any wool without regard to any restriction imposed by law.

Analysis of Budget Programs

The budget of the Corporation for the fiscal year 1949 is based on five types of programs carried out under corporate and specific authorities. These types of programs are:

1. Price support program
2. Supply program
3. Foreign purchase program
4. Commodity export program
5. Loan to Secretary of Agriculture for agricultural conservation purposes

In addition, a subsidy program, which during the war years was a major activity of the Corporation, was completed when price ceilings on sugar were terminated effective November 1, 1947. Activities under this program beginning on that date have been limited to its liquidation.

Basically the types of programs carried out by the Corporation are not entirely independent since in carrying out a primary objective in one program, the objective of another program is also attained. For example, purchases under the supply program may reduce or completely absorb the visible surplus of an individual agricultural commodity and in some instances make it unnecessary to carry out a price support operation in connection with that commodity under the price support program. Commodities acquired under the price support program may be used to meet supply requirements or in a commodity export operation which, if they were not so disposed of, would have to be held by the Corporation until other suitable outlets could be developed. Similarly, facilities such as storage and elevating equipment, originally acquired or financed in connection with one program, may be utilized in connection with other programs.

During the period from July 1, 1946, to January 1, 1948, an important part of the operations of the Corporation has been the procurement of supplies of agricultural commodities and products thereof, foods, and related facilities needed for cash paying foreign governments, various relief organizations and Government agencies including, among others, the Departments of the Army and Navy, and the State Department. Wherever possible, price support operations are directed toward developing the production needed to fulfill such needs as well as the needs of our domestic economy. The level of support prices is established in some cases not only with a view to meeting minimum legal requirements but also to bringing about desirable shifts in production and obtaining the needed volume of production.

In addition to the programs carried out by the Corporation, the Secretary of Agriculture under the authority of Public Law 271, approved July 30, 1947, has determined that Corporation funds should be transferred under the provisions of that act to the appropriation for the eradication of foot-and-mouth and other contagious diseases of animals. Proceeds from the sale of canned meat, procured in Mexico with funds so transferred, are being applied by the Corporation as a credit against the transfers made. It has been assumed that in line with the understanding expressed in House Report 990 on H. R. 4269, Eightieth Congress, reimbursements will be made to the extent of the net transfers. Transfers under this authority have amounted to $25 million as of December 18, 1947 (see exhibit A). Any additional transfers ordered by the Secretary of Agriculture will increase this amount, but it is assumed that the full amount of such additional transfers will be recovered.

BASIC ASSUMPTIONS

Budget estimates for operations of the Corporation during the fiscal years 1948 and 1949 reflect a continuation of high production and a continued need for large quantities of food and agricultural products in foreign countries. The restoration of foreign agricultural production is progressing but, in view of weather and other conditions in many areas, it does not now appear that it will be restored sufficiently to reduce the demands for food and agricultural products during the fiscal years 1948 and 1949. The serious maladjustment of agricultural production and distribution in foreign countries will continue to influence domestic production and the utilization of such production. It is also assumed that some maladjustments in domestic production and consumption will be apparent but that many commodities will continue to be produced in large volume with full demand for such commodities for domestic and export uses.

The budget estimates have been prepared on the assumption that during the entire budget period there will be a continued high level of national income, industrial activity, general prices, and agricultural production, and

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

that agricultural prices may average slightly higher but will be stabilized and level off during the fiscal year 1949.

Legislation establishing the minimum levels at which prices of basic agricultural commodities are now supported expires upon completion of support activities on the 1948 crop and minimum levels at which prices of Steagall commodities are supported expires on December 31, 1948. Since it has not been decided to what extent or at what minimum levels the Congress will establish support of agricultural commodities subsequent to the expiration of this legislation, fund requirements have been estimated throughout the fiscal year 1949 based upon present support levels. These estimates are, therefore, subject to either upward or downward adjustment, depending upon subsequent congressional action in establishing a policy as to the minimum levels at which the Corporation is directed to support agricultural prices and administrative actions taken thereunder.

It has been assumed that the Corporation will be required to supply on a reimbursable basis the domestic and some foreign agricultural commodities needed in carrying out the European recovery programs.

If the general price level rises sharply and results in material increases in the parity index, support prices will also rise sharply since they are required by law to be at a specified percentage of parity prices. When the general price level rises, farm commodity prices generally rise more rapidly than do parity prices. If this should occur, the volume of commodities acquired by the Corporation under the price support program would decline.

If, on the other hand, there should be a substantial decline in national income and consumer purchasing power from the assumed levels, the estimates probably would be inadequate because of the increased volume of commodities acquired under the price support operations, which would very likely more than offset any decline in the level of support prices. Also in a decline in market prices the farm prices usually drop more rapidly than do parity and related support prices.

It is the policy of the Corporation to return the procurement of food and agricultural commodities to meet the needs of various Federal Government agencies, foreign governments, and others to commercial channels as rapidly as possible. The Corporation has discontinued the procurement of many types of foods and agricultural commodities for foreign governments. Present indications are, however, that it will be necessary for the Corporation to procure a portion of the requirements for foreign governments through the marketing period on 1947 crops and that it will be necessary to continue central procurement of commodities for foreign rehabilitation needs throughout the marketing season on 1947 and 1948 crops. It is probable the continued centralized procurement will be required on certain foods and agricultural commodities as long as world food supplies are short and competition in the procurement by several buyers would disrupt domestic markets.

It is assumed that the procurement of agricultural commodities and products thereof in foreign countries will be substantially returned to private trading channels but that the Corporation may be required to purchase limited quantities of agricultural commodities or products thereof if the present policies of some foreign governments on sales for export are continued during the fiscal year 1949. In some instances, sales in foreign countries for exports may be made only on a government-to-government basis. Where such policies exist, the Corporation may purchase commodities produced in foreign countries to meet the needs of this country. The Corporation may also be required to increase the volume of purchases of agricultural commodities in foreign countries materially in furtherance of the objectives of any foreign recovery programs which the Congress may subsequently authorize.

In considering these estimates, it should be recognized that it is very difficult to estimate requirements for the year beginning July 1, 1948, and ending June 30, 1949. Approval of the proposal to authorize the disposition of commodities acquired under the price support program at the price equivalent to the domestic market price of a quantity of wheat having the same caloric value may increase losses materially and decrease the dollar value of sales. The possible effects of such an authorization on the price support program are unknown at this time. As pointed out above, the minimum support levels at, and the extent to, which the Congress will direct and authorize the Corporation to support agricultural prices after December 31, 1948, are also undetermined at this time. In addition to these factors, the financial requirements of the Corporation will depend on weather conditions, volume of domestic and foreign production of practically all agricultural commodities, domestic and foreign economic conditions, availability of dollar exchange, food requirements in foreign countries other than those participating in the European recovery program, and many other unpredictable factors.

PRICE SUPPORT PROGRAM

Under its price support program the Commodity Credit Corporation, through loans, purchases, and other operations, supports the prices of various agricultural commodities. The purpose of the program is to place a floor under the farm price of agricultural commodities by assuring farmers a minimum price. In some instances, this support price is established at a level designed to obtain the expanded production of those specific agricultural commodities needed to meet abnormal foreign and domestic requirements. The Corporation carries out its price support program under its charter powers to buy, sell, lend, and engage in other activities with respect to agricultural commodities and their products. To a large extent the Congress has by specific legislation directed that these charter powers be used to support the price of certain agricultural commodities. (This legislation was discussed in some detail in the narrative statement for the 1948 Budget under the heading "Creation and Purpose.")

The price support program may be generally divided into three categories:

(1) Mandatory loans made available upon the basic commodities—corn, cotton, except American-Egyptian cotton, peanuts for nuts, rice, tobacco, and wheat—in accordance with section 8 of the Stabilization Act of 1942, as amended (50 U. S. C. 968), and the act of July 28, 1945 (7 U. S. C. 1312, note).

(2) Mandatory price support through loans, purchases, or other operations pursuant to section 4 (a) of the act of July 1, 1941, as amended, the so-called "Steagall amendment" (15 U. S. C. 713a–8 (a)), with respect to the following "Steagall commodities": Hogs, eggs, chickens and turkeys, milk and butterfat, dry peas of certain varieties, dry edible beans of certain varieties, soybeans for oil, peanuts for oil, flaxseed for oil, American-Egyptian cotton, potatoes, and sweetpotatoes.

(3) Price support operations with respect to agricultural commodities other than those required to be carried out under the acts cited above. These operations include the mandatory support of wool under the provisions of the act of August 5, 1947 (Public Law 360, 80th Cong., 1st

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

sess.) and the nonmandatory support of a large variety of other commodities, such as, among others, naval stores, several grains, sugar beets, sugarcane, raisins, and prunes, in accordance with the congressional policy stated in section 4 (b) of the act of July 1, 1941, as amended.

In carrying out is price support program the Corporation utilizes normal trade facilities to the fullest practicable extend and to this end, private organizations are utilized by the Corporation when it is required by law, in accord with legislative policy, or clearly advantageous to the Corporation. Thus, where loans are made to farmers the Corporation makes use of local banks, cooperatives, and other private lending agencies by entering into contracts with such lending agencies under which the Corporation agrees to take over loans made in accordance with the Corporation's program on or before maturity upon request of the lending agency. In addition, the Corporation enters into contracts with processors and dealers under which they buy through normal trade channels agricultural commodities at support prices for the account of the Corporation or for their own account. In the latter event the Corporation generally agrees (subject to conditions established by the Corporation) to take over their unsold inventories of such agricultural commodities or products processed therefrom or otherwise protects them against loss because of the purchase of commodities at the support prices.

Effective with the crop year 1947, a new type of purchase plan was offered to producers of grains, seeds, peas, beans, and potatoes. The announcement of price support operations for these commodities contain a provision that producers may sign purchase agreements with the Corporation in the period during which loans on such commodities are available. The terms of these purchase agreements generally provide that the Corporation will purchase such quantities of the eligible commodity as the producer elects to deliver within 30 days of the maturity date established for loans on such commodities. The price paid for commodities delivered to the Corporation under these agreements is the applicable loan value or the established support price at the delivery point.

In accordance with the act of February 18, 1946 (Public Law 301, 79th Cong.), $500 million was paid to the Corporation to be held as a reserve for postwar price support of agriculture. With the issuance of the Presidential proclamation, No. 2714, declaring the cessation of hostilities on December 31, 1946, the postwar period for the purposes of this reserve began on January 1, 1947. The Corporation has established the policy that all price support losses recorded on the books of the Corporation, on and after January 1, 1947, should be charged against this reserve.

As indicated under "Basic assumptions," the price support fund requirements for each commodity are the gross amounts which it is anticipated will be required to support farm prices of agricultural commodities at not less than present minimum statutory levels through June 30, 1949. The termination of emergency price support legislation will not materially reduce the funds needed to support the prices of 1948 crops. The commodities that might be materially affected by any termination of or change in price support levels are the noncrop commodities such as wool, eggs, dairy products, poultry, and naval stores, and the crop commodities of early potatoes and wheat harvested in the last half of the fiscal year 1949.

Loans.—While demand and prices continued at high levels during the fiscal year 1947, the value of loans made increased from $184,615,551 in 1946 to $277,790,231. Substantial loans on corn and wheat indicate that producers use loans to facilitate the marketing of their commodities even in periods when market prices are substantially above the loan rates.

It is anticipated that the Corporation will make substantial loans particularly on cotton, grain, peanuts, tobacco, flaxseed, potatoes, and soybeans, during the fiscal years 1948 and 1949. In view of the estimated market conditions in fiscal years 1948 and 1949, collateral acquired in the settlement of loans is expected to continue at a very low level during both years. In fiscal year 1947, $13,832,537 of collateral was acquired in the settlement of loans, and it is estimated that only $2,050,045 and $2,883,000 worth of collateral will be acquired in the settlement of loans during fiscal years 1948 and 1949, respectively. Loans on tobacco are expected to decrease substantially due to the reduction of acreage due to marketing quotas which were approved by vote of producers. It is anticipated that total loans outstanding will increase from $227,783,000 as of June 30, 1948, to $324,665,000 as of June 30, 1949.

Purchases.—During the fiscal year 1948, it is estimated that price support purchases will amount to $371,596,039 and that these purchases will decrease during the fiscal year 1949 to $335,573,000. This decrease will be due primarily to anticipated strong foreign demand for most commodities during the fiscal year 1949. High prices and strong foreign demand are expected to eliminate the necessity for any grain price support purchases during the fiscal years 1948 and 1949. While some changes in the amounts of individual "Steagall" and other nonbasic price support commodities purchased during the fiscal year 1949 are anticipated due to specific production-consumption conditions and the availability of competitive foods, the total purchases of these commodities are expected to decrease from $341,596,039 in 1948 to $303,173,000 in 1949.

Sales.—It is estimated that the volume of sales for fiscal year 1948 will decrease materially from the actual sales made during fiscal year 1947. Since the major portion of the Corporation's cotton stocks were sold in 1947, a sharp reduction of sales of cotton is anticipated in the fiscal year 1948; this reduction more than counterbalances anticipated increases in the sale of wool, dairy products, flaxseed, and dried fruit. The decrease in sales from $368,546,643 in 1948 to $322,285,000 in 1949 reflects in the main the net result of increases in sales of eggs, flaxseed, soybeans and seeds; decreases in dairy products, poultry, Irish potatoes, peanuts and dried fruit, and the termination of the Puerto Rican and Virgin Islands sugar operations.

Commodity stocks.—At the beginning of the fiscal year 1947, commodity stocks held under the price support program amounted to $398,259,523; these had been reduced to $300,270,049 at the end of the fiscal year 1947. The principal inventory reduction during fiscal year 1947 occurred in cotton; substantial export sales of this commodity reduced the inventory from $136,934,562 to $1,180,556 by the end of the fiscal year 1947. It is estimated that inventories will decrease from $300,270,049 to $231,090,000 during the fiscal year 1948 and to $146,544,000 during the fiscal year 1949. These estimated reductions in inventories are due to the anticipated strong foreign demand for food and to reductions in wool inventory due to anticipated sales at prices competitive to those of foreign wool.

Losses.—Price support operations for the fiscal year 1947 resulted in a realized loss of $42,784,597. The principal losses sustained were due to the disposition of potato in-

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

ventories and the sale of wool at prices competitive with imported wool. These losses were partially offset by a substantial profit on the sale of cotton inventories. Estimated realized losses for fiscal year 1948 are $99,071,900. It is anticipated that major losses will occur in peanuts, eggs, potatoes, and wool. The loss on peanuts is due to the reduced prices received for peanuts sold to crushers in order to support the price of edible peanuts. Potato losses are anticipated because the 1947 crop in early and intermediate States exceeded the amount normal domestic outlets could absorb and disposition of the surplus in export markets and for byproduct uses have been at prices which, on the average, have been considerably below support prices. Losses on wool are expected to continue as a result of sales at prices competitive with imported wool prices. Losses on eggs are anticipated because dollar exchange shortages and competition on a calorie basis with lower-priced foods are expected to necessitate lower prices in order to move this commodity into export channels.

Price support realized losses for the fiscal year 1949 are expected to amount to $116,559,000. The same commodities on which substantial losses are anticipated in fiscal year 1948 are expected to be the source of the principal losses in 1949. In addition to the factors cited as the principal reasons for anticipated losses in the fiscal year 1948, it is estimated that the sale of a larger portion of egg inventories will be responsible for the increased losses in 1949.

The estimated losses for the fiscal year 1949 are based on the assumptions stated earlier in this Budget submission; however, any major change in the parity level from the level assumed, any major increases in production over those assumed, any change in the sales policy on price support commodities directed by the Congress, or any changes in the economic situation on prices of competitive foods which might reduce consumption could easily increase the losses materially in any one of these commodities.

In supporting the prices on basic commodities it has occasionally been necessary to hold inventories for several years before it was possible to dispose of them with a profit or minimum loss to the Corporation. It is not possible to hold inventories of those nonbasic commodities which are classed as either perishable or semiperishable for extended periods and for that reason immediate outlets must be developed and the inventories disposed of in a relatively short period of time. It is not usually possible to market inventories of perishable and semiperishable commodities by sale at parity prices. Thus, it is ordinarily necessary to divert such inventories into other than normal uses and substantial losses usually occur under such conditions.

As indicated above, all losses resulting from price support operations after January 1, 1947, as evidenced by the books of the Corporation, are charged against the reserve for postwar price support. After adjustments of reserves covering the difference between book and estimated realizable values of inventories and collateral securing loans, the net loss on price support operations for the fiscal year 1947 amounted to $79,820,970. The portion of this loss, amounting to $59,950,696, incurred between January 1 and June 30, 1947, was charged to the reserve for postwar price support; the balance of the loss amounting to $19,870,274 incurred between July 1 and December 31, 1946, was charged against the Corporation's surplus. After adjustments of inventory and loan valuation reserves, it is estimated that the net price support loss to be charged against the reserve for postwar price support will amount to $91,405,456 for the fiscal year 1948 and to $80,883,000 for the fiscal year 1949. These estimates of charges against the postwar price support reserve will be affected by changes in the sales price policy of price support commodities directed by the Congress as well as other indefinite economic factors such as price levels, weather, etc.

SUPPLY PROGRAM

Under its supply program the Corporation procures foods, agricultural commodities and products thereof, and related materials for the purpose of supplying the requirements of United States Government agencies, foreign governments, relief agencies, and other similar organizations. The centralization of such procurement operations in the Corporation not only has made possible increased efficiency through combined operations but also has eliminated the inflationary effect of competitive buying which would otherwise result if several Government agencies, as well as numerous representatives of foreign countries, were in the market simultaneously. In addition, it has enabled such operations to be conducted in a manner that provides maximum benefit to American agriculture in that the procurement is carried out during peak marketing seasons and is closely coordinated with the price support program. The Corporation's procurement operations are conducted in accordance with procedures and policies calculated to assure the Corporation against loss. In this connection the Congress by section 4 of the act of July 16, 1943 (15 U. S. C. 713a–9), specifically required that the Corporation be fully reimbursed for services performed, losses sustained, and operating costs incurred or commodities purchased or delivered to or on behalf of any other Government agency. It also procures or aids in the procurement of foods and agricultural commodities and products thereof in order to facilitate distribution or to meet anticipated requirements during periods of short supply. The Corporation has also procured or aided in the procurement of supplies and facilities needed by farmers in connection with the production, handling, and marketing of agricultural commodities and their products, such as feed, seeds, cotton bagging, fertilizers, and insecticides. The Corporation's supply program is carried out under its charter authority to purchase, sell, or otherwise deal in agricultural commodities and products thereof and related materials and to engage in activities in connection with production, handling, and marketing thereof.

The volume of purchases in the supply program is expected to increase above the 1947 level during the fiscal year 1948 and to continue at approximately the 1948 level during the fiscal year 1949; thus, supply program purchases which amounted to $1,094,536,066 in fiscal year 1947 are estimated to amount to $1,689,069,500 in 1948 and $1,686,387,000 in 1949. The large volume of supply program purchases in 1948 and 1949 is due primarily to the anticipated European recovery programs which are now being considered by the Congress and to the effects of the unfavorable foreign crop conditions encountered during the calendar year 1947. Sales of commodities under the supply program amounted to $1,277,891,199 in fiscal year 1947, as compared with estimates of $1,763,055,241 in fiscal year 1948 and $1,776,349,000 in fiscal year 1949. It is estimated that the inventories of commodities owned by the Corporation under this program which have been reduced from $240,987,549 as of June 30, 1946, to $123,244,959 as of June 30, 1947, will

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

amount to $129,446,000 as of June 30, 1948, and will be slightly reduced to $99,530,000 by June 30, 1949. These estimates are based on the assumption that European recovery programs will be carried out. Therefore, these estimates of the Corporation's supply program are subject to revision, depending upon final congressional action determining the size and scope of the recovery programs now under consideration.

FOREIGN PURCHASE PROGRAM

Under its foreign purchase program the Corporation purchases abroad such foods, agricultural commodities and products thereof, and related facilities as are needed to meet both foreign and domestic requirements. These purchases have consisted largely of commodities in short supply, notably fats and oils, sugar, cocoa beans, long-staple cotton, protein meals, tea, and rice. Most of the purchases have implemented the allocations of agricultural commodities in short world supply made by the International Emergency Food Committee. This program is carried out pursuant to the Corporation's charter authority to purchase and sell commodities both in the United States and foreign countries. The President of the United States on April 28, 1942, approved "the use by the Commodity Credit Corporation of any of its funds for the purpose of carrying out projects involving the acquisition, handling, and disposition of agricultural commodities produced in foreign countries friendly to the United States." On May 16, 1942, the Board of Economic Warfare, which had general jurisdiction over foreign economic matters, designated the Corporation, with certain exceptions, as the sole and exclusive agency for the purchase of agricultural commodities in foreign countries. The foreign purchase program of the Corporation, with the exception of purchases of sugar in Cuba and purchases of commodities in Canada, was transferred to the Foreign Economic Administration by Executive Order 9385 (8 F. R. 13783) dated October 6, 1943, but was returned to the Department of Agriculture by Executive Order 9630 (10 F. R. 12245) dated September 27, 1945.

Purchases of agricultural commodities and products in foreign countries amounted to $382,044,014 during the fiscal year 1947, as compared to an estimated $298,287,700 during the fiscal year 1948 and an estimated $128,590,000 during the fiscal year 1949. The sharp decrease in estimated purchases for the fiscal year 1949 reflects the anticipated return of a substantial portion of foreign procurement activities to commercial trade channels. The anticipated procurement of oils valued at $12,150,000 during the fiscal year 1949 is based on the assumption that it may be necessary to acquire some oil to meet domestic requirements which cannot be acquired by the trade through normal channels. It is anticipated that all inventories will be liquidated by June 30, 1948, and that any commodities purchased in the fiscal year 1949 will be sold by the end of the fiscal year.

If the Congress determines that foreign agricultural products are to be used extensively in meeting European or other recovery program needs and authorizes Commodity Credit Corporation to enter into relations with the appropriate agencies in the non-European countries to furnish such essential supplies and materials, as can be made available, required for expanding production of foods and food products, and to enter into procurement arrangements on mutually agreed upon terms and conditions of payment, substantial increases in foreign purchase program activities may result.

770000—48——73

COMMODITY EXPORT PROGRAM

Under its commodity export program the Corporation exports or causes to be exported agricultural commodities and products. The purpose of the program is to retain foreign markets for agricultural commodities and products thereof produced in the United States and to aid in the disposal of surplus agricultural commodities.

Disposals of agricultural commodities and products thereof for export are made at competitive world prices which are below domestic market prices pursuant to section 21 (c) of the Surplus Property Act of 1944 (50 U. S. C. 1630). That section authorizes the Corporation to dispose or cause to be disposed of for cash or its equivalent in goods or for adequately secured credit, for export only, and at competitive world prices any farm commodity or product thereof without regard to restrictions with respect to the disposal of commodities imposed upon the Corporation by any law. No food or food product, however, may be disposed of if such food or food product is in short supply or its disposition would create a short supply. Disposals under this authority result in a loss to the Corporation.

Prior to the enactment of section 21 (c) the Corporation's ability to engage in export operations was substantially limited by the statutory prohibition against sales of farm commodities below the parity or comparable price. A cotton project under which cotton is made available for export at competitive world prices was begun in fiscal year 1945. The extent of operations in fiscal year 1949 under this project will depend largely upon the quantity of cotton in the Corporation's stocks. This country normally exports a large portion of its shorter staples and lower grades of cotton and, consequently, provision is made for continuing this project during the fiscal year 1949.

Since the latter part of the fiscal year 1946, the Corporation has limited exports under this program to commodities acquired in price support operations. Assuming the continuation of this practice, the losses on cotton exports, the only currently active operation recorded under this program, will be reduced from $19,225,915 during the fiscal year 1947 to an estimated $54,500 during the fiscal year 1948 and to an estimated $225,000 during the fiscal year 1949. Although the possible existence of acute surpluses in other commodities during the fiscal year 1949 is not apparent at this time, it may become necessary to export other commodities under this program if such acute surpluses develop.

SUBSIDY PROGRAM

The subsidy operations of the Corporation with the exception of sugar and peanut subsidies were terminated on or before June 30, 1946, and were in liquidation during the entire fiscal year 1947; the subsidy on peanuts was terminated early in the fiscal year 1947 and sugar subsidies were terminated in the fiscal year 1948 when price ceilings were removed, effective November 1, 1947.

Subsidy payments on the 1947 crop of sugar were authorized by section 6 of the act of July 25, 1946 (Public Law 545, 79th Cong.), which provided among other things the continuation of subsidy operations on the 1947 sugar crop until the ceiling prices on sugar were removed.

While the financial results of all sugar operations prior to October 31, 1947, have been charged to the subsidy program in order that the total costs of keeping prices to consumers within established ceilings might be shown, each of these operations had two purposes. Thus in

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

addition to maintaining price ceilings, Cuban sugar was purchased to obtain needed supplies to meet domestic and foreign requirements and domestic continental and off-shore sugar operations have supported the price to producers in order to secure full production. Accordingly, with the termination of the subsidy program, the anticipated financial results of these operations are reported under the applicable foreign purchase and price support programs.

LOANS TO THE SECRETARY OF AGRICULTURE FOR AGRICULTURAL CONSERVATION PURPOSES

Section 391 (c) of the Agricultural Adjustment Act of 1938, as amended (7 U. S. C. 1391) requires the Corporation to loan to the Secretary of Agriculture during each fiscal year, such sums, not to exceed $50 million as the Secretary estimates will be required to make advances pursuant to the applicable provisions of sections 8 and 12 of the Soil Conservation and Domestic Allotment Act, as amended. These loans are used to purchase conservation materials during the period from January 1 to June 30 of each year. Repayments of such loans are directed to be made during the succeeding fiscal year from funds appropriated to carry out sections 7 to 17 of such act, with interest at a rate determined by the Secretary, but not less than the cost of money to the Corporation.

Operating Results

The Corporation's net gain for the fiscal year 1947 amounted to $203,727,019; the estimated losses for the fiscal years 1948 and 1949 are $3,985,000 and $7,500,000. One of the major factors affecting the profits of the Corporation in the fiscal year 1947 was the covering of the reserve for general commodities purchases in the amount of $178,697,601 into general income of the Corporation. This reserve represented a mark-up on supply program sales reserved to meet any losses incident to program operations; the reserve was originally established to insure compliance with the provision of section 4 of the act of July 16, 1943 (15 U. S. C. 713a-9). Since the general commodities purchase operation was placed in liquidation on July 1, 1946, and since the amount of the restoration of capital as of June 30, 1946 (Public Law 76, approved May 26, 1947), was based in part on the view that the entire reserve should now be treated as income, this reserve was covered into general income during the fiscal year 1947.

Another major factor affecting the Corporation's recorded net actual and estimated profits and losses for the fiscal years 1947, 1948, and 1949, is the availability of the reserve for postwar price support. Since this reserve became available for postwar price support effective with the declaration of the cessation of hostilities on December 31, 1946, all price support losses recorded on the books of the Corporation on and after January 1, 1947, have been and will be charged against this reserve. These charges amounted to $59,950,696 during the fiscal year 1947 and are estimated to amount to $91,405,456 during the fiscal year 1948 and $80,883,000 during the fiscal year 1949. The Corporation's surplus as of June 30, 1947, amounted to $17,895,544, and, subject to the adjustments effected by the Treasury's appraisal of the assets and liabilities of the Corporation, it is anticipated that this amount will be returned to the Treasury during the fiscal year 1948.

The Corporation's operating deficit, amounting to $1,749,120,117, as of June 30, 1946, was eliminated by the net gain of $203,727,019 (see exhibit B) and the cancellation of Treasury notes amounting to $1,563,288,642 during the fiscal year 1947. The cancellation of Treasury notes recorded in the fiscal year 1947 resulted from the restorations of capital as of June 30, 1945, and June 30, 1946, provided by Public Law 519 approved July 20, 1946, and Public Law 76 approved May 26, 1947. It is estimated that the Corporation's deficit as of June 30, 1948, will amount to $3,985,000 and will increase to $11,485,000 by June 30, 1949, due to the loss of $7.5 million estimated to be incurred during fiscal year 1949.

Financial Condition

Loans receivable.—The Corporation's loans are principally nonrecourse loans made to farmers or cooperative marketing associations and secured by chattel mortgages or warehouse receipts covering agricultural commodities. Loans are made directly by the Corporation or through private lending agencies under agreement with the Corporation and bear interest at the rate of 3 percent per annum. The actual and estimated values of loans held by private lending agencies as of June 30, 1946, 1947, 1948, and 1949, are reflected in exhibit C, "Obligations to purchase loans held by private lending agencies." The Corporation's contract with commercial lending agencies provides that loans held by such agencies will be taken over on request if the loan papers are in proper order. Private lending agencies receive one-half of the interest earned during the period the loans are held by such agencies.

Since the Corporation accepts the pledged collateral in full settlement of commodity loans, the valuation reserve represents the difference between the Corporation's investment and the estimated sales value of the collateral securing the loans outstanding at the end of each fiscal year.

Commodities owned.—Commodities owned by the Corporation are divided into two broad classifications: (1) Commodities purchased under its supply and foreign purchase program, and; (2) commodities purchased under its price support program. As previously noted, the use and economic effects of these two types of inventories are interrelated—commodities purchased or otherwise acquired under the price support program may be used to meet supply requirements, and domestic purchases to meet supply needs effectively reduce and, in some cases, eliminate the need for a specific operation designed to support domestic farm prices.

The Corporation acquires commodities by direct purchase or by forfeiture of commodities pledged as loan collateral. In some instances forfeited loan collateral commodities are "pooled" for the account of producers; under the pooling arrangement producers have an equitable interest in any net proceeds resulting from the sale of such commodities. A reserve has been established to represent the producers' equity in these pools.

Reserves for anticipated losses on commodities owned represent the difference between the cumulative cost of the commodities and the anticipated selling prices.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Cash.—The cash funds of the Corporation include funds available for administrative and current program operations and funds made available to the Corporation by the Defense Aid Appropriation Act of 1946 as a special reserve for postwar price support activities. When this postwar price support fund of $500 million was made available during the fiscal year 1946, the Corporation borrowed $500 million from the United States Treasury on non-interest-bearing notes and retired a like amount of interest-bearing notes. When price support losses are charged against the reserve for postwar price support, the cash balance of this fund is reduced in a like amount.

With the exception noted above, the Corporation's cash balances are maintained at a minimum through day-to-day borrowing and repayment arrangement with the United States Treasury. All cash, except collections in transit, is on deposit with the Treasurer of the United States.

Accounts and notes receivable.—The major portion of receivables is represented by amounts due from various Government agencies (State Department-foreign aid, War Department, and others). However, receivables from a wide variety of other debtors, including suppliers, warehousemen, processors, railroads, as well as from producers whose loan collateral was found deficient, are included in this classification.

Advances on purchases.—The major portion of advances as of June 30, 1947, is represented by those made on the 1947 sugar crop under the Cuban raw sugar agreements. Part of the shipments of raw sugar from Cuba are financed by means of 90 percent advances by commercial banks for the account of the Corporation. Such advances are liquidated upon delivery of sugar by payments made to banks for the account of the Corporation.

The estimated advances on purchases as of June 30, 1948 and 1949, are composed of amounts which it is anticipated will be advanced to commercial wool handlers for the procurement of wool from producers and for the account of the Corporation. These advances are liquidated when wool is delivered to the Corporation.

Fixed assets.—The major fixed assets are grain bins, related equipment, the natural cooler storage facility at Atchison, Kans., and in storage facilities (acquired from Army surplus), located at the Kentucky Ordnance Works, Paducah, Ky. The investment in the natural cooler facility was completely amortized by March 31, 1947. Substantial depreciation reserves have been set up against the investment in grain bins and equipment.

Borrowing authority and financing.—The Corporation's operations are financed by borrowing from the United States Treasury or, with approval of the Secretary of the Treasury, from private lending agencies and, in the case of most of the Corporation's loan operations, by arrangements under which the loans are made by local banks, cooperatives, and other private lending agencies upon the Corporation's agreement to take over the loans on demand. Daily reports of disbursements and receipts are received from the Federal Reserve banks which act as fiscal agents for the Corporation. If daily disbursements exceed daily receipts, a loan in the amount of such excess is obtained from the United States Treasury; if receipts exceed disbursements, the excess is applied as a repayment against the Corporation's loan balance. This procedure assures that the Corporation's cash balance on deposit with the United States Treasury and interest on borrowings are kept at a minimum. In some instances, funds are borrowed from private lending agencies when, in addition to obtaining funds, the Corporation desires to utilize the facilities of such lending agencies in carrying out a particular operation. All borrowing agreements with private lending agencies are approved by the Secretary of the Treasury. In making loans to farmers on agricultural commodities, the facilities of commercial banks, cooperatives, and other private lending agencies are used extensively. Under the terms of agreements with such lending agencies, the Corporation agrees that loans made in accordance with the Corporation's requirements will be taken over by the Corporation upon demand of the lending agency. These agreements also provide that the Corporation is to receive one-half of the 3 percent interest collected by the private lending agencies if loans are repaid while carried by such agencies. If a loan is taken over by the Corporation, the Corporation pays the loan principal plus a maximum of one-half of the accrued interest to the private lending agency.

The balance of borrowings decreased from $1,582,342,884 as of June 30, 1946, to $550,330,021 as of June 30, 1947, and it is estimated that net outstanding borrowings will be $261 million as of June 30, 1948, and $181,985,000 as of June 30, 1949. It should be noted, however, that the seasonal nature of the Corporation's activities will undoubtedly result in much higher outstanding borrowings during several periods within the fiscal year than will be outstanding as of the end of the fiscal year.

The present borrowing authority of $4,750,000,000 is considered adequate to meet all financing requirements of the Corporation during the fiscal year 1949. Since the Corporation follows the practice of charging the estimated gross fund requirements for the program against the borrowing authorization, it will not approve a new program unless there is sufficient uncommitted borrowing authorization to cover the program. Only in this manner can the Corporation guarantee fully that funds will be available to carry out each program.

Accounts payable.—Accounts payable are largely composed of amounts due to vendors for commodities acquired for the Corporation's supply program. Amounts due to other Government agencies, producers, railroads, and other miscellaneous creditors are also included in accounts payable.

Reserves.—The reserve for postwar price support was established in accordance with Public Law 301, Seventy-ninth Congress, approved February 18, 1946, which provided, among other things, that $500 million should be paid to the Corporation and "continued as a reserve fund for expenditure, as and when necessary, for the postwar price support of agriculture." Since charges against this reserve were begun on January 1, 1947, following the declaration of the end of hostilities, all price support losses recorded on or after this date have been and will be charged against this reserve.

The reserve for producers' equity represents amounts due to producers as a result of sale of "pooled" commodities. Under the pooling arrangements an equitable interest in the profits resulting from pool operations is reserved for pool participants. The producers' equities on each pool are paid after the pooled inventory has been completely liquidated and the net operating results determined.

Effect on the Government Budget

The Corporation's activities resulted in net budgetary expenditures of $431,712,302 in the fiscal year 1947 and it is anticipated that net budgetary receipts of $229,293,145 will be realized in 1948 while net budgetary expenditures of $12,105,700 will occur in 1949.

Administrative Expenses

Administrative expenses cover the costs of the general supervisory and operating staff engaged in the supervision of the operation of the programs carried out by the Corporation. Estimated costs of the audit of the Corporation's accounts by the General Accounting Office are included as administrative expenses. Such audit costs were not included under the administrative limitation in prior budgets. There are not included in administrative expenses, however, necessary expenses (including special services performed on a contract or fee basis, but not including other personal services) in connection with the acquisition, operation, maintenance, improvement, or disposition of any real or personal property belonging to the Corporation or in which it has an interest. Such expenses are treated as nonadministrative expenses as provided in the language carried annually in the appropriation act making corporate funds available for administrative expenses. The language proposed for the fiscal year 1949 authorizing expenditures for administrative expenses of the Corporation contemplates that the Corporation will, consistent with its established practice, treat as nonadministrative expense all expenses of the types which have been so treated during the 1948 fiscal year. In accordance with the change in policy discussed in the budget for the fiscal year 1948, expenditures for administrative equipment purchased are capitalized and are not charged against the administrative limitation. It is also contemplated that administrative expenses will be accounted for on an obligation basis as has been the case in the current and prior years.

The work of the Corporation is performed by its employees and other employees of the Production and Marketing Administration, and the Corporation assumes its equitable share of expenses for personnel and other expenses. The actual expenses for the fiscal year 1947 and the estimates for the fiscal years 1948 and 1949 are reflected in schedules following the authorizing language, part II of the Budget; the estimates for the fiscal year 1949 include a limitation of $7,575,000 for costs of administration exclusive of reimbursements for services performed.

The requested administrative funds are based on the character and volume of operations reflected in the program estimates. If any other functions or programs are assigned to the Corporation, additional administrative funds may be required.

Restoration of Capital

The act of March 8, 1938 (5 Stat. 107), provided that as of March 31 of each year an appraisal of all the assets and liabilities of the Corporation for the purpose of determining the net worth of the Corporation shall be made by the Secretary of the Treasury. The legislation provided for a basis of evaluating the assets. The act further provided that should such appraisal establish the net worth of the Corporation as less than $100 million, the Secretary of the Treasury, on behalf of the United States, shall restore the amount of such capital impairment by a contribution to the Corporation in the amount of such impairment; if the appraisal establishes the net worth of the Corporation as more than $100 million, the amount of the surplus is paid to the United States Treasury. The act of April 12, 1945 (59 Stat. 50), changed the date of appraisal from March 31 to June 30, beginning with June 30, 1945. A summary of capital impairment, restoration of capital by the Secretary of the Treasury, and payments by the Corporation into the Treasury is given in schedule C–3.

The Corporation's books show a surplus of $17,895,544 as of June 30, 1947. The amount of this surplus as adjusted in the appraisal of the assets and liabilities of the Corporation by the Secretary of the Treasury will be returned to the United States Treasury.

SCHEDULE A–1

EFFECT ON THE GOVERNMENT BUDGET

[Fiscal years ending June 30, 1947, 1948, and 1949]

	Actual, 1947	Estimate, 1948	Estimate, 1949
BUDGETARY RECEIPTS			
General account receipts:			
Interest on obligations	$1,957,804	$1,000,000	$1,500,000
Dividend paid to U. S. Treasury		17,895,544	
Total budgetary receipts	1,957,804	18,895,544	1,500,000
BUDGETARY EXPENDITURES			
General account expenditures: Cancellation of notes by U. S. Treasury	1,563,288,642		
Expenditures from checking accounts:			
Operating programs	2,413,581,146	3,086,867,116	3,368,742,000
Acquisition of fixed assets	99,499	77,352	31,700
Other expenses excluding interest payments to U. S. Treasury	34,655,685	30,120,323	30,304,530
Transfer to appropriation for eradication of foot-and-mouth and other contagious diseases of animals		25,000,000	
Repayment of borrowings to the public	458,190,333	93,330,021	92,000,000
Increase (or decrease a) to working capital items other than cash with U. S. Treasury	701,790,339	a 405,908,058	a 93,790,000
Total	3,608,317,002	2,829,486,754	3,397,288,230
Payment into miscellaneous receipts of U. S. Treasury (as above)	1,957,804	18,895,544	1,500,000
Gross expenditures from checking accounts	3,610,274,806	2,848,382,298	3,398,788,230
Corporate receipts:			
Operating programs	2,562,318,289	2,932,363,762	3,269,738,000
Sale of fixed assets	2,500,003	2,025,000	1,275,000
Other income	25,231,061	24,956,660	23,669,530
Reimbursements and proceeds applied to transfer to appropriation for eradication of foot-and-mouth and other contagious diseases of animals		25,000,000	
Borrowings from the public	217,177,470	80,000,000	90,000,000
Total corporate receipts	2,807,226,823	3,064,345,422	3,384,682,530
Net checking account expenditures (or receipts a) before adjustments	803,047,983	a 215,963,124	14,105,700
Adjustments:			
Less net redemption of obligations to the public (trust account expenditures)	379,144,599	13,330,021	2,000,000
Less cancellation of notes: Amount transferred to general account expenditures above	1,563,288,642		
Net budgetary expenditures (or receipts a), checking account	a 1,139,385,258	a 229,293,145	12,105,700
Total expenditures (or receipts a)	423,903,384	a 229,293,145	12,105,700
Adjustment to Treasury combined statement	7,808,918		
Net budgetary expenditures (or receipts a)	431,712,302	a 229,293,145	12,105,700

a Deduct.

SCHEDULE C–3

STATEMENT OF RESULTS OF TREASURY APPRAISALS

[Actual 1938–1946; estimated 1947–1949]

	Capital impairment	Surplus covered into U. S. Treasury	Cumulative results of payments to or from U. S. Treasury [1]
Appropriation of impairment or surplus[a] covered into Treasury:			
Year ending Mar. 31—			
1938	[2] $94,285,405		$94,285,405
1939	119,599,918		213,885,323
1940		[a] $43,756,731	170,128,592
1941	1,637,445		171,766,037
1942		[a] 27,815,513	143,950,524
1943			143,950,524
1944	[3] 256,764,881		400,715,405
Total	472,287,649	[a] 71,572,244	
Cancellation of Treasury notes:			
15 months ending June 30, 1945 [4]	921,456,561		1,322,171,966
Year ending June 30, 1946	641,832,081		1,964,004,047
Total	1,563,288,642		
Estimated impairment or surplus[a] to be covered into Treasury:			
Year ending June 30—			
1947		[a] 17,895,544	1,946,108,503
1948	[5] 3,985,000		1,950,093,503
1949	[5] 7,500,000		1,957,593,503
Total	11,485,000	[a] 17,895,544	
Total actual (1938–1946) and estimated (1947–1949)	2,047,061,291	[a] 89,467,788	1,957,593,503

[a] Deduct.

[1] Including cancellation of notes.

[2] This amount is cumulative from Oct. 17, 1933, as no appraisals were made prior to Mar. 31, 1938.

[3] Includes $39,436,885 capital impairment for the year ending Mar. 31, 1943, which was not appropriated by the Congress until the following year's appraisal.

[4] The act of Mar. 8, 1938 (U. S. C., 1940 ed., Supp. III, title 15, sec. 713A–1), as amended by the act approved Apr. 12, 1945, changed the date of appraisal to June 30 of each year. Therefore, the impairment as of June 30, 1945, covers a 15-month period.

[5] Represents estimated losses only. (See exhibit B.)

ESTIMATES OF AUTHORIZATION RELATING TO CORPORATE FUNDS

NOTE.—The text of general authorizing language for the Commodity Credit Corporation, as incorporated in the Department of Agriculture Appropriation Act, 1948, and as proposed for 1949, will be found under "Title II—Government Corporations" in the Department of Agriculture chapter of part II of the Budget.

FEDERAL SURPLUS COMMODITIES CORPORATION

The Federal Surplus Commodities Corporation was organized originally as the Federal Surplus Relief Corporation under the powers granted to the President by the National Industrial Recovery Act (par. b of sec. 2 of title I and subsec. a of sec. 201 of title II, 48 Stat. 195). The Corporation was granted a charter by the State of Delaware on October 3, 1933, as a nonprofit membership corporation with no capital stock. It acted in close cooperation with the Federal Emergency Relief Administration in the purchase of foods and other relief supplies for distribution to needy families through State relief organizations. As the Corporation came to deal more and more in agricultural commodities and products thereof and to conduct its program in closer association with programs of the Department of Agriculture, the charter was amended on November 16, 1935, changing the name of the Corporation to the Federal Surplus Commodities Corporation. The Corporation's independent status was terminated by the act of June 28, 1937 (15 U. S. C. 713c), which placed the Corporation under the control of the Secretary of Agriculture.

Since the establishment of the Corporation, Congress has several times recognized it as an operating agency of the United States. The last legislation dealing with the Corporation was the act of June 27, 1942 (15 U. S. C. 713c), which continued the Corporation as an agency of the United States under the direction of the Secretary of Agriculture until June 30, 1945. The Corporation ceased to function as an agency of the United States on July 1, 1945, and its liquidation was completed during the fiscal year 1947.

Originally the Corporation's operations were financed by relief funds received from the several States, Territories, and the District of Columbia. Beginning in 1935, however, the Corporation received a large part of its finances from the allocation of funds available to the Secretary of Agriculture for the purchase and disposition of surplus agricultural commodities. Nonrecourse loans were also obtained from the Disaster Loan Corporation to carry out timber salvage operations during the period 1938–45.

The Corporation's activities during the fiscal year 1947 were confined to the liquidation of accounts receivable and payable and the transfer of cash to the Treasurer of the United States. The liquidation of the Corporation's assets and liabilities was completed in the fiscal year 1947, and the Corporation was legally dissolved; $2,703,518 was transferred to the general fund of the Treasury.

FEDERAL CROP INSURANCE CORPORATION

Purpose and Financial Organization

The Federal Crop Insurance Corporation was created February 16, 1938, by the Federal Crop Insurance Act (7 U. S. C. 1501 et seq.) for the purpose of insuring producers of wheat against loss in yields due to unavoidable causes. The act was amended on June 21, 1941 (55 Stat. 257), to provide for a national insurance program on cotton. The act was further amended on December 23, 1944 (58 Stat. 918), providing for the insurance of flax on a national basis and of corn and tobacco on an experimental basis.

Public Law 320, approved August 1, 1947, placed the crop insurance programs on all crops on a restricted, experimental basis. Insurance is to be offered in not to exceed 200 wheat counties, 56 cotton counties, 50 counties each for corn and flax, 35 tobacco counties, and in 20 counties each for not more than 2 additional crops in 1948 and for not more than 3 additional crops in each year thereafter. The law provides that the counties selected are to be representative of areas where the commodity insured is normally produced, except those areas in which the income from such commodity constitutes an unimportant part of the total agricultural income of the area. The law authorizes the use of any insurance plan adapted to the commodity and provides that insurance coverage cannot exceed 75 percent of the average yield; but if 75 percent of the average yield exceeds generally the investment in a crop in an area, the coverage must be reduced accordingly. Private insurance companies are encouraged to enter the all-risk field with a provision for reinsurance in not to exceed 20 counties.

Capital funds.—The Federal Crop Insurance Act provides that the Corporation shall have a capital stock of $100,000,000 (7 U. S. C. 1504 (a)) subscribed by the United States of America. The full amount of the capital stock authorized has been purchased by the Secretary of the Treasury.

Analysis of Budget Program

Problem and significance.—All businesses enjoy a position of reasonable financial security that results from insured protection against every possible risk, including those classified as "acts of God." Agriculture, one of the most important segments of our national economy, is not afforded such over-all protection and yet is more subject to unpredictable and disastrous hazards than any other business.

Businesses protected by insurance can secure loans with which to carry on operations or tide them over an emergency. The farmer seeking a loan is not in this position because of his unprotected collateral. Consequently, crop failures frequently bring disaster to farmers without financial reserves.

The Federal Government has attempted to stabilize farm income by means of agricultural research, improved farming and soil-conservation practices, and by price supports. This assistance is of little benefit to the farmer if, after investing time and money, he has a crop failure from causes over which he has no control.

To find a basis for a sound program of financial protection against production risks, the Government has provided for crop insurance experiments. Public Law 320 has two purposes. First, it was believed that a limited program would keep possible losses of Government funds to a reasonable amount in line with the aims to be accomplished. Second, program operations should be of sufficient latitude and variety to permit the Corporation to gain adequate experience for the establishment of future national insurance programs.

Insurance program.—The 1948 crop insurance program is designed to furnish representative experience of the problems of all areas at a minimum cost to the Government. Insurance programs on wheat, cotton, flax, corn, tobacco, and one additional crop will be offered in 411 counties in 1948 and 1949. Plans are progressing to provide for reinsurance in both fiscal years.

The Corporation was directed in Public Law 320 to try any insurance plan suited to the commodity, provided sufficient actuarial data are available. By fiscal year 1949, insurance will be offered under 23 different programs on 6 crops. Farmers interested in crop insurance will be consulted concerning the type of program and methods of operation.

Insurance rates will be refined to more nearly reflect the risk and productivity of individual farms or groups of farms rather than be continued on a county basis. This should result in a more representative crop insurance participation.

Future insurance contracts will be sold on a fixed price basis which will eliminate the necessity for expensive commodity transactions and storage costs after fiscal year 1949.

Program administration.—It is estimated the Corporation will have a potential indemnity liability of over $250 million on the 1948 crops and a financial responsibility to collect over $23 million in premiums. Such a program must be soundly administered to avoid substantial losses of capital funds.

Public Law 320 provides that the Corporation be managed by a board of directors composed of five members appointed by the Secretary of Agriculture—three to be employees of the Department of Agriculture and two to be experienced in the insurance business who are not otherwise employed by the Government. The act further provides that the manager of the Corporation shall be one of the three employees of the Department of Agriculture appointed to the board.

In fiscal year 1947 the Corporation sold insurance in 43 States and maintained offices in 35. During the year the three branch offices were consolidated into one office in Chicago. The over-all planning and administration of the crop insurance programs were conducted in the Washington headquarters office. Work in connection with sales organization and educational activities, selling of insurance contracts, collecting premiums, transmitting notices of loss, and securing acreage reports was performed by county agricultural associations of the Production and Marketing Administration. Under Public Law 320, the State offices of the Corporation will be consolidated into 13 area offices, the branch and headquarters offices will be reduced in size, and work performed in the counties by other than Corporation employees will be on a piecerate basis.

Federal Reserve Bank of St. Louis

Operating Results

The Corporation sustained a net loss of $28,387,497 for fiscal year 1947. This resulted principally from heavy losses on the 1946 cotton crop. Present indications are that normal weather conditions and improvements in the program will result in more favorable experience in cotton areas during crop year 1947. It is now estimated that there will be a net profit of $18,390,670 on all insurance operations for fiscal year 1948. Since it is impossible to predict crop conditions for crop year 1948, the estimated net profit for fiscal year 1949 is based on the assumption that 90 percent of premiums earned will be paid out in indemnities. This assumption is predicated on the structure of premium rates which are so established as to provide a 10-percent reserve for unforeseen losses.

The following tables give the actual and estimated operating results for the several crops. Prices used for fiscal year 1948 were the average prices that prevailed on dates premium notes matured and for fiscal year 1949 those prevailing on August 1, 1947.

Summary of insurance operations

[Fiscal years ending June 30, 1947, 1948, and 1949]

	Actual, 1947	Estimate, 1948	Estimate, 1949
Wheat:			
Premiums	$16,071,550	$23,083,000	$14,436,000

	Actual 1946 crop	Estimated 1947 crop	Estimated 1948 crop
Wheat	305,428	360,408	100,000
Cotton	114,270	122,212	39,200
Flax	10,412	35,613	15,000
Corn	7,422	6,868	25,000
Tobacco	13,815	14,676	24,500
Other			8,000
Total	451,347	539,777	211,700

Financial Condition

Present indications are toward an improved financial condition for fiscal years 1948 and 1949. The $27,440,435 increase in cash balance by June 30, 1948, results from capital stock proceeds of $10 million with the balance consisting primarily of the excess of premium collections over indemnity payments and profits on commodity transactions. The $2,931,000 estimated increase for fiscal year 1949 is the excess of premium collections over indemnity payments and interest collected on past-due premiums.

Accounts receivable consists primarily of uncollected premiums on insurance contracts and an amount due from the Commodity Credit Corporation as a result of sales of wheat and cotton by that Corporation on behalf of the Federal Crop Insurance Corporation. Intensive premium collection practices and the reduction in the volume of commodity transactions tend to bring receivables to a minimum level.

The reserve for uncollectible accounts is composed of estimated bad debts for crop years prior to 1945 and one-half of 1 percent of insurance premiums for 1945 and subsequent crop years. Uncollectible accounts will be written off against this reserve in accordance with the provisions of Public Law 518, approved December 20, 1944, which permits the write off of uncollectible accounts after a period of 5 years or earlier under certain circumstances.

The change to fixed-price contracts will permit the Corporation to pay indemnities immediately upon approval of claims rather than issue indemnity certificates. Such certificates constitute liabilities until presented for payment. The payables shown in the statement of financial condition represent actual value of unpresented certificates for the crop years 1941 through 1945 and the estimated value (based on applicable commodity prices) of outstanding certificates for the crop years 1946 and 1947. The decline in estimated payables results from the reduction in the number of contracts in force requiring the issuance of indemnity certificates. All such contracts will either expire or be terminated before the 1949 crop year, thus leaving as liabilities only the outstanding indemnity certificates on 1948 and prior crop years.

Effect on Government Budget

Corporate operations, including administrative expenses, resulted in budgetary expenditures exceeding receipts by $30,877,144 in fiscal year 1947. In fiscal year 1948 the situation will be reversed, with estimated receipts exceeding total estimated expenditures by $12,427,127. It is now estimated that insurance operations for fiscal year 1949 will result in net budgetary expenditures of $990,000.

Administrative Expenses

The Federal Crop Insurance Act, as amended (7 U. S. C. 1516 (a)), authorizes annual appropriations by Congress of not to exceed $12 million for any fiscal year to cover the administrative and operating expenses of the Corporation. The estimated administrative expenses for fiscal year 1949 are $3,725,000. This will provide for the planning and operation of 23 different types of insurance programs covering 6 commodities, the writing of 180,500 new contracts on 1949 crops, collecting over $23 million in premiums on 211,700 contracts on the 1948 crops, and adjusting and settling an estimated 70,500 loss claims on the 1948 crops. Appropriation language and schedules of administrative expense funds available for obligation during the fiscal years 1947, 1948, and 1949, classified by activities and objects, are shown in part II of the Budget document under the Department of Agriculture.

Purpose and Financial Organization

There were no changes in the purpose, functions, or financial organization of the Federal Farm Mortgage Corporation during the fiscal year 1947. Authority to make new loans which expired July 1, 1947, and other changes in financial organization contemplated during 1948 or 1949 which would affect the information reported in prior budget submissions are discussed in following sections.

Analysis of Budget Program

In appraising the budgetary requirements of the Corporation for the fiscal year 1949, it is necessary to recognize the effect that the acts of June 30, 1945 (59 Stat. 265), and July 12, 1946 (Public Law 505), as well as economic conditions may have upon the activities of the Corporation. It is assumed that the lending authority of the Corporation will not be extended beyond July 1, 1947, and that the activities of the Corporation during the fiscal year 1949 will be restricted to a program of liquidation. These assumptions are discussed below in connection with the respective programs. The level at which these activities were carried on during the fiscal year 1947 and the projected level for the fiscal years 1948 and 1949 are shown in the statement of sources and application of funds in the financial statements immediately following the narrative (exhibit A).

Land bank commissioner loans.—The Emergency Farm Mortgage Act of 1933, as amended by the Farm Credit Act of 1935, provides that land bank commissioner loans could be made for any purpose for which Federal land bank loans may be made and in addition, for refinancing any indebtedness, secured or unsecured, of the farmer (12 U. S. C. 1016f).

Land bank commissioner loans, together with all prior mortgages or other evidences of debt on the collateral security, shall not exceed 75 percent of the normal agricultural value of the farms as determined by appraisal, nor shall a loan in excess of $7,500 be made to any one farmer. There is no difference between the concept of normal value for commissioner loans and that for Federal land bank loans, but the commissioner may accept security that is not considered eligible for a Federal land bank loan, and also may make loans based in part on dependable outside income, but shall not exceed 75 percent of the prudent investment value of the security offered (12 U. S. C. 1016b).

The act of June 30, 1945, authorized several changes of major importance in the statutory powers of the Federal land banks and the Federal Farm Mortgage Corporation, which materially affect the operations of the Corporation. One of the important provisions authorizes the Federal land banks to make loans not exceeding 65 percent of the appraised normal value of the mortgaged farm considered as a unit. The previous loanable limit, which had been in effect since the original Federal Farm Loan Act was passed, was 50 percent of the appraised normal value of the mortgaged land plus 20 percent of the appraised value of the permanent, insured improvements thereon; therefore, second mortgage commissioner loans closed after June 30, 1945, are smaller in amount than loans closed prior to that date since the spread between the loanable limit of the banks and the Corporation is only 10 percent. Also, subject to stock ownership requirements and existing loan limits, the Federal land banks are empowered by the act of June 30, 1945, to purchase from the Corporation mortgages and contracts for the sale of farms, and the Corporation is authorized to sell such assets to Federal land banks.

The act of July 12, 1946 (Public Law 505, 79th Cong.), extended the lending authority of the Corporation to July 1, 1947. This act also directed the Farm Credit Administration to make a report to the Congress by March 31, 1947, on ways and means of making available to farmers throughout the Federal Land Bank system, loans similar to those now closed through the Federal Farm Mortgage Corporation. Action which the Congress may take on this report, which was submitted March 1, 1947, may have a material effect upon the operations of the Corporation during the fiscal year 1949, and necessitate a reconsideration of its budgetary requirements.

Farmers obtained 17,104 first and second mortgage loans aggregating $15,286,730 during the year ended June 30, 1947, as compared with 15,746 loans for $14,729,530 in the fiscal year 1946. This brought to 678,465 the number, and to $1,216,442,023 the amount of loans closed since May 12, 1933. After giving effect to all of the foregoing factors, it is estimated that loans in the amount of $1,500,000 will be closed on July 1, 1947; no additional new loans to farmers will be made during the fiscal years 1948 and 1949 unless legislation is enacted extending the lending authority of the land bank commissioner beyond July 1, 1947. However, the Corporation may be required to refinance some loans closed in the name of the land bank commissioner previous to July 1, 1947 (12 U. S. C. 1016g). The following financial statements do not provide for such contingencies.

During the fiscal year 1947, the first and second mortgage loan accounts decreased from 163,546 loans with unpaid principal balances totaling $174,204,350 to 122,887 loans with unpaid principal balances totaling $123,145,601. This decrease results primarily from the excess of principal repayments over new loans closed during the period, and from the sale of mortgages and contracts in the unpaid principal amount of $14,750,944 to the Federal land banks. It is forecast that similar sales amounting to $7,420,000 and $4,440,000 will be made during the fiscal years 1948 and 1949, respectively. These sales, together with other repayments, will leave a combined total of first and second mortgages and contracts outstanding at June 30, 1949, of $66,851,213.

Liquidation of acquired security or collateral.—On June 30, 1947, the Corporation owned outright and held subject to redemption a total of 79 farms, in which it had a net investment (i. e., excluding unmatured prior liens not assumed) of $270,287. This reflects declines of 66.9 percent in number and 71 percent in amount from the comparable June 30, 1946, figures and declines of 99.2 percent in number and 99.1 percent in investment since the September 1939 peak inventory of 10,478 properties in which the Corporation had a net investment of $31,081,937. A continuation of the same general trend is forecast for the

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

fiscal years 1948 and 1949, and it is expected that the net investment in acquired security and collateral will be reduced to $252,587 by June 30, 1949.

Investments.—The Corporation had no investments at June 30, 1947, and no investment transactions are anticipated during the fiscal years 1948 and 1949.

Financing.—While its Government-owned capital and accumulated earnings have been a source of funds for lending purposes, the Corporation's primary source has been the issuance of bonds. Since the first issue in 1934, a total of $3,000,859,000 has been issued, of which $21 million was outstanding at June 30, 1947.

On June 26, 1947, the Corporation issued and sold to the United States Treasury $21 million of 1 percent bonds to provide funds to assist the Federal Land Bank of St. Paul in its program of retiring outstanding capital stock pursuant to section 14 of the act approved June 30, 1945 (59 Stat. 265). The Federal land banks have completed their current refinancing program, and it is not anticipated that further transactions of this nature will occur in either the fiscal year 1948 or 1949. The authorizing language contains a proviso which would limit the amount of bonds outstanding at any one time during the fiscal year 1949 to $1 billion.

Operating Results

The total income of the Corporation for the fiscal year 1947 amounted to $8,267,352. It is anticipated that total income during the fiscal years 1948 and 1949 will be $5,861,100 and $4,075,000, respectively. This decline in income will result principally from the decreasing volume of loans outstanding.

The total expense of the Corporation for the fiscal year 1947 was $4,134,478, of which $4,016,272 was for administrative expenses for the fiscal year 1947, $12,978 for net interest cost of the Federal Farm Mortgage Corporation bonds, and $105,228 for other interest expense. It is contemplated that expenses for 1948 will amount to $2,872,300 and that such expenses for 1949 will amount to $2,209,400.

During the fiscal year 1947, operations resulted in a net income of $6,088,217. It is forecast that the Corporation will have a net income of $3,409,300 in the fiscal year 1948 and $8,694,600 in the fiscal year 1949. After giving effect to the foregoing, it is estimated that the earned surplus account of the Corporation will amount to $49,540,957 at June 30, 1949 (see exhibits B and C).

Financial Condition

Loans receivable.—Mortgage loans, purchase money mortgages, sales contracts, etc., outstanding on June 30, 1947, decreased in number and amount from those outstanding on June 30, 1946, due principally to the excess of repayments (including mortgages and contracts transferred to the Federal land banks) over new loans closed during the past fiscal year. Continued satisfactory farm commodity prices and generally improved agricultural conditions which have enabled farmer-borrowers to retire their debts in advance are also reflected in the reduction in the number of loans and real estate sales paper delinquent. As of June 30, 1947, 8,479 or 6.9 percent of the outstanding mortgage loans were delinquent as compared with 11,847 or 7.3 percent, as of June 30, 1946.

Bonds payable.—The $21 million of unmatured 1 percent bonds outstanding on June 30, 1947, will be retired during the current fiscal year.

Return of capital funds to the Treasury.—The capital of the Corporation on June 30, 1947, consisted of its Government-owned capital stock of $1,000,000 and unreserved surplus of $105,437,057. Pursuant to section 2 of the act of July 12, 1946 (Public Law 505), it is anticipated that capital in the amount of $990,000 will be retired during the fiscal year 1948.

Dividends.—In view of the favorable financial condition of the Corporation, and inasmuch as no active lending program is contemplated in either 1948 or 1949, the board of directors will consider the declaration and payment of a dividend into the general fund of the Treasury. While the proposed authorizing language does not specify the amount of the dividend, the financial statements are prepared on the assumption that a dividend of $68 million will be paid during the fiscal year 1949.

Effect on Government Budget

Operations during the fiscal year 1947 resulted in net budgetary receipts of $39,956,088 (schedule A–1). Continued liquidation of loan receivables and a substantial decrease in noncash working capital items (principally notes of $21 million due from the Federal Land Bank of St. Paul) during the fiscal year 1948 are reflected in an estimated net budgetary receipt of $61,691,630. For the fiscal year 1949, net budgetary expenditures of $41,150,200 are predicted. The substantial expenditure in 1949 reflects the $68 million dividend payment discussed in the section above.

Administrative Expenses

Administrative expenses represent reimbursements to the Farm Credit Administration for services rendered to the Corporation, supervision of the Federal land banks in making and servicing Commissioner loans, and in other advisory and administrative capacities; payments to the United States Treasury and the Federal Reserve banks for expenses in handling bond transactions for the Corporation; reimbursement to the Federal land banks for services performed as agents of the Federal Farm Mortgage Corporation and the land bank commissioner. It also includes $10,700 to cover the cost of audit of the Corporation (for the fiscal year 1948) to be made by the General Accounting Office pursuant to the provisions of the Government Corporation Control Act. This amount is based upon a preliminary estimate of costs furnished by the General Accounting Office and an allocation suggested by it. The cost of audits covering the fiscal years 1945, 1946, and 1947, similarly estimated by the General Accounting Office, amounting to $31,900, will be absorbed within the 1948 authorization.

Estimated total administrative expenses of $2,750,000 for the fiscal year 1948 and $2,160,700 for the fiscal year 1949, when compared with the actual for 1947 of $4,016,272 (exclusive of prior year adjustments) reflects a reduction of $1,266,272 for 1948 and $589,300 for 1949. (For further details see statement of income and expense (exhibit B), and schedules following the authorizing language.)

ESTIMATES OF AUTHORIZATION RELATING TO CORPORATE FUNDS

NOTE.—The text of general authorizing language, as incorporated in the Government Corporations Appropriation Act, 1948, and as proposed for 1949, will be found at the end of the "Summary Statements and General Language" of part III of the Budget.

Administrative Expenses, Federal Farm Mortgage Corporation—

Federal Farm Mortgage Corporation: Not to exceed [$2,750,000] *$2,160,700* (to be computed on an accrual basis) of the funds of the Corporation shall be available for administrative expenses, including employment on a contract or fee basis of persons, firms, and corporations for the performance of special services, including legal services, and the use of the services and facilities of Federal land banks, national farm loan associations, Federal Reserve banks, and agencies of the Government as authorized by the Act of January 31, 1934 (12 U. S. C. 1020–1020h); and said total sum shall be exclusive of interest expense, and expenses in connection with the acquisition, operation, maintenance, improvement, protection, or disposition of real or personal property belonging to the Corporation or in which it has an interest: *Provided*, That of the funds available to the Corporation for administrative expenses, not to exceed [$400,000] *$244,000* shall be available for payment to the Farm Credit Administration for supervisory or other services rendered: *Provided further, That cash funds determined by the Board of Directors to be in excess of operating requirements for the fiscal year 1949 shall be declared as dividends and paid into the general fund of the Treasury: Provided further, That the aggregate amount of bonds the Corporation may issue and have outstanding at any one time shall not exceed $1,000,000,000.* (*The Government Corporations Appropriation Act, 1948.*)

	Actual, 1947	Estimate, 1948	Estimate, 1949

FEDERAL INTERMEDIATE CREDIT BANKS

Purpose and Financial Organization

There were no changes in the purpose, functions, or financial organization of the 12 Federal intermediate credit banks during the fiscal year 1947, and none are contemplated during 1948 or 1949 which would affect the information reported in prior budget submissions.

Analysis of Budget Program

Lending program.—During the year ended June 30, 1947, the intermediate credit banks made loans to, and discounted agricultural paper for, agricultural and livestock credit corporations and similar institutions organized under State laws, as well as for State and national banking institutions, production credit associations, cooperative associations of agricultural producers and livestock growers, and the banks for cooperatives, in an aggregate amount of $1,140,071,000, and received repayments on such loans and discounts in the amount of $1,084,259,000. Lending activities for the fiscal year 1948 are estimated at $1,171,676,000, with repayments of $1,134,696,000. For 1949, the volume of business is estimated at $1,251,391,000, with repayments of $1,216,403,000.

The volume of credit extended during the year ended June 30, 1947, was approximately $231,000,000 greater than the amount handled in the previous year. Since the intermediate credit banks do not promote business to create a demand for their services, but endeavor to carry out their statutory function of financing eligible and acceptable paper in whatever volume may be offered by institutions qualified to deal with them, the substantial increase in volume over prior years is a reflection of the demand for agricultural production and marketing credit. This demand is governed largely by general economic conditions, prices of agricultural commodities, crop and livestock yields, production costs, and other variable factors over which the banks have no control. The actual volume to be handled, therefore, may vary substantially from amounts estimated.

In estimating the prospective demand for credit for the fiscal year 1949, the banks have assumed that there will continue to be an active market at reasonable price levels for most agricultural products, and that production costs will remain relatively high. The estimated demand for credit also reflects the anticipated need for funds to finance shifts in types of agricultural practices, and in the types of crops produced, as well as further development in the mechanization of farming operations.

Financing program.—During the fiscal year 1947, the 12 banks issued debentures and borrowed money in the aggregate amount of $541,025,000, and retired such obligations in the amount of $486,060,000. For 1948 it is estimated that debentures and other borrowings will amount to $735,062,000, and that repayment of such obligations will amount to $695,445,000. For 1949, borrowings are estimated at $841,868,000 with repayments of $809,051,000. The estimates for 1948 and 1949 reflect the anticipated increase of lending activities to be financed as well as the possible shortening of average maturities. Debentures issued during the fiscal year 1947 had an average maturity of 8½ months and the estimates for 1948 and 1949 are computed upon the basis of 6-month maturities. If average maturities should be less than 6 months, the amounts to be sold and retired would be greater, while longer maturities would lessen the volume of debentures.

Operating Results

The net income of the intermediate credit banks for the year ended June 30, 1947, was $1,223,479, after all expenses had been paid or provided for, and adjustments of valuation reserves and net charge-offs or recoveries had been made. On the basis of the prospective volume of business and the estimated rates of income and costs of money, the banks estimated that their net income will be $1,202,176 for 1948 and $893,000 for 1949.

Income.—Gross income from loans and discounts amounted to $5,307,334 for 1947. Upon the basis of their prospective volume of business it is estimated that such income will be $6,179,000 for 1948 and $6,994,000 for 1949. These estimates reflect some anticipated upward revision of the loan and discount rates of the banks, as well as an increased average volume of loans and discounts expected to be outstanding during each of the 2 years. The lending rates of all 12 intermediate credit banks were fixed at 1½ percent per annum in 1939 and remained unchanged until March 1947, when one of the banks put into effect a 1¾-percent rate. Two other banks have adopted a rate of 1¾-percent, in one instance made effective September 15, 1947, and in the other December 1, 1947. Since a change in rate does not apply to loans and discounts made prior to the effective date of such change, an increase in the discount rate will not be reflected fully until all obligations accepted at the lower rate have been liquidated. Several other banks of the system are giving consideration to an upward revision of their lending rates, to reflect the higher cost of borrowed money.

Interest income on investments in U. S. Government obligations owned by the banks amounted to $1,044,729 for the fiscal year 1947 and is estimated at $1,042,000 per year for 1948 and 1949.

Expenses.—The expenses of the banks consist principally of interest and other costs on outstanding debentures and other borrowed money, and administrative expenses. During the fiscal year 1947, the intermediate credit banks paid to the banks for cooperatives, in the form of compensation for services, the sum of $72,697. It is estimated that such compensation will amount to $30,200 for the fiscal year 1948 and that no compensation will be paid in 1949. Compensation for services is a nonadministrative expense and is calculated at 66⅔ percent of the difference between the average cost of outstanding debentures of the credit banks and the rate charged the banks for cooperatives on commodity loans (other than commodity credit corporation paper) discounted for them. This arrangement between the two groups of banks was agreed upon in August 1939, but discontinued October 1, 1947. Consequently, compensation will become payable during only a part of the fiscal year 1948. Commodity loans made by banks for cooperatives bear rates of interest corresponding to the discount rate charged by the intermediate credit banks. In addition to their direct expenses, the banks are assessed for the cost of supervision and examination by the Farm Credit Administration and

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

they will be assessed for the cost of audits by the General Accounting Office. All expenses of the banks are paid out of their income.

Interest and other costs incident to the issuance and sale of debentures, together with interest paid on other borrowed money, amounted to $3,507,667 in 1947 and are estimated at $4,731,400 and $5,512,500 for 1948 and 1949, respectively. The estimated increases over 1947 costs reflect some increase in the amount of borrowing required to finance the lending operations of the system and a further rise in short-term money rates for the remainder of fiscal year 1948. Administrative expenses (which are exclusive of compensation to the banks for cooperatives for servicing paper discounted for them, interest, and other costs incurred in the issuance and sale of debentures) amounted to $1,584,227 for 1947, and are estimated for 1948 at $1,277,500 ($1,250,000, the limitation fixed by Public Law 268, 80th Cong., 1st sess., plus $27,500 excess of expenses over authorizaton to cover cost of General Accounting Office audit expense, fiscal years 1945, 1946, and 1947), and $1,647,800 for 1949.

Franchise taxes.—Franchise taxes paid pursuant to 12 U. S. C. 1072, out of earnings for the fiscal year 1947, amounted to $222,120 (paid to the Treasury in July 1947) and are estimated at $169,300 for 1948, and $142,000 for 1949. Total franchise taxes paid by the banks since organization amount to $7,180,675.

Out of final net earnings for the fiscal year ended June 30, 1947, the banks increased their reserves for contingencies by $335,000 and, after payment of the franchise tax, transferred the remaining net earnings of $666,359 to earned surplus account. Out of earnings for fiscal year 1948, it is estimated that reserves will be increased $525,000 and that $507,876 will be transferred to earned surplus. For fiscal year 1949, it is estimated that $325,000 will be added to reserves and $426,000 credited to surplus.

Financial Condition

Loans and discounts outstanding on June 30, 1947, aggregated $403,670,000. Of this amount $328,193 was secured by notes and other documents under Commodity Credit Corporation programs. Delinquent loans and discounts amounted to $5,624,304, of which $45,320 was past due 3 months or more. All paper carried by intermediate credit banks (except direct loans to cooperative associations, which are secured by approved collateral) is required to be endorsed by the bank, corporation, or association for which it is discounted. No loss to the intermediate credit banks on any presently outstanding loans and discounts is in prospect. Miscellaneous notes receivable in the amount of $440,999 was carried at June 30, 1947. A full valuation reserve of $276 is maintained to cover certain old notes of doubtful value included in notes receivable account. At the end of the year the banks also held certain acquired real estate, sales contracts, purchase money mortgages, etc., including an undivided interest in the banking quarters of one bank amounting to $85,689, against which a 100 percent valuation reserve is maintained. It is estimated that loans and discounts outstanding will amount to $440,651,010 on June 30, 1948, and $475,640,000 at the end of fiscal year 1949.

Investments.—Investments in public-debt obligations of the United States amounted to $43,150,800 (par value) on June 30, 1947, the same amount held at the end of the previous fiscal year. During the year the banks purchased as temporary investments an aggregate of $4,750,000 par value of United States Treasury certificates, upon which they paid premiums aggregating $500. In accordance with the procedure followed by the banks in past years, the premium paid was written off. All the certificates purchased were held until maturity, except one issue of $500,000 which was sold at a premium of $74 which is reflected in the accounts of the banks as profits realized on securities sold.

Investments in obligations of the United States provide the banks with a diversification of assets, which is an important factor in enabling the banks to obtain loan funds through the investment markets at reasonable cost for the benefit of agriculture. They also provide the banks with liquid assets, which can be utilized as collateral for short-term bank borrowings to provide funds to finance lending operations or to meet maturing debentures. In addition, investment securities constitute a source of income which aids the banks materially in building up reserves.

The extent to which purchases and sales of investment securities will occur in the fiscal years 1948 and 1949 cannot be determined in advance since such transactions are contingent upon a number of factors, including market prices and the needs of the banks. From time to time certain issues held by the banks are sold and the proceeds reinvested in other issues in order to maintain the most suitable portfolios. The budget estimates submitted include prospective purchases of $4,000,000 of securities in the fiscal year 1948 and $3,500,000 in 1949, and the sale (or realization at maturity) of like amounts. These transactions are intended to permit the temporary investment of otherwise idle cash arising through the liquidation of outstanding loans and discounts and the amounts to be so invested may vary substantially from these estimates.

Liabilities.—The principal liabilities of the banks consist of their outstanding debentures and notes payable, and interest accrued thereon. On June 30, 1947, the bank had outstanding debentures (not matured) and notes payable aggregating $365,750,000, and estimated the amounts outstanding at the end of 1948 at $405,477,000 and at the end of 1949, $438,294,000. Matured debentures and interest at the end of 1947 amounted to $110,791, for the payment of which a corresponding amount of funds was on deposit with the Treasurer of the United States.

Interest accrued but not due at the end of 1947 amounted to $1,439,623, and is estimated at $1,646,007 and $1,894,571 at the end of 1948 and 1949, respectively.

Return of capital funds to the Treasury.—No return of present Government capital, which is in the amount fixed by statute (12 U. S. C. 1061), is provided for in 1948 or 1949. The capital made available by law to the intermediate credit banks is considered adequate to enable them to carry out their authorized functions and to finance the increased volume of business expected to be offered to them through June 30, 1949.

Borrowing authority.—The aggregate amount of debentures and other similar obligations which any Federal intermediate credit bank may have outstanding may not exceed 10 times the surplus and paid-in capital of such bank (12 U. S. C. 1041). Although authority is provided to incur obligations in the ratio of 10 to 1 against capital and surplus, the banks have no assurance that the investment markets would absorb their debentures in an amount approaching their legal borrowing capacity. Should the banks find it necessary to borrow materially in excess of a 4-to-1 ratio, some buyer resistance might be expected and it would be likely that interest costs would advance.

Federal Reserve Bank of St. Louis

Effect on Government Budget

During the fiscal year 1947, the operations of the 12 banks resulted in a net budgetary receipt of $231,994. Substantial increases in working capital items other than cash deposited in the Treasury are estimated to result in net budgetary expenditures of $1,134,063 in 1948. For the year 1949, it is predicted net budgetary receipts will amount to $75,250.

Administrative Expenses

Administrative expenses (which are exclusive of interest on borrowed money, the expenses of issuing and selling debentures, etc., and compensation paid the banks for cooperatives for servicing loans rediscounted with the credit banks) amounted to $1,584,227 for the fiscal year ended June 30, 1947. Such expenses are estimated at $1,277,500 for 1948 and are estimated at $1,647,800 for 1949.

There follows a summary of the administrative expenses of the Federal intermediate credit banks for the fiscal year 1947, with estimated expenses for 1948 and 1949:

Summary of administrative expenses

Item	Actual, 1947	Estimate, 1948	Estimate, 1949	Average per bank (1949)
Average number of personnel (including temporary and part-time employment)	272.7	228.9	281.8	23.5
Salaries	$1,018,322	$808,690	$1,005,544	$83,795
Travel	13,987	15,700	23,850	1,988
Specialized services through general agents' offices, reimbursed at cost	93,862	67,100	79,900	6,658
Rent, communications, printing, equipment, and other district expenses	176,200	177,260	234,106	19,509
Total district expense	1,302,371	1,068,750	1,343,400	111,950
Assessments by Farm Credit Administration for supervision and examination	281,856	181,250	293,600	24,467
General Accounting Office audit expense		27,500	10,800	900
Total	1,584,227	1,277,500	1,647,800	137,317

The reduction in total expenses for the fiscal year 1948, as compared with 1947, reflects adjustments made by the banks to conform to the limitations contained in the Government Corporations Appropriation Act, 1948. The increases for 1949 reflect the amounts necessary to enable the banks to maintain operating personnel at the level deemed essential to permit them to render an effective credit service to agriculture on a sound basis. It is estimated that the essential work of analyzing, handling, and servicing the large volume of agricultural paper (estimated at more than $1,250,000,000 for the fiscal year 1949, or an average of $104,000,000 per bank) will require for each bank an average staff of 3 officers (usually a president, a secretary, and a treasurer—one of the latter two being designated as a vice president); one junior officer (usually designated as the assistant secretary and assistant treasurer); an average of 2½ credit examiners; and approximately 17 other employees, including accountants, bookkeepers, clerk-stenographers, file clerks, etc.

Being banks of discount, which ordinarily do not require direct servicing of individual loans and discounts, only a moderate amount of travel is necessary. The amount budgeted, $23,850, represents an average of less than $2,000 per bank.

The cost of specialized services furnished by the general agent and his staff is estimated at $79,900, an average of $6,658 per bank. For the system this estimate represents an increase of $12,800 over the amount available for 1948 and reflects a readjustment of the basis upon which the cost of the general agents' offices are assessed to the four corporations in each district. It will enable the banks again to avail themselves of certain services not being utilized during the fiscal year 1948 because of the inability of the banks to pay the cost thereof.

Other expenses at the district level, estimated at $234,106, include such costs as compensation and travel expense of directors, rent, communications, penalty mail, printing and supplies, equipment, and other miscellaneous expenses. Equipment expense is estimated at $43,550, compared with $15,600 for 1948, or an average of approximately $3,630 per bank. These figures include provision for the purchase of five automobiles, at a net cost of $5,000, to replace a like number of automobiles which are becoming unsafe to operate or on which the maintenance cost is becoming prohibitive. The remainder of the equipment expense is for the replacement of obsolete and worn out office equipment, principally typewriters and accounting machines.

Assessments for Farm Credit Administration supervision and examination are estimated at $293,600, an average of $24,467 per bank, and reflect the amount necessary to permit Farm Credit Administration to obtain reimbursement from the intermediate credit banks, upon an equitable basis, for the cost of the services rendered by it.

The estimated administrative expenses for the fiscal year 1949 include $10,800 to cover the cost of audits of the Federal intermediate credit banks (for the fiscal year 1948), to be made by the General Accounting Office pursuant to the provisions of the Government Corporation Control Act. This amount is based upon a preliminary estimate of costs furnished by the General Accounting Office and an allocation suggested by it. The cost of audits covering the fiscal years 1945, 1946, and 1947, similarly estimated by the General Accounting Office and reflected as an additional expense for 1948, amounts to $27,500.

ESTIMATES OF AUTHORIZATION RELATING TO CORPORATE FUNDS

NOTE.—The text of general authorizing language, as incorporated in the Government Corporations Appropriation Act, 1948, and as proposed for 1949, will be found at the end of the "Summary Statements and General Language" of part III of the Budget.

Administrative Expenses, Federal Intermediate Credit Banks—

Federal Intermediate Credit Banks: Not to exceed [$1,250,000] *$1,647,800* (to be computed on an accrual basis) of the funds of the banks shall be available for administrative expenses, including the purchase of not to exceed [ten] *five* passenger motor vehicles *for replacement only*, services performed for the banks by other Government agencies (except services performed by the banks for cooperatives in connection with loans to cooperative associations rediscounted or pledged with the Federal Intermediate Credit Banks, and services performed by any Federal Reserve bank and by the United States Treasury in connection with the financial transactions of the banks), and not to exceed [$4,000] *$4,300* for penalty mail; and said total sum shall be exclusive of interest expense, legal and special services performed on a contract or fee basis, and expenses in connection with the acquisition, operation, maintenance, improvement, protection, or disposition of real or personal property belonging to the banks or in which they have an interest: *Provided*, That of the funds available to the banks for administrative expenses, not to exceed [$181,250] *$293,600* shall be available for payment to the Farm Credit Administration for supervisory or other services rendered. (*The Government Corporations Appropriation Act, 1948.*)

PRODUCTION CREDIT CORPORATIONS

Purpose and Financial Organization

There were no changes in the purpose, functions, or financial organization of the 12 production credit corporations during the fiscal year 1947 and none are contemplated during 1948 or 1949 which would affect the information reported in prior budget submissions.

Analysis of Budget Program

The primary functions of the production credit corporations are (1) to organize, (2) to partially capitalize, and (3) to supervise production credit associations. The production credit corporations' administrative expenses relate largely to the function of supervision. The corporations' activities and work load are affected directly by the nature and magnitude of the credit, management, and operating problems of the production credit associations and their loan volume, which in turn are influenced materially by general or local economic and farm conditions.

Organizing production credit associations.—Production credit associations have been established to serve all of the continental United States and Puerto Rico, pursuant to the authority of the act (12 U. S. C. 1131c and 1131d). The credit needs of the area served by each association are under constant study by the corporations. As a result, it is from time to time found advisable by the corporations and associations to effect changes in the territory served by individual associations, to bring about liquidation or consolidation of associations, and occasionally to organize additional associations. Also, to the extent determined to be necessary and feasible, the associations maintain branch or field offices so that service to farmers will be more efficient and convenient. At June 30, 1947, there were 504 production credit associations as compared with 505 a year earlier. A typical association serves about five or six counties and in addition to its main office, has two branch or field offices.

Partially capitalizing production credit associations.—A sound paid-in capital structure and adequate reserves in relation to loan volume are essential to each association. Initially, nearly all of the paid-in capital was supplied by the production credit corporations (12 U. S. C. 1131c), but more than half of the corporations' peak investment has been returned. In the meantime, farmer-owned capital has increased to a point where, for the associations as a group, it comprises a majority of the paid-in capital. Reserves are rapidly attaining reasonable levels in most associations. Twelve associations have repaid fully the corporations' capital investment and thus are wholly farmer-owned. Additional associations will achieve this objective during 1948 and 1949, and the other associations are making progress in this direction.

Loan volume has been increasing and is expected to increase somewhat further during 1948 and 1949. This will tend to increase the over-all capital needs of the associations and will require some increases in the corporations' capital investment in individual associations. However, farmer-owned capital and accumulated earnings (reserves) are expected to increase substantially and, as a result, the corporations anticipate substantial net reductions during both 1948 and 1949 in their investment in association stock. Large-scale capital investments in associations are not expected to be necessary in 1948 or 1949; however, it is essential that the corporations have adequate resources to permit prompt action when circumstances require. Immediate action may be imperative in the event of floods, hurricanes, crop failures, or other catastrophes, or depressed economic conditions. Without this ability on the part of the corporations, farmers and stockmen served by the associations might have to be denied sound and justifiable credit necessary for their operations at a most critical time.

The corporations are charged with the responsibility of regulating associations' investments (12 U. S. C. 1131f and g), and it is considered important to the welfare of the associations that their capital structure should not be affected by fluctuations in bond prices. Association class A stock purchased by the corporations is paid for largely by transferring bonds from the corporations to the associations. The reverse is true when corporation-owned A stock is retired. As farmer-owned capital and reserves have accumulated, additional funds have become available for investment in bonds in like manner. All bonds transferred to associations by the corporations are transferred at par value under repurchase agreements and are subject to the right and obligation of the corporations to repurchase at par value. Thus premiums or discounts on bonds purchased or sold are borne by or accrue to the corporations.

Supervising production credit associations.—Under the act (12 U. S. C. 1131d et seq.) and regulations thereunder, the corporations are charged with supervision of the associations. Thus the corporations have broad authorities, such as regulating loan and investment policies, approving loans in excess of certain amounts and to certain officials, fixing minimum reserve requirements, exercising controls over association salaries, and, as long as the corporations own stock in the associations, approving election of association directors, loan committeemen, and the secretary-treasurers. As associations' managements have gained in experience and as their locally owned capital structures have developed, the corporations have been able to exercise many of their supervisory responsibilities through leadership, counsel, and training with a minimum of formal regulations. This policy of decentralization permits the corporations to function with small staffs, a majority of whom are working directly with association directors and officers, largely through contacts at the association offices and occasional group meetings for neighboring associations. To be effective in these field contacts, the personnel must necessarily be of high caliber.

In carrying out their supervisory responsibilities, the corporations have emphasized the extension of sound credit and continual improvement of service to farmers. Members are encouraged to participate increasingly in association affairs. The associations operate under annual budgets adopted by their boards of directors and reviewed by the corporations which assist the associations in regard

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

to efficiency and economy of operations. The corporations aid the associations in the maintenance of effective controls over financial transactions, and through audits make sure that proper accounting procedures are followed and check on the accounting for funds. Association boards of directors are aided by the corporations in working out programs for speeding the attainment of farmer ownership of their associations.

To carry out the supervisory program as outlined above, a broad and continuous training program for association personnel is of major importance. The corporations have a primary responsibility for the training of association directors and key officers and have assisted the associations in the training of specialized employees such as inspectors and bookkeepers and in arranging for adequate training programs by the associations for their other personnel.

The corporations make an annual review of the credit activities of each association which serves as a basis for the credit supervision during the whole year. This includes an examination of loans which is utilized by the Farm Credit Administration, together with the financial examination made by its examiners, for administrative purposes and to meet the requirements of law pertaining to examinations of associations (12 U. S. C. 1138a). In view of this use of the credit examinations, the associations are assessed for the cost thereof.

Operating Results

The principal source of income of the corporations is from interest on United States securities. There has been a moderate increase in the number of associations paying dividends; however, dividends have not been a major source of income to the corporations, inasmuch as it is the policy to reduce the corporations' class A stock investments as rapidly as the associations are able to do so. During the fiscal year 1947 the combined income of the corporations, exclusive of profits on sale of United States securities, exceeded their administrative expenses by $252,329, or an average of $21,027 per corporation. It is anticipated that the combined income of the corporations from interest, dividends, and assessments for credit examinations will be sufficient to cover their administrative expenses for the fiscal years 1948 and 1949. During the fiscal year 1947, a net profit of $316,279 was realized as the result of sales of bonds in the latter part of the year to provide cash for the return of capital funds to the United States Treasury in the amount of $8.6 million offset in part by the premiums charged off on bonds purchased in connection with investments in United States securities made from time to time throughout the year. Smaller net profits from this source are anticipated for 1948 and 1949. The losses of $127,200 on class A stock investments to be charged off in 1948 arise in connection with the expected closing of the liquidation of four associations which were placed in this status prior to 1940. These estimated losses have been fully provided for through valuation reserves which had been established in prior years.

Financial Condition

Investments in class A stock of production credit associations.—On June 30, 1947, the corporations had an investment totaling $40,643,700 in class A stock of associations. This includes $130,700 representing the balances of their investments in class A stock of four associations in liquidation. As discussed above, valuation reserves had been established prior to June 30, 1947, to provide for all foreseeable losses. The investment in class A stock is expected to be further reduced to about $30 million by June 30, 1949.

United States Government bonds.—The corporations' investment in United States Government bonds amounted to $67,036,350 (par value) on June 30, 1947 (exclusive of securities sold to production credit associations under repurchase agreements). The corporations carry all of these investments at par value; accordingly, premiums paid were written off at time of purchase.

The corporations require resources substantially in excess of the amount currently invested in association class A stock to quickly meet developments in the agricultural credit field which would require strengthening of association capital structures. Resources not needed currently for class A stock investments in associations are invested in bonds, the interest from which represents the corporations' principal source of income.

Surplus.—It is required that the corporations accumulate surpluses of at least 25 percent of their paid-in capital (12 U. S. C. 1131c(c)). At June 30, 1947, the surplus of all the corporations aggregated $16,126,978, or 17.4 percent of their paid-in capital. This surplus not only safeguards the paid-in capital against impairment, but also directly influences the amount of paid-in capital required.

Return of capital funds to the Treasury.—Annual repayments to the revolving fund starting in 1944 had reduced paid-in capital of the corporations from $120 million to $92,650,000 at June 30, 1947. Further repayments will depend upon future capital needs of the system, but it is estimated that $7,125,000 will be returned during 1948 and $6,275,000 during 1949.

Effect on Government Budget

The corporations' activities during the fiscal year 1947 resulted in a net budgetary receipt of $8,675,394. It is estimated that operations during 1948 and 1949 will result in net budgetary receipts of $7,070,543 and $6,276,124, respectively (schedule A–1).

Administrative Expenses

Administrative expenses cover the costs of carrying out the corporations' responsibilities as above described; the assessed expenses of the Farm Credit Administration; and a new item beginning with the revised 1948 estimates, the assessment for the cost of audits by the General Accounting Office. Administrative expenses exclude premiums written off on securities purchased, and losses. In the fiscal year 1949 necessary salary increases and higher costs for certain other items are expected to be offset by somewhat fewer employees and other savings so that an increase of only $2,600 for estimated costs of General Accounting Office audits is asked over the $1.6 million approved for 1948. The number of personnel for 1949 will not only be somewhat lower than for either 1948 or 1947 but will also be about 30 percent lower than in prewar years, notwithstanding a major increase in association loan volume, rather heavy turn-over in key employees of associations, and the uncertainties ahead as to agricultural commodity prices and costs, all of which increase the supervisory responsibilities of the corporations.

During the war the staffs of the production credit corporations were reduced materially, and since the conclusion of the war they have not been increased. However, the production credit system will be faced with more serious problems of loan servicing whenever it enters a

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

period of falling prices and the corporations, as well as the associations, should prudently be preparing for such a contingency. There are limits to the extent to which the number of personnel can be reduced without seriously impairing the quality of supervision and thus jeopardizing the ability of the production credit system to provide the sound and constructive credit service to farmers for which it was created by the Congress.

Estimated administrative expenses for the fiscal year 1949 include $2,600 to cover the cost of audits of the corporations' 1948 operations, to be made by the General Accounting Office pursuant to the provisions of the Government Corporations Control Act. This amount is based upon a preliminary estimate of costs furnished by the General Accounting Office and an allocation suggested by it. The cost of audits covering the fiscal years 1945, 1946, and 1947, similarly estimated by the General Accounting Office, amounting to $5,600, has been absorbed and is reflected in the 1948 estimates. Total expenses of $1,602,600 estimated for the fiscal year 1949 are comprised as follows:

	Total for 12 corporations	Average per corporation (each serving an average of 4 States)
Average number of personnel (including temporary and part-time)	205.5	17.1
Salaries	$965,304	$80,442
Travel expense	189,000	15,750
Reimbursement to general agents' offices for specialized services at cost	79,050	6,588
Rent, communications, printing, equipment, and other district expenses	134,646	11,220
Total district expenses	1,368,000	114,000
Assessments by the central office of Farm Credit Administration for supervision and examination	232,000	19,333
Subtotal	1,600,000	133,333
General Accounting Office audit expense	2,600	217

SCHEDULE A–1

EFFECT ON THE GOVERNMENT BUDGET

	Actual, 1947	Estimate, 1948	Estimate, 1949
BUDGETARY EXPENDITURES			
General account expenditures: Return of capital funds to U. S. Treasury (revolving fund)	a $8,600,000	a $7,125,000	a $6,275,000
Expenditures from checking accounts:			
Acquisition of assets	14,250,365	12,396,600	12,544,100
Operating costs	1,582,178	1,600,000	1,602,600
Increase or decrease a in working capital items other than cash with U. S. Treasurer	106,229	a 168,443	a 39,424
Return of capital funds to U. S. Treasury, as above	8,600,000	7,125,000	6,275,000
Total checking account expenditures (gross)	24,538,772	20,953,157	20,382,276
Corporate receipts:			
Realization of assets	22,779,659	19,148,700	18,667,500
Income	1,834,507	1,750,000	1,715,900
Total corporate receipts	24,614,166	20,898,700	20,383,400
Net checking account expenditures (or credits a)	a 75,394	54,457	a 1,124
Net budgetary expenditures (or credits a)	a 8,675,394	a 7,070,543	a 6,276,124

a Deduct.

ESTIMATES OF AUTHORIZATION RELATING TO CORPORATE FUNDS

NOTE.—The text of general authorizing language, as incorporated in the Government Corporations Appropriation Act, 1948, and as proposed for 1949, will be found at the end of the "Summary Statements and General Language" of part III of the Budget.

Administrative Expenses, Production Credit Corporations—

Production Credit Corporations: Not to exceed [$1,600,000] *$1,602,600* (to be computed on an accrual basis) of the funds of the corporations shall be available for administrative expenses, including the purchase of not to exceed [fifteen] *three* passenger motor vehicles *for replacement only*, services performed for the corporations by other Government agencies, and not to exceed [$4,000] *$4,300* for penalty [mails] *mail*; and said total sum shall be exclusive of interest expense, legal and special services performed on a contract or fee basis, and expenses in connection with the acquisition, operation, maintenance, improvement, protection, or disposition of real or personal property belonging to the corporations or in which they have an interest: *Provided*, That of the funds available to the corporations for administrative expenses, not to exceed $232,000 shall be available for payment to the Farm Credit Administration for supervisory or other services rendered. (*The Government Corporations Appropriation Act, 1948.*)

REGIONAL AGRICULTURAL CREDIT CORPORATION OF WASHINGTON, D. C.

Purpose and Financial Organization

There was no change in the purpose, function, or financial organization of the Regional Agricultural Credit Corporation of Washington, D. C., during the fiscal year 1947. Other than the reduction of paid-in surplus discussed in subsequent sections, no changes are contemplated during 1948 or 1949 which would affect the information reported in prior budget submissions.

Analysis of Budget Program

In appraising the budgetary requirements of the Corporation for the fiscal year 1949, it is assumed the Corporation will continue the orderly liquidation of outstanding loans and advances under the food production program of 1943 and will make loans or advances for specified agricultural purposes if authorized by the Secretary of Agriculture only in areas in which the making of such loans or advances is necessary because of economic emergencies or production disasters. Also it is assumed that agricultural conditions will not change substantially and will be as favorable as they are today. The extent to which these activities were carried on during the fiscal year 1947 and the projected level for the years 1948 and 1949 are shown in the financial statements immediately following the textual material.

Food production loans and advances.—Under Executive Order 9280, issued December 5, 1942, the Secretary of Agriculture was made responsible for establishing programs to obtain production of the increased quantities of food necessary to meet war requirements. To provide complete and positive assurance that there would be adequate credit to finance the extraordinary production of food, the Secretary, in January and February 1943, authorized the Corporation to make available to farmers additional credit to supplement that available from existing sources. Accordingly, two types of credit were made available to farmers; namely, F–1 loans and F–2 special war crop advances.

The loans and advances were made through the county war boards and loan representatives selected from personnel of the various agencies of the Department of Agriculture. Beginning with the calendar year 1944, the functions of servicing, accounting for, and collecting these loans and advances were performed for the Corporation principally by the emergency crop and feed loan offices of the Farm Credit Administration under the general supervision of the district vice presidents of the Corporation who are the general agents of the 12 Farm Credit districts; however, effective September 1, 1946, the accounting and fiscal functions were recentralized in the Washington office. The district vice presidents, with the assistance of the field organization of the emergency crop and feed loan offices, continued to service these loans during the 1946 fall harvesting period. The loan servicing during the balance of the fiscal year 1947 and the entire 1948 and 1949 fiscal years will be done by the Corporation with the assistance of the district vice presidents and a small force of loan servicing personnel.

With the enactment of restrictions on the operation of this program in section 2 of the Department of Agriculture Appropriation Act, 1944 (57 Stat. 428), active lending operations under this program were discontinued after June 30, 1943, except for commitments already outstanding and further loans and advances to aid in the collection of outstanding loans and advances. The so-called F–1 and F–2 type loans were discontinued after June 30, 1943.

Through June 30, 1947, the aggregate amount of credit extended through F–1 loans and F–2 (special war crop) advances totaled $69,302,551 (including renewals). As of the same date, the outstanding balances of these loans and advances amounted to $1,609,478. Estimated liquidation is placed at $620,000 and $465,000 during the fiscal years 1948 and 1949.

Restricted area loans.—Pursuant to section 2 of the Department of Agriculture Appropriation Act of 1944 (57 Stat. 428) and subsequent years, the Secretary of Agriculture, beginning in October 1943 and from time to time thereafter, has authorized and directed the Regional Agricultural Credit Corporation of Washington, D. C., to make loans to finance the production of specified crops and livestock in certain regions in various States designated as regions in which such loans were necessary because of economic emergencies or production disasters.

During the fiscal year 1949 the Corporation will make loans only if so authorized by the Secretary of Agriculture because of economic emergencies or production disasters. These loans will be confined to specified areas or regions, to specified agricultural purposes, and to limited time periods. These loans will carry the full personal liability of the borrower and will be secured by crops or livestock and such additional collateral as is deemed necessary to afford reasonable assurance of repayment. Certificates of refusal of the loans by local banks or the production credit associations serving the area will be required before the Corporation approves loan applications.

Through June 30, 1947, the Corporation had made loans under the restricted area program amounting to $7,956,401 of which $201,345 was still outstanding on that date. No amount is estimated for new advances during the fiscal years 1948 and 1949, respectively. Liquidation is estimated at $70,000 during the fiscal year 1948 and $40,000 during the fiscal year 1949.

Wenatchee fruit loans.—In 1941 the Regional Agricultural Credit Corporation of Salt Lake City, Utah, which was later merged with the Regional Agricultural Credit Corporation of Washington, D. C., established a branch office at Wenatchee, Wash., to make loans to fruit growers in the north-central area of the State of Washington. This branch office was opened at the urgent request of local organizations of fruit growers, bankers, and merchants after it had become impossible to obtain the necessary credit from other credit institutions in the area. The Regional Agricultural Credit Corporation went into the Wenatchee area after careful study by the Department of Agriculture and the local land-use planning committee. Financing by the Corporation was combined with general horticultural supervision for the rehabilitation of orchards in the area. The loans made through June 30, 1947, aggregated $34,679,581, and the balance outstanding on that date was $302,657.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

The Corporation expects to complete the liquidation of these loans during the current fiscal year.

Other loans.—The original loan program of the regional agricultural credit corporations was initiated upon their organization in 1932 (12 U. S. C. 1148), and in May 1934 the making of new loans was discontinued as a result of improvement in the agricultural lending field and the establishment of the production credit system.

The unpaid balance of these loans outstanding on June 30, 1947, amounted to $17,482. It is expected that $7,000 of this amount will be liquidated during the fiscal year 1948, and $6,500 will be liquidated during the fiscal year 1949.

Operating Results

During the fiscal year 1947 programs carried on by the Corporation resulted in a net loss of $226,581 after provisions for all foreseeable losses and adjustments of valuation reserves. For the fiscal year 1948 it is estimated that a net loss of $115,100 will be sustained and that the loss for 1949 will amount to $28,700. As a result of the losses expected during the fiscal years 1948 and 1949, it is estimated that the Corporation will reflect a deficit of $7,853,819 on June 30, 1949 (see exhibits B and C).

Financial Condition

Loan account.—On June 30, 1947, there were, exclusive of sales contracts, notes receivable, etc., and advances to borrowers, 4,648 loans outstanding, amounting to $2,130,-962. The reserve maintained against the loan account on June 30, 1947, is considered adequate to cover probable losses under reasonably normal conditions.

Return of capital funds to the Treasury.—No additional retirements are anticipated at this time, since the capital stock has been reduced to $100,000.

Refund of moneys advanced under the Emergency Relief and Construction Act of 1932.—The act of July 21, 1932 (12 U. S. C. 1148), which authorized the creation of regional agricultural credit corporations, provided, among other things, for the Reconstruction Finance Corporation to pay all expenses incurred in connection with the operation of such corporations. Such amounts have been reflected upon the Corporation's books as paid-in surplus. At June 30, 1947, the advances under this authority amounted to $21,960,000. In November 1947 this item was reduced in the amount of $12.5 million, and that sum was deposited into miscellaneous receipts of the Treasury.

Effect on Government Budget

The Corporation's operations resulted in net budgetary expenditure credits of $1,339,660 during the fiscal year 1947 (schedule A–1). It is estimated that net budgetary expenditures of $12,288,525 will occur in the fiscal year 1948 and net budgetary expenditure credits of $167,166 will result during the fiscal year 1949. The large net expenditure for 1948 reflects the reduction of paid-in surplus by payment to the Treasury of $12.5 million discussed above. The payment into miscellaneous receipts of the Treasury has been shown as a $12.5 million increase in budgetary receipts for the fiscal year 1948 (table 7).

Administrative Expenses

Administrative expenses include the cost of liquidating food production loans and advances and other loans, restricted area loans, and loans in the Wenatchee area. Also included in the administrative expenses is the estimated cost of audits by the General Accounting Office pursuant to the provisions of the Government Corporations Control Act. These costs are based upon a preliminary estimate furnished by the General Accounting Office and an allocation suggested by it. The costs of audits covering the fiscal years 1945, 1946, and 1947 are estimated at $6,000 and have been included in the revised 1948 estimate; the cost for the audit of 1948 operations is estimated at $1,800 and has been included in the administrative-expense estimate for 1949. Administrative expenses for the fiscal year 1949 are estimated at $46,800, or $108,200 less than the amount forecast for the fiscal year 1948.

[1] Includes drafts outstanding.

[2] Under the act of July 21, 1932, 47 Stat. 713 (12 U. S. C. 1148), which authorized the creation of regional agricultural credit corporations it was provided that the Reconstruction Finance Corporation subscribe for and pay in the capital stock of the corporations. This act further provided that all expenses incurred in connection with the operation of such corporations be paid by the Reconstruction Finance Corporation under such rules and regulations as its board of directors may prescribe; the latter amounts have been reflected upon the Corporation's books as paid-in surplus. Pursuant to the act of Feb. 24, 1938, 52 Stat. 79 (Public Law 432, 75th Cong.), the act of Mar. 8, 1938, 52 Stat. 107 (Public Law 442, 75th Cong.), and Executive Order No. 7848, dated Mar. 22, 1938, the capital of the Regional Agricultural Credit Corporation is held by the Secretary of the Treasury for and on behalf of the United States.

Federal land banks.—Under an amendment to the Federal Farm Loan Act, approved January 23, 1932 (12 U. S. C. 698), the Secretary of the Treasury on behalf of the United States subscribed to $125 million of capital stock in the 12 Federal land banks. This amendment also provided that the Secretary of the Treasury, under certain conditions, would subscribe to the paid-in surplus of any Federal land bank in an amount equal to extensions or deferments on loans granted during any particular period. For this purpose a total of $189 million has been appropriated since 1933 (12 U. S. C. 771, 781). Authority for further subscriptions of paid-in surplus on account of deferments granted by the Federal land banks expired on July 11, 1938. Authority for further subscriptions on account of extensions granted still exists, but has not been used since December 1943.

Funds repaid by the banks from time to time have been placed in revolving funds in the Treasury, from which future subscriptions of capital and paid-in surplus may be made if conditions warrant. As of June 30, 1947, the Federal land banks had retired all Government-owned capital stock and paid-in surplus. The following schedules indicate that subscriptions of capital or paid-in surplus during 1948 or 1949 are not contemplated at this time.

Subscriptions to Capital Stock, Federal Land Banks, Revolving Fund, Office of the Secretary, Treasury Department—

	Actual, 1947	Estimate, 1948	Estimate, 1949
FUNDS AVAILABLE FOR OBLIGATION			
Retirements of subscriptions to capital stock	$39,957,850		
Prior year balance available	85,042,150	$125,000,000	$125,000,000
Total available for obligation	125,000,000	125,000,000	125,000,000
Balance available in subsequent year	−125,000,000	−125,000,000	−125,000,000
Total obligation			

Subscriptions to Paid-in Surplus, Federal Land Banks, Revolving Fund, Office of the Secretary, Treasury Department—

	Actual, 1947	Estimate, 1948	Estimate, 1949
FUNDS AVAILABLE FOR OBLIGATION			
Retirements of subscriptions to paid-in surplus	$36,924,409		
Prior year balance available	152,075,591	$189,000,000	$189,000,000
Total available for obligation	189,000,000	189,000,000	189,000,000
Balance available in subsequent year	−189,000,000	−189,000,000	−189,000,000
Total obligations			

Bank for cooperatives.—The Farm Credit Act of 1933, as amended, provides that capital funds required by the banks for cooperatives would be obtained from the revolving fund of the Agricultural Marketing Act (12 U. S. C. 1134b–1134i) and from cooperatives obtaining loans from the banks (12 U. S. C. 1134k). Present provisions of the law (12 U. S. C. 1134k) make it mandatory that capital stock in the bank for cooperatives owned by a cooperative association which has paid its indebtedness to the bank must be retired and canceled upon request by the association. Because of this requirement the amount of capital stock in the banks owned by farmers' cooperatives ordinarily varies with the amount of loans outstanding and has never constituted more than a comparatively small part of the capital needs of the banks. As of June 30, 1947, stock owned by cooperatives and deposits of cooperatives in the guaranty fund totaled $8,811,200 or only 4.9 percent of the capital of the Government in the banks.

Steps have been taken to overcome the difficulties that have been faced in attempting to develop a long considered plan for increasing the capital investment of cooperatives in the banks; and a plan may be sufficiently advanced by early 1948 for submitting to Congress for the legislation necessary to make it effective.

DEPARTMENT OF COMMERCE

INLAND WATERWAYS CORPORATION

Purpose and Financial Organization

Chartering of the Inland Waterways Corporation in 1924 was an outgrowth of the need for inland water transportation during the First World War. By the Federal Control Act of March 21, 1918, the Director General of Railroads was authorized to purchase, construct, and operate transportation facilities on inland waterways. In accordance with this authority, the Director General commandeered substantially all privately owned vessels on the inland waterways and initiated a program for the construction of new floating equipment. Under the terms of the Transportation Act of 1920, the functions exercised by the Director General of Railroads were transferred to the Secretary of War, who conducted the operations through the Bureau of Inland and Coastwise Waterways Service. When, by 1924, it had become evident that this operation could not be effectively carried on by a typical Government administrative bureau, the Inland Waterways Corporation was created by act of Congress, June 3, 1924 (49 U. S. C. 151). The Corporation was operated under the direction and supervision of the Secretary of War until its transfer to the Department of Commerce in 1939.

The chief purpose and objective of the Inland Waterways Corporation is to demonstrate the feasibility of water transportation on the inland rivers and to extend the benefits of this service to the people of the United States. The Corporation operates the most complete common carrier service by barge offered on the Mississippi, Illinois, Missouri, and Warrior Rivers. All types of freight, except livestock and perishables, are handled on 3,300 miles of inland rivers with 22 boats and 273 barges. Operations are conducted through numerous private terminals, as well as through 21 general merchandise facilities.

The Corporation is to carry out the policy of Congress of providing transportation services on the Mississippi, Illinois, Warrior, and Missouri Rivers until (*a*) there shall have been completed navigable channels as authorized by Congress; (*b*) terminal facilities shall have been provided on such rivers reasonably adequate for joint rail and water service; (*c*) there shall have been published and filed under the provisions of the Interstate Commerce Act, as amended, such joint tariffs with rail carriers as shall make generally available the privileges of joint rail and water transportation upon terms reasonably fair to both rail and water carriers; and (*d*) private persons, companies, or corporations engage in, or are ready to engage in, common carrier service on such rivers. The Corporation has no specified term of existence. Enabling legislation provides, however, that as soon as the foregoing conditions shall have been met the facilities of the Corporation may be sold or leased to private enterprise when such transfer can be made to the best advantage of the Government (49 U. S. C. 153).

During the past year disposition of the facilities of the Corporation has been the subject of much discussion. The Select Committee on Small Business of the House of Representatives conducted a series of public hearings throughout the Mississippi Valley to inquire as to the best time and method of disposal of these facilities. Their recommendations are set forth in a report to the Subcommittee on Government Corporations of the Appropriations Committee (House Report No. 1102, 80th Cong., 1st sess.).

The Corporation is managed by the usual general officers, appointed by the Secretary of Commerce, who also selects the chairman and six members of an advisory board. The bylaws of the Corporation provide that each of the six members of the advisory board, who must be a recognized business leader in his community, shall represent one of the several sections of the country served by the Inland Waterways Corporation, shall serve for 5 years, and shall receive no compensation for his services other than per diem and travel.

The Corporation's originally authorized capital stock of $5,000,000 was increased in 1928 to $15,000,000 (49 U. S. C. 152). Of this amount, $12,000,000 has actually been appropriated through the Secretary of the Treasury and made available to the Corporation. The Corporation has also paid-in surplus of approximately $8,000,000, consisting of the 1924 appraised value of the equipment and facilities turned over to the Corporation by the War Department at the time of its creation, adjusted as of June 30, 1947. The propriety of the original appraisal has been questioned often. This adjustment represents the effect of a reappraisal of that portion of the original equipment still in service. Since a reappraisal of the equipment which has since been retired would affect only the "paid-in surplus" and not the depreciated book value, or current commercial value, of the fleet, such an adjustment has not been made. The Corporation has no authority to issue bonds or other long-term debt obligations. A statement of the financial condition of the Corporation is shown immediately following the textual material (exhibit C).

Included in the Corporation's assets is the Warrior River Terminal Company, a wholly owned subsidiary which operates a switching railroad in the area of Birmingham, Ala. To comply with requirements of the Government Corporation Control Act (31 U. S. C. 850) the Warrior River Terminal Company, which is chartered under the laws of Alabama, will be merged with the parent corporation. Since no legislation is necessary for the merger of the parent and subsidiary corporations, dissolution proceedings have been initiated and all requirements of Alabama law relative to the Company will be satisfied prior to June 30, 1948.

The chartering operations carried on by the Corporation under contract with the Reconstruction Finance Corporation since 1942 will be completed during the fiscal year 1948. No funds are requested for this activity for the fiscal year 1949.

Analysis of Budget Program by Major Activities

The budget program of the Inland Waterways Corporation for the fiscal year 1949 is divided into three categories: (1) common carrier operations, (2) capital replace-

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

ment program, and (3) loaning activities. The level at which the various activities of the Corporation were conducted during the fiscal year 1947 and the projected level for the fiscal years 1948 and 1949 are shown in the statement of sources and application of funds in the financial statements immediately following the narrative.

Common Carrier Operations

During fiscal year 1947, the principal activity of the Corporation was a reorganization of administration and operations. For the first half of the year the task of adjusting personnel practices and labor relations to conform with many newly applicable laws and regulations absorbed the principal energies of the management. There is no question but that this readjustment seriously delayed any progress in improving the productive efficiency of the operation. Not only were numerous changes effected in management personnel, but the administrative structure was reorganized from top to bottom. This program moved slowly and was not completed until the close of the fiscal year. It is too soon to point to any effect of this regrouping of management, but a foundation has been laid for more efficient operation in the future.

In operations several events are worth mentioning. Navigation of the Illinois River to Chicago was continued all winter with good success. A lengthening of the navigation season on the upper Mississippi to Minneapolis was undertaken for the first time. Boats ran 2 or 3 weeks later than usual and started 2 weeks earlier. Results of this experience will be an even further lengthening of the season in the coming year. Scheduled sailings on all divisions were abandoned on January 1 as being productive of expensive delays. Boats are now operated to maintain as nearly as possible a uniform interval. There was no shipper objection, and vessel efficiency has been improved. Broader reciprocity has been developed with other carriers on the river, and the Corporation now tows regularly for several other lines.

During the year slow progress was made in improving terminal efficiency. In the spring a program of separating the terminal operation organically from the barge operation was undertaken and put into effect at the close of the fiscal year. Pallets for freight handling came into wide usage, and an experimental lot of 200 cargo containers was purchased. A comprehensive program of transferring the operation of small terminals to private operators and the rehabilitation of the larger terminals has been started. Two small terminals have been disposed of and negotiations are under way to dispose of several others. All terminals are actively developing outside sources of revenue to supplement their freight handling activities.

During the fiscal year 1947 joint rates with several truck lines were published. There has not yet been time to develop any volume of traffic through these channels. This policy will be broadened in the coming years to secure the widest possible coverage.

In the fall of 1946 an experimental trip was made to Omaha. Channel conditions were found satisfactory, and terminal arrangements were made. In the spring of 1947 regular operations to Omaha were begun on a limited scale. An experimental trip was made to Sioux City in the summer of 1947. Regular operations to this port cannot be undertaken before 1949, which is the earliest date the Chief of Engineers promises a dependable channel. Missouri River navigation, generally unsuccessful in the past, will continue to be unsuccessful until both a better channel and more efficient floating equipment are available.

The various expedients undertaken during fiscal year 1947 have not yet come to fruition. It is hoped that, as the various minor improvements begin to take effect, they will be reflected in an improved showing in the fiscal year 1948.

An underlying factor affecting the whole operation was, and is, the accelerating deterioration of the Corporation's old equipment. Barges are increasingly out of service for repairs, and shipments have been more frequently damaged by leakage, resulting in shipper alienation.

The traffic situation in the fiscal year 1947 followed the general pattern of the previous year. Traffic dislocations resulting largely from the war still were the controlling factor in limiting the Corporation's revenue. Continued shortages throughout the country, with resulting tight markets, precluded any large scale shipments of merchandise. Volume of merchandise shipments increased from 417,318 tons in 1946 to 540,218 in 1947 but fell far short of the estimated tonnage of 700,000 for 1947. An important secondary influence limiting merchandise loadings was the serious car shortage prevailing throughout the year, resulting in continued delay in freight unloadings, which, in turn, also alienated shippers.

Bulk traffic fell short of estimates on account of strikes, car shortages which prevented assembling full barge shipments, and the disastrous flood which immobilized all activities of the Corporation from St. Louis north for several weeks at the close of the fiscal year. Nevertheless, bulk shipments increased from 1,164,888 tons in 1946 to 1,413,644 tons in 1947, as compared with estimated tonnage for 1947 of 2,050,000 tons.

In summary, while traffic of 1,582,206 tons in fiscal year 1946 was estimated to increase to 2,750,000 tons in fiscal year 1947, the volume actually only reached 1,953,862 tons. Although rail freight rates were increased in December 1946 an average of 17.6 percent, the average corresponding rate increase on the Corporation's traffic in the last half of the year was approximately 14.1 percent, due principally to the fact that the bulk of the Corporation's traffic is in low-rated commodities. Revenues of $6,246,053 in fiscal year 1946, expected to increase to $8,130,000 in 1947, actually only increased to $6,942,796.

Meanwhile, as in all other lines of business, expenses increased. Wages and salaries, $4,514,402 in 1946 and estimated at $4,754,595 for 1947, actually increased to $5,368,364 as a result of unexpectedly large increases in industry wage rates, the net dollar increase occurring in spite of substantial reductions in personnel. Towboat fuel costs increased in midyear, causing this item to amount to $895,131, compared to $763,114 for 1946 and the 1947 estimate of $805,000. Maintenance and repair of equipment, disproportionately high in 1946 when it cost $1,573,781, or 18.37 percent of total expenses, showed a slight decrease last year to $1,424,072, or 15.76 percent of total expenses.

The combination of a slow recovery in traffic and revenue in fiscal year 1947, producing $1,187,204 less revenue than estimated, with expenses running only $93,583 under estimates, increased the operating loss from an estimate of $995,931 to $2,089,552.

The prospects for fiscal year 1948 are good. Although the year began at the crest of the worst flood in 103 years at St. Louis, the hub of operations, the outlook is considerably brighter than last year. All reorganization is completed, and the management is in a position to get down to managing the business. The efficiency of all depart-

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

ments has noticeably sharpened, and preliminary checks on various indices show increased productivity. The traffic outlook is good. Estimates of traffic on the river are invariably in error, and therefore the original estimate of 2,850,000 tons for fiscal year 1948 has been reduced to 2,395,792 tons. This appears conservative. Merchandise loadings, while not recovering as rapidly as expected, have increased. Bulk bookings are running at capacity. The coal market is steady, and, except for unpredictable effects of freight car shortages, the prospects are for capacity operation for as long as the navigation season can be extended.

In addition to the favorable tonnage prospects, there is now pending before the Interstate Commerce Commission a railroad petition for further rate increases. If granted, this will further boost revenues through automatic corresponding increases in the Corporation's joint rail-barge traffic.

Using a very conservative estimate on traffic and revenue of $9,090,900, and being as liberal as seems now proper in estimating expenses at $9,916,800 for the current fiscal year, the result of operations this year should be a loss of only $825,900, a reduction of $1,263,652 from the operating loss of $2,089,552 for fiscal year 1947.

With the Corporation's present tools, there is not much hope that this gloomy picture can be changed. The 1949 estimated profit of $1,145,300 is based on the expected completion of the first phase of the capital replacement program, on which depends the future operation of the barge line. Continued operation of the present equipment will not only inevitably result in large annual losses but will very shortly result in rapid curtailment of operations on account of the forced retirement of inoperable equipment.

CAPITAL REPLACEMENT PROGRAM

A long-range rehabilitation program was developed during the fiscal year 1947. It was determined that of the 26 towboats and 273 barges in the Corporation's fleet in 1946 only 5 towboats and 99 barges had any useful life left. The remaining barges will be patched and used only until they can be replaced in an orderly manner. Of the 21 oldest boats, 1 was replaced by the purchase of a new Diesel tug from the United States Maritime Commission, and 5 small sternwheelers were replaced by the purchase of 3 large steam screw towboats from the same source. Eight of the oldest and least efficient vessels have been retired and are being sold. Two of the five boats worth keeping were taken out of service last winter to be re-engined with large Diesel engines from Navy surplus. At the close of fiscal year 1947, the towboat fleet consisted of 13 of the least inefficient of the obsolete boats (which are to be kept in service only until they can be replaced), the 4 boats acquired from the United States Maritime Commission, and the 5 boats of the original fleet which have some service life left. The conversion of two of these from 1,000-horsepower steamboats to 2,500-horsepower Diesel boats was begun last winter. One has been completed and in service since June, the other since October. It is planned to continue this conversion program with the other three salvageable boats. The engines for one are on hand, and engines for the other two are to be purchased from the United States Maritime Commission.

Completion of this conversion program during fiscal year 1949 will still leave the Corporation with only 9 useful vessels (5 converted and 4 recently acquired from the United States Maritime Commission) and 99 useful barges. The backbone of the replacement program must be new equipment. With the desire to replace the towing capacity of the remaining 13 towboats and 174 barges with the most efficient equipment possible, the Corporation designed an entirely new type of streamlined equipment, described as an "integrated tow." Having received congressional endorsement, a contract for the construction of the first experimental unit was let in July. Delivery is promised for May 1948.

If the performance of this new tow measures up to expectations, it is planned to continue the replacement program along these lines. To implement this plan, an additional appropriation of $3,000,000 for fiscal year 1949 is requested to build two more complete integrated tows with sufficient extra barges to provide turn-around of equipment.

In analyzing the Corporation's terminal program, it appears that no substantial capital expenditures need be contemplated at any of the small intermediate terminals. There is a long-range terminal problem at Chicago, the solution of which is involved in the completion of the Calumet-Sag River development project in the South Chicago-Gary area. This development will be carefully studied and a proposal offered at a later date.

While major improvements are needed at the New Orleans terminal, study of these must await final decision on the location of the proposed New Orleans Seaway, which probably will make it desirable to develop a new terminal in a different location.

At St. Louis and East St. Louis, major capital improvements should be made as promptly as possible to reduce freight handling costs at this most congested area. Complete rehabilitation of facilities at East St. Louis, all corporation property, will be carried out in fiscal year 1948. St. Louis facilities are owned by the city. Negotiations will be undertaken with St. Louis officials during fiscal year 1948 on a proposal to rehabilitate the municipally owned facilities.

All plans for purely research and development work, except the development of navigation on the Missouri, have been abandoned in favor of a policy of rehabilitation and refurbishment of the Corporation's common carrier operation to make it a successful and profitable operation at the earliest possible moment so that it may be sold to private operators as a unit and as a going concern.

Loaning Activities

The Corporation has three loans outstanding; the balance of which at June 30, 1947 was $238,649. These loans were made to the cities of New Orleans, La., Memphis, Tenn., and Kansas City, Mo., in accordance with the Transportation Act of 1920 (49 U. S. C. 141) which provides for the improvement of transportation facilities along the inland waterways through loans to States, municipalities, and transportation companies. No new loans have been granted since 1935 and none is contemplated for the fiscal years 1948 and 1949. Payments on the outstanding loans totaled $58,277 in 1947, whereas it is estimated that approximately $45,649 will be repaid in the fiscal year 1948, including the Kansas City loan in full, and $45,000 will be repaid in the fiscal year 1949.

Operating Results

Operations of the Corporation were relatively successful until 1939. Since then operating losses have occurred regularly due principally to the shift in tonnage, the necessity

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

for speed in getting critical war materials to their destination, the maintenance and operation of old equipment, labor difficulties in major industries, and rising labor costs without a corresponding rise in operating efficiency. Total expenses for the fiscal year 1947 were $9,032,348 as against an estimated $9,125,931. Revenues for the year were estimated at $8,130,000, whereas only $6,942,796 was actually earned. Delays in the capital replacement program, loss of tonnage through the coal strike, shortage of coal cars, and high water in the month of June are among the contributing factors to the difference in revenue estimates in the fiscal year 1947. The result was a loss of $2,089,552 instead of the estimated loss of $995,931. In estimating revenues for the fiscal years 1948 and 1949 based on available tonnage and carrying capacity, 10 percent was deducted for such contingencies as strikes, low or high water, abnormal ice conditions, etc. This factor plus the fact that savings from the operation of new equipment will not be possible until the end of the fiscal year will result in a loss for the fiscal year 1948. Revenues are estimated at $9,090,900 while expenses total $9,916,800. For fiscal year 1949 revenues are estimated to be $11,325,200 and expenses $10,179,900.

Financial Condition

Earned surplus of the Corporation in 1938 amounted to more than $2,500,000. Continued losses since that time have resulted in a deficit of $8,192,104 as of June 30, 1947. The further loss estimated for the fiscal year 1948 will increase the deficit to $9,018,004. The estimated profit for the fiscal year 1949, however, will reduce the deficit to $7,872,704.

A reappraisal of all floating equipment owned by the Corporation and a study of depreciation rates were completed during the fiscal year 1947. These studies resulted in a revaluation of property acquired by transfer from the War Department in 1924 at $7,998,020 instead of the previous appraisal of $10,460,756, as well as a surplus adjustment of $4,244,149, to cover the revaluation of obsolete property and the correction of depreciation rates. This latter adjustment accounts for the large increase in the surplus deficit in the fiscal year 1947.

For many years the Corporation has been depreciating its floating equipment at 3.12 percent, a composite rate based on the estimated service life of boats and barges. This rate was seriously in error as was evidenced by the fact that the Corporation found itself with boats and barges on hand, long past the end of their service life, but only partly depreciated on the books. The general practice of the industry is to assign a service life of 25 years to a towboat and 20 years to a barge. With the consent of the Interstate Commerce Commission, the Corporation's depreciation account was adjusted as of June 30, 1947, to reflect the true situation; book values have been lowered to where they would have been had the equipment been depreciated at proper rates throughout its life. The Corporation enters the current fiscal year with book values more in line with service values and depreciation rates in accordance with the practice of the industry.

Government securities owned by the Corporation, totaling $2,288,060 on June 30, 1947, will be liquidated to finance the purchase of new equipment and to provide operating funds. In addition, that program anticipates the receipt of $3,000,000 in the fiscal year 1949 through the appropriation of funds for the balance of the authorized capital stock of the Corporation.

Effect on Government Budget

Since the Corporation maintains checking accounts in private banks, the only effect of its operations on the Government budget will be an expenditure in fiscal year 1949 of 3 million dollars for the purchase of capital stock.

Administrative Expenses

Administrative expenses cover the general supervisory and supporting staff engaged in over-all administration of the programs carried on by the Corporation. Since the Corporation is subject to the regulations of the Interstate Commerce Commission, administrative expenses are those set forth under the title "General expenses" in the Interstate Commerce Commission Uniform System of Accounts for Carriers by Water for water operations, and under the title "Operating expense accounts—general" in the Uniform System of Accounts for Steam Railroads, for railroad operations.

Administrative expenses of the Inland Waterways Corporation and the Warrior River Terminal Company were $659,869, excluding reimbursements in fiscal year 1947, and are estimated at $438,200 and $498,800 for 1948 and 1949, respectively. A reduction of seven positions in 1949 is more than offset by cost of within-grade promotions and provision for overtime pay. Inclusion of legal fees and expenses pertaining to traffic and rate matters, and audit costs, both formerly nonadministrative expenses, bring administrative expenses to $498,800 for 1949, an increase of $60,600 over the 1948 limitation.

ESTIMATES OF APPROPRIATION

DEPARTMENT OF COMMERCE

Capital Stock, Inland Waterways Corporation—

Inland Waterways Corporation: For the purchase of the remainder of the capital stock of the Inland Waterways Corporation authorized by section 2 of the Act of June 3, 1924, as amended (49 U. S. C. 152), $3,000,000, to remain available until expended.

Estimate 1949, **$3,000,000**

Obligations: 16 Investments and loans (purchase of capital stock of Inland Waterways Corporation)—1949, $3,000,000.

ESTIMATES OF AUTHORIZATION RELATING TO CORPORATE FUNDS

NOTE.—The text of general authorizing language, as incorporated in the Government Corporations Appropriation Act, 1948, and as proposed for 1949, will be found at the end of the "Summary Statements and General Language" of part III of the Budget.

DEPARTMENT OF COMMERCE

Administrative Expenses, Inland Waterways Corporation—

Inland Waterways Corporation: Not to exceed [$418,100] *$498,800* shall be available for administrative expenses, to be determined in the manner set forth under the title "General expenses" in the Uniform System of Accounts for Carriers by Water of the Interstate Commerce Commission (effective January 1, [1942), with the exception that the cost of the audit as required by Public Law 248, Seventy-ninth Congress, shall be deemed a nonadministrative expense for the purpose hereof,] *1947) for water operations, and in the manner set forth under the title "Operating expense accounts—general" in the Uniform System of Accounts for Steam Railroads of the Interstate Commerce Commission (issue of 1943) for railroad operations,* including not to exceed [$1,200] *$1,400* for penalty mail: *Provided,* That no funds shall be used to pay compensation of employees normally subject to the Classification Act of 1923, as amended, at rates in excess of rates fixed for similar services under the provisions of the Classification Act, as amended, nor to pay the compensation of vessel employees and such terminal and other employees as are not covered by the Classification Act, at rates in excess of rates prevailing in the river transportation industry in the area. (*The Government Corporations Appropriation Act, 1948.*)

NOTE.—Estimate includes activities previously carried under "Administrative expenses, Warrior River Terminal Company." The amounts provided for 1947 and 1948 are shown in the schedule as comparative transfers.

DEPARTMENT OF THE INTERIOR

THE VIRGIN ISLANDS COMPANY

Purpose and Financial Organization

The Virgin Islands Company was established in 1934 to aid in effecting the economic rehabilitation of the Virgin Islands. During 1932 and 1933 the Red Cross was feeding approximately 40 percent of the Island's population. Sugarcane has been the chief crop and main source of employment on the island of St. Croix for almost 150 years. Other crops have been tried, with poor results; and even sugarcane is a marginal crop because of light rainfall, high evaporation, and quick run-off. Average yields of sugarcane are only about one-third of those in nearby Puerto Rico and Cuba.

During the peak season the Virgin Islands Company employs directly about 1,100 persons. In addition the Company's sugar mill is the sole market for sugarcane produced by some 550 small farmers. Thus, about 1,650 people receive their income directly from the Company—almost 50 percent of the 3,429 employed people reported in the 1940 Census. Subsistence levels have been raised, decent housing and subsistence plots furnished, and sanitary systems introduced. If the activities of the Company were to cease, the only apparent substitute would be direct and continuing relief.

The capital stock of the Company consists of three shares of $10 each, held in trust by the Secretary of the Interior, the Under Secretary of the Interior, and the Governor of the Virgin Islands. Under an agreement with the Secretary of the Interior, the Company operates federally owned properties whose depreciated value on June 30, 1947, was $1,539,945.

Analysis of Budget Programs

The Company's income is derived from the production and sale of sugar, rum, and electric power, and from miscellaneous activities, including assistance to small farmers.

Production and sale of sugar.—The sugar program shows an approximate gross loss of $120,000 for the fiscal year 1947 and is expected to sustain slightly smaller losses in 1948 and 1949. The primary cause of these losses is low sugarcane production per acre. The average for St. Croix runs about 12 tons per acre, compared with about 30 tons in nearby Puerto Rico and Cuba. Low production results from prolonged droughts, depleted soil, use of hand-labor methods and Company policy of employing aged and other less productive workers. It must be remembered that the Virgin Islands Company was created primarily to provide employment and thereby to cure the economic and social chaos which existed during the 4 years immediately preceding its creation in 1934. In the past several years all sugar has been sold to the Commodity Credit Corporation. In 1947 it was sold at an approximate loss of $35 per ton. It is practically impossible to predict with any accuracy what the crop and price situation will be in future years. However, it is estimated that the loss per ton in 1948 will be $37 and in 1949, $23.

Production and sale of rum.—In the fiscal year 1947 the Virgin Islands Company earned a gross profit of $65,182 on sales of rum. A gross loss of $41,700 is forecast for fiscal year 1948 with a smaller loss of $31,200 for 1949. Sales of rum have fallen off considerably in the past few years because of a glutted market in the United States. This budget is based on estimated sales of 22,000 cases in fiscal year 1948 and 32,000 cases in 1949. If market conditions improve, the Company should, as in the past, show a profit on rum operations.

Production and sale of electric power.—The electric power program made money during the war because of sales to military establishments. The latter are now closed down and sales have fallen off. A gross loss of about $18,000 was sustained in 1947 and $3,000 is forecast for 1948. The Rural Electrification Administration has agreed to loan an additional $157,000 for the purchase of a 234-kilowatt generator and the extension of rural services in St. Croix. A wholesale power contract has been made between the Company and the St. Croix Power Authority whereby the Power Authority will purchase energy to supply Christiansted and Frederiksted, which are to be converted from direct current to alternating current. The contract will remain in effect until rural consumption has increased to the point where the Virgin Islands Company has no excess power. This sale of power, plus the new rural customers gained by extending the lines, should provide additional income in an amount that may eventually enable the Rural Electric Division to operate without losses.

Assistance to small farmers and miscellaneous activities.—Miscellaneous operations of the Company are expected to show a gross income of $3,200 in fiscal year 1948 and a gross loss of $4,700 in fiscal year 1949. The Company expects to maintain at about the present level its assistance to small farmers in plowing their land and furnishing cane seed. Any governmental agency, private concern, or individual may purchase the products of the Company, rent its equipment, or otherwise have access to the services of the Company upon approval of its duly authorized officers. The Company has followed this policy of assisting hundreds of small growers and homesteaders to help themselves by renting them tractors and farm equipment, furnishing improved varieties of cane seed for planting, and grinding facilities for the sugarcane they produce. In order to insure proper care of children whose parents are employed by the Company, nurseries and attendants for the children are provided during working hours.

In addition to these activities, the Company maintains a herd of cattle, operates a rock crusher used in local road construction, and runs a mail, cargo, and passenger schooner between St. Thomas and St. Croix. It expects to continue its cooperation with the cattlemen on the island of St. Croix in the operation of an abattoir and to continue the operation of a poultry farm by a private lessee. A market and cold-storage plant on the island of St. Thomas is operated by the municipality. The Company also operates for the cities of Christiansted and Frederiksted, on a cost-plus-a-percentage reimbursable basis, the direct-current electric generators which are used to generate electricity for the urban areas.

Operating Results

During the fiscal year 1947, programs carried on by the General Operations Division resulted in a net loss of $96,180, with a further loss of $18,574 for the Rural Electric Division, a total loss of $114,754. For the fiscal years 1948 and 1949, it is expected that the losses will total $200,000 and $184,000, respectively. No particular improvement in the continued loss position can reasonably be expected until such time as rum can be sold in the United States market at a profit.

Financial Condition

Accounts receivable.—The $80,719 of accounts receivable on June 30, 1947, consisted partially of amounts due from the Commodity Credit Corporation for price support payments, and partially of other purely routine balances. The large decrease in accounts receivable between June 30, 1946, and June 30, 1947, was due to the payment by the Commodity Credit Corporation of its account early in the 1947 fiscal year.

Inventories.—The inventories of commodities, supplies, and materials are all valued at cost. In the case of sugarcane in the fields, cost consists of the direct materials and direct labor, together with an applicable part of overhead, expended on the crop up to the close of the fiscal year. Rum inventory, most of which is in barrels, represents direct manufacturing costs, together with an applicable part of overhead.

Land, structures, and equipment.—The cost of land, structures, and equipment, net of depreciation reserves, represents the equipment operated by the Rural Electric Division and that part of general operating equipment which has been acquired by the Company in its own corporate name. In addition, the Company operates for the United States Government additional assets whose value, at cost less depreciation, is $1,539,945.

Accounts payable.—The accounts payable of $123,173, as of June 30, 1947, consist largely of past-due accounts which the Company's financial condition has not allowed it to pay.

Notes payable.—The Company has borrowed, during the current fiscal year, $250,000 from the United States Treasury. In addition, it is indebted to the Rural Electrification Administration in the amount of $209,302, which will be increased to $366,300 by June 30, 1949. There is a note payable due the Banco de Ponce in Puerto Rico in the amount of $150,000. This note is past due, but the Company is unable to pay it, and has applied for a time extension. The increase in this item to $300,000 on June 30, 1948, and to $550,000 on June 30, 1949, represents the amount of new loans which will be necessary to finance the inventory increases and the operating losses during the next 2 years.

Effect on Government Budget

Net budgetary expenditures for the fiscal year 1948 are estimated at $297,067, with $39,400 estimated for 1949. Budgetary receipts will be $4,200 in fiscal year 1948 and $4,700 in 1949.

Administrative Expenses

This expense covers the general supervisory staff and expenses relating to the over-all supervision of the programs carried on by the Company. It does not cover wages for the growing and harvesting of cane, and the manufacture of sugar and rum.

Language

There is now pending before the Congress H. R. 3108 providing for Federal reincorporation of the Company pursuant to the Government Corporation Control Act of 1945. A change in language is proposed which would make the administrative expense authorization subject to the enactment of the pending incorporation legislation.

During the current fiscal year the Company is authorized to borrow $250,000 from the Treasury of the United States. This authority is not requested for fiscal year 1949.

SCHEDULE B–1

COST OF COMMODITIES SOLD

[Fiscal years ending June 30, 1947, 1948, and 1949]

	Actual, 1947	Estimate, 1948	Estimate, 1949
SUGAR			
Cost of manufacturing:			
Direct materials (schedule B–2)	$307,567	$316,900	$397,600
Direct labor	43,434	51,300	70,200
Manufacturing expenses	157,834	129,000	180,000
Depreciation	1,051	1,000	1,000
Total manufacturing costs	509,886	498,200	648,800
Less molasses credits	[a] 25,318	[a] 23,800	[a] 22,000
Less cost of sirup used for rum	[a] 36,360	[a] 33,600	[a] 31,500
Net manufacturing costs	448,208	440,800	595,300
Deduct: Loss in handling	[a] 1,938		
Total	446,270	440,800	595,300
Add other expenses:			
Insurance	222	200	300
Shipping and selling expenses (schedule B–3)	14,468	14,400	21,500
Cost of sugar sold	460,960	455,400	617,100
RUM			
Cost of manufacturing:			
Direct materials	110,791	98,400	104,900
Direct labor	18,658	24,300	30,200
Manufacturing expenses	84,125	96,400	116,400
Depreciation	1,780	1,800	1,800
Total manufacturing costs	215,354	220,900	253,300
Inventory variation—work in process (rum):			
Inventory at beginning of year	373,815	410,100	532,300
Inventory at end of year	410,145	532,300	646,700
Subtotal, inventory variation	[a] 36,330	[a] 122,200	[a] 114,400
Less: Cost of alcohol sold and cost of alcohol and rum given free	[a] 3,315	[a] 2,000	[a] 2,000
Inventory variation—finished goods and work in process (bottling):			
Inventory at beginning of year	27,255	10,294	10,294
Inventory at end of year	10,294	10,294	10,294
Subtotal, inventory variation	16,961		
Total	192,670	96,700	136,900
Add other expenses: Shipping and selling expenses (schedule B–3)	66,865	22,000	30,300
Cost of rum sold	259,535	118,700	167,200

ESTIMATES OF APPROPRIATION

Loans to Virgin Islands Company, Treasury Department—

[The Virgin Islands Company is authorized to borrow from the Treasury of the United States, for the purpose of carrying out any of the programs of the Company set forth in the budget for the fiscal year 1948, sums of money not to exceed a total of $250,000: *Provided*, That none of the funds borrowed under this authority shall be available for repayment of bank loans outstanding at the date of enactment of this Act. For this purpose the Secretary of the Treasury is authorized and directed to make loans to the Company, out of any funds in the Treasury not otherwise appropriated, on such terms and conditions as the Secretary of the Treasury shall determine. Such loans shall bear interest at a rate determined by the Secretary of the Treasury, taking into consideration the current average rate on outstanding marketable obligations of the United States as of the last day of the month preceding the making of the loan to the Company.] (*The Government Corporations Appropriation Act, 1948.*)

Appropriated 1948, **$250,000**

Obligations: 16 Investments and Loans—1948, $250,000.

ESTIMATES OF AUTHORIZATION RELATING TO CORPORATE FUNDS

NOTE.—The text of general authorizing language, as incorporated in the Government Corporations Appropriation Act, 1948, and as proposed for 1949, will be found at the end of the "Summary Statements and General Language" of part III of the Budget.

DEPARTMENT OF THE INTERIOR

Administrative Expenses, The Virgin Islands Company—

Virgin Islands Company: [Not] *Subject to the enactment of legislation providing for reincorporation pursuant to the requirement of the Government Corporation Control Act of 1945, not* to exceed $20,000 (to be computed on an accrual basis) of the funds of the Company shall be available during the fiscal year [1948] *1949* for its administrative expenses which shall be determined in accordance with the Company's prescribed accounting system in effect on July 1, 1946, and shall be exclusive of depreciation, interest expense, payment of claims, contribution to the local government in lieu of taxes, expenditures which the Company's prescribed accounting system requires to be capitalized or charged to commodities produced or acquired and expenses in connection with acquisition, construction, operation, maintenance, improvement, protection or disposition of facilities and other property belonging to the Company or in which it has an interest. DEPARTMENT OF JUSTICE

FEDERAL PRISON INDUSTRIES, INC.

Purpose and Financial Organization

Federal Prison Industries, Inc., was created as an independent agency by Executive Order 6917 dated December 11, 1934, issued pursuant to the act of June 23, 1934 (18 U. S. C. 744i–n). The Corporation as of January 1, 1935, took over the powers, duties, and functions vested in the Attorney General by the act of May 27, 1930 (18 U. S. C. 744a–h), theretofore exercised by the industries division of the Bureau of Prisons, Department of Justice. Under Reorganization Plan No. 2, effective July 1, 1939 (5 U. S. C. 133t, note), the Corporation (with its board of directors) and its functions were transferred to the Department of Justice to be administered under the general direction and supervision of the Attorney General.

The Corporation is authorized to establish and operate, in the Federal prisons, industries for the production of articles and commodities for use in the prisons or for sale to other agencies of the Federal Government, but not for sale to the public in competition with private enterprise. It is required to select such forms of employment as will give prisoners "a maximum opportunity to acquire a knowledge and skill in trades and occupations which will provide them with a means of earning a livelihood upon release" and to diversify its industries so as to "reduce to a minimum competition with private industry or free labor." (18 U. S. C. 744c.)

By recent act of Congress (Public Law 67, approved May 16, 1947), the Corporation is authorized to compensate prisoners employed in important tasks in the maintenance and operation of the prisons. The purpose of this act is to eliminate inequities between prisoners by permitting compensation not only to those who work in the Corporation's industrial shops but also to those who serve in positions of unusual responsibility in institutional operations. A survey and analysis of such prison positions is now in process, and before the end of the fiscal year 1948 appropriate designations are expected to be made and payment of compensation actually begun.

All funds of the Corporation are deposited in the Treasury of the United States in a special working capital account known as the prison industries fund. The Corporation is authorized by its basic statutory authority to use this fund as operating capital and for the purposes enumerated in the act of May 27, 1930. Accounts of all fiscal transactions of the Corporation must be rendered to the General Accounting Office, which exercises the same supervision over such transactions as in the case of any Government department. The Corporation has no borrowing or lending power. (18 U. S. C. 744l.)

The Corporation has no capital stock. Its original capital consisted of all assets under the jurisdiction of the industries division of the Bureau of Prisons. The net value of these assets was $4,113,380. As of June 30, 1947, the Corporation had received property from other Government agencies, without exchange of funds, to a net value of $733,947. Net earnings of the Corporation from January 1, 1935, to June 30, 1947, total $19,841,471.

A statement of financial condition is shown as exhibit C.

Analysis of Budget Program

The Corporation has two major programs, (1) the establishment and operation of diversified industries, and (2) vocational training of inmates. (18 U. S. C. 744a–n.)

Establishment and operation of diversified industries.—The extent of the Corporation's activities varies with the number of prisoners for whom employment is to be provided. The inmate population of the institutions as of June 30, 1947, was 17,680, and it is estimated that the average population for the fiscal years 1948 and 1949 will approximate 17,500. Approximately 86 percent of the total prison population is employed either in the maintenance and agricultural operations of the institutions themselves, or in the Corporation's industries. The remaining 14 percent are not normally employable, being the old, sick, or crippled, those in quarantine, and those held temporarily awaiting trial, transfer, or release. It is desirable that industrial employment be furnished for approximately 25 percent of the employable population, or about 21.5 percent of the total population. This percentage, applied to the estimated population, indicates that an average of 3,762 prisoners should be provided with employment by the Corporation during 1948 and 1949. This compares with average full-time employment of 3,162 prisoners during 1947.

At the beginning of the fiscal year 1947 there were 39 shops and industries in production at 20 prisons. Two more began production during the year, one being a wooden mat shop at the Alcatraz Island, Calif., penitentiary, and the other a brick plant at the Chillicothe, Ohio, reformatory. In addition, preliminary work was done toward the establishment of a machine, die, and tool shop at the El Reno, Okla., reformatory and a woolen mill at the Terre Haute, Ind., penitentiary. Thus at the year's close there were 41 shops and industries in production and 2 in preparation.

However, during the first months of the fiscal year 1948 the brick plant at Chillicothe was closed down, and the harvesting activity at Columbia Camp, near Benton City, Wash., was completed and the camp vacated by the Bureau of Prisons. While the ending of these two activities temporarily reduces the number of prisoners which the Corporation can employ, this reduction will be more than offset by opening of the two new operations at El Reno and Terre Haute. Requirements for civilian employees to manage and supervise all operations is expected to decline slightly in 1949.

Vocational training of inmates.—It is estimated that approximately 45 percent of the prisoners are susceptible of training in vocations, which would indicate that such opportunities should be extended, on the basis of the 1948 and 1949 estimates of population, to 7,800 prisoners. This program, which is in process of expansion, is expected to provide training for an average of 5,500 prisoners in those years.

In order for the prisoner to receive maximum benefits from this training and from practical experience gained from employment in industrial activities, the Corporation undertakes to seek out employment for these prisoners

Federal Reserve Bank of St. Louis

upon their release. For this purpose five employment officers are maintained, located at five of the larger prisons. The 1949 budget includes provision for continuance of this aspect of the vocational training and industrial programs.

Operating Results

Principally because of increased price levels during the fiscal year 1947, both the sales and net income of the Corporation exceeded the amounts previously estimated, and likewise were in excess of sales and net income for the fiscal year 1946. Sales totaled $11,994,515, and net income, after deduction for all known losses and depreciation, was $1,627,030. (See exhibit B.)

On the assumption that sales and price levels will remain fairly constant during 1948 and 1949, the value of sales for each of those years is estimated at $12 million, with estimated net income of $1,768,000 and $1,670,000, respectively.

The Corporation has adequate funds to finance its proposed programs for the fiscal years 1948 and 1949.

Financial Condition

Plant and equipment.—As of June 30, 1947, the net value of plant and equipment was $4,161,398. Capital expenditures of $1,842,000 during the fiscal years 1948 and 1949 will increase the net investment in these assets to $5,396,398 after deduction for depreciation. (See exhibit C.)

Because of the unavailability of certain equipment which was to have been purchased during 1947, much of the program for that year was necessarily deferred to 1948. Present plans for 1948 and 1949 contemplate expenditure of $700,000 for building and improvements for industrial operations, $100,000 for a combination industrial and vocational training building, and $1,042,000 for machinery and equipment.

Working capital.—Other capital assets consist of cash, accounts receivable, commodity and materials inventories, and sundry items. Actual or estimated amounts of these assets as of June 30, are in 1947, $11,971,008; in 1948, $12,089,008; and in 1949, $12,164,008. Offsetting liabilities in 1948 and 1949 approximate $1,125,000 in each year. (See exhibit C.)

On June 30, 1947, cash amounted to $4,579,225. Because of anticipated payments into the general fund of the Treasury, cash is estimated to decline to $4,497,225 at the end of 1948, and to $4,372,225 at the end of 1949. Accounts receivable, which amounted to $2,373,914, are estimated to equal that amount at the close of 1948 and 1949. Inventories are to be increased from the 1947 amount of $4,951,913 to $5,151,913 in 1948 and $5,351,913 in 1949. Sundry assets, which amounted to $65,956, are estimated to remain at that amount in 1948 and 1949.

Dividend payments to the Treasury.—The board of directors at their meeting on December 14, 1946, determined that a minimum cash amount of $1,750,000 in the prison industries fund, exclusive of amounts in the hands of disbursing officers or in transit, is required for the Corporation to carry out its functions. At the same meeting the directors authorized payment of a dividend as of December 31, 1946, to be based on this determination. The officers of the Corporation subsequently ascertained that the amount payable, after slight adjustment, was $4,913,293.30. This amount was paid into the general fund of the Treasury in 1947, making the total of such payments $9,688,000.

Based on the expected financial condition of the Corporation, it is now estimated that during each of the fiscal years 1948 and 1949 dividends of at least $1 million will be paid into the general fund of the Treasury. Anticipated payments in that amount are reflected in the financial statements. (See exhibits A and C.)

Effect on Government Budget

The effect of the Corporation's estimates on the Government Budget for the fiscal year 1948 will be a net budgetary receipt of $918,000, composed of $1 million dividend payment, less net expenditures of $82,000. During the fiscal year 1949 there will be net receipts of $875,000, representing payment into the Treasury of the dividend of $1 million, less net expenditures of $125,000. (See schedule A–1.)

Administrative Expenses

Included in this category are the salaries and expenses of the supervisory and clerical staff located in the District of Columbia, together with the cost of the audit of the Corporation performed by the General Accounting Office. Excluded are salaries and expenses of employees assigned to vocational training, whether located in the District of Columbia or elsewhere, and all other salaries and expenses charged to production, manufacturing expense, or cost of sales. Because of the provisions of section 306 of The Government Corporations Appropriation Act, 1948, there is also included in the administrative expense limitation the cost of rent in the District of Columbia during 1948 and 1949. The necessity of paying rent and the cost of the audit performed by the General Accounting Office from the administrative expense limitation will require a supplemental authorization to the limitation on administrative expenses in 1948.

During the fiscal year 1947 an average of 51.7 positions were filled, which with attendant expenses resulted in accrued costs of $246,358. The estimates for 1948 and 1949 reflect the increased expenses, consisting of the addition of the item for rent in the District of Columbia, within-grade promotions, and a slightly increased average employment of personnel.

UNITED STATES SPRUCE PRODUCTION CORPORATION

Analysis of the Budget Program—Dissolution

In view of the dissolution of the Corporation in fiscal year 1947, no estimate was submitted for fiscal year 1948. However, a provision contained in The Supplemental Appropriation Act, 1948, increased the limitation upon the amount of fiscal year 1947 funds of the Corporation which might be used for administrative expenses.

Effect on the Government's Budget

During fiscal year 1947, the entire outstanding capital stock was retired with the return of $100,000 to the United States Treasury for this purpose. In addition, $62,429 was returned to the United States Treasury in payment of interest on debentures and in disposition of the accumulated profits of the Corporation.

DEPARTMENT OF STATE

INTRODUCTORY STATEMENT

Five corporations were created under the laws of the State of Delaware by the Coordinator of Inter-American Affairs to assist in carrying out the programs of the coordinator's office. The corporations were established pursuant to authority contained in the Third Supplemental National Defense Appropriation Act, 1942, the First Supplemental National Defense Appropriation Act, 1943, and the National War Agencies Appropriation Act, 1944. Control over the corporations was first vested in the Coordinator, later in his successor the Director of the Office of Inter-American Affairs and subsequently by Executive Order 9710, signed April 10, 1946, this control was transferred to the Secretary of State as of May 20, 1946.

One of these corporations, the Inter-American Navigation Corporation, has been dissolved and its liquidation completed in February 1947. Two others, The Institute of Inter-American Transportation and Prencinradio, Inc., have been dissolved and are in the process of liquidation. The Institute of Inter-American Transportation will be completely liquidated prior to August 1949 and Prencinradio, Inc., prior to May 1949, the dates on which the prescribed 3-year liquidation period will expire.

The other two corporations, The Institute of Inter-American Affairs and the Inter-American Educational Foundation, Inc., under the provisions of Public Law 369, Eightieth Congress, have been succeeded by a new Federal corporation created August 5, 1947, by that act. This new corporation also bears the name of "The Institute of Inter-American Affairs." The continuation of the activities of this corporation are justified as part of this Government's long-range program of cooperation with the other American Republics and as an instrument of United States foreign policy. Public Law 369 provides that the Institute shall have succession for a period of 3 years unless sooner dissolved by act of Congress.

THE INSTITUTE OF INTER-AMERICAN AFFAIRS

Purpose and Financial Organization

The Institute of Inter-American Affairs was created by Public Law 369, Eightieth Congress, approved August 5, 1947. Under the provisions of that act the Institute shall be a nonprofit corporation and shall have no capital stock. Under further provisions of that act, the Institute has accepted full title to and ownership of all the assets, funds, and property—real, personal, and mixed—and all debts, liabilities, obligations, and duties, and all rights, privileges, and powers subject to the restrictions, disabilities, and duties of The Institute of Inter-American Affairs and the Inter-American Educational Foundation, Inc., two of the Delaware corporations created by the Coordinator of Inter-American Affairs.

The purposes of this new Corporation, as set forth in section 2 of Public Law 369, are "to further the general welfare of, and to strengthen friendship and understanding among the peoples of the American Republics through collaboration with other governments and governmental agencies of the American Republics in planning, initiating, assisting, financing, administering, and executing technical programs and projects, especially in the fields of public health, sanitation, agriculture, and education." Senate Report 675, Eightieth Congress, contains the following endorsement of the program of the Institute: "The Foreign Relations Committee agreed that a continuation of the kind of cooperation in the fields of public health, sanitation, agriculture, and education contemplated in S. 1678 (now Public Law 369, 80th Cong.) would do much to strengthen the ties of friendship and understanding among the peoples of the 21 American Republics. In approving what they considered a practical and tangible evidence of the good-neighbor policy, the committee called attention to the relatively small cost involved to the United States and underlined the fact that the other American Republics are constantly assuming an increasingly large share of the total cost of the program. At a time in world history when it is essential for the nations of the New World to work together, such action would constitute a reaffirmation on our part of our desire to cooperate with the other American Republics in furthering the general welfare of the peoples of the Americas." The Committee on Foreign Affairs of the House expressed their approval of the program in House Report 955, Eightieth Congress, as follows: "The committee have come to the following considered judgments: (*a*) The activities whose continuation is here proposed have well justified their existence as instruments of the United States foreign policy. (*b*) That their value to this Nation lies not alone in their contribution to the strengthening of relations among the American nations and building up the foundations of democratic society in the Western Hemisphere but also in the dividends, both realized and potential, which they pay in increasing the foreign trade of the United States. (*c*) That the United States' burdens in supporting the cooperative action programs have tended to diminish both absolutely and in proportion to the other American Republics' contributions; that the prospect of a continuation of this trend amply warrants this Nation in continuing support of the programs so as to protect what it has already invested. (*d*) That the activities under review do not overlap with the functions of other international undertakings in which this Nation participates."

Cooperative programs of the Corporation materially assist the other American Republics to solve critical health, sanitation, education, and food problems, the control and solution of which are essential to the economic development of each participating country and of the Western Hemisphere; to expedite the procurement of materials which are in short supply; to off-set serious economic dislocations; to raise consumer standards; to strengthen democratic ideas and institutions, and to counteract the spread of communism. The programs do this by demonstrating the practical capacity of demo-

Federal Reserve Bank of St. Louis

cratic governments, aided by this form of cooperation, to improve basic conditions of human life and successfully meet the challenge of totalitarian propaganda.

The previous Institute of Inter-American Affairs was financed by grants made by the Coordinator of Inter-American Affairs and later the Office of Inter-American Affairs. The total amount granted was $65,434,236, and an additional $698,053 was contributed by other parties, principally by several participating Latin-American Governments for direct expenditure by the corporation; of these amounts $3,266,106 in cash remained as of August 8, 1947, and was transferred to the new corporation together with $7 million receivable from 1948 appropriations, and certain other small accounts receivable. The Inter-American Educational Foundation, Inc., was likewise financed by grants from the Coordinator of Inter-American Affairs and later the Office of Inter-American Affairs, which totaled $5,088,275, and by contributions equaling $386,083 made principally by several participating Latin-American countries to be disbursed directly with funds of the Foundation for mutually approved programs. Of the above-mentioned funds, $1,011,223 in cash remained as of August 8, 1947, and this balance was also transferred to the new Institute of Inter-American Affairs, together with $1,115,000 receivable from 1948 appropriations, and certain other small accounts receivable. Public Law 369, Eightieth Congress, provides authorization, at a rate not to exceed $5 million annually, of such sums as may be necessary to carry out the purposes of said act.

The major activities of the Corporation are conducted in cooperation with the other American Republics in accordance with the terms of agreements entered into with their governments. The agreements usually provide for the programs to be performed by cooperative services established within the framework of the particular ministry or department concerned; i. e., ministry of health or ministry of education. Provision is also made for the programs to be approved, and conducted by mutual agreement of the parties under the general supervision of the chief of party of the technical mission sent to the particular country by the Institute. The cooperative agreements provide for contributions by both parties of funds, materials, services, and facilities. During the past several years the governments of the other American Republics have been increasing their contributions, and this Government through the corporations has been decreasing its contributions to these cooperative programs. The total of direct cash contributions by the other American Republics to these cooperative services and to the corporation for direct expenditure is estimated at $55,143,623. In addition, contributions other than cash are also made by the other American Republics to the cooperative services, estimated value of which is $5,048,385. The total contributions to cooperative programs by the other governments are estimated at $60,192,008, equalling 94.5 percent of the amount of corporation funds budgeted for such programs.

No funds have been borrowed or securities issued by either the present corporation or by the two predecessor corporations. The transactions of the corporations have been audited by the General Accounting Office, under an arrangement with the Comptroller General at the beginning of the fiscal year 1944. The present Corporation is subject to audit by the General Accounting Office, under the provisions of Public Law 248, Seventy-ninth Congress, entitled the "Government Corporation Control Act."

Analysis of Budget Programs

The budget program of the new corporation during the fiscal year 1949 will be on a somewhat reduced scale from the combined programs of the two former corporations during the fiscal years 1947, and 1948. During the fiscal year 1947 there were 33 cooperative agreements in effect; during the fiscal year 1948, 30 were in effect; and during the fiscal year 1949 it is anticipated that there will be 22 programs in operation the entire year. The cooperative programs, and other expenses related to such programs, amounted to $7,593,327 during the fiscal year 1947 and are estimated at $8,690,192 during the fiscal year 1948. The requirements for the fiscal year 1949 are estimated at $5,332,634.

The requirements of the Washington office (general administrative and the expenses of the operating divisions) have been estimated for the fiscal years 1948 and 1949, on the basis of work intake, work in progress, and work settlement.

The active programs are discussed below, and pertinent financial data are set forth in the statement of sources and application of funds (exhibit A) and the statement of income and expenses (exhibit B).

HEALTH AND SANITATION PROGRAM

Cooperative bilateral agreements designed to aid and improve the health and general welfare of the people of the Western Hemisphere were entered into by The Institute of Inter-American Affairs, as an agency of the United States Government, in collaboration with 18 of the other American Republics as a result of the third meeting of the ministers of foreign affairs of the American Republics held at Rio de Janeiro in January 1942. Programs to implement those cooperative agrreements were established in the countries concerned and pursuant to extended agreements operations are continuing in all countries except Panama, Nicaragua, and Costa Rica, where the programs terminated in September 1945, March and June 1947, respectively. No agreements have been executed with, or programs undertaken in, Argentina or Cuba.

Under Public Law 369 reincorporating the Institute, the Corporation proposes to continue 11 of its present 15 programs with the understanding that the programs in Guatemala and Mexico will be continued only to complete present projects now under way in Guatemala and in the case of Mexico to allow for a time extension to properly supervise the expenditure of an expected balance in project funds in December 1948 when the program as now scheduled terminates. Programs will also continue in Bolivia, Brazil, Chile, Colombia, Ecuador, Haiti, Honduras, Peru, and Uruguay.

Expenditures for the fiscal year 1947 totaled $5,828,436. It is estimated that expenses during fiscal years 1948 and 1949 will amount to $6,386,880 and $2,781,306, respectively. Total expenditures of the Institute, under and related to health and sanitation cooperative agreements, from the inception of the Institute to the end of the programs are estimated at $54,317,007 which amount includes $532,935 contributed by other governments which is taken into and disbursed directly by the Institute. Contributions, in cash and in kind, of other governments pursuant to agreements in effect during the entire cooperative program are estimated at $44,860,000.

As of June 30, 1947, reports indicate that 1,013 health and sanitation activities carried on under cooperative agreements had been completed and 534 were active. The total of 1,547 are divided into the following cate-

Federal Reserve Bank of St. Louis

gories: 279 (including 219 completed) involved the construction or improvement of medical and public health facilities; 606 (including 430 completed) were in the field of sanitation; and 662 (including 364 completed) were medical or other public health activities such as operation of health centers and laboratories, and special disease control projects. During the remainder of the program, the construction activities will be gradually terminated and service aspects of the program will be emphasized.

Training of technicians in the other American Republics is providing a staff of Latin-American nationals to carry on public health and sanitation activities. This is being accomplished both by the training of national doctors, nurses, and engineers in graduate schools of the leading universities in the United States, and through courses conducted by North American technicians within the countries. This type of training gives the health workers of the other American Republics a broad knowledge of North American methods and acquaints them with the use of United States machines, materials, and products.

The most recent available information indicates that in connection with the cooperative health and sanitation programs there were 7,443 national personnel employed, of whom 405 were physicians, 175 engineers, 207 nurses, 443 practical nurses or sanitary inspectors, 4,800 local workmen, and 1,413 technical, clerical, and other personnel. Practically all of this personnel is employed by the cooperative services through which the programs are carried on. In addition, United States citizens numbered 128, including 14 physicians, 41 engineers, and 32 nurses.

The enthusiasm and support of these programs by the other American Republics has been manifested not only by their requests for extensions of agreements but also by substantial increases in their contributions under the cooperative agreements which in many cases equal or exceed those of the Institute.

The usefulness of these programs from a political point of view has been vouched for by United States ambassadors in the other American Republics, many of whom have made specific requests for a continuation of this work.

FOOD SUPPLY PROGRAM

Originally established to meet emergency food problems, this program continues as an implement of United States foreign policy designed to improve chronically unfavorable economic conditions preventing stability in the other American Republics. Need for agricultural assistance of this kind by the United States was recognized in July 1945 by the Third Inter-American Conference on Agriculture at Caracas, Venezuela. In its final act it stated that the work of the Institute of Inter-American Affairs and the United States Department of Agriculture had been beneficial "(*a*) in promoting the production of food; (*b*) in facilitating technicians and new agricultural techniques; (*c*) in furthering technical education and development by the interchange of students * * *." It further stated: "This collaboration should be continued so that it may render the maximum possible benefits * * *."

Immediate objectives of the food supply program are (1) to increase production of food crops urgently needed for local consumption, and (2) to demonstrate United States practices and standards which lead to a higher level of living and increased purchasing power for the people. The carrying out of these objectives increases local economic stability, stimulates a demand for United States methods and products, and extends United States influence to millions of persons hitherto not reached.

The food supply program is carried on in each country under authority of diplomatic notes and a bilateral cooperative agreement entered into by the Institute on behalf of the United States and the government of the other American Republic which is usually represented by the ministry of agriculture. This agreement outlines the type of program to be undertaken, and provides for the execution of specific project agreements describing in detail the work to be done. While choice of exact projects depends on local needs and circumstances, in general the projects involve: (1) Demonstrating improved methods of irrigation, drainage, erosion control, and seed bed preparation; (2) assisting local producers in obtaining seed, fertilizer, insecticides, etc.; (3) initiating or strengthening agricultural education and extension programs; (4) assisting in construction of food storage facilities and improvement of distribution and marketing systems; (5) demonstrating improved methods of livestock and pasture management; and (6) training of nationals to carry on future activities.

During the fiscal years 1947 and 1948 the food supply programs have been carried on in Haiti, Costa Rica, Peru, and Paraguay, and it is proposed that each of these programs be continued in the 1949 fiscal year. Outstanding accomplishments of the cooperative program in each country includes: (*a*) In Costa Rica the development of an agricultural project for the Guanacaste meat-producing region, the expansion of agricultural extension work, the completion of the procurement program for the United States Armed Forces, and the development of the El Alto agricultural demonstration farm; (*b*) in Haiti the training of seven agricultural students in Puerto Rico, institution of a local training course, inauguration of a new livestock program by the Haitian Government based on food supply recommendations, initiation of work for drainage and flood control on the Artibonite Plain—Haiti's greatest potential agricultural resource and expansion of rehabilitation work on La Gonave Island; (*c*) in Paraguay, completion of the first agricultural census in the country's history, institution of home demonstration in connection with the expanding supervised credit program, development of the National Agronomic Institute under the direction of an outstanding United States plant pathologist, and inauguration of dairy extension work; and (*d*) in Peru, completion of a study and report on Peru's milling and baking crises by an outstanding United States technician, transfer by the Peruvian Government of all its agricultural machinery to be used in the expansion by food supply technicians of agricultural machinery pools reaching farmers without equipment throughout the country, extension of veterinarian work inaugurated by food supply technicians, and continued operation of the 29 office-field extension agent activities.

Prior to the enactment of Public Law 369, reincorporating the Institute, all of the food supply programs proceeded on a planned reduced scale because of contemplated terminations by the end of the 1948 fiscal year. With the term of existence of the Corporation now extended beyond that time and based on experience gained and availability of more trained technicians, detailed planning of operations can now proceed, including that of securing increased contributions from the host governments.

Expenditures aggregated $725,125 in the fiscal year 1947, and are estimated at $1,067,543 in the fiscal year 1948. (See exhibit B.) Expenditures in the fiscal year 1949 are estimated at $1,446,920. Total expenditures, including expenses related to cooperative programs, from

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

the inception of the cooperative programs to the contemplated completion dates of the agreement, are estimated at $12,385,023, which amount includes $875,000 contributed by other governments to the Institute. As compared with this, the cooperating local governments have or will contribute, in cash and in kind, an estimated sum of $9 million to the programs.

COOPERATIVE EDUCATIONAL PROGRAM

The general objective of the Institute in this field is the development of cooperative educational programs in collaboration with ministries of education of the other American Republics that emphasize vocational education, the training of teachers, the improvement of rural life and agriculture, the development of community schools, health education, and the teaching of the English language.

Beginning in fiscal year 1944, plans for the program were developed, and on the basis of diplomatic notes exchanged between the United States and the countries concerned, bilateral agreements were entered into between the Inter-American Educational Foundation, Inc., and the Governments of Peru, Haiti, Guatemala, Honduras, Nicaragua, Bolivia, Costa Rica, Ecuador, Chile, Paraguay, El Salvador, the Dominican Republic, Panama, and Brazil. Two separate agreements were signed with Brazil for cooperative education programs, one with the Ministry of Agriculture, and the other with the Ministry of Public Health and Education, making a total of 15 agreements with 14 countries. Educational activities have been carried on in all of the other American Republics. Activities in countries that have not signed cooperative agreements have consisted largely of interchange of personnel and materials and of special projects of a more limited scope than the cooperative educational programs.

Specialists in vocational education, health education, rural education, teacher training, and English teaching were sent to the other American Republics to work in those cooperative programs. Several hundred thousand items of teaching materials, such as books, pamphlets, maps, charts, etc., have been made available for reference and demonstration purposes to field staffs of the Corporation, to certain educational officials, and to selected schools in all 20 of the other American Republics, for the purpose of assisting in promoting the development and use of modern teaching materials including those prepared by Latin-American nationals, adapted to local needs. Distinguished educators, supervisors, and teachers from the other American Republics were brought to the United States to lecture, to study, and to participate in national, state, and local educational programs. The persons who have participated in this program total 101 as of September 15, 1947.

During the fiscal year 1947 the education division operated in 13 countries and expended $1,342,408. In the fiscal year 1948 it will operate in 12 countries and it is estimated will expend $1,559,437. In the fiscal year 1949 the education division plans to operate in 7 countries and it is estimated will expend $1,312,168. During the entire program it is estimated the expenditures for the education program will total $7,017,153, which sum includes $591,083 contributed by other governments and expended directly by the Institute; in total they are expected to contribute $6,332,000.

Though the war brought into relief the necessity of initiating the cooperative education program, from the beginning it was conceived to be a long range effort. It has always been planned that the other governments would gradually take over the cooperative education programs and integrate them into their regular school activities.

Each country has its own peculiar educational problems and the type of program developed has consequently varied from country to country in accordance with these problems. All, however, provide for (1) sending of United States educational specialists to work with the minister of education and his staff, (2) the development of adequate teaching materials, and (3) the bringing of distinguished educators, supervisors and teachers to the United States to lecture, to study, and to participate in national, state, and local educational programs. Of the 14 Republics with which cooperative agreements were signed, programs have been under way in 12 during the fiscal year 1948. The program with Haiti was terminated April 29, 1947; the agreement with Nicaragua was never activated, and was formally cancelled by an exchange of diplomatic notes on May 19 and April 1 of 1947. Of the remaining 12 programs, that in Honduras was terminated August 16, 1947, and the one in Costa Rica will terminate February 29, 1948. It is proposed to terminate on June 30, 1948 the programs in Chile, the Dominican Republic, and El Salvador.

In the remaining programs for which funds are requested for fiscal year 1949—i. e., in Bolivia, Brazil, Ecuador, Guatemala, Panama, Paraguay, and Peru—the emphasis is on teacher training and revision of curriculum and administration in the following general fields: rural education, with special stress on agriculture, in Bolivia, Brazil, Ecuador, Guatemala, and Peru; vocational education in Bolivia, Brazil, Panama, Paraguay, and Peru.

OPERATING RESULTS

During the fiscal year 1947, operations carried on by the two former corporations resulted in a net expenditure of $8,788,439. Inasmuch as these corporations were not operated for profit, this represents, in fact, depletion of capital. The net expenditures during the fiscal year 1948 are estimated at $9,713,692 and during the fiscal year 1949 at $6,367,634.

FINANCIAL CONDITION

The proposed change in total capital of the Corporation from approximately $71 million as of June 30, 1947, to $81 million as of June 30, 1949, is a result of the extension of the Corporation to August 5, 1950, and represents additional requirements for the 2-year program authorized by that extension.

ADMINISTRATIVE EXPENSES

This expense covers the general administrative expenses of the Corporation in Washington including the supervisory staff of the Corporation which is concerned with program operations, the salaries of employees engaged directly in handling fiscal, legal, and personnel matters, and providing general office services, as well as incidental expenses such as supplies and materials, communication services, etc.

During the fiscal year 1947, personal services averaged 240.8 positions and during the fiscal years 1948 and 1949 there are estimated 233 and 186 positions, respectively.

INSTITUTE OF INTER-AMERICAN TRANSPORTATION

General Summary Statement

The Institute of Inter-American Transportation was created under the laws of the State of Delaware on June 26, 1943, pursuant to authority contained in the First Supplemental National Defense Appropriation Act, 1943 (56 Stat. 708). This Corporation is a Government-controlled nonprofit, stock corporation, the stock being held by the Secretary of State, as agent for the United States.

The general purpose of the Corporation, as set forth in its certificate of incorporation, was to assist and improve the means and methods of transportation in the Western Hemisphere by land, air, or water. However, the activities of the Corporation were directed only toward carrying out the terms of a cooperative agreement to rehabilitate and improve the operating efficiency of certain key sections of the National Railways of Mexico, as provided in an exchange of notes between the Governments of Mexico and the United States, dated November 18, 1942, as amended.

The Corporation's operations in Mexico were carried out through the United States Railway Mission. A certificate of dissolution of the Corporation was filed with the Secretary of the State of Delaware on August 21, 1946, and the 3-year liquidation period under the laws of that State will expire on August 21, 1949.

The total capital provided to the Corporation was $7,601,986, of which $737,390 had been returned to the United States Treasury by June 30, 1947. It is estimated that an additional $74,426 will be returned in fiscal year 1948, bringing total returns to $811,816 and completing the disposition of the assets of the Corporation.

Administrative expenses in 1948 consist entirely of terminal leave, amounting to $2,947.

General Summary Statement

The Inter-American Navigation Corporation was created under the laws of the State of Delaware on July 15, 1942, pursuant to authority contained in the Third Supplemental National Defense Appropriation Act, 1942 (55 Stat. 818). This Corporation was a Government-controlled, nonprofit, stock corporation, the stock being held by the Secretary of State for United States of America.

The Corporation was formed to carry out plans approved at a meeting of the members of the Board of Economic Warfare, held on July 25, 1942, for supplementing existing shipping facilities with a small cargo-vessel program to be carried out through the acquisition and coordination of all existing small tonnage in the Latin-American trades, particularly the Caribbean area, and the construction in Latin-American shipyards of additional small vessels.

On April 30, 1943, an agreement was made with the War Shipping Administration under which the vessels of the Corporation were turned over to that agency for the purpose of coordinating all vessel operations in the Caribbean and Latin-American trades. The purpose for which the Corporation was formed having been accomplished, the Corporation proceeded with liquidation, which was completed on February 25, 1947.

Of the total capital of $500,000 originally provided to the Corporation by the former Office of Inter-American Affairs, the final disposition was as follows: (1) Return to the United States Treasury, $241,217; (2) value of property turned over to other Government agencies, $52,327; (3) applied to operations, $206,456.

PRENCINRADIO, INC.

General Summary Statement

Prencinradio, Inc., was created under the Laws of the State of Delaware on July 20, 1942, pursuant to authority contained in the Third Supplemental National Defense Appropriation Act, 1942 (55 Stat. 818). This Corporation is a Government-controlled, nonprofit, membership corporation formed to further the general welfare of and to strengthen the bonds between the peoples of the Western Hemisphere through the effective development, operation, and use of all media and facilities whether written, spoken, or visual, for the dissemination and interchange of knowledge and information including but not limited to the press, cinema, and radio. Its activities were confined, however, to the radio and motion picture fields. A certificate of dissolution of the Corporation was filed with the Secretary of State of Delaware on May 14, 1946, and the 3-year liquidation period will, therefore, expire on May 14, 1949.

Funds available to the Corporation were derived from grants made to it by the former Office of Inter-American Affairs. Of the total thus made available, $1,833,200, there had been returned to the U. S. Treasury a total of $975,000 as of June 30, 1946. Returns in fiscal year 1947 were $125,000. It is estimated that further returns of $15,000 and $45,789 will be made in fiscal years 1948 and 1949, respectively, in part contingent upon collections of accounts receivable. The total of returns estimated is, therefore, $1,160,789.

No administrative expenses are estimated for the fiscal year 1949, as the liquidation activities of the Corporation are being absorbed by personnel of The Institute of Inter-American Affairs. Administrative expenses in fiscal year 1948 are $1,931, consisting entirely of terminal leave.

TITLE III—GENERAL PROVISIONS

SEC. 301. Funds made available by this Act for administrative expenses shall be available, in addition to objects for which such funds are otherwise available, for personal services and rent in the District of Columbia; printing and binding; examination of budgets and estimates of appropriations in the field; travel expenses in accordance with the Standardized Government Travel Regulations, the Subsistence Expense Act of 1926, as amended (except as to per diem rates outside continental United States) and the Act of February 14, 1931, as amended (5 U. S. C. 73a); for the objects specified under the head "General provisions" in title II of the Independent Offices Appropriation Act, [1948] *1949*, all the provisions of which title unless otherwise specified in this Act, shall be applicable to the expenditure of such funds; and services in accordance with section 15 of the Act of August 2, 1946 ([Public Law 600] *5 U. S. C. 55a*).

SEC. 302. No part of any funds of any wholly owned Government corporation shall be used for the purchase or construction, or in making loans for the purchase or construction of any office building at the seat of government primarily for occupancy by any department or agency of the United States Government or by any corporation owned by the United States Government.

SEC. 303. Funds of the corporations and agencies covered by the provisions of this Act shall be available for payment of claims [settled in accordance with part 2] *pursuant to section 403* of the Federal Tort Claims Act (*28 U. S. C. 921*).

SEC. 304. Any funds of, or available for expenditure by, any corporation or agency included in this Act, which are not subject to audit by the General Accounting Office under the provisions of the Government Corporation Control Act ([Public Law 248, Seventy-ninth Congress] *31 U. S. C. 841–869*) or other law, shall be accounted for and audited in accordance with the Budget and Accounting Act, as amended, and no such fund shall be obligated or expended unless and until an appropriate appropriation account shall have been established therefor pursuant to an appropriation warrant or a covering warrant: *Provided*, That this section shall not be so construed as to modify or repeal any provision of any other law respecting warranting, accounting for, and auditing of funds.

SEC. 305. No part of the funds of, or available for expenditure by, any corporation or agency included in this Act shall be used to pay the salary or wages of any person who engages in a strike against the Government of the United States or who is a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or who advocates, or is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: *Provided*, That for the purposes hereof an affidavit shall be considered prima facie evidence that the person making the affidavit has not contrary to the provisions of this section engaged in a strike against the Government of the United States, is not a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or that such person does not advocate, and is not a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: *Provided further*, That any person who engages in a strike against the Government of the United States or who is a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or who advocates, or who is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence and accepts employment the salary or wages for which are paid from any funds available to any corporation or agency included in this Act shall be guilty of a felony, and upon conviction, shall be fined not more than $1,000 or imprisoned for not more than one year, or both: *Provided further*, That the above penalty clause shall be in addition to, and not in substitution for, any other provisions of existing laws.

[SEC. 306. Title to all office buildings at the seat of government, which are owned by wholly owned Government corporations, and all right, title, or interest of such corporations in the land upon which such buildings are located are hereby transferred to the United States, and the Secretary of the Treasury is authorized and directed to discharge the indebtedness to the Treasury of any corporation holding such rights, title, or interests in any such land or building to the value thereof as determined by the Secretary of the Treasury as of the date of transfer: *Provided*, That in case of disagreement on the part of the head of the Corporation with respect to said value as determined, the Administrator of the Federal Works Agency shall make a final determination of the property value. Hereafter, such buildings shall be controlled and managed in the same manner as prescribed in the Act of March 1, 1919, as amended (40 U. S. C. 1). Wholly owned Government corporations requiring space in office buildings at the seat of government shall occupy only such space as may be allotted in accordance with the provisions of such Act of March 1, 1919, as amended (40 U. S. C. 1), and shall pay such rental thereon as may be determined by the Federal Works Administrator, such rental to include all cost of maintenance, upkeep, and repair.]

[SEC. 307. Section 104 of the Government Corporation Control Act (Public Law 248, Seventy-ninth Congress) is hereby amended to read as follows:]

["SEC. 104. The Budget programs transmitted by the President to the Congress shall be considered and legislation shall be enacted making necessary appropriations, as may be authorized by law, making available for expenditure for operating and administrative expenses such corporate funds or other financial resources or limiting the use thereof as the Congress may determine and providing for repayment of capital funds and the payment of dividends. The provisions of this section shall not be construed as preventing Government corporations from carrying out and financing their activities as authorized by existing law, nor as affecting the provisions of section 26 of the Tennessee Valley Authority Act, as amended. The provisions of this section shall not be construed as affecting the existing authority of any Government corporation to make contracts or other commitments without reference to fiscal year limitations."]

PART IV

SPECIAL ANALYSES AND TABLES

Federal Activities in Public Works
Explanation of the Estimates of Receipts
Grants to State and Local Governments

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

INTRODUCTION TO PART IV

Part IV of the Budget presents three special articles separately listed and discussed below. An article in the 1948 Budget (pp. 1353–1355) described the revised functional classification which was adopted last year. This subject is covered very briefly in this year's introduction to part I.

Federal Activities in Public Works

This article covers Federal outlays for public works planning and construction, including grants and loans to State and local public bodies as well as direct Federal outlays for such purposes. The concept of Federal public works used herein cuts across functions and funds. Outlays of general and special accounts for both national defense and civil works activities, including loans and grants, and outlays of Government corporations are shown on a gross basis in the tables and adjusted to a net basis in the totals.

Items are shown at the appropriation level, except in a few instances where construction forms a substantial portion of an appropriation which is not generally public works in character. Where appropriations contain both maintenance and new construction, maintenance has not been excluded.

Explanation of the Estimates of Receipts

This statement by the Treasury Department discusses at some length the estimated Budget receipts for the fiscal years 1948 and 1949.

Grants to State and Local Governments

A compilation of Federal payments for grants-in-aid and shared revenues to States and their subdivisions is here included in the Budget for the first time. Like the article on Federal public works, this discussion of grants is a summary of items occurring in various functional categories. Some grants-in-aid are to finance civil public works. The extent of this overlapping between the two compilations is indicated at the end of the table on grants-in-aid.

FEDERAL ACTIVITIES IN PUBLIC WORKS

INTRODUCTION

The public works activities of the Federal Government have been classified in this Budget with other governmental activities under the functions which they serve. In this section they are brought together to show the volume and nature of Federal public works undertakings.

The construction of Federal public works is not an end in itself, but is a means of providing the structures and capital facilities needed by the Government to carry out its many and varied responsibilities. These responsibilities have broadened greatly during the past 20 years, resulting in a steady expansion in type as well as in volume of Federal public works. This expansion has occurred both in construction undertaken directly by Federal agencies and in Federal financial participation in construction of State and local public works.

Public works involve the creation of capital assets from which benefits are derived over a long period of time. They are generally planned somewhat in advance of need, and may involve major outlays of funds as compared with some current expense programs. The nature of public works is such that some flexibility in timing of construction is possible. In some cases this permits their scheduling to take advantage of favorable conditions in the construction industry, or to provide some stimulation to particular labor and materials markets. However, the long-range objective of any public works program must be primarily to provide, in an orderly and economic manner, the capital facilities required to carry out governmental functions.

TOTAL CIVIL PUBLIC WORKS AND NATIONAL DEFENSE CONSTRUCTION

The volume of Federal public works and construction will rise in fiscal year 1949 to even higher levels than in fiscal years 1947 and 1948. Expenditures for civil public works are estimated to increase sharply over those in fiscal year 1948, whereas expenditures for national defense construction show a small decline. The result is an increase of $748 million for Federal public works in 1949 over 1948.

[Fiscal years. In millions]

Type	Expenditures		
	Actual, 1947	Estimate, 1948	Estimate, 1949
National defense construction	$432	$409	$334
Civil public works (including loans and grants)	1,422	2,002	2,825
Total	1,854	2,411	3,159

CIVIL PUBLIC WORKS

Resumption of activity on civil public works construction after VJ-day, and the starting of new public works programs through funds provided in prior years has resulted in an expanding volume of public works in the postwar years. Federal expenditures for some of this work were limited by action of the Executive Office in fiscal year 1947 in order to minimize the competitive effect of Federal construction on labor and materials. The starting date of many projects was thus postponed until late in fiscal year 1947, with the resulting deferral of heavy expenditures on such projects until fiscal years 1948 and 1949.

The 1948 expenditure program is largely for construction of projects and programs started in prior years, although a number of new flood control and navigation projects are being started with 1948 appropriations.

Likewise, the 1949 program is largely a continuation of going projects. The 1949 Budget provides for the initiation of only a limited number of new Federal projects where the economic and social benefits are considered to be substantial. Recommendations for new loan and grant commitments for public works are being held at or below authorized annual rates, or to the minimum necessary to meet urgent requirements.

SIZE AND NATURE OF THE 1949 PROGRAM

Federal civil public works expenditures are estimated to reach $2,825 million in fiscal year 1949 as compared with $2,002 million of estimated expenditures in 1948 and $1,422 million of actual expenditures in 1947. The major portion of these anticipated expenditures in fiscal year 1949 will be for six large programs: Construction of veterans' hospitals; flood control, navigation and power projects of the Corps of Engineers; irrigation and power projects of the Bureau of Reclamation; construction of the production, research, and housing and community facilities for the expanding atomic energy program, included for the first time in this analysis; grants to States by the Public Roads Administration for highway construction; and loans of the Rural Electrification Administration to cooperatives and public bodies for rural electrification lines. An estimated $2,375 million, or about 84 percent of total civil works expenditures for fiscal year 1949, will be for these six programs. Of the remaining $450 million, about $190 million is for expenditures of the Public Health Service, Civil Aeronautics Administration, and Tennessee Valley Authority.

The 1949 public works program is much larger than any regular public works program prior to the war, even though public works were being expanded at that time to provide employment. Some of the increase in volume results from an expansion in program objectives. Direct Federal construction of multiple-purpose flood-control, irrigation, navigation, and power projects, as well as veterans' hospitals has expanded greatly, and a new program has been added in atomic energy construction. Likewise, Federal-aid programs for hospital and airport construction have been added, while Federal aid for highways

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

and loans for rural electrification have increased far beyond 1939 levels.

Some of the expenditure increase is also accounted for by the fact that construction costs have approximately doubled since 1939. These costs have shown an uninterrupted rise since 1939, with the steepest rises occurring since the end of the war. The construction industry is seriously affected by labor and materials shortages and high costs. In some cases, contractors' bids must be rejected because they are too high in relation to agency cost estimates or available funds.

TABLE 1.—*Expenditures for civil public works—general and special accounts and corporate funds*

[Fiscal years. In millions]

	Expenditures		
	Actual, 1947	Estimate, 1948	Estimate, 1949
Major programs:			
Veterans' Administration, hospitals [1]	$28.0	$127.0	$412.0
Public Roads Administration	206.2	409.0	479.9
Rural Electrification Administration, gross	192.5	300.0	320.0
Bureau of Reclamation	92.7	156.9	232.0
Corps of Engineers	266.3	444.7	620.1
Atomic Energy Commission	[2] 51.4	174.0	326.0
Other programs:			
National Advisory Committee for Aeronautics	7.0	8.0	14.0
Public Health Service	.8	17.2	62.2
Public Buildings Administration	9.9	7.8	17.9
Bureau of Community Facilities	57.1	72.2	29.1
Department of Agriculture:			
Forest roads and trails	27.6	18.3	17.2
Flood control	2.6	5.5	8.5
Civil Aeronautics Administration	33.1	41.9	70.0
Bonneville Power Administration	15.4	16.8	26.6
Southwestern Power Administration	.5	3.5	5.0
Bureau of Indian Affairs	3.5	8.4	13.1

Reconstruction Finance Corporation, gross	30.3	29.3	33.8
Housing and Home Finance Agency, gross	361.6	73.6	18.6
All other, gross	27.3	40.5	42.2
Total, gross	1,456.8	2,035.1	2,858.9
Adjustment to net expenditures for corporations	35.0	33.5	33.5
Total, net	1,421.8	2,001.6	2,825.3

[1] Includes construction by the Corps of Engineers.
[2] Expenditures for 1947 include only those after Dec. 31, 1946, when the program was shifted to the Atomic Energy Commission.

CONTINUING WORK AND NEW PROJECTS

A striking characteristic of the public works program for 1949 is the preponderance of continuing work in the total program. Public works appropriations and contract authorizations for 1948 and prior years have largely determined the 1949 expenditure program. In fact, $2,631 million, or over 90 percent of estimated total net expenditures, is required to continue work started in prior years or to make payments on prior year commitments for public works loans and grants. Only $194 million of the 1949 expenditures is estimated to be required for new projects. Expenditure requirements for this large program of continuing work in 1949 restrict to narrow limits the opportunity for downward adjustment of expenditures for public works in this Budget.

TABLE 2.—*Total estimated cost of the 1949 civil public works program—Classified according to date of expenditure, and continuing work and new projects and commitments*

[Fiscal years. In millions]

Program	Total estimated cost	Expenditures		
		To June 30, 1948	Estimated, fiscal year 1949	Required to complete in later years
Continuing work:				
Direct Federal construction:				
Veterans' Administration [1]	$1,151.0	$145.9	$407.6	$597.5

Total, civil public works, net	17,361.6	6,668.1	2,825.3	7,834.6

[1] Includes Corps of Engineers expenditures for veterans' hospitals.

Continuing work.—Expenditures for "continuing work" in 1949 include (1) those required in 1949 for projects started with funds appropriated in prior years and continuing into 1949; (2) those required in 1949 to meet loan and grant commitments, such as Federal-aid highway grants and Rural Electrification Administration loans, provided for in prior years; and (3) those required for nonproject costs such as administration, maintenance, and other continuing expenses included in over-all public works appropriations. In some cases an integrated development for a large segment of an entire river basin is considered to be a single project. Examples are the lower Mississippi River flood-control project of the Corps of

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Engineers, and the Central Valley project of the Bureau of Reclamation.

An estimated $1,807 million will be required for continuing work on direct-Federal construction projects, and $859 million will be needed for loan and grant commitments made under prior year authority. Approximately one-third of the 1949 expenditures for continuing work on direct-Federal projects will be spent on flood control and river and harbor projects of the Corps of Engineers. Another one-fifth will be for continued construction work on new veterans' hospitals, many of which will be placed under contract in the latter half of fiscal year 1948 and in fiscal year 1949. Large expenditures will also be made on facilities required by the Atomic Energy Commission. Most of the expenditures in 1949 for prior year loan and grant commitments will be for payments to States under the 3-year $1.5 billion postwar highway program, which will approach its expenditure peak in 1949, and for loan payments to rural cooperatives for electric line and facilities construction.

New projects and commitments.—The term "new projects and commitments" includes (1) those direct-Federal projects which would be started with appropriations or contract authorizations recommended for fiscal year 1949; and (2) new commitments recommended for fiscal year 1949 on loan and grant programs, either in the form of appropriations or contract authorizations.

Only about $61 million is estimated for expenditures in 1949 on new direct-Federal projects totaling $494 million in final cost. Estimated new commitments for loans and grants for 1949 totaling $448 million are at, or somewhat above, the 1948 level, but only $133 million will be spent in 1949 in payment on these commitments. The remainder will be carried into 1950 and later years for payment.

New river and harbor projects recommended in fiscal year 1949 are considered necessary to provide satisfactory navigation at major harbors. New flood-control projects recommended for starting by the Corps of Engineers are required for the protection of urban areas where flood problems are critical, and for the orderly progress of the long-range flood-control program in the Mississippi River Basin. For the multiple-purpose developments of the Bureau of Reclamation, new project features are recommended for starting in fiscal year 1949 to permit work on large developments such as the Columbia Basin and Central Valley projects to continue in a manner designed to bring in irrigation at the earliest possible date. Other new projects, such as those for the Tennessee Valley Authority, Veterans' Administration, and Civil Aeronautics Administration, are held to a minimum consistent with meeting urgent needs.

New loan commitments of $300 million recommended for rural electrification for 1949 are required to meet the growing demands of rural areas for electric service. Grant commitments recommended for Federal-aid hospital and airport construction are at or below the levels established in authorizing legislation, and will provide only for the minimum requirements. No new commitments for Federal-aid highways are included in the 1949 Budget, as all funds provided in the postwar Federal-Aid Highway Act have been apportioned to the States, and further apportionments must await additional authorizing legislation.

COMMITMENTS AFTER 1949

Substantial expenditures will be required after fiscal year 1949 to complete the projects and to make payments for the loan and grant commitments in the present civil public works program, including the new starts recommended for 1949. The $7.1 billion of expenditures required after fiscal year 1949 for this work is more than double the estimated total expenditures for civil public works in 1949. Although the major portion of these future expenditures will be required in fiscal years 1950 and 1951, expenditures on some large projects will continue thereafter for 4 years or longer.

For direct Federal projects, new starts recommended in 1949 will add $430 million to the $6.3 billion of expenditures required after 1949 to complete projects started in prior years. New loan and grant commitments recommended for 1949 will add $315 million to the $751 million of expenditures required after 1949 to liquidate commitments made in prior years.

The largest volume of expenditures required after 1949 is for completing large multiple-purpose river basin projects of the Corps of Engineers and Bureau of Reclamation. Some of these developments will take 5 or 6 years after 1949 to complete. Other large requirements are for completion of construction on the $1.2 billion veterans' hospital program, and payments on the postwar Federal-aid highway program. These requirements will largely fall in fiscal years 1950 and 1951. Expenditures for completion of other programs including that of the Atomic Energy Commission will be made largely in 1950 and 1951.

The estimates of expenditures required after fiscal year 1949 to complete projects are based largely upon current construction costs. Should construction costs change to any great extent before the projects are completed, the required expenditures may differ markedly from the estimates shown in table 2.

RESERVE OF FEDERAL PROJECTS

Authorized work.—An indication of the possible magnitude of the Federal public works program in future years is the sizable reserve of projects which have been authorized either in general or specifically by the Congress but on which work will not have started by fiscal year 1949. Agency reports indicate that, on the basis of present prices, almost $9.5 billion of authorized work will be available for undertaking after fiscal year 1949. As shown in table 3, about 80 percent of the authorized work is included in the programs of the Corps of Engineers, Bureau of Reclamation, Rural Electrification Administration, and the Forest Service program of highways, roads, and trails. Some of these programs extend over 10 to 20 years.

TABLE 3.—*Reserve of authorized projects and programs available for undertaking after fiscal year 1949*

Agency and program:	*Total cost of projects (millions)*
Corps of Engineers:	
Rivers and harbors	$738.5
Flood control	2,366.3
Bureau of Reclamation	1,745.8
Rural Electrification Administration	1,944.0
Public Health Service, Federal-aid hospitals	225.0
Civil Aeronautics Administration, Federal-aid airports	402.5
Department of Agriculture, forest highways, roads, and trails	830.3
Other	1,222.8
Total	9,475.2

Programs not yet authorized.—In addition to authorized programs, Federal agencies report a total of $8.9 billion of proposed construction which has not yet been authorized by the Congress. Included is the proposed $2.5

770000—48——81

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

billion sea-level canal across the Isthmus of Panama, $3.8 billion of multiple-purpose irrigation and power projects proposed by the Bureau of Reclamation, and $1.7 billion of river and harbor and flood control work recommended by the Corps of Engineers. An important project included by the Corps of Engineers is the St. Lawrence seaway and power development. Grant-in-aid programs to be considered for authorization by the Congress include additional grants for Federal-aid highways, and grants and loans for stream pollution abatement facilities.

Planned projects.—The status of plans for Federal construction projects is constantly changing as projects are placed under contract, and planning is started on others. Also, the status of plans varies widely between different Federal agencies. A substantial reserve of planned river and harbor and flood control projects, totaling $835 million in cost, is reported by the Corps of Engineers. A large volume of other construction work, such as multiple purpose projects of the Bureau of Reclamation, and veterans' hospital projects, is in the planning stage preparatory to construction. Other Federal agencies including the Public Buildings Administration are preparing detailed plans in advance on a limited scale, but no great volume of construction work is involved.

BASIC SURVEYS AND DETAILED PLANS

The 1949 Budget provides funds for continuing the collection of basic data, the undertaking of preliminary examinations and surveys, and the preparation of detailed plans and specifications for construction projects. Basic data, such as topographic maps, and records of rainfall, run-off and stream flow, are essential to the efficient and economical design and construction of many Federal public works projects, particularly in the field of resource development. Similarly, well-conceived development projects require much preliminary investigation and survey work to determine their engineering and economic feasibility and social desirability. Preparation of detailed project plans well in advance of construction provides for more orderly programing of project construction, and may prevent expensive changes in project designs during the construction period.

Basic data.—A total of $18,622,390 is recommended for appropriation or allotment in fiscal year 1949 for topographic mapping and for assembly of hydrologic data. This compares with a total of $13,975,891 for these purposes for fiscal year 1948. These data are useful not only in connection with Federal, State, and local construction projects, but also to provide the necessary basis for the economic development of resources.

Preliminary surveys.—Appropriations and allotments totaling $18,556,442 are recommended for fiscal year 1949 for continuation of preliminary surveys on authorized projects and on those projects not yet authorized but under investigation for possible future authorization. It is essential that survey work on the many and varied aspects of Federal river basin developments be properly programed and coordinated. Federal development of water resources involves, in addition to the major purposes of navigation, flood control, irrigation and power, such associated purposes as recreation, minerals development, conservation of fish and wildlife, forestry and soil erosion control. The interests of many Federal agencies are involved in such investigations. Accordingly, the 1949 Budget includes funds, either through direct appropriation or by transfer, for river basin surveys for such agencies as the National Park Service and Fish and Wildlife Service, as well as for the primary construction agencies.

TABLE 4.—*Preliminary surveys*

[Fiscal years]

Agency and program	Appropriations or allotments	
	Actual, 1948	Recommended, 1949
Federal Power Commission, flood-control surveys	$301,500	$340,000
Public Health Service, hospital construction surveys	800,000	642,378
Department of Agriculture, flood-control surveys	1,358,172	2,070,500
Civil Aeronautics Administration, airport surveys	471,364	423,029
Department of the Interior		50,000
Southwestern Power Administration		25,000
Bonneville Power Administration	57,000	
Bureau of Indian Affairs	210,000	309,000
Bureau of Reclamation	2,500,000	6,000,000
National Park Service	416,723	777,435
Fish and Wildlife Service	715,972	920,000
Bureau of Land Management	335,000	450,000
Alaska Road Commission	135,000	634,100
International Boundary and Water Commission, United States and Mexico	265,000	240,000
The Panama Canal	2,182,700	100,000
Tennessee Valley Authority	374,000	175,000
Corps of Engineers:		
Rivers and harbors	2,000,000	1,900,000
Flood control	3,813,500	3,500,000
Total	15,935,931	18,556,442

Detailed plans.—An important objective of the public works policy of the Federal Government, not yet fully realized, is the preparation of detailed project plans well in advance of construction. The purpose is to prepare a reserve of projects, planned in advance, for undertaking when required. As projects planned in previous years are brought to the construction stage, plans are initiated on other projects, and the reserve of projects is kept at a somewhat stable level.

For advance planning of authorized construction projects, a total of $13,047,000 of appropriations or allotments is recommended for fiscal year 1949. The major share of this total covers detailed plans for river basin projects of the Corps of Engineers and the Bureau of Reclamation. In addition, substantial amounts for detailed plans will be available from construction appropriations for some agencies, including the Veterans' Administration, and the Atomic Energy Commission.

Federal aid for State and local planning.—From June 30, 1945, to June 30, 1947, the Federal Works Agency has made repayable advances to State and local governments to assist them in preparing detailed plans for construction projects. Total advances approved under the program will result in the planning of over 7,000 construction projects, estimated to cost over $2,350,000,000. Authority for making planning advances expired on June 30, 1947, but this Budget recommends legislation to continue such authority in the Federal Works Agency. Should such authority be granted it will be possible to maintain a reserve of planned State and local public works projects. A supplemental appropriation estimate of $20 million is included in the Budget for fiscal year 1949, pending the passage of the authorizing legislation.

Maintenance of a stable reserve of planned projects equal to several years normal construction volume will enable the reserve to be drawn upon when it is necessary further to expand public construction.

PROGRAM BY MAJOR FUNCTIONS

In most of the functional fields of Federal Government operations, public works are required to some extent. The wide range of functions served by Federal public works is indicated in table 5, which shows civil public works classified according to major function and subfunction. The major share of Federal public works expenditures is made for veterans' services and benefits, development of natural resources, and for transportation and communication.

TABLE 5.—*Federal civil public works expenditures by function and subfunction*

[Fiscal years. In millions]

Function	Actual, 1947	Estimate, 1948	Estimate, 1949
Veterans' services and benefits: Veterans' hospitals, other services, and administrative costs	$54	$179	$418
International affairs and finance: Foreign relations	2	2	2
Social welfare, health, and security:			
Work relief and direct relief	2	6	9
Promotion of public health	1	21	74
Crime control and correction	1	1	1
Total, social welfare, health, and security	4	28	84
Housing and community facilities:			
Public housing programs	376	74	19
Provision of community facilities	46	50	58
Total, housing and community facilities	423	124	77
Education and general research: Educational aid to special groups	(1)	1	5
Agriculture and agricultural resources:			
Loans and investments to aid agriculture	194	302	322
Conservation and development of agricultural land and water resources	5	8	10
Total, agriculture and agricultural resources	199	310	332
Natural resources not primarily agricultural:			
Conservation and development of land and water resources	324	551	781
Conservation and development of mineral resources	6	10	10
Conservation and development of fish and wildlife	(1)	1	(1)
Recreational use of resources	5	10	15
Development and control of atomic energy	51	174	326
Total, natural resources	387	746	1,132
Transportation and communication:			
Provision of navigation aids and facilities	100	147	183
Provision of highways	238	433	514
Promotion of aviation, including provision of airways and airports	40	51	84
Postal service			1
Other services to transportation		6	15
Total, transportation	378	638	797

Total, civil public works, gross	1,457	2,035	2,859
Adjustment to net expenditures for corporations	35	34	34
Total, civil public works, net	1,422	2,002	2,825

[1] Less than $500,000.

VETERANS' SERVICES AND BENEFITS

Expenditures in fiscal year 1949 for veterans' services are estimated to be approximately 15 percent of total civil public works expenditures.

Veterans' Administration hospitals.—During fiscal year 1949 work will proceed on the large program of construction of veterans' hospitals approved in prior years. The total program, estimated to cost almost 1.2 billion dollars, includes construction of 99 new hospitals and additions to existing hospitals to provide 53,500 beds and repair and modernization of existing hospitals. It is expected that 91 of the authorized hospitals and additions, and approximately 80 percent of the program of repair and modernization will be under construction or completed in fiscal year 1949.

Appropriations of $230 million are recommended for fiscal year 1949 for liquidation of contract authorizations. Additional contract authorization of $43 million is recommended for fiscal year 1949, of which $28 million is for a new program of repairs and modernization of existing hospitals, and the remaining $15 million is to cover increased construction costs for new hospitals already authorized. The 1949 construction program provides no authorization for new hospitals.

In carrying out this program the Veterans' Administration is using the services of the Corps of Engineers for supervision of the planning and construction of 72 new hospitals. Expenditures by the Corps of Engineers are estimated at $300 million in fiscal year 1949, and those of the Veterans' Administration at $112 million.

Federal Works Agency, veterans' educational facilities.—Under this program, authorized by Congress in August 1946 as part of the veterans' education program, surplus war structures are dismantled and rebuilt as temporary classrooms and other nonhousing facilities. With the expenditure of $4.5 million in 1949, this program will be brought to an end.

INTERNATIONAL AFFAIRS AND FINANCE

Public Roads Administration.—The small amount of expenditures under this function is for continuation of cooperative work on the Inter-American highway. No appropriation for this work is recommended in fiscal year 1949.

SOCIAL WELFARE, HEALTH, AND SECURITY

Construction activities of the Federal Government in this field consist largely of the provision of hospitals and other facilities for public health. Expenditures are estimated to total $84 million in fiscal year 1949, and are expected to increase somewhat in future years as the hospital construction grant program gets well under way.

Public Health Service.—The Federal-aid hospital construction program provides a total of $375 million of Federal grants over a 5-year period for non-Federal public and private nonprofit hospitals. The making of grants is conditioned upon the development by each State of a master plan for hospital construction, with establishment of priorities for most urgent needs, particularly in rural areas. During fiscal year 1947 most States made inventories of existing hospitals and surveyed needs for new facilities. For fiscal year 1948 Congress provided the first $75 million of contract authorization under this program. It is anticipated that a supplemental appropriation of $15 million will be recommended for fiscal year 1948 to meet payments on approved construction grant agreements. For fiscal year 1949 an additional contract authorization of $75 million is recommended to permit new grant commitments, and an appropriation of $60 million is recommended for cash payments on approved construction grant agreements.

This agency is now preparing plans for a joint mental, health, cancer, and general medical research center at Bethesda, Md., estimated to cost a total of over $34 million. An appropriation of $5 million is recommended for fiscal year 1949 to permit starting of construction. Planning and supervision of construction of the center will be undertaken by the Public Buildings Administration.

HOUSING AND COMMUNITY FACILITIES

Housing and Home Finance Agency—Public Housing Administration.—During fiscal year 1949 construction loans will be made to continue reactivation of low-rent

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

housing projects on which commitments were made before the war. Gross expenditures of the Public Housing Administration for financing these projects, through purchase of bonds and notes, are estimated at $6,201,000 in 1949. Work will also be continued in fiscal year 1949 on correction of construction deficiencies in low-rent housing projects completed during the war. Expenditures for this purpose include $3.6 million for the purchase of bonds and $2.5 million for direct outlays at federally owned projects, and will largely complete the work.

Final project payments will be made during fiscal year 1949 for temporary homes for veterans, erected under the $470 million re-use housing program, largely completed in 1947.

Federal Works Agency, Bureau of Community Facilities.—During fiscal years 1946 and 1947 the Federal Works Agency provided advances to State and local communities for advance planning of their public works. Authority for making new commitments expired on June 30, 1947, but expenditures will continue in 1948 and 1949 to complete payments on advances made in prior years. The Budget includes a supplemental appropriation of $20 million for fiscal year 1949, to finance additional planning advances under recommended legislation.

Continuation of construction of public works in the Virgin Islands to provide roads, water supply and sanitation facilities, harbor improvements, and other projects will require expenditures of $1,780,000 in fiscal year 1949. An expenditure of approximately $5 million will be required in later years to complete the authorized program.

EDUCATION AND GENERAL RESEARCH

Expenditures of $4.6 million under this function in fiscal year 1949 are for planning and construction of buildings at Howard University, Washington, D. C., for research facilities at the National Bureau of Standards, and for a geophysical institute at Fairbanks, Alaska.

AGRICULTURE AND AGRICULTURAL RESOURCES

Public works activities included under this function are those which provide for the conservation and development of agricultural resources, and aid the agricultural economy. Closely associated with these activities are a number of important land improvement programs, such as those of the Soil Conservation Service, which are not included here because they are primarily of a nonstructural nature. However, these activities are an essential element in the total national program of land and water conservation and development.

Rural Electrification Administration.—The rural electrification program has been expanding since the war in response to the great demand from rural groups for electric service. Between July 1945 and October 1947, the Rural Electrification Administration allocated loan funds to provide over 324,000 miles of distribution lines to serve over 960,000 customers. Loan advances totaled $192.5 million in fiscal year 1947, and are estimated to reach $300 million in fiscal year 1948. For the fiscal year 1949, advances to borrowers are estimated at $320 million. These will be financed from a recommended loan authorization of $300 million and from funds available from prior years.

Department of Agriculture, flood control.—Expenditures for flood-control activities by the Soil Conservation Service and the Forest Service are estimated at $8,540,000 in fiscal year 1949. Construction will be continued on nine watersheds, including the Los Angeles in California, Trinity in Texas, and Little Sioux in Iowa. Increased emphasis will be given to completing investigations of upstream flood-control problems, particularly in the Mississippi River Basin where an expanded program of construction of flood-control reservoirs is now under way by the Corps of Engineers and Bureau of Reclamation. As these investigations are completed and upstream flood-control work on additional watersheds is authorized, expenditures for flood-control operations by the Department of Agriculture may be expected to increase. Because upstream flood-control operations help to prevent soil erosion, they play an important part in the long-range utility of multiple-purpose reservoirs by retarding siltation. Accordingly, these operations should keep pace with the construction of multiple-purpose dams and reservoirs by other Federal agencies.

NATURAL RESOURCES

A major segment of Federal public works activities is related to the development, control, and conservation of the Nation's natural resources. Involved is the multiple-purpose development of watersheds for flood control, irrigation, hydroelectric power and other purposes, and the conservation and development of land, forest, mineral, recreational, and wildlife resources. The development of natural resources requires certain capital improvement activities which cannot be classed strictly as construction, such as range land improvements, wildlife development, reforestation, and forest protection. Such improvement work is not included herein, as this section covers only work of a structural character.

The trend of expenditures for natural resources projects will continue upward during fiscal year 1949, largely because of the new work started in fiscal years 1947 and 1948. Recommendations for new projects in 1949 are held to a minimum in this Budget, but the necessity for continuing work at an efficient rate on the large volume of projects started in previous years will result in construction expenditures for natural resources programs of $1,132 million in 1949, as compared with $746 million in 1948. This high level of expenditures is expected to increase in fiscal year 1950, even without the addition of any new projects, as a number of large projects reach their construction peak.

Corps of Engineers.—The flood-control program of the Corps of Engineers is Nation-wide in scope and involves the construction of levees, improvement of channels, and the provision of major storage reservoirs, in many cases for multiple purposes. The ultimate objective is to develop coordinated systems of flood-protection works on all of the major river systems of the Nation. In fiscal years 1948 and 1949, major emphasis will be given to flood-control works in the Mississippi River Basin, in accordance with the long-range program for flood control in this basin, presented to Congress in July 1947. In addition, major projects are under construction on the Susquehanna, Roanoke, and Savannah Rivers on the Atlantic seaboard; the Alabama-Coosa and Trinity Rivers on the Gulf coast; and in the Central Valley of California and the Los Angeles and Willamette Rivers on the Pacific coast. Expenditures for flood control are estimated to increase from $314 million in 1948 to $449 million in 1949.

The Corps of Engineers is continuing its investigations of river basins, in accordance with congressional acts and committee resolutions, to determine the engineering and economic feasibility of projects for possible future authorization, and is also preparing detailed plans for authorized projects to be started in later years.

Bureau of Reclamation.—The program of this agency for multiple-purpose development of water resources in the

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

17 arid and semiarid States in the West will continue to expand in fiscal year 1949, as construction of many irrigation and power projects proceeds. Major development programs are under way in the Central Valley of California, the Columbia Basin, lower Colorado River in Arizona and California, the Colorado-Big Thompson project in Colorado, and the Missouri River Basin. Included in this program is the construction of transmission lines to carry the electric energy produced at the projects to load centers. The program as recommended for fiscal year 1949 provides for continuation of existing construction activities at rates designed to bring in irrigation and power benefits as early as possible.

New work in 1949 will be restricted largely to certain new features required in connection with existing projects and one new dam and reservoir of importance to flood control and power in the Missouri River Basin.

Expenditures for construction are estimated to increase to $231 million in fiscal year 1949 from $155 million in 1948. Even without the addition of any new projects, expenditures are estimated to remain at about this level in fiscal year 1950 and later years.

The Bureau of Reclamation will also continue its preliminary investigations and surveys in the river basins of the West to determine the engineering feasibility and economic worth of basin development plans and projects for possible future authorization by Congress, and of possible modifications of projects already authorized.

Bonneville Power Administration.—This agency is responsible for marketing the large blocks of power generated at federally owned dams in the Pacific Northwest. Accordingly, funds have been recommended in fiscal year 1949 to provide for continued construction, operation, and maintenance of the main integrated trunk transmission system with its associated substations and facilities. Particular emphasis is given to providing facilities for handling the increasing power generation at Grand Coulee Dam and the furnishing of power to shortage areas, with preference given to public bodies and cooperatives, as provided by law. Expenditures for construction, operation, and maintenance of the Bonneville power transmission system are estimated at $26.6 million in 1949, including $3.7 million for operation and maintenance of the system.

Southwestern Power Administration.—This agency has been designated by the Secretary of the Interior to dispose of power and energy generated at Federal reservoir projects in the Oklahoma-Arkansas-Texas area. An initial appropriation of $7.5 million was provided in fiscal year 1947 for construction and acquisition of transmission lines and related facilities to integrate the power being produced at the Norfork and Denison Dams, and to construct feeder lines and service connections to cooperatives and municipalities. The 1947 appropriation was made available for expenditure in later years. For fiscal year 1949, expenditures are estimated to total $5 million.

Tennessee Valley Authority.—Construction activities of the Tennessee Valley Authority in 1949 involve the continuation of capital improvements for the unified development of the Tennessee Valley. Construction will be continued on South Holston and Watauga Dams and on minor improvements to other dams and reservoirs. The 1949 Budget also provides for the installation of additional hydroelectric generating units in existing dams, and extension and improvement of the transmission line system, to meet the growing needs for power in the region. In addition, initiation of work on a $54 million steam generating plant is recommended. Other construction activities include construction of a power service building and research facilities for the chemical plant.

Construction expenditures from appropriated funds are estimated at $29 million in 1949. Expenditures financed from corporate funds, which are almost entirely for power facilities, are estimated at $29 million. Appropriations of $28 million are recommended for public works for fiscal year 1949. Outlays for power facilities will continue to be substantial since the Tennessee Valley Authority has the responsibility of supplying the growing power needs of the region.

International Boundary and Water Commission, United States and Mexico.—Current activities consist of the construction, in cooperation with the Mexican Government, of the first of the multiple-purpose dams authorized on the Rio Grande, in accordance with the terms of the treaty signed on February 3, 1944. Other activities include flood control and stream rectification works along the Rio Grande. Expenditures in fiscal year 1949 are estimated at $7,870,000 and can be expected to increase in succeeding years, as work provided in the treaty reaches a peak.

Bureau of Indian Affairs.—For fiscal year 1949, a small program of survey and construction work is provided on Indian irrigation projects in the Western States, chiefly for work on the Colorado River irrigation project. With funds recommended for fiscal year 1949, it is estimated that 7,000 acres of land can be brought under irrigation on this project.

National Park Service.—The stoppage of construction during the war and the subsequent curtailment of new work has created a critical situation in national park areas where facilities to service the large and increasing number of visitors are grossly inadequate. For fiscal year 1949, a moderate increase is recommended in the construction program of roads, buildings, and utilities in national parks, monuments and historic sites. Expenditures for construction in fiscal year 1949 are estimated at $14,774,000. The program includes development of tourist facilities in Mount McKinley Park and Glacier Bay National Monument in Alaska. The National Park Service is also conducting surveys of the recreational possibilities of the multiple-purpose reservoir projects being built by the Corps of Engineers and Bureau of Reclamation. As the many reservoirs to be constructed are completed, plans and programs must be available for the full use of the recreational resources of such reservoir areas.

Atomic Energy Commission.—Construction activities of the Atomic Energy Commission involve the continuation of programs for provision of production, research, and housing and community facilities at various locations throughout the country. Total expenditures for these purposes are estimated at $326 million for 1949. Additional expenditures totaling $533 million will be required in later years to complete the current construction program.

TRANSPORTATION

In the fiscal year 1949, expenditures of $797 million for transportation will comprise about one-third of total estimated expenditures for Federal civil construction. The expenditures represent a considerable increase over the $638 million of expenditures estimated for 1948, and the $378 million in 1947. The large increases over preceding years are in expenditures for Federal-aid highways, river and harbor construction, and Federal-aid airports. Further increases can be expected in these programs in later years.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Corps of Engineers, rivers and harbors.—Expenditures for construction, maintenance and operation, and for surveys of river and harbor improvements are estimated at $171 million in 1949 as compared with $131 million in 1948. Expenditures for construction are estimated to increase from $57 million in 1948 to $93 million in 1949. The major portion of the expenditures is required for projects started in prior years on which work will be continued during fiscal year 1949 at an economical and conservative rate. Only nine new rivers and harbors projects with appropriations totaling $10 million are recommended for fiscal year 1949.

The rivers and harbors program in 1948 and 1949 provides for dredging and rock excavation on a number of the major harbors on the Atlantic and Gulf coasts, including Portland, New York, and Savannah Harbors, improvement of the Intracoastal Waterway along the Gulf coast, work on inland waterways such as the Ohio, upper Mississippi and Missouri Rivers, improvements to Great Lakes harbors and channels, and start of construction on the multiple-purpose McNary Dam on the Columbia River.

Expenditures for rivers and harbors construction work will continue to increase in fiscal year 1950, even without starting of any new projects in that year, because of requirements to complete projects started in 1949 or prior years.

The Panama Canal.—Construction of housing, roads, streets, schools, and hospital improvements in the Canal Zone will require an estimated expenditure of $6.4 million in 1949. In accordance with law, the President on December 1, 1947, transmitted the report of the Governor of the Panama Canal on possible means of increasing the capacity and security of the Panama Canal. The subject of a sea-level canal connecting the Atlantic and Pacific Oceans is under study.

Public Roads Administration.—The major portion of expenditures of the Public Roads Administration is for the postwar Federal-aid highway program which provided authorizations of $500 million annually for 3 years beginning with fiscal year 1946. Expenditures under this program were relatively small in fiscal years 1946 and 1947, because of high construction costs and shortages of labor and materials. In fiscal year 1948, expenditures for all construction programs of the Public Roads Administration, including both prewar and postwar authorizations, are estimated at $406 million; in fiscal year 1949 they are estimated at $478 million, of which $415 million is for the postwar highway program.

The Eightieth Congress extended the period of availability of funds apportioned to the States from the postwar highway authorizations from 1 year to 2 years after the close of the fiscal year for which the funds were authorized. This has the effect of continuing the availability of funds for obligation through fiscal year 1950. However, new legislative authority for Federal-aid highways is needed for orderly planning and development of the program in later years. Expenditures for Federal-aid highways in 1950 are estimated at about the same level as 1949, and will be largely for grant payments for construction completed under the present postwar highway program.

Road programs of other Federal agencies.—Other road programs of the Federal Government include the construction of forest highways and development roads in and through national forests, secondary roads on and adjoining Indian reservations, and highways and roads in the Territory of Alaska. These road and highway programs are administered directly by Federal agencies, and in some cases involve maintenance as well as new construction. Expenditures for these programs are estimated to total $27 million in 1948 and $36 million in 1949.

Civil Aeronautics Administration.—The Federal-aid airport program provides for $520 million of authorizations over a 7-year period, beginning in fiscal year 1947. Through fiscal year 1948, $77.5 million has been appropriated, and $40 million is recommended for fiscal year 1949. The program has been delayed in getting under way owing to the time required for the development of procedures and project plans, and expenditures in fiscal year 1949 are estimated at $45 million. Fulfillment of the entire program over the 7-year period would require a substantial increase in expenditures in succeeding years.

Expenditures of $20 million by the Civil Aeronautics Administration in 1949 are required for the provision of air navigation facilities in the continental United States and Alaska for the safety and continued expansion of air travel. They can be expected to increase in 1950 and later years, to keep pace with the growth of air transportation and new developments in control of air navigation.

National Advisory Committee for Aeronautics.—Estimated expenditures by this agency for fiscal year 1949 total $12 million for construction of improvements and new facilities at its three laboratories—Langley Field, Va.; Cleveland, Ohio; and Moffett Field, Calif. A major new project recommended in fiscal year 1949 is an aircraft propulsion sciences laboratory at Cleveland, Ohio, presently estimated to cost $10 million. The 1949 budget also makes provision for supplemental funds for initiating construction of additional supersonic research facilities for which submission to Congress of authorizing legislation is anticipated.

Alaska Railroad.—In fiscal year 1949, expenditures of $15 million are estimated for continuation of the rehabilitation program started in fiscal year 1948 to restore and improve the Alaska Railroad in order to provide proper service to the areas in Alaska dependent upon the railroad. The total program is estimated to cost about $48 million, and is scheduled for completion in fiscal year 1952.

GENERAL GOVERNMENT

Public Buildings Administration.—No postwar general public buildings program is recommended in this Budget. However, advance planning of certain public buildings will continue in 1948 and 1949, and construction work will proceed on a few public buildings already started. Expenditures for these purposes are estimated at $6.3 million in 1949.

Bureau of Indian Affairs.—The general building and utilities construction program on Indian reservations provides for administrative, health, welfare, and educational facilities. The 1949 program includes a number of new hospital and school building projects in Alaska to meet urgent requirements, as well as similar facilities for reservations in the United States. Expenditures are estimated at $6 million in 1949, an increase from the estimate of $3 million in 1948. If the urgent requirements for buildings and utilities for Indians are to be met, expenditures in 1950 and later years will show further increases.

NATIONAL DEFENSE CONSTRUCTION

Expenditures for national defense construction during 1947 and 1948 are largely for programs started in fiscal year 1947 and prior years. The 1949 Budget provides

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

for supplemental appropriations and contract authorizations totaling $342 million in fiscal year 1948 for new construction programs to be authorized by Congress for the Departments of the Air Force, Army, and Navy. These new programs, aggregating $252 million in total cost for the Navy, and $248 million in total cost for the Army and Air Force, will provide for permanent housing, research and training facilities at establishments in the continental United States and in certain overseas possessions. Additional supplemental appropriations and contract authorizations totaling $110 million are recommended under proposed legislation for the three departments in fiscal year 1949 for high priority projects of an urgent nature.

EXPLANATION OF THE ESTIMATES OF RECEIPTS

The estimates of receipts from taxes and customs for the current and ensuing fiscal years are prepared in December each year by the Treasury Department. The estimates of miscellaneous receipts in general are prepared by the agency depositing the receipts in the Treasury.

TOTAL RECEIPTS

Total Budget receipts under existing legislation (daily Treasury statement basis) are estimated in the amounts of $46,837.4 million in the fiscal year 1948 and $46,148.9 million in the fiscal year 1949. Total receipts are estimated to increase $2,119.1 million in the fiscal year 1948 over actual receipts for the fiscal year 1947, but in the fiscal year 1949 total receipts under existing legislation are expected to decline $688.5 million because of the decrease in receipts from nontax sources.

The details of the estimated and actual receipts are shown in table 6, pages A11–A21. Throughout the tables shown in this exposition the figures are rounded and will not necessarily add to totals. This exposition utilizes the Budget classification of receipts. The footnotes to the table outline the differences between this classification and the Treasury classification of receipts.

Percentage distribution of total Budget receipts by sources

Source [1]	Actual		Estimate	
	1946	1947	1948	1949
Direct taxes on individuals	43.0	45.6	48.8	50.6
Direct taxes on corporations	29.1	21.6	20.4	22.0
Excise taxes	15.1	16.3	15.6	16.2
Employment taxes	3.9	4.6	5.1	5.4
Customs	1.0	1.1	.8	.8
Miscellaneous receipts	7.9	10.8	9.3	5.0
Total Budget receipts	100.0	100.0	100.0	100.0

[1] The Budget classification of taxes differs in several respects from the classification used by the Treasury Department in the daily Treasury statement. In the Budget classification, the Treasury "income tax" is divided into "direct taxes on individuals" and "direct taxes on corporations," except that the unjust enrichment tax is placed in "excise taxes." The Budget classification removes from the Treasury "miscellaneous internal revenue," the estate and gift taxes, which are placed in "direct taxes on individuals," and the capital stock tax, which is placed in "direct taxes on corporations" for the fiscal year 1946 only since the tax was repealed with respect to years ending after June 30, 1945. The Budget "excise taxes" consists of the Treasury "miscellaneous internal revenue" less the capital stock, estate, and gift taxes and plus the unjust enrichment tax. The Budget "employment taxes" consists of the Treasury "social security taxes," "taxes upon carriers and their employees," and "railroad unemployment insurance contributions."

Amounts shown for the fiscal years 1946 and 1947 are on the basis of the daily Treasury statement as far as possible. Since the classification used in the daily Treasury statement does not correspond exactly to the Budget classification, it is necessary to allocate arbitrarily some of the adjustments from the detailed collections basis to the daily Treasury statement basis. The adjustment from the collections basis to the daily Treasury statement basis for "miscellaneous internal revenue" is contained in "excise taxes" and the adjustment for "income tax; other" (other than withheld by employers) is contained in "direct taxes on individuals." The total amounts for employment taxes, customs, and miscellaneous receipts are on the basis of the daily Treasury statement. All details of taxes, other than "income tax: withheld by employers" and the details of "employment taxes," are on the basis of collections. Details of miscellaneous receipts are on the basis of warrants issued.

Direct taxes on individuals continue as the leading source of revenue and are estimated to account for more than 50 percent of total receipts in the fiscal year 1949. Estimated receipts in the fiscal years 1948 and 1949 represent the largest absolute amount ever collected from this source. Direct taxes on corporations maintain their position as the second most important revenue source and increase slightly on both absolute and percentage bases in the fiscal year 1949, after having declined on both bases in 1947 and 1948. Excise taxes increase in absolute amount in both fiscal years and on a percentage basis in 1949, but decline slightly in the fiscal year 1948 on a percentage basis. Receipts from employment taxes increase on both absolute and percentage bases. Receipts from customs and miscellaneous receipts decline in absolute amount and percentagewise. The decline in miscellaneous receipts reflecting nonrecurring revenue in the earlier years represents the only significant decrease estimated for any major receipts source.

FISCAL YEAR 1948

Actual receipts in the fiscal year 1947 and estimated receipts in the fiscal year 1948 are compared by major sources in the following table:

Total and net Budget receipts by sources [1]

[In millions of dollars]

Source	Actual, 1947	Estimate, 1948	Increase (+) or decrease (−), 1948 over 1947
Direct taxes on individuals	20,408.1	22,793.0	+2,384.9
Direct taxes on corporations	9,676.5	9,548.0	−128.5
Excise taxes	7,270.5	7,320.0	+49.5
Employment taxes	2,038.5	2,409.5	+371.0
Customs	494.1	394.0	−100.1
Miscellaneous receipts	4,830.7	4,372.9	−457.8
Total Budget receipts	44,718.3	46,837.4	+2,119.1
Deduct appropriation to Federal old-age and survivors insurance trust fund	1,459.5	1,627.0	+167.5
Net Budget receipts	43,258.8	45,210.4	+1,951.6

[1] See footnote to preceding table.

Net Budget receipts in the fiscal year 1948 are estimated to amount to $45,210.4 million, an increase of $1,951.6 million over actual receipts in the preceding year. The six tax sources are divided evenly as to increases and decreases but the large increase in the most important revenue source, direct taxes on individuals, accounts for the net over-all increase.

Direct taxes on individuals.—The yields of direct taxes on individuals are shown in the following table:

[In millions of dollars]

Source	Actual, 1947	Estimate, 1948	Increase (+) or decrease (−), 1948 over 1947
Individual income tax			
Withheld	10,013.1	11,327.0	+1,313.9
Not withheld	9,064.7	9,997.0	+932.3
Back taxes	551.0	627.0	+76.0
Total individual income tax	19,628.8	21,951.0	+2,322.2
Estate tax	708.8	777.0	+68.2
Gift tax	70.5	65.0	−5.5
Total direct taxes on individuals	20,408.1	22,793.0	+2,384.9

Individual income tax rates affecting fiscal years 1947 and 1948 are the same; therefore the changes in receipts are the result of changes in income levels. Individual income taxes withheld increased in fiscal year 1948 as a result of an increase in the salaries and wages subject to withholding. The increase in income taxes other than

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

withheld in fiscal year 1948 reflects the increased tax liabilities as a result of the larger incomes. Back tax collections are a function of the liabilities of previous years and are estimated to increase, reflecting the increasingly large individual income tax liabilities of the past several years.

Estate tax returns are required to be filed no later than 15 months after the date of death, and gift tax returns are filed in March of the year following the year of gift. The collections from these taxes reflect the valuation of property transferred in the above periods.

Direct taxes on corporations.—The details of the taxes from this source appear in the table below:

[In millions of dollars]

Source	Actual, 1947	Estimate, 1948	Increase (+) or decrease (−), 1948 over 1947
Income and excess profits taxes	8,518.2	8,442.0	−76.2
Declared value excess profits tax	36.7	2.0	−34.7
Back taxes (excluding unjust enrichment)	1,121.6	1,104.0	−17.6
Total direct taxes on corporations	9,676.5	9,548.0	−128.5

Corporation income and excess profits tax receipts in the fiscal year 1947 reflect incomes and tax provisions of the calendar years 1945 and 1946, while receipts in the fiscal year 1948 reflect incomes and tax provisions of the calendar years 1946 and 1947. The repeal of the excess profits tax and the reduction in surtax rates under the Revenue Act of 1945 were nearly offset by the rising trend of corporate income during the calendar years 1945, 1946, and 1947. The relatively small declared value excess profits tax was repealed by the Revenue Act of 1945 and receipts from this source virtually ceased after the end of the fiscal year 1947. It is estimated that receipts from back taxes will show only a small decline and that in total receipts from direct taxes on corporations will be only slightly lower in the fiscal year 1948 than in the fiscal year 1947.

Excise taxes.—Receipts from this source by major groups are listed in the following table:

[In millions of dollars]

Source	Actual, 1947	Estimate, 1948	Increase (+) or decrease (−), 1948 over 1947
Liquor taxes	2,474.6	2,276.0	−198.6
Tobacco taxes	1,237.8	1,302.0	+64.2
Stamp taxes	80.0	69.0	−11.0
Manufacturers' excise taxes	1,425.2	1,621.0	+195.8
Retailers' excise taxes	514.2	453.0	−61.2
Miscellaneous taxes	1,552.8	1,599.0	+46.2
Unjust enrichment tax	.3	(1)	−.3
Adjustment to daily Treasury statement basis	−14.4		+14.4
Total excise taxes	7,270.5	7,320.0	+49.5

[1] Included in miscellaneous taxes.

The small increase estimated for total excise taxes represents the net effect of offsetting changes in the several tax groups. Liquor tax receipts are expected to decline from the exceptionally high collections of the fiscal year 1947, which reflected substantial inventory accumulation. Declines are also estimated in collections of stamp taxes, principally because of an expected decrease in activity in new securities, and in retailers' excise taxes because of the decreased coverage of the tax on furs effective April 1, 1947, and a general falling off in sales of commodities taxable under the retailers' excise taxes as more durable goods become available to consumers. The total decrease estimated for these three groups is more than offset by the increase estimated for manufacturers' excise taxes as consumers' durable goods increase in supply and by the increases estimated in tobacco taxes and miscellaneous taxes reflecting better supply and increased income levels.

Employment taxes.—The yields of the various employment taxes are shown below:

[In millions of dollars]

Source	Actual, 1947	Estimate, 1948	Increase (+) or decrease (−), 1948 over 1947
Federal Insurance Contributions Act	1,459.5	1,627.0	+167.5
Federal Unemployment Tax Act	184.8	211.0	+26.2
Railroad Retirement Tax Act	380.1	557.0	+176.9
Railroad unemployment insurance contributions	14.2	14.5	+.3
Total employment taxes	2,038.5	2,409.5	+371.0
Deduct appropriation to Federal old-age and survivors insurance trust fund	1,459.5	1,627.0	+167.5
Net employment taxes	579.1	782.5	+203.4

The estimated increase in receipts in the fiscal year 1948 over the fiscal year 1947 is based on higher industrial and railroad pay rolls and on an increase in the tax rate under the Railroad Retirement Tax Act. The rate change from 3½ to 5¾ percent each on the carriers and on their employees beginning on January 1, 1947, was reflected in receipts under this act beginning with the last quarter of the fiscal year 1947. Because of Public Law 379, Eightieth Congress, the rates of tax under the Federal Insurance Contributions Act remain at 1 percent each on the employer and employee during the period reflected in the receipts.

Customs.—Customs receipts are estimated to be $394 million in the fiscal year 1948 or $100.1 million less than in the fiscal year 1947. This decrease is primarily a consequence of rate changes.

Miscellaneous receipts.—The decrease in miscellaneous receipts is estimated for the fiscal year 1948 because certain of the fiscal year 1947 receipts from this source were nonrecurring.

FISCAL YEAR 1949

Estimated receipts in the fiscal years 1948 and 1949 under existing legislation are compared by major sources in the following table:

Total and net Budget receipts by source[1]

[In millions of dollars]

Source	Estimate, 1948	Estimate, 1949	Increase (+) or decrease (−), 1949 over 1948
Direct taxes on individuals	22,793.0	23,322.0	+529.0
Direct taxes on corporations	9,548.0	10,158.0	+610.0
Excise taxes	7,320.0	7,476.0	+156.0
Employment taxes	2,409.5	2,493.0	+83.5
Customs	394.0	378.0	−16.0
Miscellaneous receipts	4,372.9	2,321.9	−2,051.0
Total Budget receipts	46,837.4	46,148.9	−688.5
Deduct appropriation to Federal old-age and survivors insurance trust fund	1,627.0	1,672.0	+45.0
Net Budget receipts	45,210.4	44,476.9	−733.5

[1] See footnote to first table.

Net Budget receipts in the fiscal year 1949 under existing legislation are estimated to amount to $44,476.9 million, a decrease of $733.5 million from estimated

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

receipts in the fiscal year 1948. All of the tax sources show increases with the exception of customs, which is expected to show a slight decrease, but this increase in receipts from tax sources is offset by the substantial decline in miscellaneous receipts which, for the most part, comprises receipts from nontax sources.

Direct taxes on individuals.—The yields of the direct taxes on individuals are shown in the following table:

[In millions of dollars]

Source	Estimate, 1948	Estimate, 1949	Increase (+) or decrease (−), 1949 over 1948
Individual income tax:			
Withheld	11,327.0	11,757.0	+430.0
Not withheld	9,997.0	10,071.0	+74.0
Back taxes	627.0	678.0	+51.0
Total individual income tax	21,951.0	22,506.0	+555.0
Estate tax	777.0	750.0	−27.0
Gift tax	65.0	66.0	+1.0
Total direct taxes on individuals	22,793.0	23,322.0	+529.0

Individual income tax receipts from withholding are estimated to increase slightly in fiscal year 1949. This increase results from an estimated increase in salaries and wages subject to withholding. Beginning in calendar year 1949 the salaries and wages of members of the armed forces will be subject to withholding in addition to an estimated increase in other salaries and wages. Income tax receipts other than withheld increase slightly, reflecting increased liabilities other than those paid through withholding. Back tax collections are estimated to continue to increase as a result of the continuing high level of individual income tax liabilities.

Estate and gift tax estimates reflect the valuation of property transferred in their respective periods of liability.

Direct taxes on corporations.—The details of the receipts from this source appear in the table below:

[In millions of dollars]

Source	Actual, 1947	Estimate, 1948	Increase (+) or decrease (−), 1949 over 1948
Income and excess profits taxes	8,442.0	8,902.0	+460.0
Declared value excess profits tax	2.0		−2.0
Back taxes (excluding unjust enrichment)	1,104.0	1,256.0	+152.0
Total direct taxes on corporations	9,548.0	10,158.0	+610.0

The combined income level for the calendar years 1947 and 1948 is estimated to be greater than the combined income level for the calendar years 1946 and 1947, and the receipts from income and excess profits taxes are estimated accordingly to be greater in the fiscal year 1949 than in the fiscal year 1948. Receipts from the declared value excess profits tax, which was repealed by the Revenue Act of 1945, are negligible in both years. Receipts from back taxes, which are estimated to be slightly greater in the fiscal year 1949 than in the fiscal year 1948, reflect primarily the rising trend of incomes during the calendar years 1945, 1946, and 1947.

Excise taxes.—Receipts from the major groups of excise taxes are listed in the following table:

[In millions of dollars]

Source	Estimate, 1948	Estimate, 1949	Increase (+) or decrease (−), 1949 over 1948
Liquor taxes	2,276.0	2,394.0	+118.0
Tobacco taxes	1,302.0	1,322.0	+20.0
Stamp taxes	69.0	59.0	−10.0
Manufacturers' excise taxes	1,621.0	1,648.0	+27.0
Retailers' excise taxes	453.0	436.0	−17.0
Miscellaneous taxes	1,599.0	1,617.0	+18.0
Total excise taxes	7,320.0	7,476.0	+156.0

Total excise taxes in the fiscal year 1949 are not expected to differ appreciably from estimated collections in the fiscal year 1948 as income levels are estimated to be approximately the same in both years.

Employment taxes.—The yields of the various employment taxes, under existing legislation, are shown below:

[In millions of dollars]

Source	Estimate, 1948	Estimate, 1949	Increase (+) or decrease (−), 1949 over 1948
Federal Insurance Contributions Act	1,627.0	1,672.0	+45.0
Federal Unemployment Tax Act	211.0	224.0	+13.0
Railroad Retirement Tax Act	557.0	582.0	+25.0
Railroad unemployment insurance contributions	14.5	15.0	+.5
Total employment taxes	2,409.5	2,493.0	+83.5
Deduct appropriation to Federal old-age and survivors insurance trust fund	1,627.0	1,672.0	+45.0
Net employment taxes	782.5	821.0	+38.5

The estimated increase in receipts in the fiscal year 1949 over the fiscal year 1948 is based on higher industrial and railroad pay rolls and on an increase in the tax rate under the Railroad Retirement Tax Act. The rate change from 5¾ to 6 percent each on the carriers and on their employees, beginning on January 1, 1949, will be reflected in receipts beginning with the last quarter of the fiscal year 1949. For the time interval reflected in these receipts there is no change in the rate of contributions under the Federal Insurance Contributions Act.

Customs.—Customs receipts are estimated to be $378 million in the fiscal year 1949, or $16.0 million less than in the fiscal year 1948. The rate concessions made by the United States under the Geneva agreement, signed on October 30, 1947, will be applicable only during the last half of the fiscal year 1948 but during the entire fiscal year 1949 and it is expected that this will more than offset the small increase in volume of imports anticipated for the fiscal year 1949.

Miscellaneous receipts.—The decreasing income from this source progressively continues to reflect the nonrecurrence of certain items of income collected in earlier years.

GRANTS TO STATE AND LOCAL GOVERNMENTS

Federal payments for grants-in-aid and shared revenues to State and local governments are of increasing importance in the Budget. By far the largest are in the fields of social welfare and transportation.

Nearly one-third of the grants, chiefly for highways, airports, and hospitals, is for construction of civil public works by the States and their subdivisions. Annual expenditures under these grant programs are subject to less control by the Federal Government than are expenditures on direct Federal public works; nevertheless, the estimates for 1949 reflect a policy of keeping commitments as low as possible.

For the other two-thirds of the Federal grant expenditures, the amounts required in most cases are fixed by statutory commitments. The largest of these programs is for Federal aid to the States in providing old-age assistance, aid to dependent children, and aid to the blind. The appropriation and expenditures for this purpose are determined entirely by application of a statutory formula to expected case loads and to individual benefit rates established by the several States.

The accompanying table enumerates the major grant-in-aid programs and gives the total expenditures and appropriations for grants in each functional category.

The grant-in-aid is paid in some instances from an appropriation which also covers Federal administrative or other expenses. In such cases, in order to exclude wherever possible any objects of expenditure other than the actual grants, the amounts in the table are the actual or estimated obligations for grants-in-aid. This involves an assumption that there is no significant lag of expenditures behind obligations for the part of the appropriation used for the grant payments. Thus adjusted, these figures exclude Federal administrative expenses or other nongrant items for most of the programs. On the other hand, a few grants to private nonprofit institutions may be included—specifically, under the veterans' educational facilities program of the Federal Works Agency, the school lunch program of the Department of Agriculture, and the hospital construction program of the Federal Security Agency.

Expenditures.—Of the total estimated expenditures for grants and shared revenues in the fiscal year 1949, $1,890 million represents requirements under existing law and $407 million would be paid under proposed legislation included in the recommendations in the President's Budget Message.

Appropriations and other authorizations.—The Budget recommendations for appropriations for grants and shared revenues for the fiscal year 1949 total $2,267 million, including $427 million as an estimate of the amount that will be required under proposed legislation. In addition, a contract authorization of $75 million is recommended for the Federal-aid hospital construction program of the Public Health Service.

Other aids.—Repayable advances for public works planning are included in the table, since the advances become grants if the planned improvements are not built. On the other hand, loans to public agencies by the Reconstruction Finance Corporation and the Public Housing Administration are not included in the total of grants. Also, the table does not include indirect financial aids, such as exemption from the Federal income tax of interest paid on State and local debt; services which may be rendered by Federal agencies in the ordinary course of their operations; and some programs administered cooperatively for the purposes of both the State and Federal Governments, such as the National Guard or agricultural crop reporting.

Payments in lieu of taxes are included in the table as either grants-in-aid or shared revenues, depending on the program involved, but direct payments of taxes on federally owned property—e. g., by the Reconstruction Finance Corporation—are omitted.

Since the table deals with aid by the Federal Government, it does not record the reciprocal assistance given to it in the form of services rendered or payments made to the Federal Government by the States or their subdivisions.

GRANTS TO STATE AND LOCAL GOVERNMENTS

Summary of grants and shared revenues included in major programs

[Fiscal years. In millions]

Function, program, and agency	Functional code No.	Expenditures			Appropriations, 1949
		Actual, 1947	Estimate, 1948	Estimate, 1949	
GRANTS-IN-AID					
Veterans' services and benefits:

Federal Reserve Bank of St. Louis

INTRODUCTION TO THE APPENDIXES

Appendix 1, "Analysis of the public debt," shows the outstanding public debt by types of indebtedness. The difference between the total public debt outstanding at the end of the fiscal years 1946 and 1947 appears in table 5 as the net increase in public debt during the fiscal year 1947.

Appendix 2, "Guaranteed obligations and contingent liabilities of the United States," lists guaranteed obligations and contingent liabilities as of June 30, 1947.

Appendix 3, "Permanent appropriations, general and special accounts," shows these permanent appropriations for the fiscal years 1947, 1948, and 1949. They have been enacted by Congress at various times and the acts remain in effect until repealed or amended. This appendix does not include permanent trust appropriations. Most of the trust appropriations listed in table 13 are of the permanent type.

Appendix 4, "Comparison of expenditures by organization unit," compares expenditures of departments and agencies and their constituent units over a 7-year period. Whenever reorganizations have transferred activities between departments and agencies, annual expenditures throughout the 7-year period have been readjusted upon the pattern of organization in effect on June 30, 1947. Footnotes indicate the date of the transfer and the name of the earlier agency.

Appendix 5, "Unexpended balances of general and special account appropriations * * *," shows, as of June 30, 1947, by organization unit, the unexpended balances of appropriations (*a*) on the books of the Treasury and (*b*) to the credit of disbursing officers. It also shows appropriations for the fiscal year 1948 as of November 1, 1947. Finally, it combines the foregoing to show the "total available" to each organization unit.

Appendix 6, "Budget receipts and expenditures, by function," presents a historical comparison (1940–49) of budget receipts by source, and budget expenditures by function. This appendix presents only total budget expenditures by function and subfunction, and hence omits the break-down heretofore given between gross expenditures of general and special accounts, and net expenditures from the checking accounts of wholly owned Government corporations and credit agencies with the United States Treasurer.

APPENDIX 1

ANALYSIS OF THE PUBLIC DEBT

Issues	OUTSTANDING PUBLIC DEBT	
	June 30, 1946	June 30, 1947
Interest-bearing debt:		
Public issues:		
Marketable obligations:		
Prewar bonds (World War I), including postal savings bonds	$179,519,580.00	$165,696,460.00
Treasury bonds	119,322,903,950.00	119,322,882,950.00
Treasury notes: Regular series	18,260,793,000.00	8,142,235,000.00
Certificates of indebtedness	34,803,825,000.00	25,295,970,000.00
Treasury bills	17,038,939,000.00	15,774,960,000.00
Nonmarketable obligations:		
Armed forces leave bonds		1,792,972,450.00
Depositary bonds	426,851,000.00	325,426,000.00
United States Savings bonds	49,034,697,588.45	51,366,729,479.10
Treasury savings notes	6,711,499,100.00	5,560,079,700.00
Total, public issues	245,779,028,218.45	227,746,952,039.10
Special issues:		
Treasury notes:		
Alaska Railroad retirement fund	2,360,000.00	2,680,000.00
Canal Zone, Postal Savings System	3,500,000.00	3,500,000.00
Canal Zone retirement fund	11,325,000.00	12,257,000.00
Civil service retirement fund	2,155,034,000.00	2,435,238,000.00
Federal Deposit Insurance Corporation	120,000,000.00	408,000,000.00
Federal old-age and survivors insurance trust fund	2,509,400,000.00	1,109,000,000.00
Federal Savings and Loan Insurance Corporation	48,962,000.00	62,212,000.00
Foreign Service retirement fund	8,678,000.00	9,638,000.00
Government life insurance fund	2,400,000.00	
Mutual mortgage insurance fund		14,500,000.00
National service life insurance fund	5,239,685,000.00	6,473,685,000.00
Postal Savings System	779,000,000.00	1,624,000,000.00
Railroad retirement account	657,000,000.00	805,500,000.00
War housing insurance fund		3,000,000.00
Certificates of indebtedness:		
Adjusted-service certificate fund	12,500,000.00	12,250,000.00
Federal old-age and survivors insurance trust fund	3,401,000,000.00	5,995,000,000.00
Government life insurance fund	682,000,000.00	1,254,000,000.00
Unemployment trust fund	6,699,000,000.00	7,142,000,000.00
Total, special issues	22,331,844,000.00	27,366,460,000.00
Total, interest-bearing debt	268,110,872,218.45	255,113,412,039.10
Non-interest-bearing debt:		
Public issues:		
Matured debt on which interest has ceased (payable on presentation)	376,406,860.26	230,913,535.76
Debt bearing no interest (payable on presentation):		
Special notes of the United States: [1]		
International Bank for Reconstruction and Development series		415,785,000.00
International monetary fund series		1,724,000,000.00
United States notes, less gold reserve	190,641,585.07	190,641,585.07
National and Federal Reserve bank notes assumed by the United States on deposit of lawful money for their retirement	584,457,485.50	516,765,561.50
Other [2]	159,721,023.98	94,865,387.24
Total, non-interest-bearing debt	1,311,226,954.81	3,172,971,069.57
Total, public debt on basis of Treasury daily statement	269,422,099,173.26	258,286,383,108.67

[1] Issued under the provisions of the Bretton Woods Agreements Act, approved July 31, 1945, and under the authority and subject to the provisions of the Second Liberty Bond Act, as amended. The notes are nonnegotiable, bear no interest, and are payable on demand.

[2] Includes excess-profits-tax refund bonds amounting to $57,995,648.75 on June 30, 1946, and to $19,185,739.72 on June 30, 1947.

AUTHORIZED AND OUTSTANDING BONDS, DEBENTURES, AND NOTES GUARANTEED BY THE UNITED STATES, JUNE 30, 1947

Issuing agency	Authorized	Principal outstanding		
		Total	Held by Treasury	Held by others
Commodity Credit Corporation (see 1 above)	$4,750,000,000	$550,330,020.90	$510,000,000.00	[2] $40,330,020.90
Export-Import Bank of Washington	2,500,000,000	516,200,000.00	516,200,000.00	
Federal Farm Mortgage Corporation (see 2 above)	2,000,000,000	23,425,000.00	21,000,000.00	2,425,000.00
Federal Housing Administration (see 3 above)	[8]	38,210,236.23		38,210,236.23
Public Housing Administration (see 4 above)	[9] 800,000,000	347,002,000.00	347,000,000.00	2,000.00
Home Owners' Loan Corporation (see 5 above)	[9] 4,750,000,000	532,877,900.00	529,000,000.00	[3] 3,877,900.00
Reconstruction Finance Corporation (see 6 above)	[10]	9,966,143,850.39	9,966,140,850.39	3,000.00
Tennessee Valley Authority (see 7 and 10 above)	[11] 61,500,000	56,500,000.00	56,500,000.00	
U. S. Maritime Commission (see 8 above)	[12]			
Total		12,030,689,007.52	11,945,840,850.39	84,848,157.13

[1] Excludes bonds, notes, and debentures held by the Treasury and reflected in the public debt.

[2] Represents balances of outstanding obligations as of June 30, 1947, on account of drafts and invoices paid by commercial banks for the account of the Commodity Credit Corporation.

[3] Includes $15,250 in transit for redemption.

[4] Funds have been deposited with the Treasurer of the United States for the payment of outstanding matured principal and interest guaranteed by the United States.

[5] The contingent liability for notes due depositors, together with accounts payable amounting to $24,375,810.05 of the Postal Savings System, are offset by the following assets: Cash in designated depository banks amounting to $5,561,323.09, which is secured by the pledge of collateral as provided in regulations of the Postal Savings System, having a face value of $5,845,450; cash in possession of the System amounting to $197,991,294.49; Government securities with a face value of $3,303,016,290; and other assets of $16,893,373.39.

[6] Offset by cash on hand and in depository banks amounting to $387,684.52, Government securities with a face value of $9,850,000, and other assets.

[7] In actual circulation, exclusive of $709,924,021.92, redemption fund deposited in the Treasury, and $626,377,165 of Federal Reserve notes held by the issuing banks. The collateral security for Federal Reserve notes issued consists of $11,998,000,000 in gold certificates and in credits with the Treasurer of the United States payable in gold certificates, $13,571,498,000 face amount of U. S. Government securities, and $33,762,000 face amount of commercial paper.

[8] Although there is no specific statutory limitation on the amount of debentures which may be issued or outstanding, limitations are provided by the National Housing Act, as amended, on the amount of insurance under the titles of that act out of which these debenture issues arise, namely, title II, mutual mortgage and rental housing insurance, and title VI, war and veterans' emergency housing insurance. The title II limitation provides that the aggregate amount of principal obligations of all mortgages insured under this title and outstanding at any one time shall not exceed $4,000,000,000, which may be increased with the approval of the President to $5,000,000,000. The title VI limitation provides that the aggregate amount of principal obligations of all mortgages insured under this title shall not exceed $4,000,000,000, except that, with the approval of the President, such aggregate amount may be increased to not exceeding $4,200,000,000. Repair and modernization insurance under title I, claims in connection with which are paid in cash, is subject to the limitation that the total liability which may be outstanding at any one time, plus the amount of claims paid in respect of all insurance granted under title I, less the amount collected from insurance premiums and other sources and deposited in the Treasury may not exceed an aggregate of $165,000,000.

[9] The amount shown is the aggregate amount which may be issued. The Home Owners' Loan Corporation is in liquidation.

[10] Public Law 132, approved June 30, 1947, rescinded the several individual grants of authority to borrow from the Secretary of the Treasury and instead provides that the Corporation "may issue to the Secretary of the Treasury its notes, debentures, bonds, or other such obligations in an amount outstanding at any one time sufficient to enable the Corporation to carry out its functions under this act or any other provision of law." Section 4 (c) provides that "the total amount of investments, loans, purchases, and commitments made pursuant to this section 4 shall not exceed $2,000,000,000 outstanding at any one time."

[11] Authorized under sec. 15c of act approved May 18, 1933 (48 Stat. 58), as amended by act approved July 26, 1939 (53 Stat. 1083). The amount shown is the aggregate amount which may be issued.

[12] The Commission is authorized to make commitments not exceeding $200,000,000 for the purpose of insuring ship mortgages under title XI of the Merchant Marine Act approved June 29, 1936 (49 Stat. 1985), as amended by act approved June 23, 1938 (52 Stat. 969).
